The Board is not satisfied that such a complete reversal has taken place. The most that can be said is that there are some indications that the bottom of the depression has been reached and it has not been established before this Board that any change has taken place so far as the company is concerned that relieves it from the difficulties under which it is operating. We do hope that a marked improvement for the better may soon manifest itself in increased revenue to the company, but until that time does come the company has to grapple with the actual facts and conditions confronting them.

The company has stated that it would have been justified in asking an additional 10 per cent reduction when the former agreement was said to have been terminated on the 28th February last. In our opinion, there is something to be said in support of the company's contention, but, weighing the probabilities of better conditions with the fact that the actual earning power of this group that we have to deal with is low, we do feel that according to the merits and substantial justice of the case, a deduction of 5 per cent, making a total deduction of 15 per cent, qualified as hereunder, is justified and we recommend accordingly.

The Board is of opinion that the parties should enter into an agreement for the term of one year commencing on a date in November during the present pay period, to be by them fixed, that such agreement should provide, in general, for a fifteen per cent deduction from the existing basic rates, but so that the application of the 5 per cent deduction additional to the existing 10 per cent deduction shall not operate further to reduce the earnings of stores employees at points where their working hours are governed

by shop hours which do not exceed 80 hours per month, and so that the deduction of 15 per cent shall apply only when shops are worked twelve days or more per month. The agreement should provide—

- (a) that it shall not be so applied as to bring about any increases to employees from their present rate of compensation in the positions they now occupy;
- (b) that for those employees who, on account of reductions of staff, have exercised their seniority to lower rated positions than those which they previously regularly occupied, involving a decrease in their rates of pay of \$13.12 or more per month, the 15 per cent reduction in compensation will not be applied to an extent so as to bring such employees occupying clerical positions below a minimum rate of \$87.50 per month;
- (c) that for those employees in the group covering positions such as messengers, callboys, etc., who, on account of reduction in staff, have exercised seniority to lower positions than those they regularly occupied in the group, involving a decrease of \$13.12 or more per month, the 15 per cent deduction in compensation will not be applied so as to bring the compensation of such positions below a minimum of \$45 per month;
- (d) that for those employees who occupied regularly positions in the group for which a minimum of \$87.50 is provided in the existing agreement but who, on account of reduction of staff, have exercised their seniority into lower rated classes for which the agreed basic minimum rate is \$45 per month, the 15 per cent reduction in compensation will not be so applied as to bring their total reduction in compensation from the rates received in positions regularly occupied in the higher class group to the positions they now occupy in the lower class group beyond a maximum of \$25 per month; and
- (e) that the suggested further deduction of 5 per cent in so far as applicable be put into effect during the present pay period.

All of which is respectfully submitted.

Dated at Montreal this eighth day of November, 1933.

(Sgd.) W. F. O'CONNOR,  
(Sgd.) G. S. CURRIE.

## ARBITRATION OF COAL MINING DISPUTE AT NACMINE, ALBERTA

A DISPUTE having arisen in the mine of the Thomas Coal Company at Nacmine, Alberta, regarding the rate of wages to be paid under a new method of work and also the applicability of the agreement rate for certain work, the employer and the union representing the employees requested the Minister of Labour to appoint an independent chairman to arbitrate in the case.

The agreement between the company and District 18 of the United Mine Workers of America, as for many years past as in the case of many other coal mines in Alberta, provides:—

"In the event of the failure of the Pit Committee and the Mine Management to settle any

dispute so referred to them the matter in dispute shall be referred to the Mine Management and one or more District Officers of the U.M.W. of A., District No. 18, who shall endeavour to settle the dispute as speedily as possible. In the event of their failure to agree, they shall endeavour to select an independent chairman, and failing to agree upon an independent chairman, shall ask the Minister of Labour to appoint such chairman, whose decision shall be final and binding on both parties."

On November 3, Mr. Norman Fraser, Edmonton, Alberta, was named by the minister as independent chairman.

Two previous cases in which an arbitrator was appointed by the Minister of Labour were reported in the *LABOUR GAZETTE*, January, 1925, page 18.

## CANADIAN NATIONAL RAILWAYS EMPLOYEES' BOARD OF ADJUSTMENT No. 2

### Summary of Recent Decisions

REPORTS have been received of eight cases recently settled by the Canadian National Railways Employees' Board of Adjustment No. 2. Outlines of previous cases were given in the *LABOUR GAZETTE*, August, 1933, page 763, and in previous issues. The issue of August, 1930, contained a general summary of the proceedings of the Board, covering the period from January 1, 1928 to December 31, 1929; and a similar summary of proceedings from September 1, 1925, the date of the inception of the Board, to December 31, 1927, appeared in the issue of October, 1928, page 1060. The text of the memorandum of the agreement made between the railways and the employees concerned for the establishment of the Board was given in these summaries.

The Canadian National Railways Employees' Board of Adjustment No. 2 was established for the purpose of disposing of outstanding grievances or disputes that might arise from the application, non-application or interpretation of the schedule of working conditions for "Clerks and Other Classes of Employees as herein named," which are not adjusted between the officers of the railway and the representatives of the employees. The members of the Board are appointed for a term of one year, subject to reappointment. The Board is composed of four members selected by the management and four members selected by the representatives of the employees concerned. The decisions of the

Board are binding upon the parties to the agreement. Provision was made in the agreement constituting the Board for the appointment of an arbitrator in any case in which the Board might be unable to agree upon an award.

#### Case No. 123—Sleeping, Dining and Parlour Car Department (Atlantic Region)

A sleeping car conductor at Halifax was dismissed for cause during the month of July, 1928, and after being out of service for a period of more than four years, was reinstated by the management with full seniority rights dating from July 17, 1893, without an agreement having first been reached with the general chairman of the Employees' Committee as provided for in Article 2 Rule (e) of the Schedule. The employees protested against the management's disregard of the schedule, particularly as they were not disposed to agree, under any circumstances, to the reinstatement of this man with full seniority rights, and asked that he be removed from the service.

The claim of the employees was sustained by the Board.

#### Case No. 127—Operating Department (Central Region)

A relief despatcher was continuously employed in monthly rated positions in the Mechanical Department, Southern Ontario

District, from January 1, 1924, to October 31, 1932, when he was laid off on account of reduction in staff. On December 16, 1932, he exercised his seniority rights to position of relief despatcher and call boy at Toronto Roundhouse and was continuously employed in that position since that date. After starting on his vacation on June 26, 1933, he was informed that he would not be allowed his vacation with pay. The employees submitted, under Article 14—Rule (a) of the Schedule for Clerks and Other Classes of Employees, that this man, having once qualified for vacation, was entitled to his two weeks' vacation with pay in 1933.

The management cited Article 14, Rule (a) of the Schedule for Clerks, etc., which provides that monthly rated employees will be allowed vacation with pay for twelve working days, provided they have had at the beginning of the calendar year at least one year's continuous service with the Railways in any monthly rated position. The management stated that the complainant had been permitted to start a vacation through an error, and that he had been recalled to duty. They contended that he could not, under the circumstances, be considered to have had one year's continuous service at the beginning of the calendar year, and that he was not entitled to a vacation in the year.

The Board sustained the employees' claim to the extent that he be allowed ten days vacation with pay in 1933.

#### **Case No. 128—Operating Department (Central Region)**

An employee entered the service of the Auditor of Freight Accounts' Office, Accounting Department, Montreal, as a clerk, on May 1, 1916, and was continuously employed in that office until May 17, 1917, when he transferred to the Car Shops at Montreal, starting to work at the car shops, Montreal, the following morning, May 18, 1917. Since May 18, 1917, he was continuously employed as a clerk in the Car Department.

The Accounting Department having recorded the complainant as resigning on May 17, 1917, the management allowed him seniority only from the date he started to work in the car shops, May 18, 1917. However, the Staff Record Committee, having examined his service record, allowed him continuity of service from May 1, 1916. The complainant then applied to have his seniority corrected accordingly, but this claim was declined by the management. The employees contended that the complainant was transferred from the Accounting Department to the

Car Shops at Montreal prior to the effective date of the first schedule negotiated for clerical forces on the former Grand Trunk Railway; therefore, as there was no rule to prevent him from transferring from one department to another with his seniority, they submitted that under Article 3,—Rule (b) of the present schedule he was entitled to seniority date of May 1, 1916.

On the other hand the management claimed that the service performed by the complainant from May 1, 1916, to May 17, 1917, was in an entirely different group, and that no transfer was made to the car department as provided for by the Railway Employees' schedule. The management contended further that if this man's claim to be given his full seniority from the date he entered the service were granted it would be establishing a precedent which would not be in the best interests of the employees in general. "We have many employees who have spent years in the service of the Railway and who have left the various seniority groups to enter other seniority groups where they felt they could better themselves, but we have not allowed them to carry their full seniority unless the transfer was made according to schedule."

The claim of the employees was sustained by the Board.

#### **Case No. 129—Operating Department (Central Region)**

Several positions were abolished at Union Station, Ottawa, as from May 1, 1932, a number of employees being laid off. Among these was a ticket examiner, who endeavoured to exercise his seniority, under Article 3, Rule (k) of the schedule, to the position of constable held by a junior employee. The management refused him the right to do so. The employees claimed that the applicant was qualified to perform all the duties of a constable. The management, explaining its action, stated that "the duties of Constables are such that a careful selection must be made in choosing men to fill those positions, and the incumbents must have sufficient training and experience in this branch of the service to be qualified for the position, as they are frequently called upon to act in conjunction with the City Police. They have to be clothed with police authority in order to carry out their duties satisfactorily, and it is the contention of the Company that while these Constables are covered by the C.B. of R.E. Schedule, it was not the intent that positions of this sort be subject to displacement, resulting in additional expense to the Company and numerous changes being made.

Further, the employees who desire to displace these Constables have had no experience in this line of work, and must have the necessary physical qualifications for such a position."

The claim of the employees was sustained by the Board.

#### **Case No. 130—Operating Department (Atlantic Region)**

A stationary fireman at Campbellton was laid off in June, 1923, owing to a reduction in staff, for a period exceeding eight months, after which he was re-employed without loss of seniority. The employees pointed out that the schedule in effect at that time provided that employees out of service for six months would lose their seniority rights, and they contended that this man's seniority should date from the time of his re-employment. The management stated that several efforts had been made by the employees on other grounds to have the man displaced from his employment and claimed that the objection now put forward should not be considered, after a lapse of twelve years, and also owing to the further fact that subsequent schedules allowed employees, laid off in staff reductions, to retain seniority for twelve months, and that employees covered by the Clerks' Schedule so laid off since January 1, 1930, are, by mutual agreement with the General Chairman of Clerks and Other Classes of Employees, still carried on the seniority list.

The claim of the employees was sustained by the Board.

#### **Case No. 131—Operating Department (Atlantic Region)**

This case also concerned the seniority status of a stationary fireman at Campbellton who had been laid off in 1921 for a period exceeding six months, and re-employed, the employees contending that the rule governing seniority should have been observed. As in Case No. 130, the management contended that the question should not be raised after an interval of twelve years.

The claim of the employees was sustained by the Board.

#### **Case No. 133—Sleeping, Dining and Parlour Car Department, Toronto**

Fifteen compartment, observation, library and buffet car porters on Trains 1 and 2, between Toronto and Vancouver, claimed for expenses incurred during stop-overs at Winnipeg, in the summer of 1932. The stop at Winnipeg was for 14 and 10 hours for these trains respectively. In July, 1932, the Rail-

ways issued a bulletin requiring porters to stand by their cars during these stop-overs. The employees contended that these men were required temporarily to perform duties away from the home terminal and were entitled under Article 9 Rules (a) and (d) to be reimbursed for expenses incurred for meals during the stop-overs.

The management pointed out that the order to stand by the cars only applied "when through space was sold in these cars in either direction," and that the order was one of the conditions of service that had been accepted by the car porters in bidding for the run. In actual practice it was found that through passengers did not stay on their cars during the layover, and that the baggage was locked up, so that the porters were not held with their cars during the stop-over period. The management claimed further that while Article 9 provides that employees while on duty on trains having dining cars are to be served meals, free on such cars, there was no dining car attached to the cars in question during the layover. Moreover the porters were not "temporarily performing duties away from their home terminal," but were performing part of their regular duties, so that Rule (d) could not be applied in this case.

The claim of the employees was denied by the Board.

#### **Case No. 135—Sleeping, Dining and Parlour Car Department, Montreal District**

Buffet car employees in Montreal District asked for the assignment of three crews to the buffet cars on trains between Montreal and Portland, a buffet porter and cook to each car. Prior to June 25, 1933, three crews were used, but after that date two buffet car crews of one man each were assigned to this run. The employees pointed out that these crews were on duty 10 hours and 55 minutes one direction, and 11 hours and 20 minutes in the other. These long hours, they claimed, were not in accordance with the intention of Article 4, Rule (c) of the schedule, while under Article 15, Rule (b), subsection 3, the crew of each buffet parlour car should consist of two men, a buffet porter and a cook.

The management pointed out that the present schedule of 1927 (Article 4, clause A, item 22) provided for two crews on this run during the summer season. As to the claim in regard to two men being used, they claimed that Rule (b) was qualified by a clause which states that "under normal conditions" the crew shall consist of two men; whereas the

actual business on this run was far below normal. Moreover, Article 4, Rule (c), cited by the employees, applied in the opinion of the management only to the assignment of

employees to summer runs not already covered in Article 4.

The claim of the employees was denied by the Board.

## STRIKES AND LOCKOUTS IN CANADA DURING OCTOBER, 1933

THE following table shows the number of disputes, workers involved and time loss for October, 1933, as compared with the previous month and the same month a year ago.

| Date           | Number of disputes | Number of employees involved | Time loss in working days |
|----------------|--------------------|------------------------------|---------------------------|
| *Oct., 1933..  | 14                 | 1,108                        | 19,203                    |
| *Sept., 1933.. | 23                 | 6,991                        | 39,194                    |
| Oct., 1932...  | 16                 | 2,388                        | 9,554                     |

\* Preliminary figures.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

The number of strikes and lockouts recorded for October was substantially lower than that shown for September, the number of workers involved and the time loss incurred showing a similar decline. As compared with October, 1932, a slight decrease appeared in the number of strikes recorded and in the number of workers involved, while the time loss incurred was almost twice as great as that recorded for the same month last year, due largely to a dispute involving six hundred furniture factory workers at Stratford, Ont., which caused a time loss of over 14,000 working days in October, 1933.

Five disputes, involving 721 workers, were carried over from September, the strike of shoe factory workers in Toronto, Ont., commencing September 1, 1933, shown as un-terminated in the October issue of the LABOUR GAZETTE, later being reported to have terminated on September 9. Nine disputes com-

menced during October. Of these fourteen disputes, twelve terminated during the month, six being in favour of the workers involved, four in favour of the employers concerned, while compromise settlements were reached in two cases. At the end of October, therefore, there were two disputes in progress recorded as strikes or lockouts, namely: furniture factory workers, Stratford, Ont., and poultry dressers, etc., Stratford, Ont.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected, but which the unions concerned have not declared terminated. Information is available as to seven such disputes, namely: photo engravers, Toronto, Ont., commencing March 23, 1931, one employer; photo engravers, Toronto and London, Ont., Montreal and Quebec, P.Q., and Winnipeg, Man., May 4, 1931, one employer; motion picture projectionists, Winnipeg, Man., February 28, 1932, one employer; motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; lithographers, Toronto, Ont., April 15, 1932, one employer; motion picture projectionists, Saint John, N.B., March 6, 1933, one employer; and compositors, Winnipeg, Man., March 13, 1933, one employer.

Disputes involving men on unemployment relief work, who are not paid wages but receive subsistence for which work is performed or may be required, are not included in the record, as no relation of employer and employee is involved.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

SHOE FACTORY WORKERS, TORONTO, ONT.—In connection with the dispute of shoe factory workers in Toronto, Ont., reported as un-terminated in the October issue of the LABOUR GAZETTE, information was later received that a settlement had been reached on September 9. A number of the employees had been replaced and no written agreement was signed, but it is stated that the employees, who had demanded increases ranging from twenty per cent to thirty per cent, returned at wage rates approximately five per cent higher than those in force prior to the dispute.

LEATHER GOODS WORKERS, TORONTO, ONT.—The employer involved in this dispute, which commenced on August 18, for adjustment of wages, a forty-four hour week and recognition of the Toronto Leather Goods Workers' Union, was on October 12 refused an interim injunction restraining members of the union from picketing the establishment. It was later reported by the union that the strike was considered to have lapsed by October 31, and it has consequently been recorded as terminated from that date.

WOMEN'S CLOTHING FACTORY WORKERS (DRESSMAKERS), MONTREAL, P.Q.—The workers involved in this dispute, which commenced September 18, against the discharge of one worker, were replaced by the employer, and as the establishment was reported to be operating early in October the dispute, therefore, is recorded as lapsed by the end of the month.

FURNITURE FACTORY WORKERS, STRATFORD, ONT.—This dispute, commencing on September 14, to secure increases in wages, reductions in hours and union recognition, was terminated at the end of the month. On Octo-

ber 12, the factories reopened but only a small number of employees reported for work. Foremen were struck with missiles, tomatoes, etc., thrown by pickets, and one of these was arrested on a charge of disorderly conduct. On October 16 the provincial government appointed a special investigator to deal with the dispute but no settlement was reached at the time. A settlement was reached in one factory on October 19, 1933, affecting ninety employees, an agreement being signed between the management and a shop committee representing the union members. This provided for certain minimum wage rates and certain increases, and the forty-four hour week subject to certain exceptions. Early in November a settlement was reached in the other five factories between the shop committees and the various employers, work being resumed on November 6, 1933, in four and on November 9 in the other. These agreements provided for wage scales as negotiated on the basis of ten per cent increases, the 44 to 50-hour week, and recognition of shop committees. The agreements are summarized elsewhere in this issue. The detachment of mili-

\*In this table the date of commencement is that on which time loss first occurred, and the date of termination is the last day on which working time was lost to an appreciable extent.

tary forces sent to the city at the end of September were then withdrawn.

POULTRY DRESSERS, ETC., STRATFORD, ONT.—This dispute, which commenced on September 21, 1933, a wage increase being demanded, was terminated at the end of the month. During October the plant was closed, but toward the end of the month the management proposed a settlement, involving the establishment of a plant committee consisting of an equal number of representatives of the workers and of the management, an increase in wages of ten per cent to be made if the committee so recommended. On November 3 some em-

ployees returned, and later this offer was accepted, the remaining strikers resuming work next day. The wage increase was then put into effect.

RESTAURANT EMPLOYEES, VANCOUVER, B.C.—The dispute involving waiters, waitresses, etc., employed by one firm in Vancouver, which commenced on August 1, to enforce a demand for increased wages, is recorded as terminated, the union having reported that all strike activity had ceased by the end of October, the restaurant, however, being declared unfair to organized labour.

**COAL MINERS, JOGGINS, N.S.**—Coal miners employed in one colliery ceased work on October 12, against non-payment of wages. After one day work was resumed but the employees again ceased work from the eighteenth to the thirty-first. Arrangements were made for payment of arrears and an agreement was signed providing for union recognition.

**HOSIERY FACTORY WORKERS, HAMILTON, ONT.**—Knitters and toppers employed in a full-fashioned hosiery manufacturing establishment in Hamilton, Ont., ceased work on October 2, 1933, to enforce a demand for an increase of eighteen per cent in piece work rates and a reduction in the number of hours worked per week. Negotiations between representatives of the parties concerned resulted in the workers agreeing to accept an increase of approximately ten per cent, with a reduction from sixty-three to sixty hours per week for the night shift, the day shift to continue to work fifty-five hours per week. Work was resumed on October 3 under the above conditions.

**KNITTING FACTORY WORKERS, TORONTO, ONT.**—Three disputes involving knitting factory workers in Toronto, Ont., are reported to have occurred during October, the majority of the strikers in each case being members of the Textile Workers' Union affiliated with the Workers' Unity League. On October 10, twenty-five operators, cutters, knitters, etc., in one establishment ceased work, demanding increases between ten and fifteen per cent in piece rates and recognition of the union shop committee. Negotiations between the representatives of the parties involved resulted in the resumption of work on October 12, 1933, the employer having agreed to pay the increased rates and to recognize a shop committee elected by all his employees.

On October 12, 1933, twenty-five knitters, operators, etc., employed in a second establishment ceased work demanding increased rates of wages and recognition of the union shop committee. A settlement was reached the next day providing for the increased rates and work was resumed the following day.

In the third case it is reported that a demand was made for a ten per cent increase for knitters, with a forty-four hour week and recognition of a union shop committee, the employees ceasing work on October 17, 1933. On October 24 work was resumed, the workers having secured a five per cent increase, a forty-four hour week and recognition of their shop committee.

**TEXTILE FACTORY WORKERS, HAMILTON, ONT.**—Sixty to seventy employees in the weaving

and rubber departments of one textile manufacturing factory in Hamilton, Ont., on October 14 ceased work to secure a twenty per cent increase in wage rates. A grievance as to overtime was also reported. On October 16 it is reported the entire staff of the factory, some two hundred workers, were given a ten per cent increase. The strikers, however, remained firm in their demand for twenty per cent until October 17, when they agreed to accept the general ten per cent increase, with some other concessions.

**PICTURE FRAMERS, ETC., TORONTO, ONT.**—This dispute commenced on October 6 when one hundred employees of one picture framing and art company in Toronto, Ont., ceased work demanding an increase in wages and a reduction in hours. The factory was picketed by members of the Chesterfield and Furniture Workers' Industrial Union, and on October 10 three of the pickets were arrested in connection with a disturbance when the employer attempted to reopen the factory with new workers. On October 16, however, work was resumed, an agreement having been reached providing for a minimum wage of \$12.50 per week for women, a reduction in hours from fifty-two to forty-eight per week, recognition of the union, time and one-quarter for overtime and wage increases said to range from fifteen per cent to fifty per cent.

**TEAMSTERS AND TRUCK DRIVERS, WINNIPEG, MAN.**—One lumber and fuel company in Winnipeg was affected by this dispute, which commenced on October 23 when six teamsters and truck drivers ceased work demanding an increase in wages from twenty-five cents per hour to thirty-five cents, with recognition of a shop committee of employees who were members of a union affiliated with the Workers' Unity League. A further demand for the reinstatement of one worker who had been discharged the day the strike commenced was also made. Work was resumed on October 25, however, the employer having agreed to the strikers' demands.

**CIVIC LABOURERS, PRESTON, ONT.**—Forty-one part-time labourers employed by the municipality of Preston, Ont., ceased work on October 26 in protest against the rate of thirty cents per hour paid by the town council and delay on the part of the council to consider the grievances of the men. Work was resumed on October 30, however, with no change in conditions pending further consideration by the council of the demands set forth by the workers.

## STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the *LABOUR GAZETTE* from month to month, bringing down to date that given in the issue of February, 1933, in the review of Strikes and Lockouts in Canada and Other Countries, 1932. The latter review included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the latest figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible directly from the government publications of the various countries concerned, while information as to particular disputes is obtained for the most part from newspaper reports.

### Great Britain

The number of disputes beginning in September was 31, and 13 were still in progress from the previous month, making a total of 44 disputes in progress during the month, involving 11,700 workers with a time loss of 70,000 working days for the month. Of the 31 disputes beginning in September, 6 were over proposed reductions in wages, 9 on other wage questions, 9 over questions respecting the employment of particular classes or persons, 3 over questions respecting working arrangements and 4 on questions of trade union principle. Settlements were reached during the month in 30 disputes, of which 9 were in favour of workers, 10 in favour of employers and 11 were settled by compromises. In 4 other disputes, work was resumed pending negotiations.

### United States

The number of disputes beginning in August was 152 and 133 were in effect at the end of the month. The number of workers involved in disputes in effect at the end of the month was 83,483 and the time loss for the month 2,377,886 working days.

The strike of bituminous coal miners in Western Pennsylvania employed at mines which are controlled by and operated for the use of steel manufacturers, which was noted in the last issue of the *LABOUR GAZETTE*, was terminated at the beginning of November through the direct mediation of the President of the United States and officials of the

National Recovery Administration. Under the settlement reached, employers agreed to the check-off, that is that employers would deduct union dues, assessments, etc. from the pay of union members and give such money over to the union concerned. The employers however retained the right to deal only with elected representatives of their employees, and not directly with the union representatives as such. The minimum wage under the agreement is \$4.36 per day. Conditions were to be much the same as provided in the general agreement for commercial mines until the elected representatives of the employees meet the employers and draw up an agreement especially for these mines.

The strike of between 5,000 and 10,000 steel mill workers at Weirton, West Virginia, over the question of union recognition was settled October 16, through the mediation of the National Labour Board, when it was agreed that elected representatives of employees should meet the employers to draw up an agreement and any dispute arising in connection with the agreement should be submitted to the National Labour Board for decision.

The strike of tool and die makers employed in the automobile manufacturing industry in Michigan, which was reported in the last issue of the *LABOUR GAZETTE*, continued during October and no report of any settlement has been noted.

Strikes in the silk manufacturing industry at Paterson, New Jersey, and neighbouring centres were noted in the last two issues of the *LABOUR GAZETTE*. Settlements were reached during October for the silk dyeing branch and the jacquard branch of the industry, but broadsilk workers were still on strike at the end of October.

The Commissioners of the General Hospital at Saint John, New Brunswick, are giving favourable consideration to a proposed system of voluntary contribution for hospital insurance. Dr. R. S. D. Hewitt, general superintendent recently outlined a plan to have small payments made regularly as a hospital insurance entitling the contributor to hospital care when necessary. He noted that such a system had worked out well in England. It can only be carried out, he stated, when a considerable group is contributing. It was arranged to hold a special meeting shortly to go into the proposed scheme more fully.

## COMBINES INVESTIGATION ACT

### Prosecution of Alleged Coal Combine in Province of Quebec

HEARINGS in the trial of six coal companies charged with violations of the Combines Investigation Act and Section 498 of the Criminal Code were concluded at the city of Quebec on November 9 before Mr. Justice Laliberté, who reserved judgment to December 12.

The appointment of Mr. L. S. St. Laurent, K.C., by Premier L. A. Taschereau, to conduct prosecutions against members of the alleged combine, comprising the principal importers of British anthracite coal in the province of Quebec, was reported in the *LABOUR GAZETTE*, July, 1933, p. 687. Proceedings against the companies charged by the Crown were commenced in the Court of Sessions at Quebec in July. In August the cases were transferred to a special session of the Court of King's Bench called for September 11 to deal exclusively with the coal combine case. On September 19 all eleven firms entered pleas of "not guilty." A separate trial for the five companies not connected with Canadian Import Company, Limited, was granted, and an adjournment to October 10 was allowed to permit the defence to bring from Great Britain

as witnesses Sir Alfred Cope, managing director of Amalgamated Anthracite Collieries, Limited, and R. O. Piercey, managing director of the T. T. Pascoe Company, of Swansea, Wales. The charges in the indictment against each of the eleven companies relate to arrangements to fix and enhance prices of coal and coke to the detriment of the public and to lessen unduly competition in the sale of these fuels in the cities of Montreal and Quebec and elsewhere in the province.

The six companies whose trial has been concluded are The Canadian Import Company; The Canadian Import Company, Limited; St. Lawrence Stevedoring Company, Limited; British Coal Corporation, Limited; F. P. Weaver Coal Company, Limited; and The F. P. Weaver Coal Company, Limited. The six defendants were tried without a jury. The first four were represented by Aime Geoffrion, K.C., and Lucien Moraud, K.C., and Hon. Lucien Cannon, K.C., acted as counsel for the two Weaver companies.

The trial of the five other companies alleged to be members of the combine has been set by the Court to commence on December 21.

---

## National Economic Council in Mexico

A Mexican Act which come into force on August 1, 1933, provides for the establishment of a National Economic Council, which will be an advisory organ of the Federal Executive and to which all proposals affecting the general economic life of the country must be submitted for examination. The duties of the Council will be the following: to advise on questions referred to it by the Federal Executive, to submit to the Executive any plans it considers necessary for the improvement of the economic and social condition of the country, and to undertake any enquiries which may be necessary for the fulfilment of these tasks.

The National Economic Council will include representatives of the local economic councils, which will have one representative for each district. In addition, the Council will comprise the following members: ten representatives of agriculture, nominated by the National Council of Agriculture; ten represent-

atives of the mining industries, five being employers and five workers; ten representatives of manufacturing industry, five being employers and five workers; ten representatives of commerce, five being employers and five workers; ten representatives of public utility undertakings, five being employers and five workers; five representatives of banks and subsidiary establishments; five representatives of the consuming public; and five representatives of the liberal professions. It will also include ten economic experts appointed by the Government and a Secretary appointed by the President of the Republic. The members will be appointed for a period of two years and a substitute shall be appointed for each member.

The Act contains detailed provisions relating to the procedure of appointment and the bodies which are to appoint the members. Every member must be a Mexican citizen in full enjoyment of civic rights, and must genuinely belong to the occupation he is to represent in the Council.

## INTERNATIONAL CONVENTION FOR THE SAFETY OF LIFE AT SEA

### Certain Vessels Exempted from Provisions of Canadian Act

THE provisions of the Safety of Life at Sea and Load Line Conventions Act, passed by the Parliament of the Dominion in 1931, were outlined in the *LABOUR GAZETTE*, September, 1931, page 981. That Act gave effect to the two international conventions mentioned in its title, to which conventions Canada had declared its adherence in the previous year (*LABOUR GAZETTE*, September, 1930, page 1001). The points covered by the Conventions include the sub-division of hulls of ships into water-tight compartments so arranged that in case of accident the flooding will be localized; the provision of a sufficient number of lifeboats with competent men to man them, life jackets and life saving appliances for all on board; the equipment of ships with radio apparatus; the maintenance of a North Atlantic patrol for the reporting of icebergs and the destruction of derelicts, and the safety of navigation generally; the marking of load lines on the sides of ships indicating the maximum depth to which they may be loaded; division of the world into zones and the fixing of the depth to which ships may be loaded when undertaking voyages to the various zones. The operation of the Conventions is limited to ships engaged in international ocean voyages. They do not apply to ships plying on the Great Lakes.

By an order published in the *Canada Gazette*, October 21, 1933, certain exemptions are made from the requirement of the Convention for the Safety of Life at Sea that ships are to be fitted with radiotelegraph installation. The following ships are exempted from this requirement:

1. *Passenger Ships*: (a) Passenger ships licensed to carry, or carrying less than 50 persons, including passengers and crew, provided such ships do not in the course of any voyage go more than 20 miles from the nearest land or more than 200 miles in the open sea between two consecutive ports. (b) passenger ships, other than the above, which are not compelled to carry radiotelegraph apparatus under the provisions of Section 7 of the Radiotelegraph Act, Revised Statutes of Canada, 1927, Chapter 95. (c) Passenger ships which make voyages entirely within the restricted areas specified in the Annex to Article 28, Chapter IV, Schedule 1, of the Safety of Life at Sea and Load Line Conventions Act, 1931.

2. *Cargo Ships*: (a) Cargo ships which in the course of their voyage do not go more than

150 miles from the nearest land. (b) Cargo ships (i) of less than 2,000 tons, gross tonnage, until January 1, 1938; (ii) of less than 1,600 tons, gross tonnage, on and after January 1, 1938.

3. *General*: (a) Barges in tow and existing sailing ships—For the purpose of this regulation, an existing sailing ship shall be considered as one the keel of which has been laid before the 1st July, 1931. (b) Ships of primitive build, such as dhows, junks, etc., if it is practically impossible to fit them with a radiotelegraph installation. (c) Ships which are not normally engaged on international voyages, but which, in exceptional circumstances, are required to undertake a single voyage of that kind.

*Watches*.—The following ships, registered in Canada, which are required to be fitted with a radiotelegraph installation, are exempted from the requirement of a continuous watch:—

1. *Passenger Ships*: All passenger ships from 3,000 to 5,500 tons, gross tonnage, both included, until January 1, 1934, provided that during the period of such exemption they shall maintain a watch of at least 8 hours per day.

2. *Cargo Ships*: (a) All cargo ships over 5,500 tons, gross tonnage, until January 1, 1934, provided that during the period of such exemption they shall maintain a watch of at least 8 hours per day. (b) All cargo ships from 5,500 to 8,000 tons, gross tonnage, until January 1, 1935, provided that during the period of such exemption from January 1, 1934, they shall maintain a watch of at least 16 hours per day.

An inquiry by the United States Bureau of Labour Statistics covering 91 per cent of all the co-operative credit societies in the United States showed a combined membership of 301,119 at the end of 1932. Share capital aggregated nearly \$22,000,000, and the combined assets of the societies in 23 States amounted to more than \$31,000,000. Nearly 16½ million dollars was granted to members in loans during the year, while over half a million was returned in dividends, by societies which reported on these points. As compared with 1929, although the number of societies nearly doubled, and the membership rose some 14 per cent, a decrease in share capital and business was shown.

## Rules governing the Public Service in Saskatchewan

Rules and regulations under the Public Service Act of Saskatchewan were given in the *Saskatchewan Gazette*, October 16, 1933. The Public Service is classified into four main groups with salary grades in each group. The four divisions and the commencing salary in each subdivision are as follows: (1) Administrative Division—junior administratives, \$2,400; associate executive, \$3,400; senior executive, \$4,500; (2) Professional Division—junior, \$1,500; intermediate, \$2,600; senior, \$4,200; (3) Clerical Division—junior, \$780; intermediate, \$1,200; senior, \$2,160; senior A, \$2,760; (4) General Division—junior, \$600; intermediate, \$1,440; senior, \$1,800.

Admissions to the service are by competitive examinations, and, unless otherwise stipulated, the minimum standards of efficiency required in all cases is 60 per cent of the maximum possible marks. Provision is made to grant a percentage bonus to candidates in cases where knowledge of special local conditions or previous experience in similar positions is a factor, such bonus to be exclusive of the percentage to which war veterans are entitled. Eligibility lists expire after one year's establishment except where the public interest may be served by their continuance. It is also provided that no person shall be eligible for appointment if two or more persons belonging to his family are already employed in the service.

Other sections of the regulations deal with temporary and seasonal employment, transfers, promotions, leaves of absence, working hours, allowances and compensation, etc. A feature of the last named section is the provision for overtime payment for work performed in cases of "unusual urgency" by employees receiving less than \$2,400 per annum. The scale of payment for overtime is 50 cents per hour for those receiving less than \$900 per

annum; 60 cents per hour for those between \$900 and \$1,200 per annum; 70 cents per hour for employees between \$1,200 and \$1,500 per year; and 75 cents per hour for those receiving between \$1,500 and \$2,400 per annum.

### Joint Council

The last section of the regulations refers to procedure respecting the Joint Council in the Saskatchewan Government Service (the establishment and provisions of the Joint Council were noted in the *LABOUR GAZETTE*, June, 1931, page 661). The voting regulations specify that the Public Service Commission shall establish four separate lists of employees on the permanent staff, such lists to comprise (a) employees in the mental hospitals, jails, and other similar institutions; (b) employees in or under the Liquor Board; (c) employees of the Department of Telephones and Telegraphs, and any other public utility branches of the public service; (d) employees in the remainder of the public service. Such lists are termed "The Electoral Lists," and are to be retained by the secretary of the commission, and shall be open to inspection. Only employees whose names are on any such lists shall be entitled to vote. Provision is made for the holding of the election under officers appointed by the Saskatchewan Government Service Association. Candidates are to be nominated in writing by three employees entitled to vote. If there be no nomination of candidates from any of the four divisions of the Public Service, then the executive of the Saskatchewan Government Service Association is empowered to make the necessary appointment in the particular division failing to make a nomination. Each voter is entitled to vote for two candidates.

## Co-operation in Saskatchewan in 1932-33

The report of the Commissioner of Co-operation and Markets of Saskatchewan for the twelve months ended April 30, 1933, has been published separately, being extracted from the annual report of the provincial Department of Agriculture for the same period. It describes the conditions in the industry as showing a marked improvement over the preceding year, and makes the following comments on conditions in the various co-operative organizations in the province.

"In spite of conditions which necessitated the continuation of the policy whereby the members of the Wheat Pool were given the

privilege of deciding whether to deliver their grain to a voluntary pool or sell at open market prices, it may be said that the Wheat Pool as a grain handling organization has held its own reasonably well, as is evident from the proportion of grain marketed through the Pool Elevators.

"The live stock industry in common with other branches of agriculture felt the effects of depressed prices and unfavourable markets. In spite of this situation, co-operative organizations associated with the live stock industry maintained their position rather well when conditions in general are considered.

"The Saskatchewan Egg and Poultry Pool experienced on the whole a satisfactory year. While the volume of eggs and live poultry handled showed a decrease, the volume of dressed poultry marketed increased by forty-one per cent over the previous year.

"While the operations of the Saskatchewan Dairy Co-operative Marketing Association showed that marketing of dairy products upon the co-operative plan can be conducted successfully and that there is scope for further development in this regard, the experience of the last few years suggests that careful consideration of all the factors involved should be given by producers interested before attempts are made to organize co-operative dairy marketing associations in other localities.

"Co-operative associations trading in carlot quantities and having a small overhead as compared with associations operating stores, showed satisfactory financial results on the average during the year under review.

"Co-operative stores encountered more difficulties, but the systematic efforts made by the directors to reduce expenses and credit trading are indicated in the reduced loss per store during 1932 as compared with the previous year. . . . On the whole, it may be said that the Co-operative Wholesale Society conducted a satisfactory business during the year under review.

"A number of trading associations were incorporated during the year, the majority of these selling gasoline and oils to their members.

"Generally speaking it may be said that interest in consumers' co-operation is being well maintained, which indicates increasing recognition of the significance of the movement to the present social and economic structure.

"During the year, the branch co-operated to the fullest possible extent with the various co-operative organizations in the province."

### Musical Instrument Industry in Canada

Statistics of the musical instrument industry in Canada for 1932 are given by the Dominion Bureau of Statistics in a new bulletin in the Census of Industry series. The report includes statistics relating to the production of musical instruments of every description, all materials and parts of same, gramophones and phonographs and accessories such as records, cabinets, etc. Reports were received from twenty establishments which were located as follows: Quebec four, Ontario fifteen and British Columbia one. These twenty factories represented a total capital investment of \$5,107,534. The total number of persons employed was 1,080 with a payroll amounting to \$993,941. The cost of materials used was \$1,141,198, whilst the value of production amounted to \$2,561,125 and the value added by manufacture \$1,419,927.

It is pointed out that the output of the musical instruments industry has been decreasing steadily during the past few years, the output of pianos, phonographs and phonograph records becoming smaller and smaller. The main product of this industry, viz., the radio, is now produced in the electrical apparatus industry. The output of these manufacturers, however, cannot be credited to this industry in view of the fact that electrical apparatus and not radios form their main products. Imports of musical instruments in 1932 were

valued at \$407,032 as compared with imports valued at \$800,525 in 1931, while exports were valued at \$57,315 in 1932 and \$206,076 in 1931.

At the recent annual meeting of the South Temiskaming Teachers' Institute, Mr. Frank Lendrum, chairman of the public school board at Cobalt, advocated the establishment of a minimum salary schedule for teachers in Ontario. Such a measure, he claimed, would protect teachers against members of their own profession who for various reasons were willing to accept lower salaries than their experience or living conditions warranted. He contended that school boards should not have authority legally to ask applicants for vacant positions to state the salary they would accept.

A commission on interstate compacts affecting labour and industries has been created by the State of Massachusetts as a step toward attaining greater co-operation between the various States in establishing more uniform labour laws. The commission is authorized to meet, with similar commissions formed in other States, for the purpose of drawing up a joint report to be submitted to the State legislatures. By such action it is hoped the labour laws will be made more uniform and the handicap placed upon States having more advanced laws regulating labour will be removed.

## AMERICAN FEDERATION OF LABOR

### Summary of Proceedings of the 53rd Convention

THE fifty-third annual convention of the American Federation of Labor was opened at Washington, D.C., on October 2, 1933, by Richard A. Dickson, president of Washington Central Labour Council. After the invocation by Right Reverend John J. McNamara, Auxiliary Bishop of Baltimore, Md., the chairman welcomed the delegates on behalf of organized labour of the city. Addresses followed from Mr. Luther H. Reichelderfer, president, board of commissioners of the District of Columbia; Hon. William H. King, United States Senator from Utah and chairman of the District of Columbia Committee of the United States Senate, and Hon. Thomas P. Littlepage, president of the Washington Chamber of Commerce. President William Green thanked the speakers for their welcome, and after declaring the convention open, briefly reviewed events of special interest to the workers and expressed labour's demand for: (a) the 30-hour week and higher wages in the fair practice codes established under the National Recovery Act to make jobs for over 11,000,000 jobless workers; (b) the restoration of pay of government employees; (c) a comprehensive program of social justice legislation.

The president then called for the report of the credential committee. This report showed 554 delegates present, representing 92 international and national unions, 4 departments, 32 state branches, 234 central bodies, 40 local trades and federal labour unions, and 4 fraternal delegates, one of whom represented the Trades and Labour Congress of Canada, two the British Trades Union Congress, and one the National Women's Trade Union League of America. In submitting the report the secretary of the committee stated that it was the largest convention of the American Federation of Labor on record.

*Executive Council's Report.*—The report of the executive dealt with the various activities of the Federation during the past fiscal year. A synopsis of the report as read by First Vice-president Duffy, dealt with the following subjects: National Recovery Act; unemployment; trade union benefits; national legislation; public schools; Pan-American Federation of Labour; the right to organize; convict labour; repeal of the Eighteenth Amendment; Geneva conference on shorter work-day; child labour amendment; minimum wage laws; and Puerto Rico.

*Report of Secretary.*—This report showed total revenues, including balance from the previous year, of \$826,368.87; expenditures amounted to \$424,236.07, leaving a balance as at September 1, 1933, of \$402,132.80, of which \$66,621.44 was in the general fund and \$333,511.36 in the defense fund. The decline in membership during the fiscal year was reported at 405,415, which left a membership of 2,126,846. The report of the trustees of the A. F. of L. Building showed a balance on hand of \$50,452.54.

*Committee on Organization.*—The committee on organization concurred in that part of the executive report which came under the caption "The right to organize," stating that this right was specifically incorporated in section 7-A of the National Recovery Act, and calling upon the workers to take advantage of these provisions without delay. Referring to that part of the executive's report under the heading "Organization," the committee expressed pleasure at the results obtained from the organizing campaign which had been inaugurated, there being 621 charters issued for local trade and federal labour unions by the American Federation of Labor within the past few months. The committee recommended co-operation in this movement by all city central bodies, state federations of labour, and national and international unions.

The following resolutions were concurred in by the committee and adopted by the convention: (1) urging the organizing of all hotel, restaurant and beverage workers; (2) endorsing the efforts of the Theatrical Wardrobe Attendants' Union in endeavouring to extend their trade union organization; (3) that a special effort be made to organize the quarry workers; (4) re-affirming previous declarations that all workers are eligible to membership in the American Federation of Labor irrespective of creed, colour, nationality, sex or politics; (5) favouring the launching of an organizing campaign among the laundry workers.

*Union Labels.*—The committee on union labels drew attention to the fact that only one resolution was referred to it, and interpreted this as an evidence of satisfaction on the part of the delegates that the officials of the department were doing their utmost to further the interests of organized labour

through this channel. The resolution which was adopted recommended that the membership of the Federation patronize those retail establishments showing the "Blue Eagle" and the union store card, giving preference to all places displaying union emblems or where union buttons are worn.

*State Organizations.*—The committee on state organizations dealt with that portion of the executive report which referred to progress made on minimum wage laws for women and minors, and the social legislation obtained in the Island of Puerto Rico by the free Federation of Labour. Mention was made that sixteen states have enacted legislation for the protection of women and minors in employment by stipulating a minimum wage. Satisfaction was expressed for the progress made by the workers of Puerto Rico in organization and social and labour legislation. The committee strongly urged the desirability of having all locals affiliated with central bodies or state federations.

*Industrial Relations.*—The favourable recommendation of the Committee on Industrial Relations on the following resolution was adopted: Pledging the assistance of the American Federation of Labor to the Hotel and Restaurant Employees and Beverage Dispensers' International Alliance in bringing about a compliance with the agreement entered into between the United States Department of Labour and the Hotel Association of Cleveland, whereby the latter would re-employ, when opportunity afforded, their former employees who were locked out.

A resolution condemning the alleged anti-labour policy of the Associated Press was referred to the executive of the Federation, as were also two other resolutions, one dealing with a controversy between the Butte, Montana, Building Trades Council and the Hansen Packing Company, and the other a jurisdictional dispute between the building trades and local No. 333, Amalgamated Butcher Workmen and Meat Cutters of America.

#### *Committee on Executive Council's Report.*

The committee on Executive Council's Report, which dealt mainly with jurisdictional disputes and amalgamations, reported that \$51,448,348.73 was paid out in benefits to members of organized labour by the various unions affiliated to the American Federation of Labor, an increase of \$11,486,475.59 as compared with the amount expended for benefits in the previous year. Mention was made of the amalgamation of the Cloth Hat and Cap Makers' Union and the United Hatters. The committee recommended that the ex-

ecutive continue its efforts to bring about an amalgamation between the Cigar-makers' International Union of America and the International Union of Tobacco Workers. The executive was urged to continue its efforts toward adjustment of jurisdictional disputes.

*Committee on Education.*—In the report of the Committee on Education attention was drawn to the demoralizing effect the economic depression was having on the public schools, many of which were being closed through lack of funds to pay the teachers. Mention was also made of that part of the executive council's report under the caption "Public Schools" wherein the attention of the delegates was drawn to the curtailment and re-trenchments which have been inaugurated in the public school system in the name of economy, such as closing of schools wholly or in part; schools kept open by unpaid or partially paid teachers; charging of fees; dismissal of teachers, etc. The committee also dealt with a number of resolutions having reference to education. In addition the committee reported upon the dedication of Gompers Memorial (referred to later in this report), making special mention of the addresses of Franklin D. Roosevelt, President of the United States, and William Green, president of the Federation. Child labour amendments and workers' education bureau were reported on by this Committee.

*Shorter Work Day.*—The committee on the shorter work day reaffirmed the stand taken by the Cincinnati convention of the Federation for the six-hour day and five-day week without wage reductions. A tribute of high appreciation was paid to President Roosevelt "and to his rare courage and clear vision that prompted the institution of the National Industrial Recovery Act." The convention adopted the recommendation of the committee that the executive council be directed to resolutely continue their efforts until the five-day, six-hour work week, without any reduction in pay, is included in every code adopted under the National Recovery Act. On recommendation of the committee the convention adopted the following resolutions: (1) Favouring the enactment by the Congress of the United States of a measure establishing a 30-hour work week without any reduction in the weekly pay received by government employees prior to the enactment of the "Economy Acts"; (2) the shortening of hours for members of the fire departments of the United States and Canada, with no reduction in monthly salaries.

*Local and Federated Bodies.*—This committee recommended that the convention reaffirm the pronouncements of former conventions of the A. F. of L., urging all national and international unions to take such action as in their judgment may best be calculated to bring their locals into their respective central labour unions.

*National Recovery Act.*—The committee on Resolutions to which was referred that portion of the report of the executive under the caption "National Recovery Act" drew attention to the statement "that the act is the most important and far-reaching legislation ever enacted by Congress." The committee was supported by the convention in assuring the President of the United States of the wholehearted support of the American Federation of Labor in his great undertaking. A resolution calling for adequate labour representation on all boards or committees appointed under the National Recovery Act was adopted by the convention on recommendation of the committee.

*Unemployment and Relief.*—The committee on Resolutions, reporting on that part of the report of the executive dealing with "Unemployment," recommended the adoption of the section which urged that for the coming winter the work hours should not be over 30 a week. The committee also urged the adoption of the recommendations of the executive council in regard to relief as follows: (1) the appropriation by Congress of adequate relief funds; (2) the making available for distribution to the unemployed of surplus agricultural products; (3) the educating of public opinion to the immensity of relief needs this winter; (4) that higher incomes and surplus profits should bear their fair share of the burden of relief.

In regard to the section of the report of the executive under the heading "discrimination against the older worker" the committee on resolutions recommended that an effort be made to secure legislation calculated to remedy this evil. The recommendation was adopted by the convention.

*National Legislation-Government Economy.*—Under this heading in the report of the executive council a comprehensive statement of the efforts made to prevent a reduction of wages and salaries of government employees was presented, and the committee on resolutions to whom this section of the report was referred, heartily commended the officers for their defense of these employees and recom-

mended that efforts be continued to have the salaries and wages of government employees restored.

*Immigration.*—The committee on resolutions, dealing with that part of the report of the executive under the subtitle "Immigration" concurred in the declaration "that there has never been a time when restricted immigration is more necessary than at present, and that therefore we must strive in every way to prevent any modification of the immigration laws." The committee also recommended the adoption of the following resolutions, which was confirmed by the convention: (1) demanding immediate effective immigration restrictions of Filipino labourers; (2) favouring the passage of the King bill providing, among other things, for the deportation of certain alien seamen; (3) calling upon American employers to refrain from the practice of giving preference in employment to labour not domiciled in the country.

*Amalgamated Clothing Workers Affiliated with American Federation of Labour.*—President Green submitted to the convention a supplementary report of the executive council, which contained particulars concerning the mutual understanding reached between the United Garment Workers of America and the Amalgamated Clothing Workers of America, thus ending a lengthy jurisdictional controversy. Mention was also made in this report that the Amalgamated Clothing Workers of America had made application for affiliation with the Federation, and that a charter of affiliation had been granted.

*International Labour Relations.*—The committee on International Labour Relations urged the officers and executive council of the A. F. of L. to do all in their power to assist the Pan-American Federation of Labour. The committee further recommended representation of the United States in conferences of International Labour office at Geneva. The recommendations of the committee were adopted by the convention.

*Other Resolutions.*—The convention adopted the entire report of the committee after approving of its recommendations on the following resolutions:

Instructing the executive to make a further study of "credit unions" and calling upon the President of the United States to set up interim facilities of consumer credit.

Establishment of a system of national banks under Federal Ownership and control.

Adoption of an N.R.A. code, for telegraph communications industry.

Enactment of compulsory unemployment insurance laws in every State of the Union.

Licensing of all individuals, firms and corporations engaged in interstate business.

Legislation to establish federal technological research and statistical division under the appropriate department of the Government.

An interpretation of the National Recovery Act so that section 7 of the Act shall apply to all city, county and state employees, as it does to all other workers.

Opposing any reduction in the present salaries of fire fighters and that the personnel of fire departments be kept up to a standard established by qualified experts.

Expediting of the public works program by all proper and reasonable means.

Protesting against any policy tending to lower wages and prolong work hours that would destroy labour standards in the building trades under N.R.A. codes.

Granting of the franchise to residents of the District of Columbia.

Congressional investigation of wide scope into the operations of the American Telephone and Telegraph company.

Construction of naval vessels and the manufacture of war munitions in navy yards and arsenals.

Establishment of a chair in a university of standing for the study of industrial problems as affecting the wage earners and the human values in society as a memorial to deceased leaders.

Pledging the Federation's co-operation with the International Fur Workers' Union in the latter's campaign against communism in the fur industry.

Investigation by Congress of the activities of strike breaking agencies.

Condemning attempts of political agents to disrupt trade unions.

Remedial action which will prevent violations of N.R.A. codes in the textile industry.

Establishment of the 30-hour week in the fur industry.

Commending the executive of the Federation for their efforts to purge the labour movement of rackets, racketeers and anti-union agitators.

That the Pullman Company be included under the emergency railroad transportation act, 1933.

Protesting discrimination against negro workers under N.R.A.

Continuance of efforts for the unconditional pardon or early release of Mooney and Billings.

Enactment of a compulsory old age pension by Federal and State laws.

Legislation providing for the assured security of depositors in banks.

Establishment of a new United States employment service in Puerto Rico, and that the workers of the island receive due protection under the N.R.A. codes.

A thirty-year optional retirement law for government employees.

Reaffirming opposition to use of cost of living as basis for determining wages, and urging restoration of working conditions to government employees.

Continuance of the United States Compensation Commission in its present official status as an independent government agency.

Extension of prevailing wage law to include painting of public buildings.

Removal of the prohibition on promotions for employees of the Federal Government.

Repeal of Eighteenth Amendment.

A resolution favouring the formation of an Independent Labour Party was not concurred in by the convention.

#### **Address of Secretary of Labour, Frances Perkins**

Miss Frances Perkins, Secretary of Labour of the United States, addressed the delegates on the third day of the convention. She outlined the steps taken by the Department of Labour to put into effect the recommendations made by an advisory committee, on which were included a number of representatives of labour. This committee, she stated, was called together "to canvass some of the outstanding problems of labour and to draw up for me and for the Department of Labour a certain program of accomplishment which we might desire to see put under way within the next four years."

She invited the Federation to give their whole-hearted constructive co-operation to her department.

General Hugh S. Johnson, administrator of the National Recovery Act, addressed the convention on October 10, his speech being broadcasted over a national net work.

#### **Other Addresses**

During the sessions of the fourth day, the addresses of the fraternal delegates were delivered. Fred J. White, M.P.P., Calgary, Alta., president of the Alberta Federation of Labour, extended the greetings of the Trades and Labour Congress of Canada, and the fraternal messages from the British Trade Union Congress were presented by James Rowan and A. Hall. In accordance with the established custom the president of the

Federation made presentations to the fraternal delegates.

Others to address the convention during its various sessions were: Miss Elizabeth Christman, fraternal delegate, National Women's Trade Union League of America; Rev. George Lakeland, New Haven, Conn.; Rev. Francis J. Haas, Ph.D., director, National Catholic School of Social Service; Hon. Jas. A. Farley, Postmaster General of the United States; Spencer Miller, Jr., Secretary, Workers Education Bureau of America; Sol. Rosenblatt, Deputy Administrator, National Recovery Act; Edward A. Hayes, National Commander, The American Legion, and Hon. James J. Davis, United States Senator.

### Dedication of Gompers Memorial

On October 8, the dedication of Gompers Memorial was solemnized in the presence of delegates to the convention of the American Federation of Labor and their friends. The invocation was pronounced by Rt. Rev. James E. Freeman, Bishop of Washington, after which President Green presented Hon. Franklin D. Roosevelt, President of the United States, who in a short address spoke of the personal friendship which he held for many years with Samuel Gompers, of his great leadership and love of country. President Green, who followed, gave a short

historical account of the life of Samuel Gompers, referring to the growth and expansion of the American Federation of Labor under his wise leadership.

The monument was unveiled by James C. MacKay, nine years of age, great grandson of Samuel Gompers, and the benediction was pronounced by Rt. Rev. John M. McNamara.

### Officers Elected

The officers elected for the year 1933-34 were as follows: President, William Green, Washington, D.C.; first vice-president, Frank Duffy, Indianapolis, Ind.; second vice-president, T. A. Rickert, New York, N.Y.; third vice-president, Matthew Woll, Washington, D.C.; fourth vice-president James Wilson, Cincinnati, Ohio; fifth vice-president, John Coefield, Washington, D.C.; sixth vice-president, A. O. Wharton, Washington, D.C.; seventh vice-president, Joseph N. Weber, New York, N.Y.; eighth vice-president, G. M. Bugniet, Washington, D.C.; Treasurer, Martin F. Ryan, Kansas City, Mo.; secretary, Frank Morrison, Washington, D.C.

Fraternal delegates to the British Trades Union Congress: Michael J. Colleran, Bronx, N.Y.; and Edward Flore, Buffalo, N.Y..

Fraternal delegate to the Trades and Labour Congress of Canada: Joseph P. McCurdy, Washington, D.C.

San Francisco, California, was chosen as the convention city for 1934.

## Amalgamated Association of Street Railway Employees of America

The twenty-third convention of the Amalgamated Association of Street and Electric Railway Employees of America was held in Toronto recently. Among the guest speakers who addressed the delegates were: Hon. Peter Heenan, former Minister of Labour; Controllers W. D. Robbins and James Simpson (also vice-president of the Trades and Labour Congress of Canada); P. M. Draper, secretary of the Trades and Labour Congress; W. C. McBrien, chairman of the Toronto Transportation Commission; John Noble, vice-president of Toronto Trades and Labour Council; Joseph Tompkins, chairman, Ontario Executive of Trades and Labour Congress; William Collins, representing the American Federation of Labor; Daniel J. Tobin, president of International Brotherhood of Teamsters. A message was also received from William Green, president of the American Federation of Labor.

The report of the International President, William D. Mahon, presented a detailed survey

of the activities of the organization during the two years since the last convention. This report showed that 72 agreements were renewed at the old rate; 86 were renewed with decreases and 61 supplemental agreements with decreases, making a total of 219 agreements during the period under review. This was considered as being a good showing under prevailing circumstances. In the same period, 15 local divisions managed to retain annual vacations with pay, while 66 locals retained old age pensions. There were eight cases of arbitration in the United States and three in Canada, while there was one strike involving three local divisions in the United States.

The president's report also indicated that the total paid out by local divisions in death, disability, old age and sick benefits for the two calendar years 1931 and 1932 amounted to \$528,867.62. In addition, the International Association, during the same period disbursed in funeral, disability and old age benefits the sum of \$1,682,325.02, thus making a grand

total expended in benefits of \$2,211,192.64. The problem of paying benefits on reduced revenues was studied by a special committee and debated at length by the convention. New regulations concerning benefits were adopted, the chief of which was the committee's recommendation that the maximum benefit in all cases be reduced to \$600 instead of \$800.

An adopted resolution aimed at the protection of seniority rights by requesting the aid of the American Federation of Labor in resisting "any discrimination as to the age of any street railway worker throughout the nation, and to promote and inject clauses into all codes affecting street railway and bus operators, forwarded to the National Recovery

Administration, prohibiting any violations of the spirit of that resolution, thereby making it a national policy of labour."

Another resolution which met with unanimous approval commended the United States President for his "stalwart courage" and fairness in pursuing his emergency program and pledged support to the National Industrial Recovery Act.

The convention expressed approval of President Mahon's advice to the Winnipeg local respecting the industrial dispute which developed there. The president's wire to the Winnipeg local urged that "no Amalgamated member should ever act as a strike-breaker."

### Progress of Indian Workers in Canada

The annual report of the Department of Indian Affairs for the year ended March 31, 1933, describes the condition of the Indian population of Canada during the past year as follows: During the past year the Indians may be said to have held their own reasonably well in respect to economic and health conditions when the unfavourable situation throughout the country generally is taken into consideration. It must be admitted, however, that those Indians who are dependent upon industrial employment as wage earners are under a peculiar disadvantage as naturally their white competitors are favoured in securing such employment as is available. On the other hand, Indian agriculturists, particularly in the Prairie Provinces, are remarkably prosperous at the present time and undoubtedly in a much better position economically than their white neighbours. This gratifying situation may be ascribed to the intensive agricultural assistance and instruction given these Indians during the past half century by the Government. Furthermore, they are protected against the depression by their circumstances, inasmuch as they are exempt from payment of taxes, mortgage interest and principal and other overhead charges. The transition of these Indians appears remarkable when it is recalled that after the failure of the buffalo in 1878 they were left destitute, and were kept alive only by Government rations. Progressive policy has made these Indians self reliant in two generations.

The hunting Indians in the more remote districts are maintaining themselves quite comfortably according to their own native standards of living, which while primitive are simple and healthy. The hunting Indians, however, who are located in the intermediate

territory between civilization and the wilds are faced with a difficult problem owing to the depletion of the fur in the habitat and the competition of white trappers who are entering their hunting grounds in increasing numbers. The Indian fishermen of the west coast of British Columbia who were formerly a prosperous class have suffered severely owing to the depressed state of the fishing industry. It is hoped that this set-back is temporary in character and that these Indians, many of whom are of a progressive type, will be restored to their former good circumstances.

The Indian population remains about 108,000, and there has been no decline in their number in recent years.

The International Labour Organization, in its weekly publication *Industrial and Labour Information* for October 9, gives preliminary statistics of industrial production in the Soviet Union during the first half of 1933. During the first half of 1933, the value of industrial production showed an increase of 2.3 per cent as compared with the corresponding period of the previous year, instead of 12 per cent as required by the program. This increase was due mainly to heavy industry, in which production increased by 7.4 per cent; light industry showed an increase of 0.7 per cent; and the wool industry and the food products industry (excluding the seasonal branches) only reached 94 per cent of the output in the first half of 1932. The total value of the production of State industry amounted to about 15,300 million roubles, of which 8,540 million roubles represented means of production and 6,760 million roubles articles of consumption. During the half-year 43.3 per cent of the program for the full year was completed.

## EMPLOYEES' CONFERENCE COMMITTEE ESTABLISHED BY THE PROCTER AND GAMBLE COMPANY OF CANADA

**A**N Employees' Conference Committee was established recently by the Procter and Gamble Company of Canada, Limited, at their factory at Hamilton, Ontario. Similar committees exist in the factories of the Procter and Gamble Company in the United States. Mr. William Cooper Procter, Chairman of the Board, sets forth the purpose of the committee in a prefatory note to the constitution of the Committee, as follows:—

"In order to promote mutual understanding, to effect a friendly relationship and to bring about efficient co-operation to a greater extent than has existed heretofore, and to provide a plan whereby the desired results can be attained, the Employees' Conference Plan has been formulated and presented for adoption to the several plants of the Procter and Gamble Company and The Procter and Gamble Manufacturing Company. The purpose of the plan is to provide for regular conferences between the representatives of the employees and representatives of the management, in order to afford to the employees ready means of making suggestions and of bringing to the direct attention of the management matters which, in their opinion, need adjustment or correction, as well as to give to the management opportunity to outline its views and plans to the workmen, to the end that both may benefit and that a fuller understanding between them shall exist."

The Employees' Conference Committee consists of representatives of the employees, elected by ballot, and of the management. The latter are appointed by the superintendent, and must not exceed one-half of the number of employee representatives. It is provided that "there shall be no discrimination under this plan against any employee because of race, sex, political or religious affiliation, or membership in a labour or other organization. Each representative shall be wholly free in his performance of duties as such and shall not be discriminated against on account of any action taken by him in good faith in his capacity as representative."

The constitution provides that "for the purpose of securing proper representation, the superintendent shall divide the factory enrollment into election units composed of similar or related groups or departments, such as (a) office, clerical, and laboratory, (b) mechanical and miscellaneous labour, (c) process departments, (d) production departments. The employees shall elect not less than four representatives nor more than ten. Each election

unit shall have at least one representative. No election unit shall have less than one representative for every fifty employees. The basis of representation, however, shall be the same for all units in a factory. As new departments are created, representation shall be provided by the Conference Committee. Subject to the approval of the Conference Committee, election units may be reorganized when conditions, such as the creation of new departments, make such changes desirable."

It is further provided that "any employee, except a member of the supervisory forces, who has been on the company's payrolls for a period of one year prior to nomination, who satisfies the age requirements (21 years or over in the case of male employees, 18 years or over in the case of female employees) and who is a British subject shall be considered qualified for nomination and election as a representative. Any employee, except a member of the supervisory forces, who has been in the service of the company for sixty days prior to nomination or election shall be entitled to vote."

Procedure is laid down for the establishment of an organizing committee to conduct the first election of employee representatives; and for the subsequent elections to the Conference Committee. Elections are to be held annually, "one-half of the total number of employee representatives to be chosen at each annual election. Elections subsequent to the first elections shall be conducted by the employees, in accordance with rules prescribed by the Conference Committee. Elections shall be by secret ballot."

"Employee representatives are elected for a term of two years (after the first election) and are eligible for re-election." They may "resign only on presentation of a written resignation, stating reasons for such action, which shall be referred to the Conference Committee and which must be approved by that body before resignation becomes effective. A representative shall be deemed to have vacated office upon severance of his relations with the Company. An election unit may recall any one of its representatives by a majority vote of the employees in the unit in favour of such recall. Any five employees may request such a vote under rules prescribed by the Conference Committee. The employee representatives shall conduct such a vote."

The management representatives, as already noted, are appointed by the superintendent,

"not to exceed one-half of the number of employee representatives. Such appointments are to be made just subsequent to yearly elections and shall continue for one year."

"Immediately after each annual election the employee representatives are to meet and elect from among themselves a chairman and vice-chairman of the Conference Committee. The Employees' Service Supervisor may act as secretary for all meetings of the Conference Committee. The chairman or the superintendent may call a special meeting of the Conference Committee at any time. A special meeting of the employee representatives only (no representative of management attending) may be called at any time by the chairman. Special committees may be appointed by the chairman to investigate and report on any subject. Such special committees shall include at least one representative of the management. . . . Membership of special committees may be dissolved by the chairman of the Conference Committee at any time."

Regular meetings of the Conference Committee are held monthly. "For time necessarily occupied in actual attendance at regular Conference Committee meetings or at meetings of special committees, employee representatives shall receive a stated payment from the company of not less than \$1 each for each meeting provided that such meetings are held on employees' time. If held on company time the regular rate of pay of committee members shall be in force, involving no extra compensation. A committee, when concerned with matters of special interest to any particular department or class of employees, shall have the right to invite into conference such additional representatives of the employees or of the management as are likely to be particularly concerned in such matters."

The regulations provide that "any matter which may seem to require adjustment or consideration shall first be taken up by the employee interested with the foreman of his department. In a matter of special importance to the employee he may ask a representative from his election unit to assist him in taking up the matter with his foreman. Failing settlement in a manner satisfactory to the employee, he may take the matter up, through his representative, with the Conference Committee."

"Decisions made by a voting majority of the Conference Committee shall consist of the vote of three-fourths of all Employee Representatives present and three-fourths of the Management Representatives present, provided that there is a quorum. . . . When the Conference Committee cannot arrive at

a decision on any question, it shall be referred to the Committee on Appeals. The Vice-President in charge of manufacture shall be chairman of the Committee on Appeals, which committee shall be composed of two management representatives appointed by him, and the chairman and vice-chairman of the Conference Committee. They shall submit a ruling on any case presented to them by the Conference Committee within one month from its presentation, which ruling shall be binding on all concerned."

"A suitable place for meetings is to be provided for all committees." When possible, committees must "arrange to hold meetings during working hours. Actual time used will be paid for by the management." Members are "expected to attend all regular meetings of the Conference Committee. Satisfactory excuses for absence must be furnished to the Chairman in every case. Any member who fails to attend two consecutive meetings of the Conference Committee shall receive notification of his delinquency from the secretary, and if he fails to attend three regular consecutive meetings and does not present satisfactory excuses for his absence, he shall forfeit his membership, the officers making provision for the election of his successor. Final action in such cases shall be taken by the Conference Committee."

---

A study of the comparative output of men and women employed on the same kind of factory work, carried on by two Italian experts over a period of 24 working days, showed that men produced their lowest output at the first hour of the work period, both morning and afternoon, while women reversed this, showing their lowest output at the last hour of each work period. A study of the production curves led to the conclusion that efficiency calls for shorter working hours for women than for men, with no overtime.

---

The average weekly wage of chain-store employees in the United States, excluding supervisors and managers, was \$20.60 per week in March, 1929, and \$20.48 in January, 1931, according to a study made by the Federal Trade Commission. In 1929 the range of the average wage was from \$16.13 up to \$30 and over, the higher averages being relatively rare. A comparison of average wages in chain stores and independent stores for the eight kinds of business for which comparable figures were obtained showed higher averages for the independent stores, the difference varying with the kind of business.

## PROVISION OF RECREATION AND INSTRUCTION FOR SHORT-TIME AND UNEMPLOYED WORKERS IN CANADA

THE Canadian Council on Child and Family Welfare is issuing a series of bulletins on "the problem of the constructive use of the leisure time of millions of Canadians, employed and unemployed, of both sexes and of all ages." The first bulletin defines the problem arising from "improved" methods of production, with the resulting unemployment. Events subsequent to the war, with extreme fluctuations in business, "have forced the problem into such prominence that it cannot be neglected. Any nation which as a whole is disposed to believe that it can be left to take care of itself can only assume such an attitude at its peril."

In Canada, action is checked by the uncertainty as to jurisdiction: "Does the task to organize the leisure-time activities of our civilization fall upon the cities or municipalities, or on the provinces, or on the Dominion as a whole? Does the matter lie in the realm of education or that of business? On whom must the responsibility be placed? Then again, who shall shoulder such financial obligations as may be entailed, and who shall co-ordinate the volunteer activities which will undoubtedly be offered once the problem is realized by a sufficient section of our population? There is no easy answer to those questions, yet Canada is no more immune from the necessity of facing the challenge of leisure than any of the other great nations of the world. The immense electrical developments which have taken place—especially in Ontario and Quebec—accompanied or followed by a greatly increased use of machinery of many types, and even the mechanization of agricultural production—especially on the prairies—have greatly decreased the necessity for long hours of labour. At the same time as the hours of those actually engaged in production tend to be reduced, with weeks of 40 hours or even less coming to be standard, there is also manifest a tendency for the age of children entering industry or business to be raised. This is true even when business is in full swing, in what we have been accustomed to call 'normal' times. But what of periods of depression, when many workers are discharged or placed on short time? A certain small percentage of the younger age-groups will resume educational work. Probably many girls who might otherwise be able to contribute in cash to the support of their homes will find domestic employment there instead. In lesser degree there will be odd jobs about the home which partially occupy the boys. But even among

the younger age-groups the vast majority face a complete absence of employment, whether gainful or otherwise, which can hardly fail to be injurious to themselves both physically and morally, as well as to the society in which they will have to take their places."

As to the effects of idleness on young persons the bulletin points out that recent comments by judges in several of the provinces on the extreme youth of the prisoners charged before them with quite serious crimes are a sufficient indication of the danger to society which this tendency, brought about largely through idleness, may constitute when allowed to develop unchecked. "The demoralizing effects of disappointment in the search for work are not limited to the individuals themselves but spread almost immediately to their families, and so, through groups composed of similar units, to and through a large part of society. The atmosphere of discontent which may be generated as a result cannot be regarded with anything but alarm."

Commercial interests, it is noted, have been quick to take advantage of the increased amount of leisure, as is shown for example in the tremendous increase in the motion picture industry and in professional sports. As contrasted with such recreations, the object of the Canadian Council is to develop the "constructive utilization of leisure time in which self-activity in sport, hobbies and other phases of recreation, has a central place."

The second bulletin shows that leadership and organization are the fundamental requirements in any community where an efficient program for the use of leisure time is desired, and outlines forms of organization that are considered to be suitable for large or small urban communities.

The third bulletin sketches in particular the recreational program in the large city. In addition to providing facilities for recreation, such as public parks and well equipped playgrounds, a good program should include such activities as soft ball, tennis, swimming, quoits, track and field events, football, lacrosse, handball, physical training, golf, skating and winter sports, life-saving and first aid. There should also be provision for community picnics, music, dramatics and pageants, gardening, handicrafts, and winter time social clubs. A large part of such a program, it is claimed, is already being carried out in some of the larger Canadian cities.

In addition to pure recreation, the Council strongly recommends the establishment of

occupational clubs for short-time or unemployed workers. No complete solution of this problem has been reached as yet, though such clubs exist in England. "It should not be beyond the capacity of large Canadian cities to devise their own schemes for similar enterprises. Those responsible for the operation of 'Day Shelters for Unemployed,' with cards and games alone, agree that this is not enough, and are taking steps to introduce occupational projects into the program."

"The Community Centre Plan, utilizing facilities provided for day school purposes but not required in the evenings, has recently been put into effect for family recreation purposes

as well as for the training of special groups—not only in Great Britain and the United States, but in Canada as well. Handwork, including mechanical drawing for boys; sewing and millinery for girls; knitting and dress-making for women, and economics lectures for men, have been found valuable features, together with dramatics, music, country dances, and other customary forms of recreation. The plan depends largely on volunteer co-operation and has been tested under Canadian conditions sufficiently to justify extension so that all sections of large cities requiring it might be granted its privileges and advantages at comparatively low cost."

### University Education for Workers in Ontario

The annual conference of the Workers' Educational Association of Ontario was held at Stratford in September. The Secretary, Mr. Drummond Wren, reported that during 1932-33 session there were fifteen local associations, which organized 32 classes, with an aggregate enrolment of 1,328 students. The local associations are at Brantford, Brockville, Dundas, Galt, Hamilton, Kingston, Kitchener, London, Oakville, Peterboro, Stratford, St. Catharines, Windsor, Woodstock and Toronto. Toronto had fourteen classes, Hamilton three and London and Windsor two each. Elementary and advanced classes are conducted in such subjects as economic history, economic theory, psychology, public speaking, literature, appreciation of music, appreciation of art, composition, biology, astronomy, labour problems, current events, and public finance. The secretary called attention to the fact that while the average attendance was 27.5 per cent in 1931-32, it rose to 41.5 per cent in 1932-33. One-half more actual work was, therefore, done without any increase in tutorial expenses, a fact which also indicates the growing popularity of the movement.

At the conference, Mr. George Keen, Brantford, was elected president of the board of directors. The university representatives on the Board are Dr. Hamilton Fyfe, Principal of Queen's University; Dr. S. F. Maine, University of Western Ontario; and Professors H. R. Kemp and F. C. Auld, of the University of Toronto. Instruction is under the supervision of Mr. W. J. Dunlop, B.A., Director of University Extension of the University of Toronto.

President Keen outlines the history of the movement in the October issue of his magazine, the *Canadian Co-operator*, as follows: "Thirty years ago, on the initiative of a Woolwich co-operator, Dr. Albert Mansbridge, Workers Educational Associations were organized in Great Britain, and in connection

therewith tuition was secured from the universities. The Workers Educational Association of Ontario functions in a similar manner. Workers in industrial centres organize themselves into an association, and out of the membership form classes. When a class of twenty-five or more is organized, the University of Toronto provides and pays for instructors on such subjects as the class may decide upon; the lecturers being drawn from Toronto, Queen's University (Kingston), Western (London), and McMaster (Hamilton) Universities. The students pay annually a membership fee of \$1 each, and \$1 for each class attended. These nominal fees are retained by the local association to defray its own expenses, and to enable it to make a contribution towards the maintenance of the Workers Educational Association of Ontario. The classes meet one evening per week during the fall and winter months, and the courses consist of twenty lectures each."

During October a total of 3,187 accidents were reported to the Ontario Workmen's Compensation Board in the industries in Schedule 1 of the Act, 13 of which were fatal cases; in Schedule 2 industries 153 accidents were reported, including 4 fatal cases; and 218 accidents to employees of the Crown, 3 of which were fatal, were reported during the month, making in all 3,558 cases, of which 20 were fatal.

It is stated that employers in the engineering and shipbuilding industries in Great Britain recently submitted to the trade unions concerned a communication on the possibility of establishing a 40-hour week. An agreement making this provision was concluded early in October between the Amalgamated Engineering Union and Imperial Chemical Industries Limited.

## Welfare Work in Montreal in 1932

The Montreal Council of Social Agencies has issued the eleventh year book on "Welfare Work in Montreal," describing the relief operations carried on by various organizations in the city in 1932. The volume comprises the annual reports of thirty-one agencies within the Financial Federation of the Montreal Council of Social Agencies, as well as the reports of the Montreal Council of Social Agencies and of the Financial Federation campaign of 1933. This campaign is conducted for the purpose of securing the funds necessary for the operations of the affiliated organizations. The financial objective of the 1933 campaign was \$776,000, of which amount \$740,077 was raised, \$429,343 or 58 per cent, being in cash.

The Board of Directors of the Financial Federation, in their annual report, note a further aggravation of conditions resulting from unemployment during the year. "Not only have more men been thrown out of work, but the resources of those unemployed for varying periods of time have become exhausted. The result is that the army of destitutes has more than doubled. This has affected our agencies directly and indirectly. The federal, provincial and municipal Governments have undertaken to provide food, fuel, shelter and clothing to those who are able and willing to work, but have made no provision for medical care and leisure time activities which are almost equally essential. Agencies in the health field, such as the Victorian Order of Nurses, the Federation Health Service and the Child Welfare Association, having rendered free nursing and medical service to the unemployed to a degree unequalled in our experience. The Parks and Playgrounds Association, the Settlements and other recreational agencies have extended their programs to suit the needs of the unemployed. Indeed, practically all the agencies in the Federation have had to expand their activities,

so far as finances permitted, to include the unemployed. Actual relief to the unemployed in the Protestant Community is largely issued by the Emergency Unemployment Relief Committee, of which Brig.-Gen. G. E. McCuaig is the Chairman, and the destitute who are not eligible for government relief are assisted by the Family Welfare Association."

Special commendation is given of the work of the committee in charge of the Day Shelter for Unemployed men, the Community Garden League, and the Parks and Playgrounds and Family Welfare Associations. The Federation also expresses its deep appreciation of the help received from the city authorities: "The amount of destitution has reached such proportions that private charity cannot possibly hope unaided to grapple with the situation. Our thanks are due to the City Council for their co-operative attitude and for their intelligent help in the matter. Acknowledgement must also be made to the Federal and Provincial Governments who bore an equal share in the expenses."

Elsewhere the report states: "It is believed that the broader scope of unemployment relief, now recognized by government authorities, may do much to relieve the Family Welfare Association of oppressive burdens of unemployment relief that are properly a charge on public funds and can no longer be carried by our private charities. With a substantial saving in that agency's budget for unemployment relief and more minor adjustments in other budgets, it is hoped that the Federation will be able to finance its agencies during the coming year."

Various features of relief work among the unemployed are summarized under such headings as the Day Shelter, Family Relief, Unemployment Among Office Workers, Single Women, and Central Emergency Clothing Room.

---

## Montreal Training Scheme for Unemployed Girls

A training scheme for unemployed girls was carried on last winter in the Y.W.C.A. building at Montreal. A description of the work, prepared by Miss Postill, general secretary of the Montreal Y.W.C.A., appears in the September issue of *Child and Family Welfare*, published by the Canadian Council on Child and Family Welfare. Courses were provided for "cook generals," and in sewing. Twenty-four girls took the former course, which lasted four weeks daily from 9 a.m. to 4 p.m., with a

half session on Saturday. Twice during the course the girls were sent out to the home of some interested person to do a day's work such as they would likely be required to do later on. This person made a report to the teacher, which helped her to estimate their ability and degree of adaptability and to correct faults. The course covered a general routine of house work, as much plain cooking as possible, table service and household etiquette. The girls were placed immediately on completion of

their course, and reports to date state that they are giving complete satisfaction. In the same way a considerable number of waitresses were trained, who work part-time on call. These girls were all registered as out of work and most of them either required financial assistance or would have required it very shortly. Care was taken to find sympathetic employers who would continue the training, so that what they had learned might not be lost and also that they might not become discouraged by being placed in a position where they were being exploited.

The work in the sewing shop is described as follows: "Whenever circumstances warranted it, when a girl came to the Y.W.C.A. destitute she was placed under the supervision of an experienced seamstress where she worked in a room set aside for that purpose from 9.30 a.m. until 4 p.m. five days a week. She was paid a salary of 75 cents or a \$1 a day, given a substantial noon meal and a substantial

tea, this allowing her to live on her earnings as she herself felt wisest and best. Orders were solicited for sewing from other organizations and from individuals for which a small fee was charged, which assisted with the financing. Special precautions were taken, however, not to harm other industries or to take work from anyone else. Work was also undertaken for the Emergency Unemployment Relief Fund for which payment was made.

"This has been a very satisfactory experiment," the secretary concludes, "and has not only offered relief but retained the self-respect of the girls, has improved their spirits and morale and given them some very useful instruction in needle work. We average twenty-five girls in the work room at one time and have paid for 1,357 days' work since the first of January, to which of course must be added the days' work given last year."

## AVERAGE EARNINGS AND WEEKS EMPLOYED FOR WAGE EARNERS IN CANADA, 1931

THE Dominion Bureau of Statistics has issued a bulletin entitled "Earnings Among Wage-Earners for Canada and the Provinces, 1931," being No. XXXIII, giving the results of the seventh Census of Canada, 1931, and showing not only earnings but weeks of employment during the twelve months ending May 31, 1931. "Wage-Earners" in this bulletin includes those on wages, salaries, commission, etc., excluding those in business for themselves, owners, etc., therefore not covering all those gainfully employed reported in Bulletin No. XXXI (LABOUR GAZETTE, August, 1933, pages 819-821). The present bulletin gives data for 2,566,001 persons, ten years of age and over, out of the 3,924,533 persons, ten years of age and over, reported on

as gainfully employed in the previous bulletin. The information is given in four tables, the first a summary table by age groups and sex, total earnings, etc., by provinces; the second, average earnings and weeks employed by age groups and sex, by provinces; the third, total and average earnings and weeks of employment for certain occupations, male and female, by provinces; the fourth, by industries, total and average earnings, numbers employed, etc. Out of the 2,566,001 "wage-earners" there were 88,963 who did not report their earnings, leaving 2,477,038, of whom 1,948,500 were males and 528,538 females.

The accompanying tables give the figures for Canada by age groups, and for selected occupations.

NUMBERS OF WAGE-EARNERS, AVERAGE EARNINGS AND WEEKS OF EMPLOYMENT IN CANADA BY AGE GROUPS DURING 12 MONTHS PRIOR TO JUNE 1, 1931

## REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD JULY TO SEPTEMBER, 1933

EMPLOYMENT conditions, as indicated by the business transacted by the offices of the Employment Service of Canada during the quarter July to September, 1933, showed a gain over that of the corresponding quarter last year, as there was an increase of about 5 per cent in both vacancies listed and placements effected. This gain was largely accounted for by the construction and maintenance group, where placements were substantially higher, due to work provided on highways and other government projects for the relief of unemployment, but was materially lessened by a heavy reduction in farming. Logging, services, mining and manufacturing also reported additional placements, the remaining groups, transportation and trade, recording only nominal declines. Provincially, all except the Prairie Provinces reported in-

creased vacancies and placements, the highest gain being in Ontario and the decline in Manitoba, Saskatchewan and Alberta about evenly distributed.

From the chart on page 1113, which accompanies the article on the work of the Employment Offices for the month of September, it will be noticed that the curves of vacancies and placements in relation to applications declined slightly during the first half of July; remained practically unchanged during the latter half of that month; pursued an upward trend during the first part of August; followed by a decline until the middle of September, when an upward course was again pursued, the level of each curve at the end of the quarter under review being about 2 points below that shown at the close of the corresponding period last year. During the period July

to September, 1933, there was an average of 53.6 vacancies and 51.0 placements for each 100 applications for employment, as compared with 58.0 vacancies and 55.4 placements for each 100 applications during the corresponding period last year.

The average number of positions offered daily during the present quarter was 1,181, of applications registered 2,203 and of placements effected 1,123, in contrast with a daily aver-

age of 1,123 vacancies, 1,935 applications and 1,072 placements in regular and casual employment during the corresponding quarter of 1932.

During the three months, July to September, 1933, the offices reported that they had made 91,035 references of persons to positions and effected a total of 86,467 placements, of which 49,369 were in regular employment and 37,098 in casual work. Of the placements in regular employment, 37,180 were of

men and 12,189 of women, while casual work was found for 29,791 men and 7,307 women. Records for the corresponding quarter of 1932 showed 82,490 placements, of which 45,376 were in regular employment and 37,114 in casual work. Applications for employment during the period under review were received from 132,123 men and 37,441 women, a total of 169,564, in contrast with a registration of 148,944 persons during the same period in 1932.

Employers notified the Service during the quarter July to September, 1933, of 90,888 vacancies, of which 67,703 were for men and 23,185 for women, as compared with 86,425 opportunities for work during the corresponding period a year ago.

In another section of this issue will be found a report in detail of the transactions of the Employment Offices for the month of September, 1933.

## EMPLOYMENT CONDITIONS IN CANADA AT THE END OF OCTOBER, 1933

### Reports of Superintendents of the Employment Service

**T**HE employment situation at the end of October was reported by the Superintendents of the Employment Service to be as follows:—

Farmers were busily engaged in fall ploughing and in gathering the root crop in the Maritime Provinces. In Nova Scotia, due to excessive rain, the potato crop was only fair, but better conditions in this line were noted in New Brunswick, potatoes there being in some localities 25 per cent better than those of last year, with no blight or rot. Fishing was somewhat hampered by severe storms; nevertheless, catches were fair. Other than the repairing and building of camps and the placement of a few pulpwood cutters, activity in logging was at a standstill, although indications appeared brighter for more extensive operations in the near future. Mines in the New Glasgow area operated from one to 6 days per week, with conditions reported as slightly better, while those in Cape Breton and vicinity worked 4 to 6 days. A metal mine in the latter district, which had ceased operations when the price of its product dropped too low to admit of profitable mining, was making a test shipment of concentrates to Ottawa, and it was hoped that the result of the test might show how this ore could be treated profitably by a new process. If so, the probabilities were that the mine would be reopened shortly, which would be of great benefit to many workmen in that district. Oil companies reported business slow, due to the partial cessation of automobile traffic, but sugar refineries were busy, also bakers and confectioners, the latter busily preparing for the Christmas trade. Steel plants were also slightly more active. Large business projects already underway were progressing favourably, while a fair number of mechanics and unskilled workers were employed on small dwellings and minor repair jobs. Highway, street and sewer construction also continued as a relief measure. Passenger traffic by railway and automobile was somewhat slow, but there was a fairly heavy movement of freight, both by rail and water, this consisted chiefly of lumber, flour and potatoes. Trade was fair. There was a continued demand for domestics and charworkers, and placements made accordingly.

There were practically no orders received for farm help in the Province of Quebec, nor was there any demand for miners. Logging, however, showed a revival of business as

camps were being reopened. Manufacturing, in Hull, showed an increase in the number of workers employed. In Montreal, clothing, boots and shoes and textiles were active, but metallurgy and rubber were quiet. In Quebec City, the principal industries, leather and fur, were busy, with conditions reported satisfactory in all lines at Sherbrooke. Building construction was dull for the most part, only a few men being engaged in this line of work, but over 5,000 workers were employed by the Municipality of Montreal on relief projects. Trade was fair. Orders for domestics were numerous and applicants were registered in large numbers, but wages offered were much reduced.

Few calls were reported for farm help in Ontario and these consisted chiefly of apple pickers and choremers. Due to the facts that some men were financially unable to pay their transportation to logging camps and that others were unwilling to accept piece work rates offered and entertained the hope of obtaining employment in other lines of industry, orders for pulpwood cutters in some districts remained unfilled. However, the majority of points were gradually receiving their complement of workers. In the Sudbury district approximately 900 men were engaged, compared with less than 300 last season, all camps there being well manned, with only a few replacements made as occasion arose. In this district, also, mining was very active, all companies working as formerly reported. No vital change was noted in manufacturing, except amongst a few firms which were more busily engaged in preparing for Christmas orders. Manufacturers of foodstuffs and distilleries reported business good, while sugar refineries and textiles were also busy. Steel and iron industries were fairly well employed and at Oshawa, men were being referred daily to the automobile factories. At Windsor, however, employment conditions in that particular industry appeared none too bright, as all factories there were soon expected to close for an indefinite period, or until work on the new models was forthcoming. Many other industries throughout the Province continued to operate with reduced staffs. Relief work on various government and municipal projects was still the main channel of labour provided for the majority of unemployed, building construction being quiet and taking care of only a few of those seeking positions. Boat movements of grain remained fairly steady at Fort

William, but not with the rush of former years at the approaching close of navigation. All railways running out of St. Thomas were busy, and the men who were working were making good time. A large number of brakemen and firemen, however, were still idle. Industrial conditions showed little change in the women's division, their only opportunity being in the domestic field, where orders are plentiful but wages low. Difficulty was still found in getting cooks and cooks-general who were experienced workers.

A slight decrease was noticeable in the demand for farm help in the Prairie Provinces, although it was good for the season of the year and there was little or no difficulty in meeting it. A large number of enquiries was reported regarding the Farm Labour Relief Scheme. More men were moving to the logging camps and it was expected that this increase would continue. Small mines were not busy, but improvement was noted at the larger centres with the coming of colder weather and although the mining industry was a considerable way from having reached its maximum output, orders showed a gradual increase. Manufacturing was quiet. Some building construction was under way at Winnipeg and Edmonton, but, throughout the three provinces, the main source of work offered was that provided by the government or the municipalities on the various relief programs. Wholesalers, particularly in Winnipeg,

reported a fairly steady call for groceries, drygoods and footwear, but other lines were rather quiet. Retail trade showed little change. Requests for day workers in the Women's Division were substantially fewer in the larger cities, but a better demand existed for general domestics: this was easily met.

With the approach of winter there were fewer requests for farm workers in British Columbia. Apple picking was nearing completion and all men experienced in this line were immediately placed. Harvesting the beet crop in the Ladner district had been held up on account of heavy rains. Both salmon and herring fishing were good at Nanaimo, but no demand for fishermen. There was little movement of labour in connection with the lumber camps in operation, but sawmills continued to operate steadily, although many of the shingle mills were running on short time. Mining was active at Prince Rupert and Nelson, but quieter at Nanaimo. Apart from additions and improvements to smaller buildings, little building construction was in evidence. Relief work on highways and other government projects continued. Work on the waterfronts at the various ports was also less active, although lumber shipments at Victoria were good. Trade was dull. There were still many applicants registered in the women's division for whom no positions could be found, thus adding to the already large number receiving relief.

### Family Allowances in France

A recent French decree prescribed that the Act of March, 1932, relating to family allowances (LABOUR GAZETTE, May, 1932, page 542) should come into force for the mining, metal, chemical, textile, building and public works industries on October 1, 1933, and for the tulle and mechanical lace-making industries on January 1, 1934. A further decree which will cover most other industries is now in preparation. The application of the Act to commerce and agriculture will not be considered till later.

The Minister of Labour, after consultation with the local committees and the National Committee on Family Allowances, has issued a number of Orders fixing the minimum rates of allowances for the different departments. For the funds of the Paris area the minimum rate of allowances was fixed, as follows: 1.20 francs a day, or 30 francs a month, for families of workers and salaried employees with one dependent child; 2.80 francs a day, or 70 francs a month, for families having two dependent children; 4.80 francs a day, or 120 francs a month, for those with three dependent children; 8 francs a day, or 200 francs

a month, for those with four dependent children; and 3.20 francs a day, or 80 francs a month, for each dependent child after the fourth.

### Safety Trophy for Industry in Quebec

The Province of Quebec Safety League, at a meeting held at Three Rivers in October, decided to organize a special effort to prevent industrial accidents in the province. On behalf of the provincial government, the Hon. C. J. Arcand, Minister of Labour, offered a trophy to be awarded to the company having the least loss of time from accidents. Mr. M. O. E. Sharpe, a member of the Workmen's Compensation Commission, stated that accidents reported to the Commission had increased 50 per cent during the past three months as compared with the corresponding period in 1932. He declared that if conditions should not improve, it would become necessary to distribute the cost of these accidents in such a manner that "safe" employers would not be obliged to pay for the carelessness of those who were responsible for the increase.

## EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN SEPTEMBER, 1933

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on October 1 was 8,240, the employees on their payrolls numbering 834,348 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for September was 1,762, having an aggregate membership of 149,310 persons. It should

be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 64 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 61 cities throughout Canada, showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

### (1) Employment Situation at the Beginning of October, 1933, as Reported by Employers

Industrial employment at the beginning of October showed its sixth consecutive monthly increase, according to statements received by the Dominion Bureau of Statistics from 8,240 firms, whose staffs aggregated 834,348 persons, as compared with 816,458 in the preceding month. Activity has frequently declined between September and October in the twelve years of the record, the change, on the average, being a fractional reduction; the gain this year is therefore unusually interesting, particularly so because it is the largest advance reported on October 1 since the record was commenced in 1921. The index (based upon the average for the calendar year 1926 as 100) stood at 90.4 on October 1, 1933, compared with 88.5 on September 1, 1933, and 86.7 on October 1, 1932. On the same date in the eleven preceding years, the index was as follows:—1931, 103.9; 1930, 116.2; 1929, 125.6; 1928, 118.8; 1927, 110.3; 1926, 106.5; 1925, 99.5; 1924, 95.0; 1923, 100.7; 1922, 95.8 and 1921, 91.3.

The continuous recovery that has characterized employment since April has resulted in the re-instatement of approximately 134,000 persons by the employers making returns, an average of more than 16 per establishment during the six months. This decided improvement in business among the co-operating firms has no doubt also been accompanied by important gains among the smaller firms in the industries covered, as well as among employers in the industries for which no statistics are available,

so that the number of workers obtaining employment in this general expansion of industrial activity must greatly exceed the 134,000 mentioned above. The Bureau's index of employment has risen from 76.0 on April 1 to 90.4 on October 1, an advance of 14.4 points or 18.9 per cent in six months. Only in 1928 and 1929 out of the twelve years for which comparable data exist, were there larger increases in the corresponding six months, while last year a decline of nearly three points had been indicated between April and October.

The most pronounced increase since September 1 was in highway construction, but there were important gains in logging, mining and trade, while shipping was also brisker. The improvement in mining and trade was more pronounced than on October 1 in any earlier year of the record; that in logging was greater than in 1930, 1931 or 1932. On the other hand, services, building and railway construction, and communications were slacker, the declines in most of these industries being seasonal in character. There was also a slight reduction in factory employment, the first indicated since the beginning of the year, due in the main to seasonal curtailment in fish-preserving and lumber factories.

### Employment by Provinces

As on the same date in 1932, firms in the Maritime Provinces and British Columbia showed decreases, but in Quebec, Ontario and

the Prairie Provinces the trend was upward, the largest advances taking place in the Prairie area.

*Maritime Provinces.*—A slight decline was indicated in the Maritime Provinces, where the 576 co-operating employers reduced their payrolls from 64,115 persons on September 1, to 63,502 at the beginning of October. This shrinkage involved a much smaller number of workers than that recorded at the same date of last year, when the index was several points lower than on October 1, 1933. Manufacturing, mainly of lumber products, construction and services reported the bulk of the decrease

ing month took place chiefly in manufacturing (notably of textile products), in logging, shipping, highway construction and retail trade. On the other hand, building and railway construction showed curtailment; within the manufacturing group, pulp and paper factories were decidedly slacker. Statistics were compiled from 2,009 firms in Quebec with 240,778 workers, compared with 235,148 at the beginning of September. A much less extensive advance had been noted on October 1, 1932, when the index was lower.

*Ontario.*—The trend was again upward in Ontario, according to 3,629 employers of 337,258

#### EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

**NOTE.**—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

as compared with September 1, 1933, while there were gains in logging, mining, shipping and trade.

*Quebec.*—There was a further increase in Quebec, the sixth recently recorded. During the months since April 1, over 42,800 workers have been added to the staffs of the firms furnishing data to the Dominion Bureau of Statistics, an increase which compared very favourably with that of only some 2,000 recorded in the same period in 1932; the continuously upward movement in the last six months has extended over a longer period than in any other year since 1926. The advance indicated on October 1 over the preced-

persons, or 5,749 more than in the preceding month. As in Quebec, the improvement on October 1 continued the favourable movement in evidence during the last six months, some 42,900 employees having been reinstated by the co-operating establishments since April 1. This expansion is in marked contrast to the decline of over 19,000 workers reported in the payrolls of the firms whose returns were received in the corresponding six months of last year. A smaller gain over the preceding months had been reported on October 1, 1932, and employment was then in less volume. Manufacturing as a whole (particularly of textile and canned products) logging, highway

construction and retail trade showed heightened activity, as compared with September 1, 1933, while employment decreased in iron and steel plants, transportation, building and railway construction and services.

*Prairie Provinces.*—There was a further increase in employment in the Prairie Provinces at the beginning of October, being the sixth consecutive gain indicated; nearly 25,200 persons have been added to the payrolls of the reporting employers during this period of recovery. The improvement since the beginning of September occurred mainly in highway construction, coal-mining, steam railway operation and trade. Manufacturing showed little general change, while hotels and restaurants released employees, owing to the close of the tourist season. Returns for the date under review were received from 1,210 firms with an aggregate working force of 122,685 employees, compared with 112,878 on September 1. An increase had also been recorded at the beginning of October in 1932, but this involved a smaller number of workers and the index was then lower.

*British Columbia.*—Employment in British Columbia showed curtailment, mainly in manu-

facturing (a result of the completion of the fish-canning season), while transportation and services also released employees. On the other hand, logging, mining and trade reported greater activity. Data were tabulated from 816 employers, whose payrolls declined from 72,808 persons on September 1, to 70,125 at the beginning of October. Losses on a much smaller scale were registered on October 1, 1932, but the index then was a few points lower.

Table I gives index numbers by economic areas.

### Employment by Cities

The trend of employment was downward in Quebec City, Hamilton and Vancouver, but upward in Montreal, Toronto, Ottawa and Windsor and the adjacent Border Cities, while in Winnipeg practically no general change took place.

*Montreal.*—For the seventh consecutive month, there was a large increase in employment in Montreal, where the 1,143 co-operating establishments employed 128,345 persons, or 4,392 more than on September 1. The advances recorded since March 1 have pro-

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS  
(AVERAGE CALENDAR YEAR 1926=100)

| Relative Weight of Employment by Economic Areas as at Oct. 1, 1933..... | 100.0  | 7.6                | 28.9   | 40.4    | 14.7              | 8.4              |

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area to the total number of all employees reported in Canada by the firms making returns for the date under review.

vided work for nearly 17,600 extra persons, contrasting favourably with the decline of over 2,600 employees in the staffs of the firms reporting for the same period in 1932. Manufacturing showed the greatest gain on October 1, as compared with September, but there was also improvement in transportation, construction, services and trade; within the manufacturing group, textile, vegetable food, tobacco and beverage and iron and steel factories indicated considerable expansion. Smaller advances had been noted on the corresponding date of last year, but the index of employment was then fractionally higher.

*Quebec.*—Activity in Quebec declined at the beginning of October, 157 workers having been laid off since September 1 by the 156 employers whose returns were compiled, and who had 12,409 on their paylists on the date under review. There were seasonal losses in services, and construction and manufactures were also slacker. The index was lower than at the beginning of October, 1932, when a larger decrease had been reported.

*Toronto.*—Further expansion was indicated in Toronto, according to 1,219 firms employing 108,735 persons, compared with 105,746 in their

last report. Manufacturing (particularly of textile, electrical apparatus, iron and steel, rubber, lumber and animal food products) was much busier, and services and trade also absorbed more workers. Smaller additions to staffs had been reported on October 1 a year ago, but employment generally was then at a rather higher level.

*Ottawa.*—Construction was not so active, while manufacturing and transportation showed small gains. The forces of the 157 employers furnishing data aggregated 11,871 workers, or 47 more than on September 1. The index of employment was slightly lower than on the same date in 1932, when a large reduction had been indicated.

*Hamilton.*—A decrease occurred in manufacturing in Hamilton, largely in iron and steel factories, while textiles were more active. The non-manufacturing industries, however, showed on the whole only minor changes. Statements were tabulated from 243 firms with 23,733 employees, compared with 24,443 in the preceding month. The index number at the beginning of October of last year was higher; little general change had then been reported.

| Oct. 1.....   | 87.3     | 98.3   | 90.9    | 93.2   | 75.4     | 77.6    | 82.3     | 85.9      |
| Relative Weight of<br>Employment<br>by<br>Cities as at Oct. 1,<br>1933..... | 15.4     | 1.5    | 13.0    | 1.4    | 2.8      | 1.2     | 4.1      | 3.2       |

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated city to the total number of all employees reported in Canada by the firms making returns for the date under review.

*Windsor and the Adjacent Border Cities.*—There was an increase in the number employed in the Border Cities, occurring mainly in the automobile and allied trades. One hundred and thirty-seven establishments recorded 9,931 employees, as against 9,759 on September 1. A very large decline had been reported on October 1, 1932, when employment was in smaller volume.

*Winnipeg.*—Little general change was shown in Winnipeg on October 1, when the 395 co-operating firms employed 34,352 workers, or practically the same number as in the preceding month. Manufacturing and transportation were rather less active, while construction and trade showed improvement. The situation at the beginning of October of a year ago had also remained practically the same as in the month before, but the index then was higher than on the date under review.

*Vancouver.*—There was a loss in employment in Vancouver, according to 350 employers with 26,712 persons on their payrolls, compared with 27,026 on September 1. Manufacturing reported a decline, and there was a falling-off in transportation; construction,

however, showed improvement, and trade was rather brisker. A smaller reduction on the whole had been recorded on October 1, 1932, when the index stood at 88.5, as compared with 85.9 at the beginning of October of the present year.

Index numbers by cities are given in Table 2.

### Manufacturing

There was a slight slowing-up in factory employment on October 1, when the 5,008 co-operating establishments reported 430,743 operatives, or 380 fewer than on September 1. The decline was mainly due to seasonal curtailment in fish-preserving, sawmilling and iron and steel plants, while pulp and paper mills also released employees. The losses in fish canneries, following a very active season, were unusually large, but those in the lumber and iron and steel divisions involved fewer workers than has generally been the case at the beginning of October in the last twelve years. On the other hand, vegetable food, rubber, textiles, tobacco and beverage, electrical apparatus and miscellaneous manufactures afforded increased employment, the

| Oct. 1.....   | 90.4           | 86.7          | 64.7    | 105.8  | 82.5           | 82.7           | 97.0         | 108.1    | 115.0 |
| Relative Weight of Employment by Industries as at Oct. 1, 1933..... | 100.0          | 51.6          | 2.1     | 5.8    | 2.6            | 11.6           | 13.5         | 2.6      | 10.2  |

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated industry to the total number of all employees reported in Canada by the firms making returns for the date under review.

seasonal gain in textiles being greater than the average for October 1.

The small falling-off noted on the date under review is the first interruption in the series of advances which, extending from January 1 to September 1, resulted in the index of factory employment being 12.4 points higher on the latter than the former date; in spite of the minor reduction recorded in the present report, this index was 12.3 points, or 16.5 per cent, higher on October 1 than at the beginning of the year. This improvement over January compares very favourably with the fractional gain that occurred between January 1 and October 1 in 1932, with the decline of nearly two points between those two dates in 1931 and with the increase of only 1.3 points in 1930.

*Animal Products—Edible.*—There were losses in dairies and fish-preserving establishments,

those in the latter being especially pronounced following an unusually active season. Statistics were received from 242 manufacturers, employing 19,940 persons, as compared with 23,356 in the preceding month. This contraction, which was most pronounced in British Columbia, was on a much greater scale than that registered on the corresponding date of last year, when the index was practically the same as on October 1, 1933.

*Leather and Products.*—Following eight months of steadily increasing activity, there was a minor curtailment in the leather industry on October 1, footwear factories showing small reductions in staffs, while miscellaneous leather goods afforded slightly more employment. The 256 employers making returns reported 20,252 workers, or 40 fewer than on September 1. A rather larger decline had been noted at the beginning of October of a year

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT IN MANUFACTURING INDUSTRIES BY MAIN DIVISIONS (AVERAGE 1926=100)

| Industries                               | Relative Weight | Oct. 1, 1933 | Sept. 1, 1933 | Oct. 1, 1932 | Oct. 1, 1931 | Oct. 1, 1930 | Oct. 1, 1929 | Oct. 1, 1928 |
|--|-----------------|--------------|---------------|--------------|--------------|--------------|--------------|--------------|

| Other iron and steel products.....       | 1.5             | 68.1         | 67.5          | 67.4         | 87.8         | 98.8         | 113.7        | 114.5        |
| Non-ferrous metal products.....          | 1.7             | 91.6         | 91.6          | 81.7         | 101.8        | 132.5        | 132.9        | 122.3        |
| Non-metallic mineral products.....       | 1.5             | 128.2        | 127.5         | 121.4        | 124.6        | 138.2        | 149.1        | 135.4        |
| Miscellaneous.....                       | .5              | 104.1        | 99.3          | 99.1         | 103.2        | 115.1        | 116.6        | 109.6        |
| <i>All Industries</i> .....              | 100.0           | 90.4         | 88.5          | 86.7         | 103.9        | 116.2        | 125.6        | 118.8        |

The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported by the firms making returns on the date under review.

ago, and the index number was then nearly ten points lower than on the date under review.

*Lumber and Products.*—Further seasonal contractions in personnel were indicated in the lumber group, in which employment was at a higher level than on October 1, 1932. The decrease on the date under review took place almost entirely in rough and dressed lumber mills, while furniture and miscellaneous wood-using factories were decidedly busier. A combined working force of 33,145 persons was reported by the 761 co-operating manufacturers, as compared with 34,442 at the beginning of September. The tendency was downward in all provinces.

*Musical Instruments.*—A slight gain was registered in musical instrument plants, in which employment was duller than during last autumn. Thirty-five establishments reported 861 employees, as compared with 822 in the preceding month.

*Plant Products, Edible.*—Practically all branches of the vegetable food division showed improvement; the largest gains, however, occurred in canning and sugar and syrup factories. The staffs of the 399 reporting firms aggregated 33,902 persons, or 1,270 more than in their last report. Employment was brisker in all provinces, but firms in Ontario showed the most pronounced advances. The general increase was smaller than that registered on the corresponding date in 1933, when the index was slightly higher.

*Pulp and Paper Products.*—There was a decrease in the staffs reported by 561 employers in this group, who had 52,972 workers on their payrolls, as compared with 53,790 at the beginning of September; this took place very largely in pulp and paper mills. Considerable gains were recorded in Ontario and the Western Provinces, but there were large losses in Quebec. A similar reduction, on the whole, had been indicated at the beginning of October a year ago, and the index number then was fractionally lower.

*Rubber Products.*—Employment in rubber goods showed a slight improvement on October 1, 1933; data were compiled from 45 firms with 10,972 employees, as against 10,781 in their last report. A smaller increase had been recorded on the same date in 1932, when employment was quieter.

*Textile Products.*—All branches of the textile group reported heightened activity, but the greatest advance occurred in garment and personal furnishing, hosiery and knitting, headwear and silk factories; 860 manufacturers enlarged their payrolls from 85,880 workers at the beginning of September, to 88,413 on the date under review. Quebec and Ontario re-

corded the bulk of this expansion. Greater gains had been noted at the beginning of October last year, but the index then was lower than on October 1, 1933. Practically uninterrupted expansion has been indicated, on the whole, in the textile trades during the present year, an unusually long period of recovery.

*Tobacco, Distilled and Malt Liquors.*—There was an increase in employment in these industries at the beginning of October, according to the 152 establishments furnishing statistics, which employed 15,096 workers, or 1,004 more than on September 1; beverage and tobacco factories showed greater activity. Employment was in larger volume than in the autumn of 1932, when improvement had also been shown.

*Clay, Glass and Stone Products.*—Reductions in staff were indicated in building material plants, in which employment was in much less volume than on October 1, 1932. The forces of the 183 co-operating employers were decreased by 141 persons to 6,912 at the beginning of October.

*Electric Current.*—No general change occurred in electric current plants on October 1, when 93 establishments reported 13,866 workers, compared with 13,858 on September 1. A decline had been indicated on the corresponding date of last year, the index number then stood at 113.9, compared with 112.2 on October 1, 1933.

*Electrical Appliances.*—Additions to staffs were made in electrical apparatus works, 100 of which had 10,403 employees, or 426 more than in their last report. This gain, which took place mainly in Ontario, was larger than that noted on October 1, 1932, but the index number was then many points higher.

*Iron and Steel Products.*—The heating appliance, steel shipbuilding, foundry and machine shop and some other branches of the iron and steel group registered increased employment, while there were reductions in the automobile, agricultural implement and crude, rolled and forged divisions. Statements were received from 774 manufacturers, whose payrolls aggregated 81,694 persons, as compared with 82,039 in the preceding month. Employment declined in Ontario and the Prairie Provinces, while a betterment was shown in the Maritimes and Quebec. Much more extensive curtailment had been indicated at the beginning of October last year, but employment was then in less volume.

*Non-Ferrous Metal Products.*—A combined working force of 14,376 persons was reported by the 137 co-operating employers, who had 14,393 employees at the beginning of September. There was improvement in smelters

and refineries and in factories using the precious metals, while lead, tin, zinc and copper plants were slacker. The index was some ten points higher than in the autumn of 1932.

### Logging

Statements were tabulated from 223 logging companies, whose staffs were enlarged by 4,514 workers to 17,704 on the date under review. This advance was on a much larger scale than in the early autumn of 1932, and also exceeded the gains noted on October 1, 1931 or 1930. The index was higher than at the beginning of October of the last two years. Camps in Quebec and Ontario absorbed most of the men added to payrolls on October 1 of the present year.

### Mining

*Coal-Mining.*—There was an important increase in coal-mines, in which the index of employment was fractionally lower than on October 1, 1932, when the improvement over the September 1 payrolls was not so marked. Returns were received from 95 operators employing 24,001 persons, as compared with 21,849 in their last report. Gains were indicated in both eastern and western coal fields, those in Alberta being most pronounced.

*Metallic Ores.*—Employment in this group showed an increase on October 1; 81 employers reported 18,763 workers, or 312 more than at the beginning of September. Ontario and British Columbia registered most of the advance. A smaller gain had been noted on the corresponding date last year, and the index number then was many points lower.

*Non-Metallic Minerals, other than Coal.*—Little general change was reported in this group, in which statistics were received from 78 firms employing 5,362 persons. The index was decidedly higher than on October 1, 1932.

### Communications

There was a falling-off in employment in communications, in which the companies and branches furnishing data reported 21,716 employees, as compared with 22,036 on September 1. The index was lower than in the autumn of 1932, when the tendency was also downward.

### Transportation

*Street and Electric Railways and Cartage.*—A slight decrease was indicated in local transportation, 99 persons being released from the forces of the 178 co-operating firms, who reported 24,242 on their payrolls. Employment in this industry was in smaller volume than on October 1 of last year, when the situation had improved as compared with the preceding month.

*Steam Railways.*—Statistics were tabulated from 100 employers in the steam railway operation group, whose payrolls declined from 57,304 on September 1, to 57,259 at the beginning of October. An increase had been indicated on the same date of last year, and the index was then higher. There were reductions on the date under review in Ontario, but gains in the Prairie Provinces.

*Shipping and Stevedoring.*—Moderate improvement was registered in the water transportation group, in which 91 companies employed 15,443 workers; this was an increase of 362 as compared with their payrolls in the preceding month. A slight gain had been noted on October 1 of last year, when the index was a few points lower than on the date under review.

### Construction and Maintenance

*Building.*—Following five months of continuous expansion, there was a decline in employment in building, 248 persons being let out from the forces of the 644 co-operating contractors. They had 18,172 employees; this number was smaller than that reported at the beginning of October a year ago, although a larger decrease had then been indicated. In the Maritime Provinces and British Columbia minor improvement was shown, while the trend was unfavourable in Quebec, Ontario and the Prairie Provinces.

*Highways.*—Employment in this group increased in all except the Maritime Provinces, the gains being partly due to the extension of unemployment relief works in some localities. Statements were tabulated from 357 employers, whose staffs, standing at 67,657, were larger by 11,017 workers than on September 1. The number of persons employed in the group was greater than on October 1, 1932.

*Railways.*—A slight falling-off in employment was reported on railway construction. The forces of the 37 companies and divisional superintendents furnishing returns declined from 27,831 at the beginning of September, to 27,257 on the date under review. Improvement on a small scale was registered on October 1, 1932, when the level of employment was higher.

### Services

The closing of summer hotels, together with losses in laundries and dry cleaning and other service establishments, accounted for a decrease of 1,195 persons in the staffs of the 363 firms in this group whose returns were received, and who employed 21,610 on October 1. The seasonal declines also indicated on the same date last year involved a much larger number of workers, but employment was then rather more active.

### Trade

Retail and wholesale trading establishments increased their personnel; 904 firms reported 84,419 employees, compared with 81,978 in the preceding month. This advance was more pronounced than that recorded on October 1 of 1932 or of any other year for which data are available, a significant indication of the increased purchasing power of the public, resulting from the heightened employment recorded in recent months. The index on the

date under review stood at 115.0, compared with 114.5 on October 1, 1932.

### TABLES

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables. The columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area, or industry, is of the total number of employees reported in Canada by the firms making returns on the date under review.

## (2) Unemployment in Trade Unions at the Close of September, 1933

The term unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged in work other than their own trades or who are idle due to illness are not considered as unemployed. Unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variations in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

The volume of unemployment among local trade union members during September remained approximately the same as in the previous month according to the reports received from an aggregate of 1,762 labour organizations, with 149,310 members. Of these 29,492, or 19.8 per cent were idle on the last day of the month, contrasted with 19.9 per cent of inactivity in August. Fractional improvement in conditions only was apparent from September last year, unemployment at that time standing at 20.4. The level of activity in the various provinces differed but slightly in comparison with August, minor increases and decreases in employment practically offsetting each other. In Alberta a favourable tendency was noted from August, due to increased activity in the coal mines of the province, and in Nova Scotia, New Brunswick, Ontario and Saskatchewan there was very slight advancement. On the other hand, activity in Quebec, Manitoba and British Columbia unions eased off to some extent from the previous month. Compared with the returns for September last year Ontario, New Brunswick and Nova Scotia unions all reported an upward employment trend during the month reviewed, the gains in the first two provinces named being over 2 per cent and in

the latter but nominal. In the remaining provinces there was some curtailment in the volume of work available, Saskatchewan and British Columbia unions showing declines on a rather small scale, and Quebec, Manitoba and Alberta recessions of less than 1 per cent.

A separate compilation is made each month of unemployment in the largest city in each province, with the exception of Prince Edward Island. Conditions in Halifax were substantially improved from August, gains of much lesser proportions being recorded by Saint John and Toronto unions. In Regina also the tendency was toward greater activity, though the change was quite slight. Montreal unions, on the contrary, reported moderate curtailment of activity, and in Winnipeg, Edmonton and Vancouver the recessions were very small. As in the previous comparison, Halifax unions reflected a considerably higher level of employment than in September, 1932. In Saint John and Toronto also a better volume of work was afforded though the gains were not particularly noteworthy and in Regina and Vancouver there was but fractional improvement. Unions in Montreal, however, reported a drop in activity of over 2 per cent and Edmonton and Winnipeg lesser declines.

Appearing with this article is a chart which illustrates the trend of unemployment by months from January, 1927 to date. There was practically no variation in the level of the curve during September from the previous month, almost stationary employment conditions being shown. What slight change was indicated in the curve from September last year was in a favourable direction, employment tending upward during the period reviewed.

The manufacturing industries, with 475 unions reporting a membership of 42,229 persons in September, showed that 8,991 were

without employment on the last day of the month, a percentage of 21.3, contrasting with percentages of 20.1 in August and 21.3 in September a year ago. Leather workers and general labourers reported the most noteworthy curtailment of employment from August, and among pulp and paper makers, fur, iron, steel and brewery workers, bakers and confectioners, printing tradesmen and cigar makers, the trend was also towards lessened activity. On the other hand, metal polishers showed pronounced improvement, which, however, affected very few workers, as their membership formed only a small share

and garment workers, bakers and confectioners and printing tradesmen also suffered some curtailment of activity.

A better employment volume was shown among coal miners during September than in the previous month as manifest by the returns tabulated from 52 unions with a total of 15,375 members. Of these, 1,501 or 9.8 per cent were without work on the last day of the month, in contrast with 13.1 per cent in August. The improvement from August was largely centered in Alberta, due to an increase in orders, though slight gains in employment were apparent in Nova Scotia. Short time

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

of the group total. Hat, cap, wood, textile, garment and glass workers also reported gains in activity which were of moderate proportions. Compared with the situation in the manufacturing industries during September, 1932, employment for cigar makers, hat, cap and textile workers was extensively improved. Pulp and paper makers, iron and steel workers and metal polishers were also somewhat better employed. Of the declines which affected a counteracting influence on the gains just mentioned the most significant occurred among general labourers, leather and wood workers, though fur, jewellery, glass, brewery

work also appeared less prevalent. In British Columbia there was but a nominal adverse change from August conditions. A more favourable situation obtained in the coal mines also as compared with September, 1932, when 12.3 per cent of inactivity was reported in the group as a whole. In this comparison Nova Scotia and British Columbia unions registered heightened employment during the month reviewed, the increase in Nova Scotia involving the greatest number of miners. On the other hand, Alberta miners reported slight employment cessation from September a year ago.

From unions in the building and construction trades 212 reports were received during September, covering a membership of 15,099 persons, 9,930, or 65.8 per cent of whom were idle on the last day of the month in contrast with 63.6 per cent in August. Large increases in slackness from August were reported by electrical workers and granite and stone cutters, while among plumbers and steam-fitters the tendency was towards lesser activity, though the change was but frac-

tional. On the contrary, tile layers, lathers and roofers registered a pronounced gain in activity from August, which, however, affected few workers, and among bridge and structural iron workers, bricklayers, masons and plasterers, and painters, decorators and paperhangers improvement on a moderate scale was noted. The change among carpenters and joiners from August while favourably inclined was practically negligible. Among hod carriers and building labourers the same percentage of idleness was reported in both months under comparison. Curtailment of activity was noted in the building and construction trades also from September, 1932, when 61.5 per cent of the members reported were without employment. Painters, decorators and paperhangers were much better engaged than in September last year and slight gains only occurred for plumbers and steam-fitters. There was, however a decided falling off in activity for electrical workers, granite and stone cutters and hod carriers and building labourers from September a year ago. Among bricklayers, masons and plasterers moderate curtailment of employment was evident, bridge and structural iron workers showing reductions of minor importance, and carpenters and joiners, and tile layers, lathers and roofers fractional recessions only.

Little variation in the employment level was reflected by unions of transportation workers during September from either the previous month or September, 1932, according to the reports tabulated from 774 associations, with 56,496 members. Of these 6,794 were without work on the last day of the month, a percentage of 12.0, contrasted with percentages of 11.4 in August and 11.3 at the end of September a year ago. In the steam railway division, which constituted over 78 per cent of the entire group membership reporting, the situation remained much the same during the three months reviewed, with a slight tendency towards greater activity in September of this year. Conditions for navigation workers, however, were somewhat quieter than in both the previous month and September a year ago. The volume of unemployment reported by teamsters and chauffeurs remained identical with that of August, but considerable improvement was shown in comparison with September, 1932. Among street and electric railway employees the trend was toward a decline in activity from August, though employment tended upward from September a year ago, the changes, however, being of very little importance.

Retail clerks were quite busily engaged during September, the 4 associations making

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

| Month             | N.S. and Prince Edward Island | New Brunswick | Quebec | Ontario | Manitoba | Saskatchewan | Alberta | British Columbia | Canada |
|-------------------|-------------------------------|---------------|--------|---------|----------|--------------|---------|------------------|--------|

returns with 1,026 members showing 0.6 per cent of idleness compared with percentages of 1.1 in August and 1.9 in September last year.

Activity for civic employees eased off slightly during September from the preceding month as indicated by the returns received from 69 locals embracing 6,454 members. Of these, 333 or 5.2 per cent, were without work at the end of the month, contrasted with a percentage of 4.8 in August. A somewhat better volume of employment was available than in September last year, when 7.1 per cent of the members reported were idle.

Reports tabulated for September from 126 unions in the miscellaneous group of trades, covering 4,158 members, showed that 839, or 20.2 per cent, were idle on the last day of the month, contrasted with 19.7 per cent of inactivity in August and with 20.0 per cent in September last year. Theatre and stage employees alone were afforded a greater volume of work than in August, the improvement being about 3 per cent. Curtailment slightly more than offsetting this gain, however, was apparent among unclassified workers, stationary engineers and firemen, and barbers. Hotel and restaurant employees registered an unchanged situation from August. Compared with the return for September last year, theatre and stage employees, with a drop in available work of over 5 per cent during the month reviewed, reported the most noteworthy recessions, lesser declines being shown by barbers and unclassified workers. Condi-

tions for stationary engineers and firemen, however, were moderately improved from September a year ago and slight advancement was noted among hotel and restaurant employees.

Fishermen, with 2 unions reporting during September a membership of 705 persons, indicated an unemployment percentage of 24.8, contrasted with 21.3 per cent of idleness in August. There was a substantial drop in activity from September, 1932, when 10.6 per cent of the members recorded were without employment.

Among lumber workers and loggers during September a better situation obtained than in either the previous month or September last year, the improvement in the latter comparison being quite pronounced. This was manifest by the returns tabulated from 4 associations of these workers with 605 members, 102 or 16.9 per cent of whom were unemployed on the last day of the month, contrasted with percentages of 20.5 in August and 42.3 in September, 1932.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1932, inclusive, and also the percentage of unemployment by provinces for September of each year from 1919 to 1930, inclusive, and for each month from January, 1931, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

### (3) Employment Office Reports for September, 1933

The volume of business transacted by the offices of the Employment Service of Canada during the month of September, 1933, showed only a very slight gain in the average daily placements over those of the preceding month, but a loss of nearly 5 per cent in comparison with the corresponding month a year ago. The slight increase over August in the daily average was due to there being fewer working days in September than during the previous month, the total placements for September being slightly less than those recorded during August. A heavy reduction from the preceding period was noted in farming, followed by a smaller decline in construction and maintenance. Gains were noted in all other groups, the largest in services, manufacturing and logging. In comparison with the corresponding month last year a substantial decline was recorded again in farming, but this was largely offset by a noteworthy gain in construction and maintenance owing to highway relief work

provided by the Government and the various municipalities. Minor losses occurred in trade and transportation, all remaining groups showing gains, the highest, outside of construction and maintenance, being in logging and services.

The accompanying chart shows the trend of employment since January, 1931, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being made semi-monthly. It will be seen from the graph that the curve, both of vacancies and placements in relation to applications, dipped sharply during the first half of September but followed a marked upward trend during the latter half of the month under review and at the end of September had attained a level about 2 points below that shown at the close of the corresponding period a year ago. The ratio of vacancies to each 100 applications was 44.6 during the first half

and 51.5 during the second half of September, 1933, in contrast with the ratios of 65.8 and 54.0 during the corresponding periods of 1932. The ratios of placements to each 100 applications during the periods under review were 42.6 and 49.1, as compared with 60.6 and 51.2 during the corresponding month of 1932.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during September was 1,198, the same as that of the preceding month, while 1,285 was recorded in September a year ago.

The average number of applications for employment received daily by the offices

30,204 persons to vacancies and effected a total of 28,534 placements. Of these, the placements in regular employment were 15,746, of which 11,457 were of men and 4,289 of women, while placements in casual work totalled 12,788. The number of vacancies reported by employers was 21,685 for men and 8,250 for women, a total of 29,935, while applications for work totalled 62,579, of which 48,676 were from men and 13,903 from women. Reports for August, 1933, showed 32,323 positions available, 56,588 applications made and 30,667 placements effected, while in September, 1932, there were recorded 32,111 vacancies, 53,437 applications for work, and 29,944 placements in regular and casual employment.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

during the month under review was 2,504, in comparison with 2,096 in August, 1933, and with 2,138 during September last year.

The average number of placements made daily by the offices of the Service during September 1933 was 1,142, of which 630 were in regular employment and 512 in work of one week's duration or less, as compared with a total daily average of 1,136 during the preceding month. Placements in September a year ago averaged 1,198 daily, consisting of 743 placements in regular and 455 in casual employment. During the month of September, 1933, the offices of the Service referred

The following table gives the placements effected by the offices of the Employment Service, each year, from January, 1923, to date:

| Year                 | Placements |         |         |
|----------------------|------------|---------|---------|
|                      | Regular    | Casual  | Totals  |
| 1923.....            | 347,165    | 115,387 | 462,552 |

\* 294 placements effected by offices since closed.

## NOVA SCOTIA

During the month of September, 1933, positions offered through employment offices in Nova Scotia, were over 47 per cent fewer than in the preceding month, but nearly 54 per cent above the corresponding month of last year. There was a decline of over 52 per cent in placements when compared with August, but a gain of nearly 43 per cent in comparison with September, 1932. This large gain in placements over September of last year was due to work provided in relief of unemployment on road construction, as losses were reported in all other groups, except logging. All changes, however, other than in construction and maintenance were quite small. There were 312 placements in construction and maintenance, and 300 in services. Of the latter, 217 were of household workers. During the month 6 men and 80 women were placed in regular employment.

## NEW BRUNSWICK

There was a decline of over 6 per cent in the number of orders received at employment offices in New Brunswick during September when compared with the preceding month, but a gain of nearly 12 per cent in comparison with the corresponding month of last year. Slightly smaller percentages of change were recorded in placements under both comparisons. Increased placements on highway construction, with small gains in manufacturing and transportation, accounted for the increase over September of last year. Small declines only were reported in other groups. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 37; transportation, 19; construction and maintenance, 633; and services, 406, of which 332 were of household workers. There were 84 men and 63 women placed in regular employment.

## QUEBEC

During September, employment offices in the Province of Quebec received orders for nearly 3 per cent fewer workers than in the preceding month, but 51 per cent more than during the corresponding month of last year. Placements showed a nominal decline only from August, but were 48 per cent above September, 1932. The placement of a large number of female workers through offices which had not been opened in September of last year accounted for the substantial gain under this comparison, although minor increases were also recorded in manufacturing,

construction and maintenance, trade, and farming. Logging was the only group to show any loss of importance. Placements by industrial divisions included: manufacturing, 127; logging, 128; construction and maintenance, 204; trade, 82; and services, 1,820, of which 1,638 were of household workers. Placements in regular employment numbered 587 of men and 1,323 of women.

## ONTARIO

Orders listed at employment offices in Ontario during September called for nearly 4 per cent more workers than in the preceding month and nearly 37 per cent more than during the corresponding month of last year. There was a gain in placements of over 2 per cent when compared with August, and of over 36 per cent in comparison with September, 1932. Increased placements in the highway division of construction and maintenance, with smaller gains in logging, manufacturing and transportation, accounted for the improvement over September of last year. Small losses were reported in services, farming and trade. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 645; logging, 480; farming, 792; transportation, 101; construction and maintenance, 6,380; trade, 321; and services, 3,113, of which 1,884 were of household workers. There were 3,736 men and 1,465 women placed in regular employment during the month.

## MANITOBA

Opportunities for employment, as indicated by orders received at employment offices in Manitoba during September, were over 33 per cent fewer than in the preceding month, and nearly 12 per cent below the corresponding month of last year. There was a decline also in placements of 29 per cent when compared with August, and of 7 per cent in comparison with September, 1932. Reduced placements in farming, services, manufacturing, and trade accounted for the loss from September of last year. This decline was, however, offset to a large degree by a substantial increase in placements on highway construction. The changes in other groups were nominal only. Placements by industrial divisions included: logging, 44; farming, 432; construction and maintenance, 1,713; trade, 26; and services, 791, of which 635 were of household workers. Regular employment was obtained for 1,832 men and 395 women during the month.

## SASKATCHEWAN

There was a loss of 37 per cent in the number of workers required through employment offices in Saskatchewan during September when compared with the preceding month, and of nearly 59 per cent in comparison with the corresponding month of last year. Placements were over 34 per cent less than in August and nearly 54 per cent below September, 1932. A large decrease in farm placements from September of last year accounted for the loss under this comparison, although services also showed a decline. Gains were reported in construction and maintenance and mining, while the changes in other groups were unimportant. Placements by industries included: manufacturing, 38; farming, 1,232; mining, 82; transportation, 28; construction and maintenance, 494; trade, 62; and services, 681, of which 488 were of household workers. There were 1,544 men and 379 women placed in regular employment during the month.

## ALBERTA

Employment opportunities, as indicated by orders received at employment offices in Alberta during September, were nearly 8 per cent better than in the preceding month but 56 per cent less favourable than during the corresponding month of last year. There was a gain of nearly 10 per cent in placements when compared with August, but a loss of over 53 per cent in comparison with September, 1932. Farm placements were considerably less than in September of last year, which accounted for the substantial decline under this comparison. Fewer placements were also made in services. There was an increase in bush placements, and nominal changes only were reported in other groups. Industrial divisions in which most of the placements were made during the month were: manufacturing, 32; logging, 41; farming, 1,216; mining, 44; construction and maintenance, 1,076; trade, 22; and services, 492, of which 389 were of household workers. During the month 1,790 men and 331 women were placed in regular employment.

## BRITISH COLUMBIA

During the month of September, positions offered through employment offices in British Columbia were over 21 per cent more than in the preceding month and nearly 34 per cent above the corresponding month of last year. There was a gain of over 23 per cent in placements when compared with August, and of 34 per cent in comparison with

September, 1932. The increase in placements over September of last year was due to work provided in relief of unemployment on highway construction as small gains in services, logging, and mining were offset by losses in transportation, trade and farming. Placements by industrial divisions included: manufacturing, 28; logging, 58; farming, 76; construction and maintenance, 3,085; and services, 652, of which 422 were of household workers. During the month 1,878 men and 253 women were placed in regular employment.

## Movement of Labour

During the month of September, 1933, the offices of the Employment Service of Canada made 15,746 placements in regular employment, 6,710 of which were of persons for whom the employment found was outside the immediate vicinity of the offices at which they were registered. Of the latter, 322 were granted the Employment Service reduced transportation rate, 291 going to centres within the same province as the despatching office and 31 to other provinces. The reduced transportation rate which is 2-7 cents per mile with a minimum fare of \$4, is granted by the railway companies to bona fide applicants at the Employment Service who may desire to travel to distant employment for which no workers are available locally.

The movement of labour from Ontario centres during September was entirely to provincial points and comprised the transfer of 241 workers. To points within their respective zones Port Arthur transferred 60 bush workers, 2 highway construction cooks, 1 mine cook, and 1 airport construction labourer, Fort William 7 loggers, and Sudbury 113 bush workers. The Sudbury zone was also the destination of 26 loggers travelling from Toronto, and of 15 pulp cutters transferred from North Bay. In addition, the Belleville zone received 1 baker from Hamilton, and Timmins 14 bush workers and 1 carpenter from North Bay. In Manitoba 32 persons availed themselves of the Employment Service reduced transportation rate during September, 31 of whom went to positions outside the province. These all secured their certificates for transportation at the Winnipeg office, and included 21 bushmen, 5 mine workers, 2 hotel workers, and 1 labourer proceeding to points in the Port Arthur zone, and 2 hotel chambermaids going to Regina. The 1 worker sent to provincial employment was a farm hand travelling from Winnipeg to a point within the same zone. The Regina office was responsible for the

labour movement in Saskatchewan during September, which involved the despatch of 3 workers to points within the province. Of these, 2 were teachers for the Regina zone, while 1 was a farm hand for employment in the Saskatoon zone. Reduced rate certificates granted in Alberta during September were 18 in number, all provincial. These were issued at the Edmonton office to 10 mine workers, 5 farm hands, 2 farm household workers, and 1 carpenter going to centres within the Edmonton zone. Business transacted by British Columbia offices in September involved the issue of 28 reduced rate certificates to provincial points. The Vancouver office granted 16 of these to 8 mine workers, 3 bush workers, 3 hotel employees, 1 farm hand, and

1 town housekeeper journeying to centres within the Vancouver zone. In addition, from Vancouver 2 mine workers and 1 fruit cannery worker were despatched to Kamloops and 1 blacksmith, 1 hotel worker and 1 fruit packer to Penticton. To the Penticton zone also were destined 5 fruit pickers travelling from Victoria and 1 apple sorter from New Westminster.

Of the 322 persons who secured Employment Service reduced transportation rate certificates during September 225 journeyed over the Canadian National Railways, 70 over the Canadian Pacific Railway, 15 over the Temiskaming and Northern Ontario Railway, and 12 over the Pacific Great Eastern Railway.

#### (4) Building Permits Issued in Canada in September, 1933

The value of the building permits issued by 61 cities during September stood at \$2,032,839; this was an increase of \$94,757 or 4.9 per cent from the total of \$1,938,082 in August, 1933, but a decrease of \$416,896 or 17.0 per cent in comparison with the aggregate of \$2,449,735 recorded in September of last year. The increase over August, though not large, is interesting because in the experience of the last thirteen years the September total has usually been smaller than that for August, the average decline between the two months amounting to 12 per cent.

Some 50 cities furnished detailed statistics for September, showing that they had issued 250 permits for dwellings estimated to cost approximately \$809,000 and over 1,750 permits for other buildings valued at more than \$1,082,000. During August, authority was granted for the erection of about 200 dwellings and 1,400 other buildings, estimated to cost approximately \$600,000 and \$1,150,000, respectively.

Prince Edward Island, New Brunswick, Quebec, Manitoba and British Columbia reported increases in the estimated value of building as compared with August, 1933, that of \$184,454, or 47.5 per cent in Quebec being greatest. The remaining provinces recorded declines, of which that of \$200,218 or 19.9 per cent in Ontario was most pronounced.

As compared with September, 1932, there were reductions in all provinces with the exception of Prince Edward Island and Quebec, where there were advances of \$91,200 and \$42,322, respectively. In this comparison, British Columbia showed the largest loss of \$179,662 or 40 per cent.

Of the larger cities, Montreal registered a higher total of permits issued than in either the preceding month or the same month of

last year. Winnipeg and Vancouver showed a gain in the former but a loss in the latter comparison, while Toronto showed a decrease in both comparisons. Of the other centres, Charlottetown, New Glasgow, Fredericton, Quebec City, Galt, Niagara Falls, Ottawa, Owen Sound, Peterborough, St. Thomas, Sault Ste. Marie, Welland, Brandon, Prince Rupert and Victoria recorded increases as compared with both August, 1933, and September, 1932.

#### Cumulative Record for First Nine Months 1933

The following table gives the value of the building authorized by 60 cities during September, and in the first nine months of each year since 1920, as well as index numbers for the latter, based upon the total for the corresponding period of 1926 as 100. The average index numbers of wholesale prices of building materials in the first nine months of the years since 1920 are also given (average 1926=100).

| Year      | Value of permits issued in September | Value of permits issued in first nine months | Indexes of value of permits issued first nine months (1926=100) | Average indexes of wholesale prices of building materials in first nine months (Average 1926=100) |
|-----------|--------------------------------------|--|---|---|
|           | \$                                   | \$   |   |   |
| 1933..... | 2,032,839                            | 16,125,512                                   | 13.4  | 77.2  |
| 1932..... | 2,449,735                            | 35,026,199                                   | 29.1  | 77.6  |
| 1931..... | 10,407,999                           | 88,602,995                                   | 73.7  | 82.7  |
| 1930..... | 11,093,020                           | 126,361,350                                  | 105.2   | 92.7  |
| 1929..... | 17,117,017                           | 186,011,017                                  | 154.8   | 99.2  |
| 1928..... | 20,374,149                           | 165,621,634                                  | 137.8   | 96.7  |
| 1927..... | 14,462,243                           | 141,152,535                                  | 117.5   | 96.3  |
| 1926..... | 11,047,503                           | 120,163,936                                  | 100.0   | 100.7   |
| 1925..... | 10,140,853                           | 98,364,181                                   | 81.9  | 103.1   |
| 1924..... | 15,055,250                           | 96,817,333                                   | 80.6  | 108.2   |
| 1923..... | 10,768,898                           | 108,319,972                                  | 90.1  | 111.8   |
| 1922..... | 11,597,034                           | 116,778,450                                  | 97.2  | 108.5   |
| 1921..... | 10,907,828                           | 88,573,442                                   | 73.7  | 126.8   |
| 1920..... | 9,842,677                            | 96,146,278                                   | 80.0  | 144.2   |

The aggregate for the first nine months of this year was lower than in 1932 and earlier years of the record; the average index num-

bers of wholesale prices of building materials, however, were also lower in 1933 than in any other year of the record.

## EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

### Great Britain

THE British *Ministry of Labour Gazette*, October, 1933, summarized the employment situation as follows:—

Employment at September 25, 1933, showed a substantial improvement as compared with a month before, and was much better than in September, 1932, nearly every industry showing a reduction in the numbers unemployed as compared with a year ago. The improvement since August 21, 1933, was most marked in coal mining, iron and steel and tinplate manufacture, engineering, vehicle building, metal goods manufacture, the pottery, textile and leather industries, boot and shoe, furniture, cocoa and chocolate manufacture, and the dress industries except tailoring.

On the other hand, there was seasonal decline in building, public works contracting, hotel and boarding-house service, in the tailoring and distributive trades, and in certain of the food manufacturing industries and transport services.

In the South of England employment showed a slight decline, but was still fair to moderate on the whole. In the Midlands it showed an appreciable improvement, and was moderate. There was an improvement also in the Northern Counties and in Wales, but employment in those areas was still bad. It remained bad also in Scotland and in Northern Ireland, though improving slightly in the latter area.

Among the workpeople, numbering approximately 12,808,000 insured against unemployment in Great Britain and Northern Ireland, and working in practically every industry except agriculture and private domestic service, the percentage unemployed at September 25, 1933 (including those temporarily stopped as well as those wholly unemployed), was 18.5, as compared with 19.2 at August 21, 1933, and with 22.8 at September 26, 1932. The percentage wholly unemployed at September 25, 1933, was 15.4, the same as at August 21, 1933; while the percentage temporarily stopped was 3.1, as compared with 3.8. For males alone, the percentage at September 25, 1933, was 21.7, and for females, 10.1; at August 21, 1933, the corresponding percentages were 22.5 and 10.5.

At September 25, 1933, the number of persons on the Registers of Employment Exchanges

in Great Britain was 1,857,064 wholly unemployed, 393,517 temporarily stopped, and 86,146 normally in casual employment, making a total of 2,336,727. This was 74,410 less than a month before, and 521,284 less than a year before. The total included 1,929,896 men, 57,076 boys, 309,925 women and 39,830 girls.

In Great Britain and Northern Ireland, the total number of persons on the Registers of Employment Exchanges at September 25, 1933, was 2,398,718.

### United States

Index numbers showing the trend of employment and pay rolls in manufacturing industries are computed monthly by the Bureau of Labour Statistics of the U. S. Department of Labour from reports supplied by representative establishments in 89 of the principal manufacturing industries of the United States and covering the pay period ending nearest the 15th of the month. These indexes of employment and pay rolls are figures showing the percentage represented by the number of employees or weekly pay rolls in any month compared with employment and pay rolls in a selected base period. The year 1926 is the Bureau's index base year for manufacturing industries, and the average of the 12 monthly indexes of employment and pay rolls in that year is represented by 100 per cent.

Employment in manufacturing industries increased 3.2 per cent in September, 1933 as compared with August, 1933 and pay rolls increased 2.7 per cent over the month interval. The index of employment in September, 1933 stood at 73.9, compared with 71.6 in August, and the September index of pay rolls was 53.3, compared with 51.9 in the preceding month.

Comparing the changes in employment and pay rolls over the year interval, it is seen that the level of employment in September, 1933, is 26.3 per cent above the level of the September, 1932 employment index (58.5) and pay rolls in September, 1933 showed a gain of 39.9 per cent over the September, 1932 pay-roll index (38.1).

These continued gains in September mark the sixth successive month in which increased employment and pay rolls have been reported in manufacturing industries. While the per-

centage gains in employment and pay rolls in September were not so pronounced as the gains shown in the 4 months immediately preceding, the increases continued on a broad scale, 73 of the 89 manufacturing industries reporting gains in employment over the month interval and 61 industries reporting increases in pay rolls.

These changes in employment and pay rolls in September, 1933 are based on reports supplied by 18,330 establishments in 89 of the principal manufacturing industries of the United States. These establishments reported 3,362,727 employees on their pay rolls during the pay period ending nearest September 15 whose combined weekly earnings were \$62,-766,612. The employment reports received from these co-operating establishments cover approximately 50 per cent of the total wage earners in all manufacturing industries of the country.

The average percentages of increase between August and September over the preceding 10-year period were 1.2 per cent in employment and 0.5 per cent in pay rolls. The increases, therefore, in September of the current year are somewhat larger than the average increases over the preceding 10-year period and may be attributed to a combination of seasonal gains plus an increase in number of workers added to the reporting companies' pay rolls by the adoption of NRA codes.

The Labour Day holiday somewhat lessened the extent of the general increase in pay rolls in September, as a number of establishments which pay on a bi-weekly or one-half monthly basis reported a close-down for the holiday which decreased the average weekly earnings of employees during the period reported.

*Non-Manufacturing Industries.*—A general expansion in employment in September is noted in the group of non-manufacturing industries surveyed by the Bureau of Labour Statistics, each of the 16 non-manufacturing industries reporting increases in number of employees over the month interval, and all but three industries reporting increased pay-roll totals. While the increases shown in several of these industries were seasonal in character, the gains in practically all instances were more pronounced than usual, reflecting increased business activity combined with accessions in number of employees under the various codes.

The increases in employment in September ranged from a pronounced seasonal increase of 55.8 per cent in the canning and preserving industry, which reaches its peak of employment in September, to a gain of 0.2 per cent in the electric-railroad and motor-bus operation

industry. The anthracite mining industry reported a gain of 19 per cent in number of workers coupled with an increase of 30.2 per cent in pay-rolls reflecting seasonal demands. Retail trade establishments reported an increase of slightly more than 10 per cent in employment coupled with a corresponding increase in pay-roll totals. The increases in employment in the remaining 12 industries in the order of their percentage gains were as follows: crude petroleum producing, 8.9 per cent; dyeing and cleaning, 6.7 per cent; metal-liferous mining, 5.8 per cent; bituminous coal mining, 4.7 per cent; building construction, 4.5 per cent; wholesale trade, 3.0 per cent; power and light, 2.8 per cent; hotels, 2.1 per cent; laundries, 1.8 per cent; banks-brokerage-insurance-real estate, 0.7 per cent; and telephone and telegraph, 0.4 per cent.

With the exception of the 3 industries comprising the public utility group, each of the non-manufacturing industries reported more employees on their pay rolls in September 1933 than in September 1932.

On October 23, William Green, president of the American Federation of Labour, stated that the numbers of unemployed had been reduced by 3,600,000 in the past six months.

### Community Sewing in Relief Programs

The organization of community sewing in relief programs in the United States is described in a bulletin recently issued by the Bureau of Home Economics, U.S. Department of Agriculture. "Literally millions of garments," it is stated, "are now being made in this country by volunteer groups working under the direction of the Extension Service and national and local relief agencies. The American Red Cross, through its local chapters, made clothing for more than four million persons during the winter beginning November, 1932. In every community women are coming together to sew in community workrooms or are making garments at home as part of the relief program of organized groups."

The bulletin gives practical rules for the guidance of these voluntary workers in order that the garments provided may be of standard quality and appearance. The rules deal with the proper equipment for workrooms, the selection of patterns and choice of fabrics, uses of old clothing, and construction of clothing. Suggested designs for clothing are also included.

## FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

**T**HE Department of Labour is furnished from month to month with information regarding the contracts executed by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government with respect to contracts "for construction, remodelling, repair or demolition of any work" is set forth in an Act of Parliament adopted on May 30, 1930, entitled "The Fair Wages and Eight-Hour Day Act" (chapter 20-21, Geo. V). The full text of this measure appeared in the *LABOUR GAZETTE*, April, 1930, page 383. The Fair Wages and Eight-Hour Day Act provides as follows:—

3. (1) Every contract made hereafter with the Government of Canada for construction, remodelling, repairs or demolition of any work shall be subject to the following conditions respecting wages and hours:—

(a) All persons in the employ of the contractor, sub-contractor, or of any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall be paid such wages as are generally accepted as current from time to time for competent workmen in the district in which the work is being performed for the character or class of work in which they are respectively engaged; provided that wages shall in all cases be such as are fair and reasonable;

(b) The working hours of persons while so employed shall not exceed eight hours per day except in such special cases as the Governor in Council may otherwise provide, or, except in cases of emergency, as may be approved by the Minister.

(2) The provisions of this section shall not apply to persons employed in the fabrication or manufacture of materials, supplies or equipment for use in the work contemplated where such fabrication or manufacture is carried on in any established plant or factory other than a plant or factory established for the purposes of the work contemplated.

The Fair Wages Policy was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by Order in Council of April 9, 1924. The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wages rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

In addition to the requirements of the Fair Wages and Eight-Hour Day Act, government contracts for the construction, remodelling, repair or demolition of any work, contain a number of other provisions for the protection

of the workmen employed, which are sanctioned by the foregoing Orders in Council.

It is further provided in the foregoing Orders in Council that "all contracts for the manufacture and supply to the Government of Canada of fittings for public buildings; harness, saddlery, clothing and other outfit for the military and naval forces, Royal Canadian Mounted Police, letter carriers, and other Government officers and employees; mail bags, letter boxes, and other postal stores; and any other articles and things hereinafter designated by the Governor in Council" must contain provisions for the observance of the current wages rates and working hours in the district, or, in the absence of any such current standards, fair and reasonable rates and working hours. These conditions, which are referred to in the Orders in Council as "B" conditions (the Conditions of the Fair Wages Orders in Council with reference to building and construction works being designated as "A" conditions), include the following Fair Wages Clause:—

All workmen, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed, and if there be no current rate in such district, then a fair and reasonable rate, and shall work such hours as those fixed by the custom of the trade as respects hours in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district then fair and reasonable hours, except for the protection of life and property, or on due cause shown to the satisfaction of the Minister of Labour. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade or fair and reasonable hours it shall be determined by the Minister of Labour, whose decision shall be final; payment may also be withheld of any moneys which would otherwise be payable to the contractor until the Minister of Labour's decision has been complied with.

By the term "current wages" and the term "hours of labour fixed by the custom of the trade" in the foregoing are meant respectively the standard rates of wages and hours of labour either recognized by signed agreements between employers and workmen in the district from which the labour required is necessarily drawn or actually prevailing, although not necessarily recognized by signed agreements.

Both in the case of contracts for building and construction work, and in the "B" conditions sanctioned by Orders in Council applicable to contracts for the manufacture of certain classes of supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates and working hours.

The contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and address of all workmen in his employ and the wages paid to and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workman employed claim therefore may be filed with the Minister of the Department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of the contract shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contract are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of certain classes of supplies listed in the Fair Wages Orders in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts, for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any disputes which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts, containing fair wages conditions, have been recently executed by the Government of Canada:—

#### DEPARTMENT OF NATIONAL DEFENCE

##### *Contracts in Group "B" (Manufacture and Supply of Clothing, Interior Fittings, etc.)*

The following is a statement of contracts awarded by the Department of National Defence between June 30 and October 31, inclusive, for various classes of manufactured goods, which contracts included in all cases the "B" labour conditions above referred to:—

| Details of Contract                     | Contractors                                     | Amount of Contract |
|---|---|--------------------|
|   |   | \$ cts.            |
| Leather mitts, 10,000 pairs.            | Aerne Glove Works Ltd. Montreal, P.Q.           | 2,083 00           |
| Leather mitts, 10,000 pairs.            | Aerne Glove Works Ltd. Montreal, P.Q.           | 2,083 00           |
| Breeches, 675 pairs.....                | Woods Mfg. Co., Ltd., Ottawa, Ont.              | 1,445 00           |
| Caps, forage, 1,580.....                | Wm. Scully, Ltd., Montreal, P.Q.                | 1,427 00           |
| Boots, 10,000 pairs.....                | Eudore Fournier, Plessisville, P.Q.             | 32,648 00          |
| Winter shirts and drawers, 13,333 each. | Galt Knitting Co., Galt, Ont.                   | 12,955 00          |
| Mackinaw coats, 10,000                  | Canadian Converters Co., Ltd., Montreal, P.Q.   | 38,160 00          |
| " 10,000                                | Royal Brand Clothing Co., Montreal, P.Q.        | 41,467 00          |

## DEPARTMENT OF PUBLIC WORKS

*Contracts in Group "A" (Construction, etc.)*

Construction of a public wharf at Shebandowan, Ontario. Name of Contractors, Messrs. MacKenzie & Morrison, Ltd., Fort William, Ont. Date of contract, September 22, 1933. Amount of contract, approximately \$3,900. A fair wages schedule was inserted in the contract as follows:—

| Trade or class of labour        | Rates of wages not less than | Hours of labour not more than |
|---------------------------------|------------------------------|-------------------------------|
|                                 | per hour                     | per day                       |
| Pile driver runners.....        | \$0 65                       | 8                             |
| Hoist operators (steam).....    | 0 65                         | 8                             |
| Hoist operators (gasoline)..... | 0 50                         | 8                             |
| Teamsters (team and wagon)..... | 0 65                         | 8                             |
| *Timbermen.....                 | 0 42                         | 8                             |
| Labourers.....                  | 0 35                         | 8                             |
| Quarrymen.....                  | 0 40                         | 8                             |

\* For cribmen (using such tools as broad-axe, adze, saw, hammer, auger).

Construction of protection work at Notre Dame de Pierreville, Yamaska, Co., P.Q. Name of contractor, Mr. J. A. Doucet, St. Jacques des Piles, P.Q. Date of contract, October 17, 1933. Amount of contract, approximately \$10,262.50. A fair wages schedule was inserted in the contract as follows:—

| Trade or class of labour     | Rates of wages not less than | Hours of labour not more than |
|------------------------------|------------------------------|-------------------------------|
|                              | per hour                     | per day                       |
| Drivers, horse and cart..... | \$0 45                       | 8                             |
| Drivers, team and wagon..... | 0 55                         | 8                             |
| Labourers.....               | 0 30                         | 8                             |
| Carpenters.....              | 0 50                         | 8                             |
| Masons.....                  | 0 70                         | 8                             |
| Blacksmiths.....             | 0 45                         | 8                             |

Construction of wharf repairs and improvements at Port Clements, Skeena District, B.C. Name of contractors, Victoria Pile Driving Co., Ltd., Victoria, B.C. Date of contract, September 25, 1933. Amount of contract, approximately \$5,376.65. A fair wages schedule was inserted in the contract as follows:—

| Trade or class of labour   | Rates of wages not less than | Hours of labour not more than |
|----------------------------|------------------------------|-------------------------------|
|                            | per hour                     | per day                       |
| Pile driver foremen.....   | \$1 12½                      | 8                             |
| Pile driver engineers..... | 1 00                         | 8                             |
| Pile driver men.....       | 0 90                         | 8                             |
| Pile driver boom men.....  | 0 90                         | 8                             |
| Bridgemen.....             | 0 90                         | 8                             |
| *Timbermen.....            | 0 90                         | 8                             |
| Firemen.....               | 0 65                         | 8                             |
| Labourers.....             | 0 45                         | 8                             |

\* Or cribmen (using such tools as broad-axe, adze, saw, hammer, auger).

Filling work behind protection wall at Maitland, Ontario. Name of contractors, Messrs. Jos. Bell, James J. Murray, Arthur Teal and James Hilton, Niagara Falls, Ont. Date of contract, September 16, 1933. Amount of contract, approximately \$5,007.50. A fair wages schedule was inserted in the contract as follows:—

| Trade or class of labour        | Rates of wages not less than | Hours of labour not more than |
|---------------------------------|------------------------------|-------------------------------|
|                                 | per hour                     | per day                       |
| Blacksmiths.....                | \$0 55                       | 8                             |

## RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the Department. Such agreements are summarized each month in the LABOUR GAZETTE. In the majority of cases the agreements are signed by both the employers and employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In addition to these, important schedules of wages are summarized, including civic schedules. In each agreement or schedule the rates of wages for the principal classes of labour are given, with other information of general interest.

### Manufacturing: Wood Products

STRATFORD, ONTARIO.—PRESTON NOELTING LIMITED (FURNITURE MANUFACTURERS) AND THE SHOP COMMITTEE REPRESENTING MEMBERS OF THE CHESTERFIELD AND FURNITURE WORKERS INDUSTRIAL UNION.

Agreement made following the strike reported in the LABOUR GAZETTE, October, page 986, and this issue page 1075, to be in effect from October 18, 1933, for one year, and thereafter from year to year, subject to notice.

It is provided that any group or groups or individuals as employees of the Company shall have the right to organize and bargain collectively through representatives of the employed body of their own choosing. The Shop Committee to consist of six members, one from each Department, namely, Machine, Cabinet, Finishing, Trimming and Packing, Stationery and Steel, and must be employees of at least one year's standing with the Company. The Company to meet such Committee at all reasonable times to discuss questions of wages, working conditions, hours, etc. No discrimination to be shown against members of the Shop Committee or any employees on account of their union activities.

Hours: 44 per week.

Overtime: time and one-quarter after 48 hours per week, providing competing industry is paying a similar rate.

Wages: minimum wages for girls to be in accordance with minimum wage scales for Ontario. All girls and pieceworkers to receive an increase of 12½ per cent over rates in effect prior to the strike. Minimum wages for men over 21 years of age to be: 26 cents per hour for unskilled labour, 30 cents for semi-skilled labour and 35 cents for skilled labour. Minimum wages for boys of 16 years: 15 cents per hour. The wages of individual employees to be increased according to their ability. All complaints as to piecework rates to be adjusted as soon as possible, such adjustment to apply back to the beginning of the job. The shop committee to be consulted by the company before any reduction is made in piecework rates.

Any extra help engaged by the company after the date of this agreement to be laid off work before the hours are reduced below 44 per week, unless otherwise agreed to by the shop committee. Work in any department to be distributed as equally as possible among the employees of that department.

"The committee and the employees represented by the Committee shall not go on strike in sympathy with any other plants anywhere in Canada, unless the company receives work left unfinished by another plant or factory that is on strike.

"All differences or disputes arising within the plant shall be adjusted exclusively by the company and the shop committee without any outside interference or influence whatsoever."

### STRATFORD, ONTARIO.—CERTAIN FURNITURE MANUFACTURERS AND COMMITTEES OF THEIR EMPLOYEES.

Agreements made following the strike noted in the LABOUR GAZETTE, October, page 986, and this issue page 1075, to be in effect from resumption of work after the strike, early in November, 1933, until October 1, 1934, when it may be terminated on that date by either party giving certain prior notice.

"The company recognizes the right of the employees to become organized into a union of their own choice, but no employee shall be compelled to belong to any union."

"There shall be no discrimination on the part of an employee or the management in respect to race, creed, society, fraternity or union."

Employees to be represented by a Shop Committee consisting of representatives of the employees who shall be nominated and elected by secret ballot of all employees, and this Committee to consist of one man from each department of each plant. Members of this Committee to be paid for one hour every two weeks for meeting purposes during the first six months. "The election of the shop committee shall be under the supervision of a member of an international or national union, who shall be mutually agreed upon. Nominations for the shop committee shall be received and in order to qualify for such, those nominated must be: (1) in the employment of the company at least one year immediately prior to September 14, 1933; (2) Not a foreman or employee in administrative or confidential capacity."

Hours: 44 per week with a maximum of 50, after which overtime will commence. Overtime to be worked only when necessary and to be kept at the lowest possible minimum.

Wages and piecework rates to be as arranged with the shop committee. (These are stated to be on the basis of a 10 per cent increase over rates in effect prior to the strike).

Work in different departments in the shop to be equally distributed. When the management finds it necessary to reduce the staff, employees of less than six months continuous service to be laid off first.

"Any matter requiring adjustment may in the first instance be referred by the employee affected, either personally or with his representative on the shop committee, to the foreman of the work on which the employee is engaged. If the foreman fails to adjust satisfactorily any matter referred to him, it shall then be taken up by the shop committee and if a satisfactory adjustment cannot be arrived at, the matter is

to be reduced to writing and forwarded to the President of the company or to a person, or persons, designated by him. Decisions must be made within seven days. Members of the shop committee must be employees of at least twelve months standing."

"The employees shall not go out on a sympathetic strike, except in case of work being received from another company where a strike or lockout is in progress."

### Construction: Buildings and Structures

#### THREE RIVERS, QUEBEC.—A CERTAIN CONTRACTOR AND THE NATIONAL CATHOLIC UNIONS OF CONSTRUCTION WORKERS OF THREE RIVERS.

This agreement, which covers a contract for building a chapel, came into effect October 16, 1933, and remains in effect until the completion of the contract.

The agreement is similar to the one between these unions and contractors for work at St. Prospère, Quebec, which was summarized in the LABOUR GAZETTE, July, 1933, page 732, with the following exceptions:—

Employment is limited to members of the above unions who are residents of Three Rivers or Cap-de-la-Madeleine.

Hours to be in accordance with the new law limiting hours of labour which has been in effect since July 15, 1933 (LABOUR GAZETTE, August, 1933, page 776).

Wages rates are those fixed by the above unions for Three Rivers for the year April 30, 1933, to April 30, 1934, and are as follows: bricklayers, plasterers and masons 75 cents per hour; terrazzo, tile and mosaic layers 60 cents; plumbers, steamfitters and tinsmiths, stationary engineers of portable machines, pointers and cement finishers, 50 cents; carpenters and joiners, licensed electricians, painters, steel workers and driver supplying one horse, 45 cents; driver supplying two horses, 55 cents; junior journeymen plumbers, licensed firemen, plaster mixers and hod carriers, mortar mixers and celanite mixers, metal lathers, reinforced concrete workers, 40 cents; ordinary labourers, 35 cents; wood lathers \$1.50 per thousand.

### Construction: Miscellaneous

#### BRITISH COLUMBIA.—CERTAIN ELECTRICAL CONSTRUCTION COMPANIES AND THEIR EMPLOYEES, MEMBERS OF THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS.

This agreement covers contract work for line and station construction and is similar to the agreement between the union and the British Columbia Electric Railway Company, summarized below under the heading: Transportation and Public Utilities: Electricity and Gas, in so far as that agreement covers line and station construction work, with the following exception:—

Wage rates are 25 cents per day higher than paid by the British Columbia Electric Railway Company, this higher wage rate being in place of free or reduced rates for transportation, domestic electricity and gas.

(The agreement of the British Columbia Electric Railway Company summarized below includes employees of that company engaged in line and station construction work.)

### Transportation and Public Utilities: Electricity and Gas

#### MOOSE JAW, SASK.—NATIONAL LIGHT AND POWER COMPANY LIMITED AND THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL No. 802.

Agreement to be in effect from May 1, 1933, to April 30, 1934, and thereafter subject to 30 days' notice from either party.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, December, 1932, page 1336, and January, 1932, page 91, with the following exceptions:—

Hours: regular hours to be 44 per week except for regular troublemen and employees assigned to work of an unusual or special nature. (The regular hours previously in effect were 48 per week.) A shorter working week may be adopted, if full time is not required.

Wages per hour: sub line foreman 80 cents, first class journeymen linemen 75 cents (reductions of 7½ cents per hour), second class journeymen linemen 65 cents (a reduction of 5 cents per hour). Troublemen \$148 per month (a reduction of \$14 per month).

#### MOOSE JAW, SASK.—NATIONAL LIGHT AND POWER COMPANY LIMITED AND THE SASKATCHEWAN BROTHERHOOD OF STEAM AND OPERATING ENGINEERS, LOCAL No. 2.

Agreement to be in effect from March 1, 1933, to February 28, 1934, and thereafter subject to 30 days' notice from either party.

This agreement is the same as the one previously in effect and summarized in the LABOUR GAZETTE, December, 1932, page 1336, and June, 1931, page 711, with the following exception:—

Wages per hour: shift engineers 81 cents, firemen 63 cents, oilers with second class certificate 55 cents, foreman of repairmen 67½ cents, repairmen 61 cents (reductions of 10 per cent in each case); oilers with third class certificate 47½ cents, coal and ash men 50 cents, repairmen's helpers 40 to 60 cents (no change for these three classes).

#### BRITISH COLUMBIA.—BRITISH COLUMBIA ELECTRIC RAILWAY COMPANY, LIMITED, VANCOUVER POWER COMPANY, LIMITED, VANCOUVER ISLAND POWER COMPANY, LIMITED, WESTERN POWER COMPANY OF CANADA, LIMITED, AND THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL No. 213 (VANCOUVER) AND LOCAL No. 230 (VICTORIA).

Agreement to be in effect from April 16, 1933, and thereafter subject to 30 days' notice from either party.

Only union members to be employed on electrical work as specified. The union representative to have access to all shops and stations and to be given a transportation pass on all the company's lines.

Hours for linemen, wiremen and winders: 8 per day, 4 on Saturdays, a 44 hour week; shift work also limited to 44 per week except for regular trouble work (troublemen, drivers and helpers) who may work 8 hours per day, 6 days per week. Hours for metermen and are trimmers: 48 per week. Hours for station operating staff: 8 per day with 4 days off per month.

Overtime for linemen, wiremen and winders: time and one-half for first four hours, double time thereafter and double time for work on Sundays and holidays for other than shift men. Overtime for metermen and arc trimmers: time and one-half, with double time for metermen working on Sundays and holidays. Overtime for station operating staff: one and one-half the amount of time worked as overtime to be allowed off; if required to work more than one shift in 24 hours (except when changing shifts) time and one-half to be paid for the second shift.

For station operating staff and arc trimmers, an annual vacation of two weeks with pay to be allowed and a reasonable amount of time in case of sickness will be allowed with pay, at the discretion of the Superintendent.

Wages are approximately 10 per cent reduced from the rates which were in effect since 1928, and are now as follows:—

Wages per day: *Line Department and Wiremen*: lead covered cable foreman \$8.55, journeyman cable splicer \$7.88, foreman lineman, wireman or winder \$8.33, sub-foreman lineman, wireman or winder \$7.65, journeyman lineman, wireman or winder \$6.98, line or tower truck driver \$4.95, groundman or helper \$4.95, track bonder \$6.98; apprentice lineman and wiremen from \$3.85 for beginners to \$6.98 after three years' apprenticeship; apprentice cable splicers from \$6.55 for beginners to \$7.88 after three years' apprenticeship. *Meter Department*: metermen \$5.90, chief meter tester \$6.30, meter foreman \$7.23; apprentice metermen from \$4.58 during first year to \$5.30 during third year. Wages per month: *Arc Trimmers*: \$127.25. *Station Operating Staff*: station operators \$162.45 at Class A stations, \$150.72 at Class B stations and \$143.50 at Class C stations, apprentice operators from \$113.60 during first year to \$126 during third year; engineer in charge of Class A stations \$185.01, of Class B stations \$162.45 and of Class C stations \$151.62; floormen and helpers \$113.72, load dispatchers \$189.53, chief load dispatchers \$194.04.

Employees are granted certain concessions of cheaper rates for gas and electricity for their domestic use and free transportation on local lines and free passes or reduced rates for themselves and their dependents over other lines at certain times.

For work of linemen, wiremen and winders and metermen away from headquarters on a temporary job of more than one and less than twelve days, board to be paid by the company.

Apprentices to serve three years before becoming journeymen. Not more than one apprentice to four journeymen in each department. All cable splicers' helpers to be journeymen electrical workers. An employee assisting journeymen linemen, wiremen and winders in various classes of electrical work shall be classed as a groundman or helper. Foremen linemen, wiremen and winders are employees in charge of more than four journeymen, apprentices or groundmen or more than twelve labourers, while a sub-foreman is one in charge of four or less journeymen, apprentices or groundmen or twelve or less labourers.

Certain regulations to ensure safety for work of a dangerous nature are specified and men working on poles, bridges, towers and fixtures

at an elevation of 85 feet or over to be paid the regular rate plus 75 cents per hour.

The Company will meet a representative or committee of the union to discuss any matter affecting this agreement.

### Transportation and Public Utilities: Street and Electric Railways

PORT ARTHUR, ONTARIO.—PUBLIC UTILITIES COMMISSION OF PORT ARTHUR AND THE AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES OF AMERICA, LOCAL NO. 966, AND ALL OTHER EMPLOYEES OF THE STREET RAILWAY DEPARTMENT OF THE CITY OF PORT ARTHUR.

Agreement to be in effect from May 1, 1933, to May 1, 1934, and till new agreement reached.

No discrimination to be shown employees on account of being union members, but employees will not interfere with the Management's right to discharge any employee for sufficient reason. Any employee who feels he has been unjustly dealt with may have his case investigated by a committee of employees and the Manager, and if they disagree, it may be referred to the Public Utilities Commission, whose decision will be final.

Hours for Transportation Department to be in accordance with the Ontario Statutes governing Street Railways; if hours further reduced, employees may confer with the Commission with a view to adjusting wage rates. Hours for Car House Department and Track Department: 44 per week.

Wages: to the agreement is attached a rider in effect from May 1, 1933, to May 1, 1934, which reduces the wage rates  $\frac{4}{5}$  to 5 cents per hour in the Transportation Department,  $\frac{3}{4}$  to 4 cents in the Car House Department and 4 cents in the Track Department, from the rates actually embodied in the agreement. The rates as so reduced are the same as in effect since May 1, 1932, and are as follows:—Transportation Department: two man car operators 40 cents per hour for first six months,  $45\frac{1}{2}$  cents for second six months and 50 cents thereafter; one man car operators  $7\frac{1}{2}$  cents per hour over two man rate; Car House Department: carpenter 61 cents per hour, painter 57 cents, machinist and blacksmith 61 cents, first class pitmen 56 cents, second class pitmen 51 cents, car cleaners  $46\frac{1}{2}$  cents; Track Department: track bonder 47 cents, regular trackmen 45 cents.

Overtime for Transportation Department: time and one half for work over ten hours per day, or 10 hours and 20 minutes in case of a certain shift, and for work on their day off and on legal holidays. Payment to be made for a minimum number of hours for each call for extra work or runs. Regular spare men to be paid at least for 36 hours per week. Overtime for Car House Department and Track Department: time and one half, and the same for work on Sundays and holidays.

Seniority to be considered in filling vacancies, and in choosing runs.

Uniforms to be supplied by the Commission. Free transportation to all employees covered by the agreement.

FORT WILLIAM, ONTARIO.—THE CITY OF FORT WILLIAM AND THE AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES OF AMERICA, LOCAL No. 966, AND ALL OTHER EMPLOYEES OF THE STREET RAILWAY DEPARTMENT.

Agreement to be in effect from May 1, 1933, to May 1, 1934, and until a new agreement is reached.

This agreement with rider governing wage rates for the year May 1, 1933, to April 30, 1934, is similar to the one summarized above for Port Arthur with the following exceptions:

Regular hours in the Car House Department and Track Department are not stated.

Wages in the Transportation Department during first six months are 40½ cents per hour for two-man car operators and 48 cents for one man car operators. Wages in Track Department 47 cents per hour for regular trackmen.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, OCTOBER, 1933

### Cost of Living, Prices of Staple Articles and Index Numbers

THE cost per week of the family budget in terms of retail prices was practically unchanged, foods showing the same cost as in September while a slight increase in fuel was offset by a fall in rent. The Dominion Bureau of Statistics index number of wholesale prices declined due mainly to lower prices for grains, live stock and non-ferrous metals.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in sixty-nine cities was \$7.24 at the beginning of October, the same as for September, as compared with \$7.07 for October, 1932; \$11.68 for October, 1929; \$10.93 for October, 1926; \$11.48 for October, 1921; \$16.92 for June, 1920 (the post-war peak); and \$7.99 for October, 1914. The most important decreases occurred in the costs of beef, mutton, and potatoes while the largest advances were in the costs of lard, eggs and milk. Including the cost of fuel and rent with that of foods the total budget averaged \$15.78 for October and September, as compared with \$16.40 for October, 1932; \$21.96 for October, 1929; \$21.14 for October, 1926; \$22.01 for October, 1921; \$26.92 for July, 1920 (the post-war peak); and \$14.48 for October, 1914. Fuel was slightly higher due to seasonal increases in the price of coal, while a slight decline occurred in rent.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics was again lower at 67.9 for October as compared with 68.9 for September. Figures for certain previous dates are, 65.0 for October, 1932; 96.8 for October, 1929; 98.1 for October, 1926; 99.6 for October, 1921; 164.3 for May, 1920 (the post-war peak); and 66.8 for October, 1914. One hundred and twelve prices quotations declined, fifty-nine advanced and three hundred and thirty-one were unchanged.

In the grouping according to chief component materials five of the eight main groups were lower and three were higher. The groups which declined were: the Vegetables and Vegetable Products group, due chiefly to lower prices for grains and milled products; the Ani-

mals and their Products group, because of declines in the prices of steers, hogs, hides and meats which more than offset advances in the prices of calves, milk, butter and eggs; the Fibres, Textiles and Textile Products group, mainly because of lower quotations for raw silk, cotton fabrics and thread; the Non-Ferrous Metals and their Products group, because of declines in the prices of copper, lead, silver and zinc which more than offset an advance in the price of tin; and the Chemicals and Allied Products group, because of lower prices for alum, copper sulphate, zinc oxide and certain other chemicals. The Wood, Wood Products and Paper group was slightly higher, chiefly on account of increased prices for newsprint, wood pulp, and certain lines of lumber. The Iron and its Products group and the Non-Metallic Minerals and their Products group were both higher, the former because of increased quotations for steel sheets and tin plate, and the latter due to advanced quotations for window glass and fuel oil.

In the grouping according to purpose consumers' goods were unchanged, lower prices for flour and milled products, fresh and cured meats, milk and its products offsetting higher prices for dried fruits, canned vegetables, eggs and petroleum products. Producers' goods were substantially lower, mainly because of lower prices for materials for the furs and leather goods industries, for the meat packing industries, for the milling and other industries, and for the textile and clothing industries.

In the grouping according to origin Canadian farm products and articles of marine origin were lower, articles of forest origin were slightly higher and articles of mineral origin were unchanged. Both raw and partly manufactured goods and fully and chiefly manufactured goods were lower.

### EXPLANATORY NOTE AS TO RETAIL PRICES

The table of retail prices and rentals shows the prices at the beginning of October of seventy-one staple foodstuffs, groceries, coal,

wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amounts due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which statistics were available when first published in the LABOUR GAZETTE in January, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But, as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tends to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

### Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expendi-

\*The figures for 'all items' were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18½%; Clothing, 18½%; Sundries, 20%. †Revised.

ture for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and costs of the various items from 1913 to 1926, weighted according to the importance of each item in workingmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

## Retail Prices

Beef prices were lower in most localities, sirloin steak declining from an average of 22 cents per pound in September to 20.7 cents in October, rib roast from 16.5 cents per pound to 15.7 cents and shoulder roast from 11.5 cents per pound to 11 cents. Veal and mutton were also lower, the former averaging 11.5 cents per pound as compared with 11.8 cents in September, and the latter 17.9 cents per pound as compared with 18.8 cents in September. Breakfast bacon was slightly higher at an average price of 21.3 cents per pound. Lard was up from an average price of 12.8 cents per pound in September to 13.1 cents in October.

Eggs were generally higher, fresh being up from an average price of 24.4 cents per dozen in September to 29.2 cents in October and cooking from 19.5 cents per dozen in September to 22.7 cents in October. Increases were greater in Ontario and the Western provinces than in other localities. Milk showed seasonal advances in some localities, the price averaging 9.5 cents per quart as compared with 9.3 cents in September and 9.4 cents in October last year. The price of creamery butter was fractionally lower at 24.2 cents per pound. Stocks of butter in cold storage at the beginning of October were reported to be about twenty-five per cent higher than a year ago.

The price of bread was unchanged at an average of 5.9 cents per pound, increases in some localities being offset by declines in others. Onions were generally lower at 3.5 cents per pound as compared with 4.6 cents in September. Potatoes were again lower, the price in October averaging \$1.23 per ninety pounds as compared with \$1.43 in September and 80 cents in October, 1932. Evaporated apples were down in the average from 15.5 cents per pound in September to 15.1 cents in October, decreases being more pronounced in the western provinces. The price of anthracite coal was up from an average of \$14.80 per ton in September to \$14.99 in October. The price a year ago was \$15.27 per ton. In-

sonal advances in some localities, the price averaging 9.5 cents per quart as compared with 9.3 cents in September and 9.4 cents in October last year. The price of creamery butter was fractionally lower at 24.2 cents per pound. Stocks of butter in cold storage at the beginning of October were reported to be about twenty-five per cent higher than a year ago.

creases in October were reported from Orillia, Niagara Falls, St. Catharines, Hamilton, Brantford, Galt, Guelph, Kitchener, London and North Bay. A slight decline in rent was reported from Halifax and Winnipeg.

The following are the prices reported for Welsh coal, domestic sizes: Halifax, \$16; Charlottetown, \$14.40; Moncton, \$16; Saint John, \$13; Quebec, \$13.50; Three Rivers, \$15; Sherbrooke, \$16; St. Hyacinthe, \$14.75; Montreal, \$14.50-\$14.75; Ottawa, \$16.25; Kingston, \$15.50; Belleville, \$15.50; Peterborough, \$16.25; Toronto, \$14.75; Oshawa, \$14.50; St. Catharines, \$15.50; Hamilton, \$14.75; Galt, \$16; Sudbury, \$17; Cobalt, \$17.75; Timmins, \$18.75; Port Arthur, \$16; Fort William, \$16; Winnipeg, \$19.50.

#### Wholesale Prices

The following is a summary of a statement on wholesale prices changes during the month issued by the Dominion Bureau of Statistics.

Grain prices were again considerably lower, No. 1 Manitoba northern cash wheat, Fort William and Port Arthur basis, being down from an average of 67.2 cents per bushel in September to 60.5 cents in October. The high price for the month was 65½ cents per bushel reached on the 25th and the low 54½ cents per bushel reached on the 16th. Lack of export demand together with reports that wheat was being offered from Germany and Russia were said to be factors in the decline in price. In coarse grains western barley was down from 37.2 cents per bushel to 32.8 cents, flax from \$1.47 per bushel to \$1.31, western oats from 34.3 cents per bushel to 29.4 cents and rye from 52.7 cents per bushel to 42.1 cents. Flour at Montreal was 50 cents per barrel lower at \$4.80. Rolled oats was down 50 cents per ninety pounds to \$2.45, while bran and shorts at Montreal were each 61 cents per

ton lower, the former at \$17.56 and the latter at \$18.56. Raw sugar at New York was down from \$1.67 per cwt. to \$1.32, while granulated at Montreal was unchanged at \$6.47 per cwt. Raw rubber at New York was slightly higher at 8.6 cents per pound as compared with 8.3 cents in September. In live stock choice steers at Toronto declined from \$4.50 per hundred pounds to \$4.30 and at Winnipeg from \$3.19 per hundred pounds to \$2.74. Veal calves were slightly lower at Toronto but at Winnipeg the price rose from \$4.44 per hundred pounds to \$4.61. Lambs at Toronto advanced from \$5.64 per hundred pounds to \$6.09, the same grade at Winnipeg averaging \$4.93 per hundred pounds as compared with \$4.95 in September. Bacon hogs at Montreal declined from \$7.19 per hundred pounds to \$6.03, at Toronto from \$6.84 per hundred pounds to \$5.80 and at Winnipeg from \$6.28 per hundred pounds to \$5.23. Creamery butter at Montreal was little changed at 21 cents per pound. Fresh eggs at Montreal advanced from 29.5 cents per dozen to 39 cents and at Toronto from 26.6 cents per dozen to 37.9 cents. The numbers in cold storage at the beginning of October were said to be about 10 per cent less than at the beginning of September. Raw cotton at New York was down from 10 cents per pound to 9.8 cents. The higher crop estimate at October first was said to be a factor influencing the movement. Raw silk at New York was down from \$2.16 per pound to \$1.80, while raw wool was unchanged at a price of 17-20 cents per pound. Spruce lumber was 50 cents per thousand board feet higher at \$16.50. Electrolytic copper at Montreal was down from \$9.48 per hundred pounds to \$9.13, while tin at Toronto was slightly higher at 53 cents per pound. Crude oil at Sarnia was up from \$2.69 per barrel to \$2.73.

### PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to significant changes and conditions affecting prices in Great Britain and certain other countries. The index numbers of the cost of living are from official sources unless otherwise stated. The authorities for the wholesale prices index numbers are named in all cases. The latest quarterly table giving the official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and several of the principal commercial and industrial countries appeared in the October issue of the LABOUR GAZETTE.

#### Great Britain

WHOLESALE PRICES.—The Board of Trade index number, on the base 1924=100, was 62.0 for September, an increase of 0.6 per cent for

the month. Foods were 1.3 per cent higher due to advances in the "meat and fish" and "other food" groups, although cereals were somewhat lower than in August. Industrial materials were 0.1 per cent higher, the principal changes being substantial advances in coal and wool prices and a decrease in cotton.

The *Economist* index number, on the base 1927=100, was 64.3 at October 18, as compared with 64.7 at October 4. For this two weeks' period, the food groups showed advances, while declines were noted in textiles, minerals and miscellaneous commodities.

The *Statist* index number, on the base 1867-1877=100, was 80.7 at the end of September, a decrease of 0.6 per cent for the month, and an increase of 0.4 per cent for the year. Food-stuffs were 1.1 per cent lower than at the end

of August due principally to a fall in vegetable food prices and a smaller decline in animal food, partly offset by an advance in the "sugar, coffee and tea group." Among industrial materials, a decline in textile prices was partly offset by small advances in minerals and sundries.

**COST OF LIVING.**—The Ministry of Labour index number, on the base July, 1914=100, was 141 at the end of September, showing no change from the beginning of the month. A slight increase in the food and clothing index numbers was not sufficient to raise the general index number a point.

### France

**WHOLESALE PRICES.**—The index number of the General Statistical Office, on the base 1914=100, was 78 for September, a decline of 2.5 per cent for the month, which decline was due to a fall in prices of imported products, as national products as a whole were unchanged from the August level. Animal foods were higher but all other groups both in foods and industrial materials were lower than for August.

### Germany

**WHOLESALE PRICES.**—The Federal Statistical Office index number, on the base 1913=100, was 94.9 for September, an increase of 0.7 per cent for the month, due almost entirely to increases in agricultural products, and to smaller increases in manufactured goods.

**COST OF LIVING.**—The official index number, on the base 1913=100, was 119.0 for September, an increase of 0.5 per cent for the month. There was no change in the index number for rent, but all other groups showed slight advances.

### Italy

**COST OF LIVING.**—The index number of the cost of living, Milan, on the base June, 1927=100, was 74.86 for August, as compared with 76.04 for July, due to declines in the food and sundries groups.

### United States

**WHOLESALE PRICES.**—The Bureau of Labour Statistics index number, on the base 1926=100, was 70.8 for September, an increase of nearly 2 per cent over the August level, continuing the steady advance in prices since last March. The index number for September has reached a level higher than for any month since October, 1931, 18 per cent higher than in February of this year and  $8\frac{1}{2}$  per cent higher than a year ago. As compared with prices in August, all groups were higher except for the small declines in farm products, chemicals and drugs and miscellaneous commodities.

*Bradstreet's* index number, which is the sums total of the prices per pound of 96

articles of common consumption was \$9.0512 at October 1, an increase of 0.7 per cent for the month. This is the highest level reached in two and a half years, and is 24.4 per cent over a year ago and 42.5 per cent higher than at March 1, of this year.

*Dun's* index number, which is based on the estimated cost *per capita* of a year's supply of commodities in wholesale markets, was \$162.632 at October 1, a gain of 1.5 per cent for the month and is 19.1 per cent higher than a year ago. All groups were higher than at September 1, except for a decline in the breadstuffs group.

**COST OF LIVING.**—The index number of the National Industrial Conference Board, on the base 1923=100, was 77.9, for September, an increase of 1.3 per cent over the August level, which increase extended to all groups.

### Other Countries

Figures published of official index numbers for certain other countries for recent months are as follows:

#### *Wholesale Prices:*

Austria: on the base, first half of 1914=100, 108.5 for October, a slight advance for the month.

Denmark: on the base 1913=100, 128 for September, an advance of two points.

Netherlands: on the base 1913=100, 75 for September, an advance of 2 points for the month.

Poland: on the base 1927=100, 54.9 for September, an increase of 1.9 per cent.

Switzerland: on the base July, 1914=100, 91 for September, showing no change from August.

South Africa: on the base 1910=1000, 1072 for July, as compared with 1013 for April.

#### *Cost of Living:*

Austria: on the base July, 1914=100, 105.8 for October, as compared with 105.1 for September.

Switzerland: on the base June, 1914=100, 131 for September, showing no change from the August level.

South Africa: on the base 1910=1000, 1245 for August, as compared with 1249 for July.

Over two million people in the United States have returned to the land during the past three years, a larger number, it is claimed, than the number of those who left the country for the city during the past twenty years. This migration has been recognized by the administration, which has appropriated \$25,000,000 to aid "subsistence farming." An article appearing in the October issue of *Co-operation*, the organ of the Consumers' Co-operative movement in the United States, explains how co-operative principles may contribute to this "back to the land" movement.

## FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE THIRD QUARTER OF 1933

THE number of fatal industrial accidents (including fatalities from industrial diseases reported with fatal accidents by workmen's compensation boards, etc., as well as fatalities to persons incidental to the pursuit of their occupations) which were recorded in the Department as occurring during the third quarter of 1933, was 189, there being 68 in July, 59 in August, and 62 in September.

The report for the second quarter of 1933, showing 180 fatalities, was given in the LABOUR GAZETTE, August, 1933, page 866. In the third quarter of 1932, 226 fatal accidents were recorded (LABOUR GAZETTE, November, 1932, page 1236). The supplementary lists of fatal accidents, not reported in time for inclusion, contain 13 fatalities for the first half of 1933 and 4 fatalities for 1932.

In this series of reports it is the custom to record industrial accidents under the dates of their occurrence, and fatal industrial diseases under the dates on which they prove fatal.

Reports were received from the Provincial Workmen's Compensation Boards, from the Board of Railway Commissioners of Canada, from certain other official sources and from the correspondents of the LABOUR GAZETTE. Information as to accidents is also secured from newspapers.

Classified by groups of industries the fatalities occurring during the third quarter of 1933 were as follows: agriculture, 29; logging, 15; fishing and trapping, 5; mining, non-ferrous smelting and quarrying, 29; manufacturing, 25; construction, 14; electric light and power,

3; transportation and public utilities, 41; trade, 14; service, 14.

Of the mining accidents, 19 were in "metalliferous mining," 8 in "coal mining," and 2 in "non-metallic mineral mining and quarrying, n.e.s."

Of the accidents in manufacturing, 4 were in "vegetable foods, drink and tobacco," 1 in "textiles and clothing," 1 in "leather, fur and products," 1 in "rubber products," 7 in "saw and planing mill products," 1 in "wood products," 4 in "pulp, paper and paper products," 1 in "iron, steel and products," 1 in "non-metallic mineral products," and 4 in "chemical and allied products."

In construction there were 5 fatalities in "buildings and structures," 6 in "highway and bridge," and 3 in "miscellaneous construction."

In transportation and public utilities there were 15 fatalities in "steam railways," 17 in "water transportation," 5 in "local transportation," 3 in "telegraphs and telephones," and 1 in "unclassified."

In trade there were 6 fatalities in "wholesale," and 8 in "retail."

Of the fatalities in service, 10 were in "public administration," 3 in "recreational," and 1 in "custom and repair."

There was no serious disaster resulting in the loss of a very large number of lives during the period under review. Accidents involving the loss of two or more lives were as follows:—

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE THIRD QUARTER OF 1933 BY GROUPS OF INDUSTRIES AND CAUSES

| Cause  | Agriculture | Logging | Fishing and Trapping | Mining, Non-ferrous Smelting and Quarrying | Manufacturing | Construction | Electric Light and Power | Transportation and Public Utilities | Trade | Finance | Service | Unclassified | Total |

Two miners were killed by a fall of rock at Schumacher, Ontario, on September 8.

Three workers in an explosive factory lost their lives following an explosion of nitro-glycerine, at Beloeil, Quebec, on July 19.

On July 21, two dock workers were fatally injured when a freight shed was blown down by a cyclonic wind storm at Point Edward, Ontario.

A truck driver and his helper were killed at Prairie Siding on July 10, when a train struck their truck.

Three men were drowned from a boat while preparing a regatta course near St. Catharines, Ontario, on July 26.

*Supplementary Lists of Accidents.*—A supplementary list of accidents occurring during the first half of 1933 has been compiled which contains 13 fatalities, of which 1 was in agriculture, 1 in logging, 1 in fishing and trapping, 1 in mining, non-ferrous smelting and quarrying, 2 in manufacturing, 2 in construction, 1 in transportation and public utilities, 3 in trade, and 1 in service. Two of these accidents occurred in March, 1 in April, 1 in May, and 9 in June.

A further supplementary list of accidents occurring during 1932 has been made. This includes 4 fatalities of which 1 was in logging, 1 in manufacturing, 1 in construction, and 1 in service. Two of these accidents occurred in October, 1 in November, and 1 in December.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

### Quebec Workmen's Compensation Act Again Declared Valid

The question of the constitutionality of the Workmen's Compensation Act (Statutes of Quebec, 1931, chapter 100) was once more raised in the Quebec Superior Court recently on behalf of a workman who sought damages against his employer for injuries received in the course of his employment under the circumstances outlined in the following judgment (The judgment of Mr. Justice Letourneau earlier this year in the similar case of *Slanec versus Grimstead et al.*, was outlined in the LABOUR GAZETTE, March, 1933, page 357, and that of Mr. Justice de Lorimier, in the Superior Court, Montreal, declaring the Act *Ultra vires* of the Provincial Legislature, was summarized in the issue for June, 1932, page 733). The present decision was rendered in a hearing, before trial, upon the issue of an intervention by the Attorney-General of the Province as to the constitutionality of the Workmen's Compensation Act.

#### Text of Judgment

Mr. Justice Fortier (translation): Seeing that the plaintiff by his amended declaration alleges in substance that he met with an accident at work on November 23, 1931, when, while in the employ of the defendant near Rapide Blanc in the upper part of Saint-Maurice, the scaffolding upon which he was working, in repairing a shed broke and threw him to the ground; the plaintiff was seriously injured in the lower part of his body from the fall; this accident was due to the fault and negligence of the defendant and his employees who constructed this scaffolding in a defective manner; the plaintiff by virtue of the common law claims damages of about \$9,600 and he declares that he cannot take advantage of the provisions of the Workmen's Compensation Act, 1931 (Que.), c. 100; the plaintiff alleges also

that this Act is unconstitutional and *ultra vires* the provincial Parliament for the reasons which he mentions and sets out in his notice to the Attorney-General in conformity with arts. 114 and 114a C.C.P. His reasons for the unconstitutionality of this Act are as follows:—

"1. The said Workmen's Compensation Act takes away from a class of persons the right to be judged by the Judges named by the Governor General of the Dominion of Canada in conformity with the B.N.A. Act; 2. The said Act fixes arbitrarily the right of a class of persons to indemnity for damages which are caused to him, although this is contrary to the principle recognized for other classes of society—namely, that whoever, through his fault or through the fault of those for whom he is responsible causes damage to another, must make reparation in the measure of the damage caused; 3. The said Act refuses to a class of persons the right to have the decisions rendered by the Commission which administers it reviewed, refusing, therefore, the right to submit their complaints to the authority representing the law; 4. The Legislature of the Province of Quebec could not therefore enact the said Workmen's Compensation Act nor carry out the said Act by the nomination of members of the Commission to administer it."

The plaintiff concludes in his declaration as follows: 1. That the Workmen's Compensation Act, 1931, be declared unconstitutional and *ultra vires* the Provincial Parliament; 2. That the nomination of members of the Commission to administer the said Act be as a result, also declared null and void; 3. For judgment against the defendant for the sum of \$9,600 with interest and costs.

Seeing that the defendant has pleaded to this action, first by denying all responsibility, and by saying that the plaintiff himself worked in the construction of this scaffolding which allegedly caused the accident, but which was constructed according to rules of the craft, and by repelling every allegation of fault or negligence, and by adding that the plaintiff has not suffered any loss of capacity to work; to these allegations reproduced here summarily, the defendant alleges principally that this acci-

dent of the plaintiff is governed by the Workmen's Compensation Act, 1931, and that the plaintiff himself invoked this Act, claimed an indemnity and was paid his claim and having been examined by the doctors of the Workmen's Compensation Commission, he was found able to go back to work and he has not suffered any incapacity whatever; finally that the Workmen's Compensation Act, 1931, is *intra vires* the Legislature of the Province of Quebec;

Seeing that the Attorney-General for the Province of Quebec has intervened to uphold the validity of the said Workmen's Compensation Act, and in reply to the notice of the plaintiff containing the reasons invoked against the constitutionality of this Act as well as in reply to this part of the amended declaration as set out above, the intervenant denies paras. 1, 2 and 3 of this notice and paras. 9, 10 and 11 of the amended declaration and declares that the Workmen's Compensation Act, 1931, speaks for itself, that the plaintiff has submitted his claim to the Workmen's Compensation Commission which has rendered a decision; that the Workmen's Compensation Act, 1931, is *intra vires* the Legislature of the Province of Quebec; and he concludes as a result, that the present intervention be maintained with costs and that it be declared that the Workmen's Compensation Act, 1931, is valid, legal and *intra vires* the Legislature of the Province of Quebec;

Seeing that the plaintiff has contested the declaration of the intervenant by denying all the paragraphs save that which treats of the allegation that the plaintiff himself has submitted his claim to the Workmen's Compensation Commission which rendered its decision, which paragraph is admitted by the plaintiff;

Seeing that the contestation has been joined upon the intervention by the production of a reply of the intervenant in the nature of a general denial;

Seeing that by the order of this Court the hearing upon the issue of the intervention was permitted before the trial and merit of the principal action, and that it is expedient in the interests of the plaintiff and of the defendant and to escape costs, to decide first the question of the competence of the Provincial Legislature to enact the Workmen's Compensation Act, 1931, according to the pleading in the intervention;

Considering that the question raised upon the issue of the intervention in regard to the constitutionality of the Workmen's Compensation Act, 1931, is connected with the competence of the legislative power of the Province of Quebec in a matter of civil law to pass an Act for one class of society different from the general law, in other words, to pass discriminatory legislation in which the indemnity flowing from civil responsibility is different from that of the common law and without appeal—and with the power of the Lieutenant-Governor in Council to name members of the Commission created by the Workmen's Compensation Act, 1931, notwithstanding s. 96 of the B.N.A. Act of 1867;

Considering that it is recognized by virtue of the doctrine and jurisprudence, that every Act is presumed to have been enacted by competent power and must be held valid by the Courts until it be shown without a reasonable doubt that it violated the Constitution;

Considering in the first place that the Province is Sovereign in matters of legislation upon

property and civil rights under the powers conferred upon it by the Constitution;

Considering that this principle of sovereignty must be interpreted as conferring upon the Province an exclusive power, an absolute control over legislation of which it is the source and which allows it to pass laws directly in all matters affecting property and civil rights;

Considering that in their sphere of competence the Legislatures of Provinces have a power as absolute as the Federal in its jurisdiction;

Considering that the Province in its power to legislate on matters of property and civil right is not subject to the restrictions of a delegated power and consequently it may, without hindrance, pass laws favouring a class of society independently of the general law;

Considering that the plaintiff infers that these Acts are unconstitutional because they would be, according to his expression, Acts of exception or "discriminatory" or that they derogate from the principles of liberty and equality;

Considering that in every law which is within the jurisdiction of the provincial Legislature the denial of the right of appeal to a superior tribunal is within the competence of the power exercised by this Legislature;

Considering further that the Workmen's Compensation Act, 1931, sanctions the principle of the responsibility of the employer, clears him of all personal liability but assures the indemnification of victims of accidents due to professional risk;

Considering that there is no reason to term "discriminatory" in the sense of unjust, an Act assuring workmen the benefit of professional risk, excellent in principle and adopted by the Provinces of the Dominion and most of the modern States;

Considering in the second place that this Act creates a new right, that it differs in its essence from the common law in the matter of civil responsibility by offering a fair compensation for professional risks and that it is in principle a security rather than a litigious matter;

Considering that the duties with which the Commission created by the Workmen's Compensation Act, 1931, are clothed are principally administrative and that it is only incidentally that they may be considered as judicial;

Considering that the Workmen's Compensation Act, 1931, cannot be interpreted as establishing that the Commission has the power and jurisdiction of a "Superior, District or County Court," and that as a result there is no reason to extend to the members of this Commission the restriction which s. 96 of the B.N.A. Act 1867, permits: *A.-G. Quebec v. Slanec & Grimstead*, (1933) 2 D.L.R. 289, 54 Que. K.B. 230;

Considering that for the above-mentioned reasons the Workmen's Compensation Act, 1931, is *intra vires* the Provincial Legislature;

For these reasons, the Court doth maintain the present intervention, declare the Workmen's Compensation Act, 1931, valid, legal, and *intra vires* the Legislature of the Province of Quebec; the whole with costs against the plaintiff.

*Ricard vs. Crete and Attorney-General for Quebec* (Quebec), 1933, *Dominion Law Reports*, vol. 3, page 660.

### Compensation to Parents for loss of Expectations from Deceased Son

In an action brought at Montreal by the parents of a young man, 23 years of age, for damages sustained when he lost his life in an automobile accident, the Court of King's Bench (in Appeal) affirmed the judgment of the lower court in allowing the claim, but raised the amount of damages from \$187.50 (the funeral expenses) to \$687.50. The Court ruled that the parents were entitled to recover, besides the funeral expenses, an amount for the natural and reasonable expectation of deriving pecuniary benefit from their son, irrespective of the circumstance that the son had not actually contributed to the household expenses prior to his death.

Mr. Justice Bond, in the course of his judgment, said: "Taking into consideration the age of the appellants (which is not advanced), the extraordinary expenditure made by them in respect of their son's education (extraordinary in the sense of relation to their means), the age of the deceased, his health and prospects; considering, further, the chances of life with its uncertainties and vicissitudes both as regards the parents and also their son, and the very probable demand to be made on the latter by his parents in later life,—a demand enforceable at law while he was alive; the probability that the deceased would in due time have married and established a home of his own; taking all these facts into consideration and applying the principles of common sense, as would be expected from a jury in such circumstances, and estimating to the best of my ability, I should say that the appellants have sustained real damages amounting to at least the sum of \$500."

*Daly versus McFarlane* (Quebec) 1933, *Rapports Judiciaires de Québec* (Cour du Banc du Roi), vol. 55, page 230.

### Montreal Fair Wage Schedule is Enforced by Court

The City of Montreal carried on work in connection with the Wellington Street tunnel under the Lachine Canal. The chief con-

tractor for this work was the Dufresne Construction Company, Limited, but the metallic paving was constructed by a sub-contractor, the defendant in this case. A workman (the plaintiff) was employed by the defendant company on this work, commencing in August, 1932, for a total of 604½ hours. He alleged that according to the schedule of wages approved by the City of Montreal on May 31, 1929, he should have received wages at the rate of \$1 per hour, this being the rate fixed for structural iron workers under the contract. Instead, he received wages at the rate at first of 40 cents an hour, and later of 42½ cents per hour; the total amount he received being \$255.97, instead of \$604.50. He therefor claimed the amount of the unpaid balance of \$348.53.

The sub-contractor alleged that the work done by the plaintiff did not fall within the category of structural iron work, but was that of a labourer, consisting in the placing of paving block; that this work did not require any special knowledge or offer any element of risk, and that the plaintiff was paid regularly for his work until its completion.

Judge Ducloux, in the Superior Court, District of Montreal, in giving judgment on the case, found that in the schedule of wages approved by the City for the various trades the rate for structural iron workers was \$1 per hour, and that the work done by the plaintiff fell under that category. He therefore allowed the plaintiff's claim for \$348.53, with interest from April 25, 1933, and costs of the action.

*Garneau versus Crowe's Iron Works Limited* (Quebec), 1933.

A saleswoman employed in a store at Winnipeg fell through a trapdoor in the store in the course of her employment and received injuries. In an action brought by her against her employer, Mr. Justice Adamson awarded the plaintiff \$450 in damages.

[NUMBER 12

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### Monthly Summary

CONTRARY to the usual seasonal movement in industrial employment as experienced in the last twelve years, there was further improvement in the general situation at the beginning of November, when the 8,394 firms furnishing employment returns to the Dominion Bureau of Statistics reported 845,291 employees, as compared with 836,715 on October 1. Each of these firms ordinarily employs a minimum of 15 workers. Reflecting the advance, the index (based on the average for the calendar year 1926, as 100), increased from 90.4 in the preceding month to 91.3 on the date under review, as compared with 84.7 on November 1, 1932. On that date in the preceding eleven years, the index was as follows: 1931, 103.0; 1930, 112.9; 1929, 124.6; 1928, 118.9; 1927, 108.8; 1926, 104.0; 1925, 98.3; 1924, 94.1; 1923, 100.0; 1922, 97.0 and 1921, 91.3.

At the beginning of November, 1933, the percentage of idleness reported to the Department of Labour by local trade unions stood at 19.8, the same percentage as was recorded at the beginning of October, 1933, in contrast with an unemployment percentage of 22.0 at the beginning of November, 1932. The percentage for November this year was based on the returns furnished to the Department of Labour by 1,734 labour organizations with a membership aggregate of 148,703 persons.

Reports received from the offices of the Employment Service of Canada during October, 1933, indicated a marked gain in the average daily placements effected when the figures were compared with those recorded during the corresponding month a year ago. This increase was almost entirely due to the amount of work being done on highways, streets, sewers, and airports, and in militia camps under the authority of the Federal and provincial governments. Vacancies in October, 1933, numbered 33,659, applications 68,310, and placements in regular and casual employment 32,015.

In retail prices the cost per week of a family budget of staple foods, fuel and light-

ing and rent was slightly lower for November at \$15.72 as compared with \$15.78 in October. The decrease was due mainly to a fall in rent which more than offset slight increases in the cost of food and fuel. Comparative figures for earlier dates are \$15.41 for June, 1933, the low point; \$16.10 for November, 1932; \$22.03 for November, 1929; \$21.24 for November, 1926; \$21.60 for November, 1921; \$26.92 for July, 1920 (the post-war peak); and \$14.36 for November, 1914. In wholesale prices the index number calculated by the Dominion Bureau of Statistics was higher at 68.7 in November as compared with 67.9 in October and 63.6 in February which was the low point. Figures for certain earlier dates are 64.8 for November, 1932; 95.7 for November, 1929; 97.7 for November, 1926; 98.3 for November, 1921; 164.3 for May, 1920 (the post-war peak); and 67.2 for November, 1914. The advance was due in large part to higher prices for certain farm products including grains and live stock.

The table on page 1145 gives the latest monthly statistics available reflecting industrial conditions. The index of the physical volume of business was somewhat lower in October but was still more than 31 per cent above the low level reached in February. This index computed from 45 factors indicates that business operations were at a higher level during the period August to October than at any time since the latter part of 1931. Of the chief components of the index mineral production and construction were higher than in September and were also substantially higher than a year ago, while manufacturing and distribution were lower than in September but higher than in October, 1932. Electric power output was little changed during October from the level of the previous month. The figures available for November indicate continuing improvement in employment, while wholesale prices were also higher. Carloadings and contracts awarded were lower than in the previous month but were higher than a year ago.

The time loss due to industrial disputes during November was substantially higher

than that recorded for the previous month, the number of workers involved also showing a considerable increase. As compared with November, 1932, the number of strikes and lockouts recorded was much larger, a very great increase appearing in the number of workers involved and in the time loss incurred. The higher figures for November, 1933, were due largely to disputes involving pulpwood cutters in Northern Ontario and Quebec where strikes of some 2,800 workers resulted in a time loss of over 41,000 days during the month. There were in existence during the month 20 disputes, involving 3,974 workers, and resulting in a time loss of 49,543 working days, as compared with fourteen disputes, involving 1,108 workers and resulting in a time loss of 19,203 working days in October. In November, 1932, there were on record twelve disputes, involving 980 workers and resulting in a time loss of 2,338 working days. At the end of the month there were seven disputes in progress recorded as strikes and lockouts, involving approximately 2,433 workers. These figures do not include those strikes and lockouts in which employment conditions were no longer affected, but which had not been called off by the union.

#### **Industrial Disputes Investigation Act**

During the past month the Department received the report of the Board of Conciliation and Investigation appointed in connection with the dispute between the Canadian National Railways and their clerks, freight handlers, etc., and wharf employees at Halifax. The text of this report, together with particulars of the proceedings under the Act during the month, appears on page 1150 of this issue.

#### **Industrial Conditions Act of Manitoba**

By an order dated November 8, 1933, the Government of Manitoba appointed a Joint Council of Industry under the Industrial Conditions Act (consolidated Amendments of Manitoba, 1924, chapter 92) to investigate and report upon all matters at present in dispute between the Winnipeg Electric Company and its employees in regard to rates of pay, hours of labour and conditions of employment (the report of the Board of Conciliation and Investigation under the Industrial Disputes Investigation Act into this dispute appeared in the LABOUR GAZETTE, September, 1933, page 878). The members of the Joint Council of Industry are as follows:—Honourable Stephen Elswood Richard, one of the judges of the Court of Appeal for Manitoba, as chairman, and Arnold Smith of

International Laboratories Limited, Winnipeg, and Major Edgar G. Rogers of Canadian Rogers Sheet Metal and Roofing Company, Limited, Winnipeg, as two representatives of employers, engaged in industry in Manitoba, and James John Scott, Secretary of Winnipeg Building Trades Council and business agent of Plasterers' Union No. 334, Winnipeg, and Edgar H. Cook, engineer on Canadian National Railways, Transcona, Manitoba, as two representatives of employees connected with industry in Manitoba.

#### **Coal Combine Members Convicted in Quebec**

Five companies charged as members of a combine of importers of British anthracite coal in the Province of Quebec were convicted of violations of the Combines Investigation Act and section 498 of the Criminal Code on December 12 at the City of Quebec, when Mr. Justice Laliberté delivered judgment in the case of The King v. Canadian Import Company et al. Fines totalling \$30,000 were imposed. The charges against one firm, the St. Lawrence Stevedoring Company, Limited, were dismissed. The investigation under the Combines Investigation Act and prosecution by the Attorney General of Quebec were reported in earlier issues of the LABOUR GAZETTE. Details of the judgment will appear in the January number.

#### **Canadian Railway Board of Adjustment No. 1**

The fifth report of proceedings of the Canadian Railway Board of Adjustment No. 1 is published with this issue as a supplement. Outlines of recent decisions of the Board are given in the LABOUR GAZETTE from time to time. The Board is a permanent organization for adjusting disputes arising out of agreements between the railway operating trades, telegraphers and trackmen on one side and the employing companies on the other. It was established in 1918 under a voluntary agreement between the parties, with power to deal with differences between the companies and members of any of the six railway brotherhoods. The records show that the Board has been remarkably successful in achieving its purpose of promoting harmonious industrial relations on the railways.

#### **Dominion Government's policy on public works**

In the course of an address to the Canadian people broadcast by radio on November 20, the Prime Minister made the following statement:—"While at present it is difficult to forecast with any degree of assurance what the future will be, the steady

## MONTHLY STATISTICS REFLECTING INDUSTRIAL CONDITIONS IN CANADA

(2) For group figures, see articles elsewhere in this issue.

(4) Figures for end of previous month.

(6) Figures for four weeks ending December 2, 1933, and corresponding previous periods.

(9) Sugar production given in periods of four weeks ending November 4, October 7 and September 9, 1933: November October 8 and September 10, 1932.

improvement of the last few months, in our opinion, warrants the view that we may be able, with the return of spring, to undertake a reasonable policy of public works in every province of the Dominion that will substantially assist in stimulating private enterprise, increasing purchasing power, provide employment and hasten the return of prosperity."

"The gold reserves of the Dominion," Mr. Bennett stated, "amounted on the last day of October, to over \$63,900,000 and, on the application of the principle adopted at the world conference, would warrant the issue of over \$279,600,000 of currency. The Dominion notes at the end of October amounted in even money to \$174,900,000. A portion of the balance, in any event, may be available for our necessities, but it must be limited to such an event and used in such a manner as will not injure our credit at home or abroad."

#### **Dominion-Provincial agreements on unemployment relief**

The Dominion government has concluded agreements with the various provincial governments in regard to the relief of unemployment throughout Canada during the present winter. The agreements with Quebec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia contain the following provisions:

The Dominion will pay up to 33½ per cent of the labour costs of municipal public works.

The Dominion will pay 60 cents for each man-day of work in connection with the construction of the Trans-Canada highway.

The Dominion will pay 50 cents for each man-day of work in connection with construction of provincial highways.

Single unemployed men will be absorbed into work camps to be established by the Department of National Defence and the National Parks Branch of the Department of the Interior, and the Dominion will clothe, feed and house them, and give them a gratuity of 20 cents a day.

The Dominion will pay half the cost of the support of each single unemployed man who may be unable, for physical or other reasons, to work in the camps, up to a total of 40 cents a day.

Where direct relief may be necessary in organized municipalities the former arrangement, under which the cost is divided equally between the Dominion, the province and the municipality, is to be continued; and in unorganized territories equally between the province and the Dominion.

The agreements with Prince Edward Island, Nova Scotia and New Brunswick provide for Dominion contributions towards the cost of

construction of the Trans-Canada Highway and provincial highways; also contributions toward the labour cost of municipal works.

#### **Work of forestry camps in Canada**

The Minister of Labour, in a recent statement, called attention to the forestry works program which forms a part of the existing relief scheme in Canada. "During the past summer," he said, "the men employed in camps operated by Federal and assisted by Provincial governmental departments have planted about two million trees in forestry experimental areas at Valcartier, P.Q., at Petawawa, Ont., and at Camp Borden, Ontario. A new forestry experimental area is under development in Manitoba, and it is hoped that two others, one in British Columbia and one in New Brunswick, will begin operations shortly. But the forestry scheme does not stop with re-planting. Already a great deal of exceedingly valuable work has been accomplished in the wooded sections of existing experimental areas under the control of the Dominion Government by the building of bush roads, the construction of telephone lines and trails to facilitate rapid communication and transportation by rangers, by improving the maturer stands of timber, thinning over-dense growth, clearing away dead-falls and generally applying those remedial steps which scientific timber cultivation and conservation demand. It should be understood, however, that the underlying purpose of this work is merely the demonstration of the results which can be secured by proper forest management, to the end that the example may ultimately be followed by other large holders of forest lands to the great and lasting benefit of the industry."

#### **Commission to inquire into production and sale of milk in Saskatchewan**

The government of Saskatchewan, by an order in council published in the *Saskatchewan Gazette*, November 15, has appointed Dr. William Allen, professor of Farm Management in the University of Saskatchewan, as commissioner under the Public Inquiries Act of the province, to inquire into and report upon all matters connected with the production, processing, distribution, and sale of milk and milk products in Saskatchewan, and particularly regarding the prices obtained by milk producers and distributors, the costs of production and distribution of milk, and the level of milk prices in comparison with other essential foods, and to ascertain what has been accomplished by Public Utilities Boards in adjacent provinces on the control of milk

prices and the effects thereof upon producers, distributors and consumers; and to recommend such action and measures of control in the marketing of milk in Saskatchewan as he may deem necessary or advisable in the public interest.

The following explanation of the appointment is given in the order: "Our Minister of Agriculture states that there has been much dissatisfaction among milk producers with prevailing prices paid to producers for whole milk for domestic use, and that requests have been made for the appointment of a Board to regulate and control prices, and that it is considered to be to the public advantage that an inquiry be made into the whole matter, with a view to determining the feasibility of establishing prices equitable to producers, distributors and consumers."

#### **Minimum wages to be fixed for retail stores in Quebec**

Mr. Gustave Francq, chairman of the Minimum Wage Board of the Province of Quebec, announced on November 29 that the Board intended to issue, early in the New Year, an order governing the employment of female workers in commercial establishments. It will be recalled that the provincial act was amended last year by the extension of its scope to include such establishments (LABOUR GAZETTE, March, 1932, page 298). The chairman stated that this action would be taken owing to numerous complaints received by the Board that young girls employed in certain stores in Montreal were being compelled to work long hours daily for wages as low as \$3 a week. The new order, he said, would prohibit the employment of any female employee at a lower wage than six dollars a week, and would provide also for an increase of one dollar every six months for a period of two years. "We have no power under the Act," Mr. Francq pointed out, further, "to limit the number of hours that an employer shall make a girl work, but we can establish a minimum wage rate for a 44-hour week, and if she is employed more than this number of hours, then the employer will have to pay her *pro rata* for the extra time worked."

#### **Hours of labour of truck drivers in Ontario**

Representatives of the Canadian Brotherhood of Automotive Employees and of the Toronto National Labour Council recently asked the Ontario Department of Labour to institute an inquiry as to the observance by truck owners in the Prov-

ince of the provisions of the Public Vehicle Act in regard to the hours of labour worked by chauffeurs. Section 18 of the Act forbids an employer to require a driver or operator to work in that capacity "for more than a maximum of ten hours in any twenty-four hour period." Mr. A. W. Crawford, Deputy Minister of Labour of the Province, received the deputation, and promised immediate action.

Accordingly a questionnaire was sent out by the Department to owners of bus and truck services employing two or more drivers, questions being asked regarding hours of work, rates of pay, overtime and days of rest.

#### **New British unemployment insurance and assistance scheme**

An outline of the Bill to amend the Unemployment Insurance Acts, now before the British Parliament, appears on another page of this issue. The *Ministry of Labour Gazette* points out that this is the first measure introduced in Great Britain dealing comprehensively with the whole of the able-bodied industrial unemployed. The bill embodies many of the recommendations of the "Gregory Commission" whose report was published about a year ago (LABOUR GAZETTE, December, 1932, page 1308), including the recommendation that the insurance and relief features of the scheme should be separate and distinct. It is divided into two parts, the first dealing with unemployment insurance, the existing scheme, with some important changes, to continue on a self-supporting basis. The minimum age for entry into the scheme will be lowered to the school-leaving age, benefits being payable from the age of 16, with wide extensions of instruction courses. The second part establishes a national assistance board which will take over the entire work of administering unemployment relief.

#### **National Re-employment Service in United States**

The organization and functions of the National Re-employment Service, established under the terms of the National Industrial Recovery Act, are outlined in a recent bulletin issued by the United States Department of Labour. Under the re-employment plan the sum of \$400,000,000 is to be applied to the construction of public roads, to be allocated to the States in proportion to their population, area, and road mileage. The regulations provide that each State must so spread its road money that at least three-fourths of the counties are given work. The administration of this part of the Act is in

charge of the special Board for Public Works. One of the rules laid down by the Board requires that the local labour required for public works is to be selected from lists of qualified workers submitted by local employment agencies designated by the United States Employment Service. But as there are only 135 free public employment bureaus in the United States it became necessary for the Employment Service to organize "re-employment agencies" in counties without such a public service. A National Re-employment Service has been established, under the direction of the United States Employment Service, as an emergency organization, to bring about an orderly movement of the unemployed to new jobs in connection with public works. Three federal agencies are involved in the entire program: The Federal Public Works Administration, the Federal Relief Administration, and the United States Employment Service; and the directors of these agencies form a National Re-employment Council, as a co-ordinating and advisory body for the entire movement. The organization is completed by the State re-employment directors and by local re-employment offices.

It is planned to have an office in each employment area, under the direction of local re-employment committees consisting of five or more citizens appointed by the State re-employment director and the State relief director, such committees representing local relief committees, labour, and community interest. The National and state administrative costs of the scheme are to be paid from a fund allocated to the United States Employment Service by the Special Board for Public Works. The local administrative costs are to be paid by the Federal Emergency Administration. The members of the local clerical staff, will, in so far as practicable be drawn from the ranks of the unemployed and paid on a work relief basis.

The bulletin states in conclusion that "this is an emergency co-operative enterprise to render a necessary service to the unemployed, so that they may participate adequately in the program of national recovery. It is intended to foster and to extend creditable and useful placement service,—not to impede or conflict with existing employment services."

#### **Principles for selecting compensable diseases**

The report of a British committee which recently considered proposals by the Trades Union Congress for the extension of the industrial diseases schedule in the Workmen's Compensation Act is outlined on another page of this issue. The committee,

quoting the report of an earlier committee, state the principles which must govern the selection, for compensation purposes of a particular industrial disease, as follows:—(i) Is it outside the category of accidents and diseases already covered by the Act? (ii) Does it incapacitate from work for a period of more than one week, which is the minimum period for which compensation is payable under the Act? (iii) Is it so specific to the employment that the causation of the disease or injury by the employment can be established in individual cases?

The Committee explained that this third test was subject to the qualification that in the case of a disease which was common in a particular trade and existed, though very rarely, outside the trade, it might be right to make that disease the subject of compensation. Since the earlier Committee made their Report the period of disablement which must be completed before a workman becomes entitled to compensation has been reduced by Statute to three days.

#### **Validity of New York Workmen's Compensation Law**

In connection with recent actions in Canada involving the question of the validity of provincial compensation legislation, it may be noted that the United States Supreme Court, on January 18, 1932, upheld the constitutionality of section 20 of the New York Workmen's Compensation Law, which provides that the determination by the Industrial Board (corresponding to the provincial Workmen's Compensation Boards) on questions of fact shall be final. The case, which concerned the claim of Paul Helfrick, an employee of the Dahlstrom Metallic Door Company, of Jamestown, was heard successively by the Appellate Division of the State Supreme Court, the State Court of Appeals and finally the United States Supreme Court, with the same decision by all these courts. This judgment was considered to be of special importance because the laws of several other States contain provisions similar to section 20 of the New York law.

#### **Cost of woods accidents in Canada**

The cost of accidents in the woods, and the measures required for their control, are discussed in the November issue of *Pulp and Paper of Canada*, by Mr. Julian E. Rothery, forest engineer of the International Paper Company. The writer calculates the cost of woods accidents in terms of cents per ton of newsprint paper and finds that this cost amounts to about 22 cents per ton. He

notes the increasing assessments levied on woods operations by the provincial Workmen's Compensation Boards; Ontario, he states, had a rate of 1.75 per cent for \$100 payroll in 1926, 3 per cent in 1932, with 4.75 per cent for the small jobber whose annual payroll does not exceed \$10,000. "Quebec, borrowing from Ontario's experience, recently set up a rate of 3 per cent, but finding it insufficient, is reported considering raising it to five per cent or even six per cent. New Brunswick already has a five per cent rate.

"If we assume a rate of \$5 per hundred dollars of payroll and translate that into a cord of wood, we will find that the cost of compensation in a jobber's camp alone will often amount to ten cents a cord and frequently more, to which must be added another few cents to cover the risks during the driving and the risks to the men employed direct by the company in supplemental and supervisory work, such as clerks, scalers, superintendents, foremen and men engaged in transportation of supplies or construction work. About a cord and a third of pulpwood is required to make a ton of newsprint paper, and even at the low payroll schedules of to-day, woods accidents reflect a charge of 15-20 cents in the cost of a finished ton of paper, and as labour scales increase in the future it may readily amount to 20-25 cents a ton or even more, particularly as the cost of accidents is increasing, notwithstanding the lower payroll rates."

Mr. Rothery points out the need for more interest in accident prevention on the part of executives, the need for education of employees and for better facilities for the proper treatment of accidents. In an editorial comment, *Pulp and Paper* declares that the very difficulty of the situation, increased by distance from centres, the transient character of the labourers, and their rather general lack of education really makes accident prevention work in the woods all the more necessary.

The Stone Industry in Canada, 1932, is the subject of a bulletin recently issued by the Dominion Bureau of Statistics. This industry, as a whole, in 1932, included the operations of 525 plants with a total capital investment of \$22,555,590, according to a report just issued by the Mining, Metallurgical and Chemical Branch of the Dominion Bureau of Statistics at Ottawa. Production during the year was valued at \$6,975,553, which included the value of the quarry output and the value added by manufacturing in the secondary stone industry. Salaried employees and wage-earners employed in 1932 numbered 3,512 persons and their combined earnings amounted to \$3,251,609.

The government of Nova Scotia, by an order dated November 25, 1933, made the following appointments:—

*Old Age Pensions Board.*—Ernest H. Blois, of Halifax (chairman); Robert Irwin, of Shelburne; and Donald MacLennan, K.C., of Inverness.

*Mothers' Allowances Advisory Commission.*—(Appointed for a period of one year) Robert Irwin, of Shelburne; and Donald MacLennan, K.C., of Inverness.

Re-organization of vocational schools has been ordered in Russia, as it was found that students on completing their training do not enter industry, but proceed to advanced studies in technical schools and universities. Schools in industrial undertakings will in future be organized as vocational schools giving a short course of training for the purpose of turning out skilled workers for industry and transport. According to a report published by the International Labour Organization (Geneva), based on Russian sources, the new Order notes that 500,000 skilled workers have been trained for industry and transport by the vocational schools in the last five years.

The Hon. Michael Dwyer, Minister of Public Works and Mines of Nova Scotia, has been appointed to hold also the portfolio of Labour. Mr. Earl B. Paul, of Springhill, has been named Secretary of Labour, in succession to Mr. C. J. MacDonald, who was the first to hold this office in the new Department, established under legislation enacted in 1932 (LABOUR GAZETTE, August, 1932, page 865.)

The Right Hon. R. B. Bennett, at the annual convention of the Royal College of Physicians and Surgeons of Canada, held at Ottawa on November 27, expressed the opinion that it would be a long time before a system of state medicine is introduced into Canada so far as the Dominion government is concerned. He considered that such an undertaking would be unsuitable in a new and expanding country.

During November a total of 3,253 accidents were reported to the Ontario Workmen's Compensation Board in the Industries in Schedule 1 of the Act, 13 of which were fatal cases; in Schedule 2 industries 219 accidents were reported, including 2 fatal cases; and 262 accidents to employees of the Crown, 2 of which were fatal, were reported during the month, making in all 3,734 accidents, of which 17 were fatal.

## RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

THE Board of Conciliation and Investigation established on August 28 to deal with a dispute between the Canadian National Railways and approximately 5,100 employees, being (1) clerks, freight handlers, labourers and miscellaneous classes as per system wage agreements of August 1, 1929, employees of the ferry service between Tormentine, N.B., and Borden, P.E.I., and the wharf employees at Halifax, N.S., and (2) clerks and other classes on the headquarters staffs, reported to the Minister of Labour on December 1. The dispute grew out of the company's proposal to make a 10 per cent wages deduction in addition to the existing 10 per cent deduction, i.e., a total deduction of 20 per cent from wages calculated at the schedule basic rates of pay. The personnel of the board which enquired into this dispute was as follows: The Honourable Mr. Justice Louis Cousineau, of Aylmer, P.Q., chairman, appointed by the Minister in the absence of a joint recommendation from the other board members, Mr. F. C. Dobell, of Montreal, nominated by the employer, and the Reverend Russell McGillivray, of Ottawa, nominated by the employees. The report of the board was signed by the chairman and Mr. McGillivray. Mr. Dobell submitted a minority report. The text of the two reports are given below.

### Other Proceedings Under the Act

Reference was made in the November issue of the LABOUR GAZETTE (page 1065) to the establishment of a board to deal with a dispute between the Corporation of the City of Edmonton and certain of its employees in the Water Works, Engineer's and Power House Departments, members of the Edmonton Civic Employees' Union No. 30. The board member appointed on the employees' recommendation was Mr. Charles W. Lee, of Edmonton. On November 18 Mr. James T. J. Collisson, of Edmonton, was appointed a member of the board on the recommendation of the city, and on November 22 the constitution of the board was completed by the appointment of His Honour Judge John A. Jackson, of Lethbridge, Alta., as chairman on the joint recommendation of the other board members.

In connection with the findings of the Board of Conciliation and Investigation which dealt with a wages dispute between the Canadian Pacific Steamships, Limited, and its steamship

freight checkers in Montreal (page 1066, November, 1933, LABOUR GAZETTE), the department was advised during November that the recommendation of the board that wage rates should be reduced by two cents per hour was acceptable to both the employing company and the employees concerned and that the dispute had been adjusted accordingly.

The November issue of the LABOUR GAZETTE contained, at page 1066, the text of the unanimous report of the Board of Conciliation and Investigation which dealt with a dispute between the Canadian Pacific Railway Company and its clerks, freight handlers and station employees, and subsidiary groups. The board, which was composed of Mr. Lynn B. Spencer, K.C., of Welland, Ont., chairman, Mr. George S. Currie, of Montreal, nominated by the company, and Mr. W. F. O'Connor, K.C., of Toronto, nominated by the employees, recommended a deduction of 15 per cent from existing basic rates (i.e., 5 per cent deduction in addition to the 10 per cent deduction already in operation), with the qualification that the deduction should not be applicable in cases where it would have the effect of reducing, below specified minima, the earnings of certain employees on short time or who, owing to staff reductions, had exercised their seniority to revert to lower rated positions. The department was advised during November that the recommendations of the board were acceptable to the company, and that the employees' committee had recommended to the employees that the board's findings be accepted by them.

During November a representative of the department visited Saint John, N.B., for the purpose of endeavouring to secure a settlement by conciliatory means in the case of a dispute between various steamship companies at that port and the longshoremen in their employ, members of Local 273, International Longshoremen's Association. An application for the establishment of a Board of Conciliation and Investigation had been received at the close of October from the employees concerned, approximately 900 in number. The dispute related to the employees' request for increased wages and changed working conditions. During negotiations which were resumed as a result of mediation of the departmental officer, certain demands were waived by both sides and the basis for a new agreement was reached, board procedure being accordingly rendered unnecessary.

## Report of Board in Dispute between the Canadian National Railways and its Clerks, Freight Handlers, etc.

IN THE MATTER OF *The Industrial Disputes Investigation Act and differences between the Canadian National Railways and certain of its employees being clerks, freight handlers, etc. (system and headquarters); also crew of car ferry ss. "Charlottetown," and wharf employees at Halifax, N.S.*

OTTAWA, December 1, 1933.

To the Honourable W. A. GORDON, K.C., M.P.,  
Minister of Labour,  
Ottawa, Canada.

SIR,—The Board of Conciliation and Investigation established in the above matter, and composed of the Honourable Mr. Justice Louis Cousineau, Aylmer, Chairman; Mr. F. Curzon Dobell, Montreal, nominated by the Canadian National Railways, and the Rev. Russell McGillivray, Ottawa, nominated by the Employees, was convened at the Mount Royal Hotel on September 27, 1933. The second session of the Board was held at the Court House at Montreal on the following day, when the representatives of both parties to the dispute appeared before the Board. The Acting President, Mr. S. J. Hungerford, was asked whether there was any possibility of conciliation of the dispute, and replied that the Company's position was substantially the same, that is, that a further ten per cent deduction from basic schedule rates of pay, as demanded by the Company, must be put into effect. On behalf of the Employees, Mr. J. E. McGuire stated that they were prepared to consider any modification of the Company's demands. The Board decided to ask each party to produce a written statement of its position, and accordingly adjourned until October 16, to permit of the preparation of such statements.

On October 16, the Board met again at the Court House in Montreal, and written factums were produced by each party, and explained by verbal amplifications made by the representatives present and by answers to questions put to them by members of the Board. The representatives of each party having received a copy of the other party's factum, were requested to prepare replies thereto, and a further meeting of the Board was held in camera at the Court House, Montreal, on October 27.

After careful consideration of the factums submitted and examination of the numerous exhibits produced therewith on both sides the

Board again met in public session at the Court House, Montreal, on October 30, when rebuttals were received from the representatives of the employer and the employees. The Company's representative thereupon requested an indefinite adjournment of the Board, on the ground that, a settlement having been reached in another dispute, there was a possibility that an amicable agreement might be concluded in this one. The Board thereupon adjourned *sine die* to permit of negotiations between the parties, leading if possible to a settlement of the dispute, but when, on November 17, word was received that all efforts at compromise had failed, the Board resumed its functions, and private sessions were held at the Chateau Laurier, Ottawa, on November 23, and at the Court House, Hull, on November 24.

A final public meeting was held at the Court House, Hull, on November 29, when the members of the Board received from the representatives of both sides replies to questions which had arisen out of examination of the written statements submitted. At this session the position of the Railway Company was outlined by Mr. A. J. Hills, Asst. to Vice-President, and that of the employees by Mr. A. R. Mosher, President, Canadian Brotherhood of Railway Employees.

The final meeting of the Board in camera took place at the Chateau Laurier, Ottawa, on November 30.

The primary question submitted to the Board is the following:—

An application by Canadian National Railways for a recommendation that the classes of employees above referred to should accept, in addition to the deduction in compensation of 10 per cent from basic wages which became effective on May 1, 1932, a second deduction of 10 per cent making a total of 20 per cent, from the basic rates of pay.

In its submission to the Board, the Railway Company contended that, in order to meet declining traffic during the past four years, retrenchments in service, decreases in staff, and a general wage reduction were found necessary. A deduction of 10 per cent from basic rates became effective during 1932. A further deduction of 10 per cent was sought in 1933, and, in the case of the running trades and telegraphers was put into effect, but, serious protest arising, this was reduced to 5 per cent, with effect from November 1, 1933, making a total deduction of 15 per cent from

the basic schedule rates. The same deduction was recently agreed upon between representatives of the Maintenance of Way employees and the Railway Association of Canada, subject to confirmation by the former on or before January 16, 1934. The dispute with which the present Board was appointed to deal, arises out of the general proposal on the part of the railways to effect a second 10 per cent deduction for all employees.

The Company further contended that: (1) the present basic rates were established when railway earnings were at their highest level in August, 1929, and (2) that the purchasing power of the wages of the group of employees involved in the present dispute would even, after the proposed second 10 per cent deduction, be greater than at any time prior to 1929.

The employees contended, on the other hand, that an additional 10 per cent deduction was unwarranted, in view of (1) the improvement in railway revenues and general business conditions; (2) the necessity for the maintenance of purchasing power at a high level, and (3) the low incomes now received by the workers in the classes involved in this dispute, which low incomes have been aggravated by short-time, demotion, and seasonal employment.

The Board has given careful consideration to the position of both parties to the dispute, and wishes to make the following observations thereon:

1. As a general principle, the Board seriously questions the value of any attempt by wage-reductions to find a solution of the financial problems of the Canadian National Railways.

2. The Board is sympathetically aware of the difficult financial position of the Company.

3. The Board is deeply concerned with respect to the conditions under which the lower paid employees of the Company must exist, in view of the inadequacy of the incomes to provide a reasonable standard of living.

Having these considerations in mind, and anxious that substantial justice be done to both the Company and the Employees, the Board therefore recommends that a further deduction of five per cent be made from the basic schedule rates of all employees involved in this dispute, provided, however, that such deduction shall not apply to the compensation of any employee now receiving \$85 or less per month, or operate to reduce the compensation of any employee now receiving \$85 or more per month below that amount, and that the parties enter into an agreement for the term

of one year from December 1, 1933, to November 30, 1934, upon the basis of a 15 per cent deduction from basic rates of pay, subject to the provisions stated herein.

#### *Withdrawal of Headquarters' Staffs*

In its application for a Board of Conciliation and Investigation to consider the wage-dispute as between it and the Headquarters' Staffs, Montreal, the Company included a request for a recommendation that certain employees in offices under the Auditor of Freight Accounts, Auditor of Overcharge Claims, General Car Accountant and General Freight Claims Agent and the American Railway Association Billing and Record Office be permitted to withdraw from the schedule now in effect and to change their representation.

The Company stated that, in the month of March, 1933, its Auditor of Revenues received a communication, signed by the Chairman and Secretary of a newly-formed Railway Clerks' Association, which purported to represent a substantial majority of employees in offices under the Auditor of Freight Accounts and Auditor of Overcharge Claims, requesting permission to withdraw from the Schedule. Further communications were subsequently received, representing that additional offices also wished to withdraw, and by May 30 it was claimed that over 50 per cent of the employees concerned concurred in the request for withdrawal. Accordingly, the General Chairman of the General Committee representing the employees at Montreal was advised that under these circumstances the thirty days' notice required by the Schedule was given, so that the Company might be in a position to permit of the requested withdrawal. The Committee representing the employees protested emphatically against the proposed action. At a meeting held on July 7, 1933, at which representatives of the Railway Company, of the General Committee, representing the employees and of the newly-formed Railway Clerks' Association were present, it was suggested that a ballot of the employees be taken to ascertain which method of representation was favoured by the majority, but as the representatives of both groups of employees were opposed thereto no ballot was taken.

The Railway Company stated that it was not concerned with the affiliations of its employees with labour organizations, but that it had some objection to the grouping of clerical forces, particularly at headquarters, with other classes of employees working under widely different conditions, and that it had therefore reached the conclusion that it was

in the best interests of the employees and of the Company to grant the request of the offices in question to be permitted to withdraw from the Schedule.

The General Committee representing the employees objected that the Company was interfering in a jurisdictional dispute between two groups of employees, and was endeavouring to interfere with the right of the employees to organize freely in labour unions and bargain collectively, thus constituting an unprecedented infringement of their right to unrestricted and uncoerced freedom of choice in the matter of representation. They stressed their opinion that the Board should not, upon the application of the employer, be required to adjudicate upon a dispute between two groups of employees, and stated that they viewed as undesirable the establishment of a precedent whereby an employer secured the appointment of a Board of Conciliation and Investigation to adjudicate in a jurisdictional dispute in circumstances where an application by the employees themselves would not be granted. They also contended that, contrary to the claim put forward by the Railway Company, at least two-thirds of the employees covered by the Headquarters' Staff Schedule had no desire to change their representation and offered to submit individual proxies to establish this contention.

When this matter came before the Board, it was evident, in the opinion of the Board, that the dispute was not one between the Company and a group of its employees, but between two groups of employees on the matter of representation in the negotiation of schedules and the adjustment of grievances arising thereunder, and that, further, it would seem that the action of the Railways in applying for the consideration of this matter by a Board of Conciliation and Investigation constituted interference with the rights of the employees concerned.

It was noted with some surprise that, in spite of the protestations of the Company that it was not especially concerned in the matter, it continued to insist that a decision be rendered by the Board. In the circumstances, the Board feels that the matter does not, in its present form, fall within the purview of the Industrial Disputes Investigation Act, under which the Board was appointed.

The whole respectfully submitted.

### Minority Report

IN THE MATTER OF: *The Industrial Disputes Investigation Act and differences between the Canadian National Railways and certain of its employees being clerks, freight handlers, etc., (system and headquarters); also crew of car ferry ss. "Charlottetown", and wharf employees at Halifax, N.S.*

To the Honourable W. A. GORDON,  
Minister of Labour.

SIR,—The undersigned member of the Board of Conciliation and Investigation established in the above matter begs to report respectfully as follows:—

Two applications by the Canadian National Railways have been submitted to this Board for consideration and report:

1. An application for a recommendation that the classes of employees above referred to should accept, in addition to the deduction in compensation of 10 per cent from basic wages which became effective on May 1, 1932, a second deduction of 10 per cent, making a total of 20 per cent, from the basic rates of pay; and

2. An application for a recommendation that certain offices, including among others those under the Auditor of Freight Accounts, Auditor of Overcharge Claims, General Car Accountant and General Freight Claims Agent and the American Railway Association Billing and Record office, be permitted to withdraw from the schedule now in effect and to change their representation.

#### 1.

#### Wages

The Railway Company explained in its factum and verbally through its representatives that to meet the declining traffic of the last four years it has had to make retrenchments, consisting initially of curtailment of service, but that by the Autumn of 1931 it had become evident that these measures by themselves would not meet the situation and that a general wage reduction would become essential. Deductions of 10 per cent from basic rates were put into effect for the various classes of employees during the year 1932, the deduction for the classes involved in the present proceedings being effective on May 1, of that year. On account of further declines in earnings and the serious financial situation further pay-roll economies became essential and an application was made, jointly with the Canadian Pacific Railway Company, for a further 10 per cent deduction in the remuneration of the Running Trades and Telegraphers, who are in general paid at higher rates than the other classes of employees, namely the Shop Forces, the Main-

tenance of Way Employees and the employees involved in the present dispute. After a majority of that Board had recommended a further 10 per cent deduction from the basic wages payable to the Running Trades and Telegraphers, such deduction was made, effective from May 1, 1933. Thus for engineers, firemen, conductors, trainmen and telegraphers two 10 per cent deductions were in effect from that date whereas with the groups covered by the present proceedings, and the Shop Forces and Maintenance of Way Employees, only one deduction of 10 per cent had been made when this Board was established. Protest was made by the Running Trades and Telegraphers to this second 10 per cent deduction, and after it had been in effect for six months it was by agreement replaced from November 1, by a 5 per cent deduction, making a total of 15 per cent from basic rates. Since November 1, the Maintenance of Way Employees have also by agreement subjected themselves to a total 15 per cent deduction from basic rates. Agreement with the Shop Forces has yet to be reached. Reference to these facts was made by the Railway Company to emphasize that its application in this case was not an isolated action but one of a number of steps being taken progressively by the management to reduce operating expenses in the very serious situation which confronted and still confronts it.

It must be borne in mind, the Company contended, that the present basic rates were established when railway earnings were at their highest level, namely in August, 1929, since which time the trend of the Company's earnings has been uniformly downward. In spite of this it was not until May 1, 1932, that the employees in the clerical and other groups were subjected to the first 10 per cent reduction. As the gross earnings of its Canadian lines amounted in the first eight months of the present year to only 87 per cent of those in the corresponding period of 1932 and to only 48 per cent of those in the corresponding period of 1929, the Company claimed that it should be entitled to some relief from the burden of paying 90 per cent of the rates of wages established in conditions so different from those existing to-day. The Company also showed that in the first seven months of 1933 passenger train miles had decreased 33 per cent and freight train miles 44 per cent from the figures for the corresponding months of 1929.

The Company also produced statements and graphs showing the ratio between wages and costs of living from 1926 to date and the ratio between actual wages paid and the purchasing power of those wages during those same years, contending that examination of these

figures would show that the trend in purchasing power of the wages rates during that period had been generally upward and that the purchasing power of the wages rates of the group of employees involved in the present submission would, even after the proposed second 10 per cent deduction, be greater than at any time prior to 1929.

The employees contended in their factum that there has been substantial improvement in the revenues of the Railway Company and in general business conditions since the second 10 per cent wage deduction was proposed; that the policy of wage cutting is economically unsound, as the restoration of industry depends upon an increase in the purchasing power of the masses; and that the wages of the employees involved are already so low that any further reduction of income would create intolerable and inhuman conditions of poverty and distress. They referred in particular to short time, seasonal unemployment, demotions and speed-up methods and supported their arguments by quotations from and references to trade and other publications and reports of political and judicial dicta.

Each party produced a detailed reply to the factum of the other side and the evidence produced and arguments submitted in the factums and in the replies have been not only of the utmost interest but also of very material value. Before passing to my recommendations I would express my thanks to the representatives of employer and employees alike for the clarity with which the position of each was outlined in factum and reply and for the diligence and care with which these documents were evidently prepared. I would also wish to congratulate the representatives of both parties upon the spirit of good feeling and moderation towards each other which all evinced in their appearances before the Board.

After very careful consideration of all documents produced and after making further inquiries on my own initiative, I am unable to agree with the statement of the employees that "business conditions have so definitely improved that a further wage cut cannot be defended on any rational ground"; on the other hand, I am ready, indeed eager, to take cognizance of the fact that there are indications of business improvement and that there is some reasonable justification for the hope that this improvement will be continued.

During the course of these proceedings several events occurred which necessarily affected the matter before this Board. The Canadian Pacific Railway and Canadian National Railways acting jointly reached a settlement with the representatives of the Running Trades and Telegraphers on the basis of a 15 per cent deduction, instead of the 20 per cent

deduction from basic rates which had been in effect from May 1 to October 31, a period of six months. On November 8 the Board established in the dispute between the Canadian Pacific Railway Company and its Clerks, Freight Handlers, etc., made a unanimous report recommending a 15 per cent deduction with bases for exemption in the case of some clerical positions. The Railway Association of Canada acting for the Canadian National, Canadian Pacific and other Railways effected an agreement on November 17, with the Maintenance of Way Employees, for a 15 per cent deduction from basic rates which is effective from December 1, 1933. The Railways have also effected some other agreements on the same basis.

In view of these events the Railway expressed its willingness to enter into an agreement with the representatives of the employees concerned in these proceedings providing for an aggregate 15 per cent deduction from basic rates, instead of pressing for a total 20 per cent deduction as contemplated in the Railway's application to make a further 10 per cent cut effective. Having regard to the action taken by both Railways as affecting other classes of employees and due to the action of the representatives of the employees concerned, it would therefore appear to be established that a 15 per cent deduction from basic rates must be regarded, in principle at least, as reasonable. The employees however contend that there are many individual cases, and in fact a number of specific groups, where through lack of work, reduction in staff and other causes brought about by the depression, the employees have suffered considerably beyond what would be involved in the application of a 15 per cent cut from normal wages.

The Railway, while admitting this situation, contends that the rates in the schedule which were established in good times were adjusted to the responsibilities and duties of the positions, that it cannot be expected to continue under existing traffic conditions to pay 90 per cent of the rates established in 1929, and that the actual cost to the Railway of doing the work can only be reduced by a reduction in the rates of pay. While agreeable that the work available should be shared by and distributed among the employees in order to relieve the unemployment situation, the Railway company avers, and I think with reason, that it cannot maintain one scale of rates for those who are sharing work and another scale for those who are not.

The arrangement already referred to as embodied in the recommendation of the Board established in the Canadian Pacific Railway Clerical forces' dispute makes special pro-

vision that the additional 5 per cent deduction will not be applied within certain limits to certain employees "who on account of reductions of staff have exercised their seniority to lower rated positions than those which they previously regularly occupied, involving a decrease in their rates of pay" amounting to more than a 15 per cent reduction in compensation. This arrangement is designed to grant relief where an employee occupying a certain clerical position is forced to take a position in a lower grade, originally intended more or less as an apprentice position. The employee prefers to take this position rather than to be out of employment altogether, and in certain cases such reversions no doubt result in hardship, but hardship which in my opinion it would be inequitable to relieve by the application of any general rule of exemptions, exceptions or limitations.

I am of opinion that the Railway Company has substantiated the material allegations of its application and might have been entitled to receive from this Board a report recommending the reduction prayed for, namely, an aggregate of 20 per cent from the basic rates. But the Company in the course of negotiations conducted with the employees at the invitation of the Board, with a view to effecting a settlement or compromise of this dispute, offered to agree to an aggregate deduction of 15 per cent, as being in line with settlements made since the establishment of this Board with other classes of employees. Accordingly I would recommend that this dispute should be settled by deduction of a further 5 per cent, making a total of 15 per cent, from the basic rates of wages payable to the employees involved, without any exemption, exception or limitation, and that the parties should enter into an agreement for the term of one year from December 1, 1933, to November 30, 1934, upon the basis of such reduced wages.

I am prepared to recognize that a system-wide application of this, as of any other, wage deduction might perhaps cause distress to certain individual employees, but do not feel that any specific exemptions should be fixed or any minimum wage rate appointed by this Board. I am confident that a request from this Board for the most generous consideration of all cases where distress might ensue, particularly cases of employees who have already suffered demotion, would have been most sympathetically received by the Company and would in the result afford to the employees a greater measure of protection than they could obtain by the prescription of any such hard and fast rule for exemption or exception as is advocated by my colleagues on this Board.

*Withdrawal of Offices*

The Railway Company stated that in the month of March, 1933, its Auditor of Revenues received a communication, signed by the Chairman and Secretary of the newly formed Railway Clerks Association, which purported to represent a substantial majority of employees in offices under the Auditor of Freight Accounts and Auditor of Overcharge Claims, requesting permission to withdraw from the Schedule. Further communications were subsequently received representing that additional offices also wished to withdraw and by May 30 it was claimed that over 50 per cent of the employees concerned concurred in the request for withdrawal. Accordingly the General Chairman of the General Committee representing the employees at Montreal was advised that under these circumstances the thirty days notice required by the Schedule was given so that the Company might be in a position to permit of the requested withdrawal. The Committee representing the employees protested emphatically against the proposed action. At a meeting held on July 7, 1933, at which representatives of the Railway Company, of the General Committee representing the employees and of the newly formed Railway Clerks Association were present, it was suggested that a ballot of the employees be taken to ascertain which method of representation was favoured by the majority, but as the representatives of both groups of employees were opposed thereto no ballot was taken.

The Railway Company stated that it is not concerned with the affiliation of its employees with labour organizations, but that it has some objection to the grouping of clerical forces, particularly at headquarters, with other classes of employees working under widely different conditions and that it therefore reached the conclusion that it was in the best interests of the employees and of the Company to grant the request of the offices in question to be permitted to withdraw from the Schedule.

The General Committee representing the employees objected that the Company was concerning itself with a jurisdictional dispute between two groups of employees and was endeavouring to interfere with the right of the employees to organize freely in labour unions and bargain collectively, thus constituting an unprecedented infringement of their right to unrestricted and uncoerced freedom of choice in the matter of representation. They stressed their opinion that the Board should not, upon the application of the employer, be required to adjudicate upon a dispute between two groups of employees, and stated that they viewed as undesirable the establishment of a precedent whereby an employer secured the

appointment of a Board of Conciliation and Investigation to adjudicate in a jurisdictional dispute in circumstances where an application by the employees themselves would not be granted. They also contended that, contrary to the claim put forward by the Railway Company, at least two-thirds of the employees covered by the Headquarters' Staff Schedule had no desire to change their representation and offered to submit individual proxies to establish this contention.

After the most careful consideration I am of opinion that this question, according to its merits and substantial justice, should be decided by adoption of the course advocated by the Railway Company.

When the officers of the Company received from representatives of the employees a request for permission to withdraw from the Schedule they were, on account of the currency of the existing Schedule, unable to grant this request, even though the employees apparently represented more than a majority of those concerned. Further continued demands made by the employees did constitute a dispute within the meaning of Section 2, paragraph (d) of the Industrial Disputes Investigation Act and an application for adjudication on this matter was for convenience joined to the then pending application for adjudication upon the wage rates of the clerical forces. On August 28, 1933, the Honourable the Minister of Labour was pleased to authorize the establishment of a Board of Conciliation and Investigation to report upon the question. Under Clause 2, of Section 7 of the Act the decision of the Minister in such a case is final and once a Board has been created it is conclusively deemed to be authorized by and to be in accordance with the provisions of the Act. I am accordingly unable to agree with my colleagues on this Board that the question of withdrawal of these offices is not properly submitted to the Board for its consideration and report.

Considering that the application of the Railway Company has been made to meet the desire of the majority of the employees concerned and is not contrary to the well-established principle of freedom of choice to which the employees are entitled, but is rather in pursuance of customary principles of fair dealing, I am of the opinion that the change desired by the Railway Company is proper and would respectfully recommend that the Company should be authorized to permit the withdrawal from the Schedule of the offices in question.

The whole respectfully submitted.

(Sgd.) F. CURZON DOBELL.

OTTAWA, December 1, 1933.

## CONCILIATION WORK OF THE DEPARTMENT OF LABOUR FROM APRIL 1, 1933, TO NOVEMBER 30, 1933

CONCILIATION proceedings are carried on for the most part under the provisions of the Conciliation and Labour Act, which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, preliminary inquiries and mediation by officers of the Department result in the settlement of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

The Department of Labour has on its staff conciliators and mediators who are stationed at Vancouver, Toronto, Ottawa, and Montreal. The territory of the officer resident in Vancouver comprises the four western provinces. The conciliation officer resident in Toronto confines his activities to Ontario, while the officer in Montreal covers the province of Quebec and the Maritime Provinces. The headquarters of the Chief Conciliation officer are at Ottawa.

These officers are also charged with certain duties arising out of the administration of the Fair Wages Policy applying to contracts let by the Dominion Government and to works aided by federal funds.

The following statement covers the more important conciliation matters dealt with during the period from April 1, 1933, to November 30, 1933 (An article covering the period from November 1, 1932 to April 30, 1933 appeared in the *LABOUR GAZETTE*, May, 1933, page 495).

*Longshoremen, Montreal, P.Q.*—In April, 1933, negotiations between the Shipping Federation of Canada and the Syndicated Longshoremen of the Port of Montreal, concerning wages rates for the current season, reached a deadlock, the longshoremen refusing to accept the 10 per cent reduction proposed by the employers. An officer of the Department mediated, but the workers refused any compromise whatever and the matter was later dealt with by a Board of Conciliation and Investigation.

*Building Trades, Vancouver, B.C.*—In April, 1933, the General Contractors' Association, Vancouver, B.C., gave notice in writing to representatives of the building trades of a reduction in wages as from May 1. An attempt

was made by the Western Representative of the Federal Department of Labour to have the employers' and employees' representatives meet in a joint conference to discuss the matter, but his efforts in this direction were unsuccessful.

*Lithographers, Toronto, Ont.*—Lithographers employed by the Miller Lithographic Company, Toronto, Ont., ceased work on April 15, 1932, due to a reduction in wages. Subsequently an attempt was made to settle the issue through mediation by an officer of the department of Labour, but without success. On the suggestion of an officer of Local No. 12, Amalgamated Lithographers of America, Toronto, a further attempt to settle the dispute was made on June 1, 1933. The Company, however, stated that the matter was closed as far as they were concerned and declined to deal further with it.

*Machinists, Saint John, N.B.*—The assistance of the Department of Labour was requested by the International Association of Machinists, Saint John, N.B., under date of June 5, 1933, due to a decrease in wages made effective by the Saint John Dry Dock Company, Limited. Officers of the Department were instructed to proceed to Saint John to deal with the matter. Joint conferences on July 14 brought about a settlement, the machinists' rate being increased by 5 cents per hour.

*Hosiery Workers, Hamilton, Ont.*—Employees in the full fashioned hose knitting department of the Mercury Mills, Limited, Hamilton, Ont., numbering 61 male and 26 female, ceased work on June 19, 1933, in protest against the application of a new method of operation known as the Bedaux System of Human Labour Measurement. On June 21 the strikers were joined by 500 employees in other departments. Upon the request of His Worship the Mayor of Hamilton, an officer of the Department of Labour visited Hamilton for the purpose of mediating between the strikers and Company officials. Discussions which took place made it definitely clear that the strikers would not enter into negotiations with the Company management unless the management would first agree to abolish the Bedaux System, which they refused to do. Certain concessions were offered in other directions but, due to the adamant attitude of the strikers on this particular point, it was not possible to reach an amicable basis of settlement.

*Civic Employees, Edmonton, Alta.*—An application for the establishment of a Board of Conciliation and Investigation was received in the Department of Labour on June 5, 1933, from employees of the City of Edmonton in the waterworks, engineer's and power house departments, said to number approximately 300 and being members of the Edmonton Civic Employees' Union, No. 30, to deal with the alleged wrongful dismissal of Malcolm Ainslie, a member and business agent of the Union. Direct negotiations between the interested parties prior to the application for the Board had failed to settle the dispute. Early in July an officer of the Department of Labour visited Edmonton and endeavoured through conciliation efforts to find a solution of the dispute. The civil authorities agreed to re-employ Ainslie in a temporary capacity. This, however, was not acceptable to the Union and a Board was finally established in November.

*Coal Miners, Canmore, Alta.*—Miners employed by the Canmore Coal Company, Canmore, Alta., ceased work on the morning of July 5, 1933, due, it is stated, to the company refusing the request of one of the miners to have his working place changed. Departmental assistance was requested on July 17. An officer of the Department visited Canmore on July 29 but conferences held at that time failed to solve the difficulty. Further conferences held and investigations made by a Departmental officer at a later date resulted in a proposal being made to the miners' committee which, upon being ballotted on, proved acceptable and the miners returned to work on August 14.

*Operating Engineers, etc., Coal Valley, Alta.*—July 24, 1933, the Department of Labour received a request from Local Union No. 46 of the International Union of Operating Engineers and Steam Shovel Auxiliary Local, Edmonton, to assist in settling a dispute between that Union and the firm of J. G. Pickard, which firm had a contract for the removal of the overburden at the plant of the Coal Valley Mining Company, Limited, Coal Valley, Alta. A Departmental officer was assigned to the case, and the negotiations which took place at Coal Valley on August 2 resulted in a settlement which was covered by a signed agreement.

*Machinists, Saint John, N.B.*—Arising out of a change of employment policy made effective in July, 1933, by the Saint John Dry Dock Company, Limited, complaints reached the Department of Labour from the International Association of Machinists, Saint John, N.B., that discrimination was being shown

against machinists. An officer of the Department visited Saint John on August 10 and the matter in dispute was disposed of to the satisfaction of both parties.

*Street Railway Employees, Winnipeg, Man.*—Upon the application of the Winnipeg Electric Company a Board of Conciliation and Investigation was established on May 1, 1933, to deal with a dispute concerning wages and working conditions affecting motormen, conductors and busmen, and employees of the mechanical, track and gas production departments. The report of the Board reached the Department of Labour on August 15, and in respect to wages for employees in the traffic, mechanical and track departments, recommended a further decrease equivalent to a 15 per cent reduction from the basic rates. These employees refused to accept the Board's findings and further direct negotiations failed to settle the dispute. The company thereupon gave notice on August 29 that from August 1 the wages reduction recommended by the Board would be made effective. The employees' representatives in response notified the Company that if their pay cheques for the period ending August 15 were reduced a strike would take place on August 31. The Minister of Labour found means of intervention at this time and succeeded in temporarily forestalling a strike and thereby providing a further opportunity for negotiations. An officer of the Department of Labour was immediately sent to Winnipeg for this purpose. Conferences followed between the Departmental officer and officials of the Winnipeg Electric Company, also with representatives of the employees, for several days and considerable headway was made but not to the point of reaching an amicable settlement. It developed at a joint conference near the middle of September that further conferences afforded no hope of a settlement being reached. Shortly thereafter a strike again became imminent and to prevent such happening the Chairman of the Public Utilities Commission, Winnipeg, intervened and as a result of a further joint conference an arrangement was made which led to the establishment of a Board by the Government of Manitoba under the provincial Industrial Conditions Act, to deal with the matters in dispute. His Worship Mayor Webb of Winnipeg co-operated wholeheartedly throughout all negotiations.

*Furniture Workers, Stratford, Ont.*—Several hundred furniture workers employed in five local furniture factories ceased work on September 14, 1933, demanding increased wages and recognition of the Chesterfield and

Furniture Workers' Industrial Union, affiliated with the Workers' Unity League of Canada. Subsequently employees in another factory also ceased work. At the request of His Worship the Mayor of Stratford an officer of the Federal Department of Labour proceeded to Stratford on September 20 and co-operated with the Deputy Minister of Labour of the Province of Ontario in an attempt to find a basis of settlement acceptable to the parties directly affected. Subsequent to the strike and up to September 21 no negotiations had taken place between the employers and the strikers' committee, due to the refusal of the employers to recognize the union in any way. The two officers referred to held a conference with the employers early on the afternoon of the 21st and arrangements were made to hold a joint conference between the employers and a committee representing the strikers that same evening. It developed at the joint conference that officers representing at least four and possibly five of the furniture factories were prepared to recognize the union provided the other matters in dispute could be solved. It was also agreed that all strikers would be taken back without discrimination, and further that shop committees in each factory would be recognized. The spokesman for the strikers' committee stated very definitely that if the employers would recognize the union the other matters in dispute could be settled without difficulty in a few hours. It was therefore arranged that shop committees should meet the management of the individual companies on the following day to arrive at an agreement as to wages rates and certain other matters pertaining to the working conditions. It was suggested to the employers by the Governmental officers that they should go as far as possible in the direction of concessions to make it possible to bring the strike to a conclusion. Within the next day or two shop committees met the management of several of the factories and certain concessions were made representing a general wage increase of ten per cent and the elimination of certain shop conditions of which complaint had been made. No agreement was reached, however, as the shop committees stated that these offers would have to be voted upon by the strikers at a meeting to be held the following Saturday evening, the 23rd. Statements made by the shop committees appearing in the press at the time gave reason to believe that in one or more instances the concessions offered by the employers would likely be accepted. Due to the fact that the leaders of the strikers declined to meet either of the Governmental

representatives it was not possible to ascertain definitely just what concessions would prove acceptable to the strikers and therefore, after having obtained from the employers the best proposition that seemed possible, these officers withdrew from the case. It later developed that the offer was refused.

*Bricklayers, Halifax, N.S.*—A dispute arose in Halifax between the Bricklayers', Masons' and Plasterers' International Union No. 1 and the Mechanical Builders' Exchange as to the hourly rate to be paid after May 1, 1933. The rate for Bricklayers was reduced by the Exchange from 97½ cents to 80 cents per hour. Through conciliation efforts by an officer of the Department of Labour a verbal agreement was reached between the interested parties early in September restoring the former rate of 97½ cents.

*Coal Miners, Edmonton, Alta.*—On September 19, 1933, word reached the Department of Labour relating to a situation developing in the Edmonton coal mining field and requesting that an officer of the Department be sent there to assist in adjusting the matters in dispute with the object of preventing strikes in a number of the mines. Approximately twenty mines were involved. An officer of the Department of Labour reached Edmonton during the last week of September. Prolonged negotiations ensued during which the Departmental officer acted in the capacity of mediator. The disputes had to do mainly with data and contract rates. The Departmental officer left Edmonton early in November, at which time agreements had been entered into between several of the mines and the United Mine Workers of America. In a number of other instances negotiations had reached a point where it appeared that agreements would be consummated and the likelihood of strikes taking place eliminated.

*Street Railway Employees, Vancouver, B.C.*—Due to the failure of negotiations concerning proposed wages conditions between officials of the British Columbia Electric Railway Company, Limited, and representatives of the employees, members of the Amalgamated Association of Street and Electric Railway Employees of America, Divisions Nos. 101 (Vancouver), 134 (New Westminster), and 109 (Victoria), an application for a Board of Conciliation and Investigation was received from the Company on October 4, 1933. The Company's application proposed a further reduction of 10 per cent in wages, or the equivalent of 15 per cent from the base rates constituted in the agreement, and reserved the right to propose changes in the working con-

ditions, some of which were stated to be unnecessarily expensive to the Company. An officer of the Department of Labour visited Vancouver on October 9 and for several days held separate conferences with both parties with the object of bringing about a direct settlement. Finally at a joint conference on October 17 the employees' advisory committee agreed to submit by ballot to the employees a proposal for a settlement based on the following points: a further 5 per cent deduction in wages instead of 10 per cent, the former agreement in other respects to be renewed, and the inclusion in a separate agreement of certain bus lines not heretofore covered by agreement. A ballot taken by the employees was in the negative and therefore a Board of Conciliation and Investigation was established to deal with the matter.

*Coal Miners, Canmore, Alta.*—Early in October, 1933, a dispute arose at the mines of the Canmore Coal Company, Canmore, over the rate applicable under the working agreement to certain work being performed. A conciliation officer of the federal Department of Labour visited Canmore on October 8 and again on October 25 and discussed the matter in dispute with the interested parties. While no definite settlement of the disputed point was reached it appeared at the end of November that the matter would remain in abeyance pending the expiration of the present agreement, that is, March 31, 1934.

*Coal Miners, Nacmine, Alta.*—In October, 1933, disputes arose on four points between the Thomas Coal Company, Limited, Nacmine, Alta., and the United Mine Workers of America. Two of these were disposed of through joint negotiations in which a mediator of the federal Department of Labour took part, but the dispute regarding long wall work and one having to do with sub-contracting were not settled. The existing agreement sets out the course to be followed in dealing with such matters and provides that failing an agreement both parties are to endeavour to select an independent chairman and, failing to agree in this respect, shall ask the Minister of Labour to appoint such chairman, whose decision shall be final and binding upon both parties. The parties concerned in this dispute were unable to agree upon an independent chairman and at their request the Minister of Labour made the appointment under date of November 3, naming Mr. Norman Fraser, mining engineer, Edmonton, Alta.

*Station Agents and Telegraph Operators in Station Service, Rivière du Loup, P.Q.*—Under date of October 13, 1933, a complaint reached

the Department of Labour from the Canadian Brotherhood of Railway Employees, Temiscouata, P.Q., regarding a wages reduction previously made effective by the Temiscouata Railway Company, and the conciliation services of the Department were requested. An officer of the Department proceeded to Rivière du Loup on October 23 and held separate and joint conferences with the parties directly concerned, which resulted in a settlement of the dispute on October 24 covered by a signed agreement.

*Longshoremen, Saint John, N.B.*—An application for the establishment of a Board of Conciliation and Investigation was received in the Department of Labour on October 31, 1933, from members of the International Longshoremen's Association, Local 273, Saint John, N.B., to deal with a dispute existing with the Shipping Federation of Canada concerning wages and working conditions, direct negotiations between the interested parties having failed to settle the issue. An officer of the Department of Labour proceeded to Saint John on November 19, and as a result of separate and joint conferences during which the Departmental officer acted in the capacity of mediator, an amicable settlement was reached eliminating the necessity of board procedure.

*Coal Miners, Edmonton, Alta.*—Coal miners employed by the Edina Coal Company (Premier Mine), Edmonton, ceased work on November 2, 1933, owing to failure of negotiations with the Company respecting contract rates. Joint conferences were arranged by an officer of the Department of Labour who acted as mediator. A settlement of the matters in dispute was reached, covered by a signed agreement, which represented a considerable increase in wages. The strikers resumed work on the morning of November 10.

*Divers and Caisson Workers, Vancouver, B.C.*—Divers and caisson workers employed on the Second Narrows Bridge, Vancouver, B.C., ceased work on November 8, 1933, demanding among other things increased wages for various classes. An officer of the Federal Department of Labour and the Deputy Minister of Labour of British Columbia mediated and a settlement was reached which conceded the demands of the divers and provided for a compromise in the case of compressed air workers. This strike is dealt with in the following article.

The Hon. George S. Pearson, of Nanaimo, has been appointed Minister of Mines and Labour in the cabinet of the Hon. T. D. Pattullo, Premier of British Columbia.

## STRIKES AND LOCKOUTS IN CANADA DURING NOVEMBER, 1933

THE following table shows the number of disputes, workers involved and time loss for November, 1933, as compared with the previous month and the same month a year ago.

| Date          | Number of disputes | Number of employees involved | Time loss in working days |
|---------------|--------------------|------------------------------|---------------------------|
| *Nov., 1933.. | 20                 | 3,974                        | 49,543                    |
| *Oct., 1933.. | 14                 | 1,108                        | 19,203                    |
| Nov., 1932..  | 12                 | 980                          | 2,338                     |

### \* Preliminary figures.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

The number of strikes and lockouts recorded for November was substantially greater than that shown for October, the number of workers involved and the time loss incurred showing a similar increase. As compared with November 1932, the number of strikes and lockouts recorded was much larger, a very great increase appearing in the number of workers involved and the time loss incurred. The higher figures for November, 1933, were due largely to disputes involving pulpwood cutters in Northern Ontario and Quebec, where strikes of some 2,800 workers resulted in a time loss of over 41,000 days during the month.

Two disputes, involving 565 workers, were carried over from from October, and eighteen disputes commenced during November. Of these twenty disputes, thirteen terminated during the month, four being in favour of the workers involved, two in favour of the employer concerned, compromises being reached in three cases, while the results of four were recorded as partially successful. At the end of November, therefore, there were seven disputes in progress, recorded as strikes or lockouts, namely: pulpwood cutters, Thunder Bay district, Ont.; pulpwood cutters, Coch-

rane district, Ont.; pulpwood cutters, Saguenay district, P.Q.; pulpwood cutters, Rouyn district, P.Q.; bakery employees, Winnipeg, Man.; boys' clothing factory workers, Toronto, Ont.; and cold storage plant workers, Winnipeg, Man.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information had been received indicating that employment conditions are no longer affected, but which the unions concerned have not declared terminated. Information is available as to five such disputes, namely: photo engravers, Toronto, and London, Ont., Montreal and Quebec, P.Q., and Winnipeg, Man., May 4, 1931, one employer; motion picture projectionists, Winnipeg, Man., February 28, 1932, one employer; motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; lithographers, Toronto, Ont., April 15, 1932, one employer; and composers, Winnipeg, Man., March 13, 1933, one employer. The dispute of photo engravers commencing March 23, 1931, in one establishment in Toronto, Ont., and the dispute of motion picture projectionists commencing on March 6, 1933, in one theatre in St. John., N.B., which have been carried in the above list for some months, are recorded as having lapsed by the end of November, reports from the unions involved indicating that all the strikers have secured work elsewhere.

A cessation of work from October 26 to October 28 by thirty-five employees of one box manufacturing company at Marpole, B.C., was reported to the Department too late for inclusion in the November issue of the LABOUR GAZETTE. The strikers ceased work in protest against a new system of operation and because of grievances against the plant foreman, but returned without securing any concessions.

Information has reached the Department as to a dispute commencing during November in a clothing manufacturing establishment at Longueuil, P.Q., but no details have as yet been received.

A dispute involving printers, etc., employed by one firm in Winnipeg, Man., is reported to have occurred during November, but detailed information has not as yet been received. It appears, however, that the printers ceased work demanding the restoration of a wage reduction and returned in twenty-four hours after securing their objective.

Disputes involving men on unemployment relief work, who are not paid wages but receive subsistence for which work is performed

\*In this table the date of commencement is that on which time loss first occurred, and the date of termination is the last day on which working time was lost to an appreciable extent.

or may be required, are not included in the record, as no relation of employer and employee is involved.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

FURNITURE AND WOOD FACTORY WORKERS, STRATFORD, ONT.—As stated in the November issue of the LABOUR GAZETTE this dispute, commencing on September 14, involving six furniture and wood working factories employing approximately 600 workers at the time, was terminated early in November, work having been resumed in one establishment on October 19, in four on November 6 and in the sixth on November 9. The employees had demanded a minimum wage scale of 65 cents per hour for skilled men, fifty cents for semi-skilled and 45 cents for unskilled labour and the forty-four hour week and time and one half rates for overtime. The wage scale demanded was stated to involve increases from thirty-five to fifty per cent, and the hours previously worked were generally nine per day and fifty per week. Recognition of the recently organized Chesterfield and Furniture

Workers' Industrial Union, an affiliate of the Workers' Unity League of Canada, was also demanded, including the closed shop. Mediation of the federal and provincial Departments of Labour representatives failed to bring about a settlement but finally through direct negotiations agreements were reached on the basis of recognition of shop committees, forty-four hours per week with a maximum of fifty after which overtime would be paid, wage scales for each factory to be as agreed upon between management and shop committee on the basis of ten per cent increases or more. It is stated increases for some operations were as high as twenty-five per cent. In one factory a minimum scale for men was set at 35 cents per hour for skilled, 30 cents for semi-skilled and 26 cents for unskilled labour. A union committee was also recognized. The agreements were summarized in the LABOUR GAZETTE for November on page 1124.

POULTRY DRESSERS, ETC., STRATFORD, ONT.—As stated in the November issue of the LABOUR GAZETTE, the strike of employees in a packing plant, commencing on September 21

to secure increased wages, was terminated early in November, a ten per cent increase in wages being agreed upon by the plant committee set up, consisting of equal representation from the employees and management.

**LOGGERS, NORTHERN ONTARIO AND QUEBEC.**—A number of strikes involving pulpwood cutters, tie cutters and lumber workers commenced during November, chiefly under the auspices of the Lumber Workers' Industrial Union, affiliated with the Workers' Unity League of Canada. On November 1 pulpwood cutters employed by contractors for a pulp and paper company ceased work in the Kapuskasing district to secure increases in wages and reductions in the rates for board. Work was resumed on November 8, an agreement providing for \$35 per month, with board, ten hours per day and overtime pro rata for work in excess of twenty-six days per month, for monthly employees and for piece workers, \$3.50 per double cord, and 5 cents per piece for long sticks; board reduced to 75 cents per day; no discrimination regarding union or non-union workers, recognition of camp committees but not of any union. In the same district, near Hearst, employees of a timber company ceased work on November 8 making similar demands and an agreement was reached on November 25 with similar provisions, except that for monthly men a range of \$30-\$35 was provided and the rate for board was 85 cents per day. A strike of pulpwood cutters near Cochrane on November 13 with similar demands remained unterminated at the end of the month.

In the Thunder Bay district, workers in several camps ceased work Nov. 1, making similar demands and were joined by those in other camps, finally involving eight employers and their contractors. Negotiations between the Lakehead Timbermen's Association and representatives of the strikers resulted in an offer by the employers of \$3.50 per double cord, \$35 per twenty-six day month and board, ten hours per day, reduction of board to 75 cents per day and the formation of camp committees. It was reported that the strikers' representatives were willing to accept these terms but that two of the largest operators, not members of the Association, refused to agree to these and the dispute remained unterminated.

On November 27 workers in the camps of one pulp company near Rouyn, P.Q., ceased work, making similar demands and it is reported that the employer closed the camps for the season. On the same day workers in camps in the Saguenay district in Quebec

were reported to have ceased work demanding wage increases, but particulars as to this dispute have not been received.

**COAL MINERS, EDMONTON, ALTA.**—Employees, approximately seventy in number, in one colliery at Edmonton, Alta., ceased work on November 3 demanding an increase in piece work rates. The western representative of the Department of Labour, dealing with disputes in other mines in the district not on strike, on November 5 attended a joint meeting of the parties concerned, arranged a settlement and work was resumed on November 10.

**BAKERY EMPLOYEES, WINNIPEG, MAN.**—Three disputes involving bakery employees in Winnipeg, Man., occurred during November, the strikers in each case being members of the Food Workers' Industrial Union, affiliated with the Workers' Unity League. On November 6 nine employees of one bakery ceased work to enforce a demand for an increase in wages for one worker, from \$9 per week to \$13. Negotiations between the parties involved resulted in work being resumed on November 15, a compromise rate of \$11 per week being agreed upon for the worker concerned.

On November 7 employees of a second bakery ceased work, protesting against a change from an eight hour day, as provided in a signed agreement with the union, to ten hours per day. It was also alleged that the employer was delivering bread for the plant involved in the strike on November 6. Negotiations resulted in the resumption of work on November 15, the eight hour day to prevail.

The third dispute commenced on November 27, six bakers, drivers, etc., ceasing work to enforce a demand that one worker be reinstated and that each employee be issued two loaves of bread per day in addition to his wages, a privilege which had recently been cancelled. At the end of the month the dispute was unterminated, but a settlement in favour of the workers is reported to have been reached early in December.

**SHOE FACTORY WORKERS, TORONTO, ONT.**—Eighty-five members of the Boot and Shoe Workers' Industrial Union employed in one shoe manufacturing establishment in Toronto, Ont., on November 14 ceased work, protesting against the discharge of certain workers by a new management, in order to reduce staff, and a demand that each remaining worker sign an individual agreement with the firm. On November 20, however, as the result of negotiations, work was resumed under a union

agreement with a full staff as prior to the change of management.

**BOYS' CLOTHING FACTORY WORKERS, TORONTO, ONT.**—Commencing on November 3, 1933, for recognition of union, the Amalgamated Clothing Workers of America, and for a thirty per cent increase in wages, this dispute involved approximately 128 workers employed by one firm. The plant was picketed by the strikers, two women being arrested on November 9 and charged with assault in connection with an attack on an employee. At the end of the week the employer formally discharged the strikers and attempted to operate with new workers. The strikers, who claimed they were receiving rates below those set by the Minimum Wage Board of Ontario, requested an investigation, and on November 16 a member of the Board announced that evidence would be heard and any necessary action taken. On November 29 another disturbance occurred in which two persons were injured, and at the end of the month the dispute was reported to be unterminated.

**WOMEN'S CLOTHING FACTORY WORKERS (CLOAKMAKERS), WINNIPEG, MAN.**—This dispute commenced on November 6, when sixty-five cloakmakers employed by one firm ceased work in protest against the discharge of some twenty workers, the employer, however, claiming that the dispute arose over distribution of work and that no workers had been discharged. Negotiations resulted in operations being resumed later the same day, the union, the Industrial Union of Needle Trades Workers, reporting that the twenty workers were reinstated.

**FACTORY WORKERS (WOOD), HESPELER, ONT.**—Demanding recognition of the Woodworkers' Industrial Union, affiliated with the Workers' Unity League, and protesting against the discharge of an active union worker, twenty-eight employees of one firm at Hespeler, Ont., engaged in the manufacture of wooden sports goods, ceased work on November 16. The establishment was picketed by the strikers but continued to operate with a number of employees who did not join in the strike. On November 22, however, the union declared the dispute terminated, fifty per cent of the workers returning on the employers' terms while the others were replaced.

**DIVERS AND CAISSON WORKERS, VANCOUVER, B.C.**—Employees engaged in connection with the construction of a bridge, ceased work on November 9, demanding increases in wages, the supply of equipment by the employer and recognition of the Submarine Divers and Tenders Union of Canada. The representative of the Federal Department of Labour

and the Deputy Minister of Labour for British Columbia after conferences with the representatives of the parties arranged a settlement, the terms of which were retroactive to the beginning of the work. The rates of wages provided were: divers, supplying or not supplying equipment \$25 and \$20 respectively; divers' tenders \$7; valve tenders \$5; compressed air workers (caisson) \$10; shift bosses \$1 over compressed air workers; all per working period, in accordance with the regulations of the Workmen's Compensation Board for British Columbia; lock tenders \$8 and lock tenders' helpers \$4 per day of eight hours. The union had demanded \$15 for compressed air workers, \$10 for lock tenders and \$5 for helpers. The employer agreed to reimburse employees for rubber boots, to have weekly pay periods and to permit an accredited representative of the union to have access to the work provided operations were not interfered with.

**TRUCKERS AND STEVEDORES, BELLEVILLE, ONT.**—On November 3, some fifteen truckers engaged in connection with the unloading of a boat at Belleville, Ont., ceased work demanding an increase from \$1.25 to \$1.50 per hour. Thirty-five dock labourers employed on the same job ceased work in sympathy with the truckers but also demanded an increase in wage rates, from 30 cents per hour to 40 cents. Work was resumed within a few hours, however, the truckers receiving the increase demanded while the stevedores returned with no change in rates.

**COLD STORAGE PLANT EMPLOYEES, WINNIPEG, MAN.**—This dispute commenced on November 29, when nine of the employees of one cold storage company in Winnipeg, Man., ceased work demanding a minimum rate of 40 cents per hour, recognition of a shop committee and the reinstatement of five workers who, it was alleged, had been discharged because of their membership in the Food Workers' Industrial Union. The plant was picketed by the union and two men were arrested during a disturbance and charged with intimidation and unlawful assembly. At the end of the month no termination had been reported.

**STAGE HANDS AND MUSICIANS, TORONTO, ONT.**—This dispute commenced on November 6 in one theatre in Toronto, Ont., when it was proposed to operate without an orchestra for the current production. The musicians affected alleged this to be a lockout and stage hands ceased work in sympathy as required by the agreement between the two unions. The production was carried on without orchestra or stage hands and the dispute is recorded as having lapsed by November 11.

## STRIKES AND LOCK-OUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lock-outs in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the issue of February, 1933, in the review of Strikes and Lock-outs in Canada and Other Countries, 1932. The latter review included a table summarizing the principal statistics as to strikes and lock-outs since 1919 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the latest figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible directly from the government publications of the various countries concerned, while information as to particular disputes is obtained for the most part from newspaper reports.

### Great Britain

The number of disputes beginning in October was 21, and 8 were in effect from the previous month, making a total of 29 disputes in progress during the month, involving 9,700 workers, with a time loss of 57,000 working days.

Of the 21 disputes beginning in the month, 5 were over demands for increases in wages, 7 over proposed reductions and other wage questions, 7 over questions of working arrangements and 2 over questions of trade union principle. Settlements were reached in 19 disputes, of which 2 were settled in favour of workers, 10 in favour of employers, and 7 were settled by compromise. In the case of 3 other disputes, work was resumed pending negotiations.

### Czechoslovakia

For the year 1932, the number of disputes reported was 317, involving 98,956 workers, with a time loss of 1,224,541 working days, as compared with 254 disputes, involving 46,400 workers with a time loss of 469,713 working days in the year 1931.

### Poland

The number of disputes reported for the year 1932 was 510, involving 314,914 workers with a time loss of 2,145,653 working days.

### Spain

For the year 1930 there were 402 strikes, involving 247,460 workers with a time loss

of 3,745,360 working days. During the year 1931, there were 734 strikes, involving 236,177 workers, with a time loss of 3,843,260 working days.

### United States

The number of disputes beginning in September was 143 and 133 were in effect at the end of the month. The number of workers involved in disputes in effect at the end of the month was 171,288 and the time loss for the month was 3,826,835 working days.

The strike of tool and diemakers employed in the automobile manufacturing industry at Detroit, Michigan, and vicinity, which began about the end of September and was noted in the last two issues of the LABOUR GAZETTE, was called off by the union on November 6.

Eight thousand stock yard employees at Chicago, Illinois, were on strike for two days, November 27 to November 29, when it was agreed to give a 10 per cent wage increase pending further negotiations.

A strike of 3,000 anthracite coal miners at Scranton, Pennsylvania, was in effect from September 2 to September 12, for the reinstatement of discharged workers. The dispute was settled by the conciliation service of the Department of Labour. Another strike of anthracite coal miners in north eastern Pennsylvania in the vicinity of Wilkes Barre, involving 10,000 workers, was in effect from November 6 to November 10, when a settlement was reached by accepting the proposals of the National Labour Board and by a guarantee of the reemployment of the strikers.

A strike of 3,400 fishermen of the shrimp fisheries, Biloxi, Mississippi, over prices for fish and concerning working conditions, was in effect from August 31, to September 12. Agreements were reached with a few of the canneries involved.

About 10,000 Filipino farm workers of the San Joaquin Valley, California, went on strike about August 16 over wages and working conditions, and no report of a settlement has been noted.

A strike of 5,000 woodworkers, employed in various towns in Massachusetts, was in effect from September 13 to September 21, for union recognition. In the settlement reached through the conciliation service of the Department of Labour, the Code was adopted and all questions in dispute not fixed by it were to be referred to arbitration.

## OLD AGE PENSIONS IN CANADA

## Financial Summary as at September 30, 1933

THE accompanying table gives a financial summary, to September 30, 1933, of operations under the Old Age Pensions Act (Revised Statutes of Canada, 1927, chapter 156, amended by Statutes of 1931, chapter 42) and under the concurrent Acts adopted by the provinces participating in the scheme. Full statistics, including information as to the sex, conjugal condition, former residence, countries of origin, etc., of pensioners, are given in the annual statements, of which the last was published in the LABOUR GAZETTE, July, 1933, page 683.

The Province of Prince Edward Island appears for the first time in the financial summary for the past quarterly period, the enabling provincial legislation having become effective on July 1, 1933. The Old Age Pensions Act which was adopted by the Nova Scotia legislature in 1931, was proclaimed on September 5, 1933 (LABOUR GAZETTE, September, 1933, page 875) and it will come into operation on March 1, 1934, under an agreement recently completed between the Dominion and Provincial governments.

## FINANCIAL SUMMARY OF OLD AGE PENSIONS IN CANADA AS AT SEPTEMBER 30, 1933

## Annual Report on Pensions in New Zealand

The thirty-fifth annual report of the Pensions Department of New Zealand details the operation of the Pensions Act for the year ended March 31, 1933. (A review of this legislation appeared in the LABOUR GAZETTE, September, 1931, page 992). The total number of pensions in force at the end of the year was 72,580, and the total payments amounted to £3,031,781. The total number of pensioners, by classes of pension, was as follows: war, 21,104; old age, 34,932; widows', 4,687; Maori war, 106; miners', 743; epidemic, 98; blind, 395; Boer war, 55; sundry pensions and annuities, 120; Civil Service Act of 1908, 20; and family allowances, 10,320. The percentage cost of administration to the total payments was 1.77.

By the Pensions Amendment Act, 1925, the amount of old age pensions was established at £45 10s. per annum, reducible by £1 for every complete £1 of income over £52; and by £1 for every complete £10 of net capital value of accumulated property.

Under the provisions of the National Expenditure Adjustment Act, 1932, the maximum rates of old-age, widows', and miners' pensions were reduced by 10 per cent, and the income exemptions of old-age and widows' pensions were decreased to £39 and £65 respectively. Certain income exemptions previously allowed were repealed, and provision made that no pensioner under the Pensions Act, 1926, other than an old-age pensioner, should receive a pension under the War Pensions Act, 1915.

## Charitable and Benevolent Institutions in Canada

Statistics of charitable and benevolent institutions in Canada are given in Bulletin No. 4, issued by the Dominion Bureau of Statistics in connection with the Seventh Census of Canada. On the date the census was taken, June 1, 1931, there were 316 institutions charged with the care of adults and children. There were 118 homes which had the care of adults only, with an inmate population of 8,122, of whom 4,160 were males and 3,962 females. In homes for adults and children there were 3,628 adults, of whom 1,374 were males and 2,224 were females, making a grand total of 11,750 adults in all institutions, of whom 5,534 were males and 6,196 were females.

Children were given permanent care in homes for adults and children and in orphanages. In the 79 homes for adults and children there were 5,330 children on June 1, 1931, of whom 2,290 were males and 3,040 females. In 119 orphanages there were 6,178 males and 5,001 females, making a total of 11,179 children in care. The total number of children cared for in above institutions was 16,509, of whom 8,468 were males and 8,041 were females.

In the eleven schools for the blind, deaf and dumb there were 1,687 inmates, of whom 1,561 were under 18 years of age. The males, totalled 932 and the females 755.

There were 20 day nurseries operating in Canada on June 1, 1931. The total number of children in care on that date numbered 2,513, of whom 1,404 were boys and 1,109 were girls. The number of mothers' employment agencies in connection with day

nurseries totalled ten and showed a total days' employment secured of 52,683 days with total Mothers' earnings of \$114,746 during 1930, and the number of days' care given to children during 1930 totalled 736,951.

Child-placing agencies totalled 90, of which 89 were children's aid societies. These agencies had under care 14,607 children, of whom 7,687 were males, 6,835 were females and 85 whose sex was not given.

On June 1, 1931, there were 19 juvenile immigration societies in Canada, which had in their care 6,466 boys and girls, of whom 6,113 were males and 353 were females.

The report contains a complete list of institutions, with numerous tables giving particulars of their distribution by provinces, the sex and ages of the inmates, etc.

There were 149,094 persons employed on public roads during the month of August, according to data published by the Bureau of Public Roads of the United States Department of Agriculture. Of this number, over 91,000 were paid from the emergency public roads fund and the remaining 58,000 were employed under the regular State-aid plan of the Bureau. The common-labour rate on emergency construction averaged 36 cents per hour for the United States as a whole. The common-labour rate under the regular State-aid plan averaged 35 cents per hour. The rates differed materially in the different geographic divisions, ranging from 20 cents to 50 cents an hour. Skilled-labour rates ranged from 32 to 73 cents per hour.

## LABOUR LEGISLATION IN NEW BRUNSWICK IN 1933

THE following is a summary of legislation of interest to labour enacted by the Legislature of New Brunswick which was in session from February 23 to April 6, 1933.

### Mining Act

Amendments to the Mining Act contain labour provisions for the first time. They forbid the employment of women and girls in the working of a mine and of boys under the age of sixteen years in the underground works of a mine or quarry. A workman may not be at his working place below ground for more than eight hours in twenty-four. This provision does not, however, apply to machine work under the long wall system until after December 31, 1933. Employment beyond the eight-hour period is permitted in case of accident or emergency or for exceptional work which requires to be dealt with to avoid serious interference with the ordinary work of the mine.

A person having charge of a working face must be at least eighteen years of age and have had previous experience in the use of explosives and timbering. He must also hold a miner's certificate issued by an official mining board in Canada or the British Isles or a certificate from a well-known coal operator to the effect that he has had at least six months' experience as a helper at the face and has been found to be capable. No person may operate hoisting or hauling machinery unless he has a hoisting engineer's licence as provided by the Factories Act. In cases of emergency, however, when no licensed person is available, any person known to the operator to have sufficient experience may be employed for a period of not more than six working days. The Minister, through the Inspector of Mines or any other officer appointed for the purpose, may require any mine operator to show that all persons doing work connected with the mine above or below ground are properly qualified. Should such qualifications not be satisfactory the operator, on the order of the inspector or officer, shall have such persons cease work.

The operator of a mine is required to have a monthly inspection made by some competent person of all cages, shafts, slopes, and hoisting equipment, and a report thereon forwarded to the Inspector of Mines. The operator must also appoint an inspector of working levels and timbering and see that such is done with a maximum of safety to the persons employed. No miner except those working with machines under the long wall system may

work at the coal face except when a foreman and the regular surface crew are on duty. The operator must appoint a man who, at the close of the working day, or the end of each shift as the case may be, will check the names of all employees in order to ascertain that none remain in the mine.

The Act lays down safety rules dealing, among other subjects, with protection of openings, use of explosives and electricity, hoisting and hoisting signals, construction of cages and ventilation. Notices with mine rules, regulations and signal codes, printed on durable material, must be posted in conspicuous places at the shaft heads and other points where men work or congregate. The operator is charged with the duty of dismissing any person who violates the rules so posted. The Minister of Lands and Mines, with the approval of the Lieutenant-Governor in Council, may make regulations for the carrying out of the provisions of the Act and for the safety of persons and property in and about mines. Any person violating any provision of the Act or any of the regulations made thereunder is liable to a fine of \$20 for every day on which the offence continues and in default of payment to imprisonment for a period not exceeding a month.

### Relief Act

The Relief Act empowers the Lieutenant-Governor in Council to enter into agreements with the Government of the Dominion with respect to unemployment and relief measures, and with the municipalities respecting relief measures therein; to grant financial assistance to municipalities, and to take all other steps which may be necessary or advisable for carrying out relief measures in the Province. Municipalities are given, and are deemed to have had, power to take advantage of any Federal Unemployment Relief Act and to furnish direct relief within the meaning thereof; to enter into agreements with the Province with respect to relief measures in the municipality; to construct, alter, extend, improve or repair municipal works and undertakings; to raise money by taxation to pay the cost of the said undertakings and, with the approval of the Lieutenant-Governor in Council, to borrow money therefor on the credit of the municipality. Assessments previously made for these purposes are validated as are also agreements between the Province and the Dominion relative to unemployment or relief measures. The Lieutenant-Governor in Council may make regulations for the

carrying out of the Act, such regulations to have the force of law, and may also pay out of the Consolidated Revenue Fund or raise by way of loan the moneys necessary for the purposes of the Act.

An Act to Provide for the Retaining of the Franchise by Persons in Receipt of Direct Relief provides that acceptance of such relief shall not disqualify the recipient from voting at city, town, municipal or provincial elections.

#### Other Legislation

An Act Respecting Compulsory Attendance at School was amended by the addition of

Edmundston to the list of cities and towns in which school attendance for the full term is compulsory for children between the ages of six to fourteen years. The list already included Saint John, Fredericton, Chatham, Newcastle, and Marysville.

An amendment to the Motor Vehicle Act repeals those clauses which provided that a chauffeur should receive, with his licence, a metal badge and also a receipt with his description. This receipt was to be carried and produced on demand. In future a chauffeur must carry his licence.

### NEW SCHEME OF UNEMPLOYMENT INSURANCE AND ASSISTANCE IN GREAT BRITAIN

A BILL to "amend the Unemployment Insurance Acts, 1920 to 1923, and to make further provision for the training and assistance of persons who are capable of and available for work, but have no work or only part-time or intermittent work, and for purposes connected with the matters aforesaid" was introduced in the House of Commons of the United Kingdom by the Minister of Labour on November 8. The proposed measure embodies some of the major recommendations of the Majority Report of the Royal Commission on Unemployment Insurance. The report of this Commission, of which Judge Holman Gregory was chairman, was outlined in the *LABOUR GAZETTE*, December, 1932, page 1308. The following summary of the proposed legislation is taken from the *Economist* (London), November 11, 1933. The Bill is divided into two parts—following the distinction laid down by the Royal Commission between insurance and assistance.

**Insurance.**—The first part makes provision for a self-supporting actuarially solvent Insurance Fund. No change is made in the rates of contribution or benefit for the present classes of contributors. Persons who have paid 30 contributions in the past two years may, as at present, draw 26 weeks' benefit, but those with good contribution and benefit records will be allowed an extension of benefit period up to an additional 26 weeks. Thus a man who in the past five years has paid his full contributions and drawn no benefit will be entitled, if he falls out of work, to 52 weeks' benefit before he falls out of insurance.

The Insurance Fund is to be placed under the supervision of a statutory committee which is to report to the Minister of Labour and to recommend any changes that may be necessary for financial reasons to meet a deficit or to dis-

pose of a surplus. The present debt of the Insurance Fund, amounting to £115,000,000, is to be amortized at 3½ per cent by a special charge over a period of about 40 years.

The committee is also entrusted with the duty of considering the practicability of an insurance scheme for agricultural workers.

The Bill also contains a far-reaching reform of the present regulations with regard to juveniles. The minimum age for entry into insurance is to be lowered to the present school-leaving age of 14. The new class of insured persons will be provided for by contributions of 2d. per week each by the State, the employer and the juvenile. A dependents' benefit of 2s. a week will be payable to parents in respect of all unemployed juveniles (at present applicable only to those receiving full-time instruction) between the ages of 14 and 16, when they will be entitled to draw benefit. Instructional courses for unemployed juveniles will be widely extended. In all districts where the number of unemployed juveniles below the age of 18 is considerable the local educational authority will be required to provide a junior instruction centre, the cost of which is to be met as to 25 per cent by the local authority, the remainder being borne in equal proportions by the Exchequer and the Insurance Fund. Attendance at these centres will be compulsory unless cause can be shown why exemption should be given. Arrangements will also be made for providing instructional courses in districts where the number of unemployed juveniles does not warrant the opening of a centre.

**Assistance.**—The second part of the Bill lays down the provisions for unemployment assistance. It creates a new authority called the Unemployment Assistance Board, which will consist of not more than five members. The

Minister of Labour will be responsible to Parliament for its general policy, but not for individual decisions. Parliament will also be required to approve the regulations governing the assessment of need. The Board will take over from the Public Assistance Authorities their present duties with regard to transitional payments and the administration of out-relief to able-bodied persons.

The unemployment assistance scheme is intended to embrace all employed or potentially employable persons between the ages of 16 and 65 who have either fallen out of insurance or have hitherto been uninsurable (e.g. domestic servants). The Board will administer relief through its own local officers, from whose decisions there will be an appeal in appropriate cases to local appeal tribunals. In administering relief the Board will not be bound by the statutory rates of unemployment benefit, its function being merely to relieve need, the household being taken as the unit. But certain classes of resources will continue to be protected, e.g., disability pensions which were ex-

empted from the Means Test by the Determination of Needs Act last year.

The discretion given to the Board is fairly wide. It will be permitted to give relief in kind as well as in cash, to require the applicant to attend a work centre, or to enter a work-house. When an applicant persistently refuses to maintain himself the Board (subject to appeal) may exclude him from its jurisdiction and hand him over to the poor law. The Board is also empowered to co-operate with the Minister of Labour to provide courses for physical training supplemented by short spells of actual work (at customary wages), to be arranged with the local authorities. It is estimated that the cost of the relief at present carried by the local authorities which will be taken over by the Board is about £5,000,000 a year. Local authorities will therefore be required to make a contribution for five years to the Unemployment Assistance Fund, equivalent to 60 per cent of this sum, the remaining 40 per cent being borne by the Exchequer.

## REPORT OF COMMISSION ON UNEMPLOYMENT INSURANCE IN MARYLAND

THE problem of unemployment insurance with special reference to the State of Maryland is analysed in the report of the Municipal Commission on Unemployment Stabilization (Maryland). Four types of unemployment are considered: (1) casual, resulting from industrial adjustments; (2) technical, resulting from improved machinery; (3) seasonal; and (4) cyclical, resulting from business depressions. Considerable progress, it was found, has been made in eliminating the first three types. In regard to the fourth type, the policy of spreading work has limited also to some extent the unemployment due to industrial depression. This policy, however, puts the burden of unemployment on the workers, "particularly when, as at present, it is generally accompanied by corresponding reductions in wages." The commissioners state their belief that "seasonal and technological unemployment can be reduced through intelligent efforts on the part of the management, and an unemployment insurance system might well be framed with a view to furnishing some degree of incentive toward this end." On the other hand they doubt whether much can be accomplished by the individual employer in meeting cyclical unemployment aside from the spreading of available work.

The report discusses the question whether unemployment is properly an insurable risk,

and notes that 37,500,000 workers in nineteen countries of the world are protected by insurance, and that insurance systems have operated continuously for twenty years or longer in several countries. Within certain limits, therefore, insurance is believed to be practicable. These limits are stated in a recent report by the United States Chamber of Commerce sub-committee on Unemployment Insurance as follows:—

"Experience has so far indicated that insurance might properly be used in the case of persons who are normally in employment, for protection against loss from certain seasonal unemployment, and, for a limited period, from cyclical and technological unemployment. Insurance has not been able and probably never will be able to provide against loss from long, protracted unemployment, due to continued depression, without becoming, at least in part, relief or charity instead of insurance."

The report discusses voluntary systems existing in the United States—union plans, joint agreements, and benefit plans of individual companies. "The weakness of the voluntary plan," it is considered, "lies in the very fact that it is voluntary, and may put the adopting company at a disadvantage in case its competitors do not adopt it."

Comparing the merits of an insurance system based on joint contributions by

employers and workers with one based on one-party contributions, the Commission find that "there is one compelling reason for requiring equal contributions from both employer and employee, namely, that the fund thus built up can pay larger benefits, and for a longer period, than one to which only one party contributes." For example, the Wisconsin law (LABOUR GAZETTE, March, 1932, page 323) built on the principle of self-insurance and contributions from the employer alone, contemplates benefits of only five to ten dollars per week for a maximum of ten weeks in any year; whereas a law requiring equivalent contributions from both parties would allow a maximum of \$12.50 per week for a period of sixteen weeks in any one year.

The Commissioners find that one centralized fund for all industries is preferable to self-insurance for industries severally, for the reason that it results in the economical use of reserves and in greater financial strength. Three plans have been put forward for unemployment reserve funds:—

(1) That of the American Association for Labour Legislation (LABOUR GAZETTE, February, 1931, page 120), which calls for the establishment of reserve funds by industries, each fund to be managed separately by its own stabilization Board under the supervision of the State Commissioner of Labour;

(2) The Wisconsin Unemployment Compensation Act, which provides for an Unemployment Reserve Fund to which employers must contribute 2 per cent of their payrolls, the contributions of each employer being credited to his account; when the account amounts to \$55 reserve per employee, he continues contribution to the fund, but at the rate of only one per cent of his payroll; when, and so long as, his account shows \$75 reserve per employee, no contributions are required of him; employees may not be required to contribute, but if they elect to do so the benefits shall be proportionately increased;

(3) The proposed Unemployment Insurance law for Michigan, which would establish a Reserve Fund as the depository of premiums paid jointly by the employers and employees.

These three plans illustrate three types of reserve funds—individual company funds, industry funds, and the single state-wide funds. The administrative provisions in all of these Acts are very similar. They require a system of employment exchanges where unemployed people must register for employment as a condition of receiving benefits. Clearly defined rules surround the payment of benefits to protect the system against

malingerers and the unemployable. District arbitration committees, with representatives of employers and employees, are established to decide disputed points. The administration is given authority to require regular reports on employment and payrolls.

It is suggested that large classes of employees might be placed outside the benefits of unemployment insurance, namely, those whose average income exceeds about \$2,000; farm labourers and domestic servants, being exposed to unemployment to a comparatively slight degree; and employees of the State.

The Commission believe that unemployment reserves would stabilize industrial conditions in the State: "It is probable", they say, "that a very substantial effect upon the morale of the whole business community would be evident as a result of the knowledge that unemployment would be partially compensated from reserves accumulated during prosperous years. One of the chief factors contributing to the misgiving and apprehension characteristic of the early months of a business depression would be gone. The morale of laid-off workers would be sustained during at least the first few months of lay-off. The drain upon the credit of the neighbourhood store keeper, and eventually upon the funds of the charitable agencies would be postponed for a period in all cases, and would never be felt in the cases of workers who were able to find new jobs within the period during which benefits were paid."

The report outlines the organization that would be required to administer a State system, and concludes with the following expression of opinion as to the best time for inaugurating such a scheme:—

"The experience of certain countries, especially Germany and Great Britain, has shown the importance of timing the initiation of an unemployment benefit system with reference to the business cycle. To begin accumulation of reserve at the outset, or even in the middle, of a severe depression, would be to place the system under a severe handicap from the start, and possibly to aggravate the unemployment problem. For that reason, the effective date of any unemployment insurance act which may be passed in the near future, ought to be about twelve months subsequent to its passage. If substantial economic recovery begins within that period, the system will get off to a good start, and sizeable reserves can probably be counted upon before benefits will need to be paid on an extensive scale. If the twelve months pass without considerable improvement in business conditions, the effective date might have to be further postponed."

## BRITISH INQUIRY ON PROPOSED EXTENSIONS OF INDUSTRIAL DISEASE COMPENSATION SCHEDULE

**I**N pursuance of recommendations from the Trades Union Congress and other bodies representing labour, a Departmental Committee was recently appointed in Great Britain to report on proposed extensions of the "Industrial Diseases" schedule of the Workmen's Compensation Act so as to include (1) poisoning by turpentine and (2) papilloma occurring in workers liable to mule spinner's cancer. It was also suggested by labour representatives that the description of the disease scheduled as "Dope poisoning (that is, poisoning by any substance used as, or in conjunction with, a solvent for acetate of cellulose) or its sequelae" should be amended (1) by the addition of the words "or nitro-cellulose," and of the words "any process involving the use of cellulose lacquers and varnishes."

*Mule Spinner's Cancer.*—The committee explain that this is a colloquial and indefinite expression originally used to refer to cancer of the scrotum due to employment in connection with self-acting mules in cotton spinning but now tending to be applied in the district to other forms of skin cancer. Mule spinner's cancer manifests itself by various changes in the skin, especially warts (papillomas), liable to be followed by epitheliomatous ulceration.

The committee found as follows: "The evidence before us goes to show that the period of incapacity due to treatment of the disease which it is proposed to insert in the Schedule is short; in some cases it will be almost negligible; in the more severe cases it is not likely to exceed a fortnight. We think it would tend to obviate litigation if something in the nature of a limitation of the period during which compensation is payable were introduced, and we recommend that a clause be added providing that a person undergoing treatment for 'a localized new growth of the skin, papillomatous or keratotic, due to mineral oil,' shall not be entitled to compensation under the provisions of the Order for more than fourteen days in all unless the Judge, Committee, or Arbitrator, is satisfied on the advice of the Medical Referee that the workman is still incapacitated for work as a result of the treatment in respect of which the Certificate of Disablement was issued."

*Turpentine Poisoning.*—The Committee finds as follows:—"The evidence before us does not establish the existence of chronic turpentine

poisoning as a condition that can be recognized. The only evidence we have had has been of a transitory form of illness presenting symptoms such as nausea and colic, symptoms which may be due to various other causes. Further, in those cases the period of incapacity is so short as not to justify the inclusion of such indisposition within the Schedule."

*Dope Poisoning.*—The existing schedule of industrial diseases defines this disease as "poisoning by any substance used as, or in conjunction with a solvent for acetate of cellulose," the Act covering such diseases when contracted in any process in the manufacture of aircraft. The Committee found, according to evidence, that "cellulose solvents or substances used in connection therewith, are liable to produce in workmen before they have become acclimatized, certain effects such as headache, drowsiness, loss of appetite, soreness of the throat and some conjunctivitis. These conditions do not appear to cause absence from work for a material period, and, although blood examination of workers and other investigations have been made, no definite group of symptoms or signs among the workers has been encountered after acclimatization to the work. Nor have the Factory Department any record of a case of chronic poisoning due to any of the solvents or substances used in conjunction therewith other than benzene and tetrachlorethane. At the same time, it has to be remembered that the widespread use of cellulose lacquers has only developed of recent years, and that, having regard to the fact that some of their constituents are chemically allied to substances of known toxicity, further experience may reveal that a definite group of symptoms results from exposure for long periods to a particular constituent.

"After carefully considering the matter, we have come to the conclusion that it would not be right, on the evidence at present available, to add to the present Schedule poisoning by any particular substance used as or in conjunction with a solvent for nitro-cellulose or poisoning by such solvents generally."

A second report by the same committee deals with proposals to include in the schedule "poisoning by sulphuretted hydrogen and its sequelae," and "poisoning by carbon monoxide and its sequelae."

*Sulphuretted Hydrogen Poisoning.*—The Committee found that the disablement resulting from this cause was generally of a

transitory nature, lasting for not more than three days, and that no amendment of the Schedule in this direction was required. To add this type of poisoning to the schedule would, in their opinion, "open the door to the initiation of numerous compensation claims for conjunctivitis and other common ailments which workmen might honestly but mistakenly attribute to the gas; and we do not think that this addition to the schedule would be justifiable for the sake of providing a few days' compensation in the very exceptional cases above mentioned."

*Carbon Monoxide.*—The Committee did not feel justified in recommending the inclusion of this disease in the Schedule. It had not been, in their opinion, satisfactorily established whether repeated exposure gradually produces a form of poisoning, and certifying surgeons and medical referees "could not

properly be called on to decide, in the light merely of such symptoms coupled with a history of repeated exposure to small quantities of the gas, whether or not the workman's disability is due to carbon monoxide poisoning or its sequelae. On the other hand, it is well known that persons may, as a result of inhaling C.O., be suddenly affected with giddiness and weakness in the legs (an occurrence popularly known as 'gassing') and that more serious disabling effects may arise at the time or later; and where there is medical and other evidences indicating that the workman is incapacitated for more than three days by an illness resulting from a gassing by C.O., compensation is paid on the basis of a personal injury by accident. In our view this is the basis on which compensation for carbon monoxide poisoning or its sequelae should be claimed."

### Workmen's Compensation in Saskatchewan

The Workmen's Compensation Board of Saskatchewan has published the following regulation, under an order dated November 18, to become effective on January 1, 1934.

#### REGULATION No. 54

Upon application of the Saskatchewan Anti-Tuberculosis League, a body corporate and politic by virtue of the provisions of Chapter 263 of the Revised Statutes of Saskatchewan and amendments thereto, to be added as an industry as a whole and as a special and separate class to the classes for the time being included in Schedule 1 of The Workmen's Compensation

(Accident Fund) Act of the Province of Saskatchewan, the Board hereby orders:

- (a) That the said corporation shall be as an industry as a whole included for the time being and during the pleasure of the Board only in Schedule 1 of the Act as class No. 21, and that the admission of the said corporation to the said class shall be on the terms and conditions set out in the application of the Corporation to the Workmen's Compensation Board dated the 20th day of October, 1933, and that this Regulation shall become effective on, from and after the 1st day of January, 1934.

### New Light on Silicosis

Reports have appeared in the press of new inquiries in the theory and treatment of silicosis, the industrial disease to which stone workers are specially exposed. Mr. G. C. Bateman, secretary of the Ontario Mining Association, stated recently that some interesting work was being done at the Banting Institute, and that a mechanical device to free the air from rock particles by means of electrical precipitation had been devised, and was to be tested in actual operation at one of the mines. Previous to the search for a preventive, experiments had been conducted, without definite success, with a view to discovering a satisfactory curative method of treating the disease.

Dr. W. R. Jones, of the Geological Department of the Imperial College of Science and

Technology, London, recently claimed that the disease was not mainly due to the inhalation of free silica, as has hitherto been accepted, but to certain silicate minerals occurring in the form of minute fibres loosely held together in the rock. He pointed out that no cases had occurred in the Kolar goldfield of India where the miners work in a gold bearing quartz rock containing over 90 per cent of free silica. On the other hand thousands of cases had come from the quartz conglomerate on the Rand, South Africa, which contains 80 to 90 per cent free silica, in spite of the elaborate preventive measures taken. The explanation submitted is that the aggregates of minute fibres of sericite present in the South African rocks are absent from the Kolar rocks.

## MINING IN THE PROVINCE OF QUEBEC IN 1932

THE annual report (Part A) of the Quebec Bureau of Mines for the calendar year 1932 deals with mining operations and statistics of mineral production in the province during that period. The value of mineral production in the province during 1932 amounted to \$24,557,066 as compared with \$35,778,364 in 1931—a decrease of approximately 32 per cent. In the three large subdivisions of the industry, the value of production in 1932 was as follows: metallics, \$12,788,089; non-metallics, \$3,671,634; building materials, \$8,097,343. The slump in the value of production is the lowest since 1925, and production values declined 47 per cent below the record year of 1929. "The most regrettable feature of this industrial and trade slump," the report states, "is without question the unemployment which accompanies it. In this respect the Quebec mining industry has been in a somewhat anomalous position. There was distress due to unemployment in the asbestos mining district, where, in normal years—say 1930—2,500 men find work in the mines and mills. This number was reduced to less than 1,000 in 1932, which left 1,500 without work. On the other hand, the number of metal miners, including men engaged in development work, increased from 2,000 in 1930 to 2,997 in 1932; but as this activity is practically confined to western Quebec the asbestos miners, unfortunately, could not derive benefit from it."

In a chapter dealing with employment, wages and accidents, it is stated that a total of 9,821 men were employed in the mining industry during 1932. This figure is based on returns received from 345 operators, representing 66 mines and 279 quarries, and on reports of assessment work. These men worked for a total of 2,056,494 days, so that calculated on a 300-day year basis, adopted by the Bureau for statistical purposes, the number of men employed totalled 6,855. The total number of men (9,821) employed in 1932 shows a decrease when compared with 13,185 in 1931; 13,754 in 1930; and 14,572 in 1929. On the 300-day basis, the corresponding figures are 6,855 in 1932; 9,116 in 1931; 10,549 in 1930; and 11,063 in 1929. While metal mining reflected the slump, an upward trend was again noted in 1932.

As indicating the growth of metal mining in the Province it is pointed out that whereas in 1922 employees in gold and copper mines numbered only 56, the total last year reached 2,329. In asbestos mines, on the other hand, there was a decrease in the number of employees, to 1,158, as compared with 1,507 in

1931 and 3,227 in 1929, which was the peak year for the past decade.

There was greatly decreased activity in the quarries, with a decline in employment of 43.4 per cent as compared with 1931. The total was not half that in 1930, which was the record year as regards number of men employed in quarries in the Province.

The number of men employed in producing mines during 1932 totalled 2,784, as compared with 3,794 in 1931 and 4,751 in 1930, showing a progressive decrease during the past three years. The decrease last year was more than offset by a very large increase in the number of men working in non-producing mines, or engaged in assessment work on claims. As a consequence, there was an increase in the total number of men engaged in mining, or on mining properties, from 4,422 in 1931 to 4,861 in 1932. The employment figures for non-producing mines were 215 and 1,316 in 1931 and 1932, respectively, and the corresponding totals for assessment work were 413 and 761. These figures illustrate the large amount of development work that is being carried on, more especially in the mining districts of western Quebec.

During 1932, workmen in the mines and quarries of the province received wages totalling \$6,996,341, or 30 per cent less than in 1931. Of this total, workmen in mines received \$4,827,489 and workmen in quarries \$2,168,852 as compared with \$4,935,923, and \$5,051,799, respectively, in 1931. Including both mines and quarries, the average wage earned by a 300-day workman in 1932 was \$1,021, while in 1931 it was \$1,096.

*Accidents.*—Eleven men were killed and 459 injured in and about mines and quarries in 1932 as compared with 11 fatal and 579 non-fatal accidents in 1931. Thus the total number of accidents was less than in 1932, but on the basis of per thousand 300-day workers the ratio was somewhat higher, being 68.5 against 64.7. In mines proper the rate was 1.87 and in quarries 1.17 as compared with 0.97 and 1.40 in 1931.

In the mines the outstanding causes of fatal accidents were explosives and hoisting, which accounted for three fatalities each, while fall of rock and fall of person were each responsible for one fatality. The three fatal accidents in quarries were due to slides of ground in sand and gravel pits, and were charged by the report to "the dangerous practice of excavating by under-cutting during the spring when the overhang is frozen."

An analysis of the non-fatal accidents shows that in mining proper, the chief causes of accidents are fall of person, responsible for 48 or 14.3 per cent of the total, and loading cars and boxes, with 40 or 11.9 per cent. Next in order of frequency are handling rocks or objects, falls of rock, machinery and tools, haulage, and slides of rock and ground. Many of the accidents listed under "handling objects" were due to strain in handling drills underground, or to the fall of the drill on the miner. Another common accident while drilling is the lodgment of a chip of rock in the eye. Explosives were responsible for eleven non-fatal accidents, eight of which were due to fumes from blasts in stope mining.

In quarrying, the most frequent causes of accidents were loading boxes, handling stones or objects, hammering stones, machinery and tools, falls, and falls of rock.

In annexed plants, accidents happening with machinery and tools, and through handling of objects and stones, and falls, were the most frequent.

In promoting accident prevention, the Bureau's mining inspectors concentrated on the formulation of regulations to govern electric installation, steam boilers, compressed air tanks, qualifications of hoistmen, conditions

in the interior of buildings, and transportation in and about mines. In this work the co-operation of the provincial Department of Labour was secured for the enforcement of the Bureau of Mines regulations when these are put in force.

Attention is also drawn in the report to the work of the Joint Safety Association of the Quebec Asbestos Producers which commenced its activities in 1932. Particulars are given of the inception of the Association under the provision of the Workmen's Compensation Act, and of work carried on, including the campaign of education, the investigation of working conditions, and the co-ordinating of the work of the safety committees. The results indicate that "improvement was almost immediately noticeable, and not only was the reduction in accident frequency and accident severity consistent throughout the year, but is being well maintained." Two asbestos companies went through five of the months with no lost time accident, and two went through three months without accident. Another company, which experienced a consistent reduction closed the year with a frequency 52 per cent lower than that with which it commenced the year.

### Recovery Proposals by Labour in New Zealand

Early in August, a deputation representing the New Zealand Alliance of Labour submitted to the Minister of Labour a number of proposals for higher wages, shorter hours and controlled inflation, as a means of dealing with the situation. The deputation made the following proposals: (1) wage rates should be increased immediately to the 1931 level in all industries; (2) the weekly hours of work should be reduced to 35; (3) control of currency and credit should be taken over by the State; (4) the Government should embark on a vigorous public works policy at the 1931 rates of pay. It was not necessary, in the opinion of the deputation, for the Government to raise an internal or external loan, since it could issue Treasury Notes to the amount necessary to give adequate purchasing power to the whole of the people of New Zealand. The Minister agreed to place the deputation's proposals before the Cabinet.

The proposals for a shorter week and increased wages were subsequently commented on by the Secretary of the New Zealand Employers' Federation, who expressed the opinion that the adoption of such a policy

would impose a handicap on New Zealand industry in its competition with producers in other countries. The adoption of a shorter working week, he added, might be a desirable means of passing on to the people the improvements in the methods of production by the use of machinery, but it could come about only by an agreement between the principal industrial countries. The only hope of such an agreement appeared to lie in the work of the International Labour Office at Geneva.

Another group which has under consideration various proposals for a recovery program is the National Reconstruction Association, branches of which have been formed in the principal centres to study a number of plans put forward by business men and others.

The 1933 Year Book of the National Council of Women of Canada has recently been issued. The volume contains an extensive review of the Council's activities during the year including the reports of its standing and special committees, reports of provincial presidents and the proceedings of the annual meeting.

## TRADE UNIONISM IN CANADA

## Summary of the Twenty-Second Annual Report on Labour Organization

THE report on Labour Organization in Canada, just published by the Department of Labour of Canada, is the twenty-second in a series which began in 1911. These reports give statistical and other information as to labour unions in Canada, federations and other associated bodies of various kinds. Like those preceding the present publication also contains information as to organizations of workers other than unions, the labour press, trade union benefits, registration of trade unions, and union labels, labour in politics and the labour movement throughout the world. In this report labour organization in Canada is shown as falling into two classes: (1) local branches of international unions having most of their membership in the United States and Canada; (2) unions whose membership is wholly in Canada. The principal types of organizations, as well as their development, are outlined in the present report.

*Division by Classes.*—The table on page 1179, showing the number of branches and the reported and estimated membership of the various classes of labour organizations in Canada at the close of 1932, with the number of members of each group affiliated is taken from the report.

*Branches and Membership of the Various Groups.*—The international craft union group consists of the Canadian members of 78 organizations, 4 less than in 1931, with 1,813 branches in the Dominion (a decrease of 71), and a combined membership of 149,129 (a loss of 39,090). The One Big Union reported 47 local units in Canada (a gain of 1), with 23,340 members (a decrease of 920). The Industrial Workers of the World shows 8 branches (a gain of 3), with 3,618 members (an increase of 152). The group of 29 Canadian central organizations (a gain of 4) have between them 701 branches (an increase of 22), with a combined membership of 66,993 (a gain of 9,644). There are 47 independent unions (10 more than in 1931), with a combined membership of 15,496 (a gain of 3,847). The National Catholic group consists of 109 syndicates (a loss of 12), the combined membership being 25,000 (a decrease of 151).

A computation of these figures indicates that there were in Canada at the close of 1932 a total of 2,725 trade union branches (a loss of 47) with a combined reported and estimated membership of 283,576, a decrease of 26,968.

*Percentage of Trade Unionists and Organized Wage Earners to Population.*—According to the 1931 census, trade unionists represent about 2·7 per cent of the population; adding 99,054 members comprised in non-trade union associations, whose names appear in a section of this report, organized wage-earners in Canada at the close of 1932 represented approximately 3·6 per cent of the population.

*Membership Divided by Groups of Industries.*—The accompanying chart, the figures for which are taken from the report, indicates the fluctuations which have occurred in the standing of organized labour in the Dominion for the past twenty-two years, the period covered by these annual reports. The division by groups of industries of the 283,576 trade union members in Canada is shown in another chart, the particulars of which are as follows:—

Railroad employees, 75,402 members, or 26·59 per cent of the total;

Public employees, personal service and amusement trades, 29,604 members, or 10·44 per cent;

Building trades, 27,901, or 9·84 per cent;

Mining and quarrying, 24,672, or 8·70 per cent;

Other transportation and navigation trades, 20,954, or 7·39 per cent;

Metal trades, 12,350, or 4·36 per cent;

Clothing, boot and shoe trades, 12,291, or 4·33 per cent;

Printing and paper making trades, 11,644, or 4·10 per cent;

All other trades and general labour, 68,760, or 24·25 per cent.

*Unions Having Large Memberships.*—There are thirteen organizations in the Dominion having 5,000 or more members and among them they represent a total Canadian trade union membership of 118,182, comprised in 1,008 local branches; approximately 42 per cent of the total membership and about 37 per cent of the total trade union branches.

*Trade Union Branches by Provinces.*—The division by provinces of the 2,725 branch unions of all classes in the Dominion is as follows: Ontario, 1,022; Quebec, 484; British Columbia, 273; Alberta, 271; Saskatchewan, 201; Manitoba, 184; Nova Scotia, 157; New Brunswick, 121; Prince Edward Island, 12.

*Trade Union Membership in Canadian Cities.*—There are 29 cities in the Dominion, the same number as recorded in 1931, which

TWENTY-TWO YEARS OF TRADE UNIONISM IN CANADA  
MEMBERS

have not less than 20 local branches of the various classes of labour organizations represented in Canada. These localities contain about 55 per cent of the local branch unions in the Dominion and with their 1,159 report-

ing branches represent approximately about the same percentage of the total reporting branches. The local branch unions in these 29 cities contain nearly 44 per cent of the total trade union membership of 283,576 in Canada as reported from headquarters of the central organizations or as secured from other reliable sources.

Montreal occupies first place in the list of cities, and including the National Catholic unions, has 197 local branches of all classes, 125 of which reported 27,741 members; Toronto stands second with 151 branches, 116 of which reported 23,498 members; Winnipeg ranks third with 112 branches, 74 of which reported 9,284 members; Vancouver is fourth with 105 branches, 88 of which reported 12,442 members, and Calgary stands fifth with 73 branches, 58 of which reported 4,325 members. The remaining 24 cities in order of number of branches are: Edmonton, 70 branches, 55 reporting 4,533 members; Quebec, including the National Catholic unions, has 66 branches, 48 reporting 5,913 members; Ottawa, 61 branches, 53 reporting 4,076 members; Hamilton, 57 branches, 46 reporting 3,274 members; London, 53 branches, 44 reporting 3,334 members; Saint John, 43 branches, 29 reporting 1,929 members; Victoria, 43 branches, 33 reporting 1,840 members; Regina, 43 branches, 36 reporting 1,522 members; Halifax, 39 branches, 28 reporting 1,643 members; Saskatoon, 37 branches, 29 reporting 1,845 members; Windsor, 32 branches, 26 reporting 1,501 members; Sherbrooke, including the National Catholic unions, has 31 branches, 28 reporting 887 members; Moncton, 29 branches, 23 reporting 2,359 members; Moose Jaw, 29 branches, 25 reporting 1,440 members; Lethbridge, 28 branches, 27 reporting 1,542 members; Port Arthur, 28 branches, 20 reporting 1,526 members; Fort William, 28 branches, 21 reporting 872 members; St. Thomas, 26 branches, 22 reporting 1,346 members; Brandon, 24 branches, 22 reporting 834 members; North Bay, 23 branches, 20 reporting 1,489 members; Stratford, 22 branches, 17 reporting 1,279 members; Three Rivers, including the National Catholic unions, has 21 branches, 18 reporting 1,155 members; Brantford, 20 branches, 16 reporting 565 members; Kingston, 20 branches, 12 reporting 389 members.

There are 14 branch unions out of a total of 2,101 in the Dominion which reported with 1,000 members or more, 5 less than the number in this class in 1931, the reporting branch with the largest following having 2,857 members.

*Trades and Labour Congress of Canada.*—This organization, which is the recognized head of the internationally organized Cana-

| Classes of Labour Organizations,   | Number of Main Organizations | Local Branches | Memberships |

(a) Has one local union in San Francisco, California, U.S.A., with 372 members.

(b) Other affiliated industrial unions include furniture workers, boot and shoe workers, fur dressers, food workers, fishermen, relief camp workers, domestic servants, cleaners and dyers, membership figures for which are not available.

(c) Membership for 1931, figures not supplied for 1932.

(d) During 1933 affiliated with the American Federation of Labor.

(e) Affiliated directly with the American Federation of Labor but not with the Trades and Labour Congress of Canada.

dian workers, was originally formed in 1873, but did not actually function until 1886. In all matters pertaining to legislation the Trades and Labour Congress is acknowledged as the representative of organized labour in Canada by the American Federation of Labor, as well as 60 of the more important international bodies and 3 purely Canadian central organizations, having affiliated the whole of their respective memberships by paying to the Congress the regular *per capita* tax. The Congress also has under direct charters two provincial federations of labour, 38 trades and labour councils and 46 local unions, the total membership being 127,264.

*All-Canadian Congress of Labour.*—This body came into existence at a meeting of representatives of national unions held in Montreal in March, 1927, replacing the Canadian Federation of Labour, an organization which was established in 1902. The Congress has in affiliation the One Big Union, classified as an international union by having one local union in the United States, 11 Canadian central organizations, as well as 41 directly chartered unions and 14 labour councils, the total membership being 50,728.

*The One Big Union.*—The O.B.U., as this organization is commonly called and which is referred to above, had its inception at a conference held in Calgary, Alberta, in March, 1919. At the outset the new body attracted many members to its ranks, the reported membership at the close of 1919 being 41,150, comprised in 101 local units. The general secretary of the One Big Union reported that at the close of 1932 the organization had 47 local units in Canada, and a rank and file unit in the United States, the combined membership of which was 23,712.

*Amalgamated Mine Workers of Nova Scotia.*—This organization was formed on June 19, 1932, by coal miners who seceded from the United Mine Workers of America. The first miner's union to be established in this locality was the Provincial Workmen's Association in 1879. Since that time a number of local organizations have been formed, while the United Mine Workers of America, the One Big Union and the Mine Workers Union of Canada have extended their jurisdiction into Nova Scotia. At the close of 1932 the Amalgamated Mine Workers of Nova Scotia had a membership of 7,801, comprised in 21 local unions.

*Industrial Workers of the World.*—The Industrial Workers of the World, referred to as the I.W.W., was formed in 1905 in direct opposition to the trade union movement as

represented by the American Federation of Labor, and having as its objective the abolition of the wage system. The jurisdiction of the I.W.W. was extended into Canada prior to 1911, the year in which the first of these reports were published, but the locals of this organization did not make much headway and in 1915 finally passed out of existence. In 1922 the I.W.W. re-established a branch in Vancouver but up to the present the membership has not increased very rapidly. By a referendum vote of the membership which took place early in 1932, a Canadian administration for the I.W.W. was established with headquarters in Port Arthur. According to returns received from the Canadian office the reported membership in the Dominion at the close of 1932 was 3,618, comprised in 8 local unions.

*National Catholic Unions.*—The advent of these unions took place in 1901, and with a view of co-ordinating their activities, the Federation of Catholic Workers of Canada was later established. There are a small number of members of the National Catholic unions resident in Ottawa but there are no local unions outside the Province of Quebec. At the close of 1932, the Federation had a membership of 25,000 comprised in 102 local unions and 7 study circles.

*Workers' Unity League of Canada.*—The League which was organized in 1930, has for its function the organization of industrial labour unions. In the 1931 issue of the Report on Labour Organization in Canada it was stated that the Workers' Unity League was the Canadian Section of the Red International of Labour Unions with headquarters in Moscow, but during 1932 this affiliation is stated by the officials of the League to have terminated. At the close of 1932, according to the report, this organization had three central bodies in affiliation with a combined membership of 12,500, viz., The Industrial Union of Needle Trades Workers of Canada, The Mine Workers' Union of Canada, and the Lumber Workers' Industrial Union of Canada. In addition to the above mentioned central bodies, the League has a number of directly chartered branches.

*Other Canadian Central Labour Bodies.*—In addition to the organizations previously referred to there is another important group of organizations whose jurisdiction is confined exclusively to the Dominion. At the close of the year there were 27 such central labour bodies, 2 more than the number recorded in 1931. The Amalgamated Mine Workers of Nova Scotia; The Canadian Association of Seamen, and the Native Brotherhood of

British Columbia appear for the first time, while the Federated Seafarers' Union of Canada passed out of existence. In addition to the organizations in affiliation with the Trades and Labour Congress of Canada and the All-Canadian Congress of Labour, reference to which has been made previously, there are 13 other organizations, 3 of which are affiliated with the Workers' Unity League. The combined membership of the 27 Canadian central bodies at the close of the year was 66,199 comprised in 701 local unions.

*Federations and Other Delegate Bodies.*—The plan of labour organization as developed on the North American continent by various craft unions provides for the establishment of certain delegate bodies known as federations, district councils and trades and labour councils, each of which has its own particular function. All of these delegate organizations are composed of local branch unions having affiliation with some central organizing body. In addition to contributing the funds necessary to meet the expenses of the parent organizations, many local branches assist in the maintenance of a federation or district council, and in some cases to both, as well as to a trades and labour council. The non-sectarian unions have 51 federations, 52 district councils and 54 trades and labour councils, particulars of which are given in their respective chapters. The structure of the railroad employees' organizations also makes provision for the creation of committees to deal with matters affecting working conditions on the several railways on which they have members employed, such committees of which there are 106 in Canada, being composed of delegates from the local lodges of the respective brotherhoods. In addition to these adjustment committees four of the railroad brotherhoods have what are called legislative boards, which total 36, the special duty of which are to safeguard the interests of railwaymen in legislative matters, and for which purpose they maintain representatives in Ottawa.

According to the Report on Labour Organization in Canada, the American Federation of Labour is the most representative labour organization on the North American continent. There were at the close of 1932, so far as the Department was able to secure information, 154 central national and international craft organizations and 3 subordinate bodies of main unions operating on this continent, the subordinate bodies and 106 of the main organizations being in affiliation with the American Federation of Labour. Of the Affiliates of the A. F. of L., 70 have branches or members in Canada, and the Federation

itself having directly chartered unions in the Dominion makes 71. Seven craft organizations not identified with the Federation, the One Big Union, and the Industrial Workers of the World have branches in Canada, making in all 80 international bodies operating in the Dominion, 4 less than recorded in 1931.

The combined reported membership of trade unionists in the United States and other countries (outside of Canada) in which the above mentioned organizations operate is 2,797,101 of which it is estimated that approximately 2,600,000 are in affiliation with the American Federation of Labour.

*Organizations of Workers Throughout the World.*—In addition to the information published in the report in regard to the numerical standing of international and Canadian organizations, figures are given showing the strength of organized labour in 68 other countries, the aggregate for the 70 countries enumerated being 48,847,898. Particulars concerning the International Federation of Trade Unions and affiliated organizations are also recorded. Mention is made of the Labour and Socialist International, which works in close co-operation with the International Federation of Trade Unions; the Third or Communist International; the Red International of Labour Unions, and the International Red Aid. In this section of the report is also recorded the membership of the British Trade Union Congress together with the names and membership of the various organizations of which it is composed. The chapter closes with particulars concerning the fifty-second annual convention of the American Federation, its membership for the past twenty years and present officers.

*Labour in Politics.*—The report gives a brief account of the development of independent political action on the part of labour in Canada since it was first proposed in 1887 at the annual convention of the Trades and Labour Congress of Canada held in Hamilton, Ont. On August 1, 1932, the Co-operative Commonwealth Federation was brought into existence at a meeting in Calgary, Alta., of delegates representing Labour, Farmer and Socialist groups in five provinces, viz., Ontario, Manitoba, Saskatchewan, Alberta, and British Columbia. The purpose of the new body is the establishment in the Dominion of a co-operative commonwealth in which production, distribution and exchange would be regulated to supply human needs and not for profit. A list of Labour members of Parliament and of Provincial Legislatures is shown in the report.

*Trade Union Benefits.*—The report contains a chapter dealing with the payment for benefits by labour organizations during the year 1932. Of the 29 Canadian central organizations 11 reported disbursements for benefits of \$37,872.73, a decrease of \$37,568.08 as compared with 1931. Of the 80 international organizations with branches in Canada, 59 reported having made expenditures for benefits, payments on account of death benefits being made during 1932 by 54, strike by 30, sick and accident by 19, old age pensions by 13, unemployed and travelling by 10 and other benefits by 12.

The total expenditures for benefits in Canada and other parts of the jurisdiction of the respective central international organizations which reported, amounted to \$25,952,210, a decrease of \$904,664, as compared with the disbursements by 59 organizations in 1931. The outlay for the various benefits was as follows:—

|  |              |
|--|--------------|
| Death benefits.. . . . .                         | \$13,999,890 |
| Unemployed and travelling<br>benefits.. . . . .  | 430,296      |
| Strike benefits.. . . . .                        | 824,877      |
| Sick and accident benefits.. . . . .             | 1,811,617    |
| Old age pensions and other<br>benefits.. . . . . | 8,885,530    |

Besides the amounts which may have been received from headquarters of the international organizations, 646 of the local branch unions in Canada made payments to their own members, as did also 115 branches of Canadian bodies, 20 independent units, and 49 National Catholic unions, the total dis-

bursements for the year 1932 being \$640,250, an increase of \$97,059 as compared with the disbursements for benefits by 708 local branch unions in the previous year. The total payments by all classes of local unions on account of the benefits mentioned were as follows:—

|                                      |           |
|--------------------------------------|-----------|
| Death benefits.. . . . .             | \$ 79,079 |
| Unemployed benefits.. . . . .        | 266,303   |
| Strike benefits.. . . . .            | 95,133    |
| Sick and accident benefits.. . . . . | 137,009   |
| Other benefits.. . . . .             | 62,726    |

*Non-Trade Union Associations.*—Besides the trade unions whose names are printed in the report there are in the Dominion a number of associations of wage-earners, which, though not identified with the labour movement, are considered to be of sufficient importance to justify their names being published in the present volume. The three principal groups are made up of associations of school teachers, Government employees, and commercial travellers, all of which have large followings. With the explanation that the associations discussed are not to be confused with the regularly constituted labour organizations, a chapter is included giving particulars of such known bodies, of which there are 120, the combined reported membership being 99,054.

In addition to the various trade union and non-trade union bodies referred to in the present issue of Labour Organization in Canada there are a number of unemployed workers' organizations in existence throughout the Dominion, but no information has been furnished to the Department by such organizations.

## Federation of Catholic Workers of Canada

The convention of the Federation of Catholic Workers of Canada was held at Montreal, November 18-19, 1933, President Osias Filion presiding. In addressing the delegates, Hon. C. J. Arcand, Minister of Labour of the Province of Quebec, intimated that it was not the intention of the government to pass any act which would result in the restriction of personal liberty. He declared himself in favour of the legalization of industrial agreements, and urged labour leaders to impress the workers with the importance of such a measure.

Mr. G. Tremblay, Deputy Minister of Labour of the Province of Quebec, also spoke on the legalization of industrial agreements, pointing out its advantages, among which would be the elimination of differences between employers and employees; the establishment of a uniform basis for estimating

costs, the prevention of strikes, and the bringing of employers and workers closer together.

Others to address the delegates were MM. Albert Rioux, president of the Catholic Union of Farmers; G. Saint-Onge; J. A. Francoeur; Rev. George Cote; Rev. Father Roy, O.M.I., general chaplain of the Association of Catholic Young Workers.

Among the resolutions adopted were the following:—

Condemning the principles of the Canadian Co-operative Commonwealth, at the same time pledging the Federation to a program for social re-establishment drawn up by a body of sociologists;

Asking the government to aid municipalities having a public electric system, in order to bring down its price to the consumer;

Protesting against the amendment to the Workmen's Compensation Act which deprives

injured unemployed workmen on relief work of the benefits of the Act;

Favouring the Back-to-the-land movement;

Favouring an amendment to the Lord's Day Observance Act forbidding Jews to work on Sundays;

A schedule of fair wages approved by the Minister of Labour to be inserted in all construction contracts aided by government grant under the Public Assistance Act;

An amendment to the Professional Syndicates Act so that the funds of a dissolved Catholic union may revert to the diocesan authorities to be used in the best interest of the Catholic labour movement;

That the Government adopt a system of social insurance, and in the meantime adopt the Dominion Old Age Pensions scheme;

Extension of the Moratorium Act for another year;

That identification cards be made compulsory for workers and voters;

Improvement in labour camps with regard to juvenile unemployed, a chaplain for each camp to be appointed;

Extension of lien period granted employees under the Workmen's Lien Act to six months;

That the Dominion Government decline to support any proposed immigration scheme;

The three-shift system in certain undertakings with one day off a week.

Officers elected were: President, Osias Filion; first vice-president, A. Bussière; second vice-president, G. A. Gagnon; secretary, Rene Benard.

### United Mine Workers of America, District 26

The annual convention of the United Mine Workers of America, District 26, was held at Truro, N.S., October 30 to November 4, 1933, with approximately eighty delegates in attendance. President Morrison, in his opening address referred to the trying times through which the organization had passed since the last convention, due to some extent to the formation of a dual organization necessitating a complete reorganization of the whole District with the exception of sub-district No. 3, which remained intact. The president referred to the severe loss sustained by the District in the sudden passing of William P. Delaney, who had been secretary-treasurer since 1926.

He stated that the Nova Scotia Steel and Coal Corporation had notified the District officers that they wished to re-open the contract for the purpose of revising the rates, this in accordance with the provisions of the agreement which became effective February 1, 1933, and expires January 31, 1934 (LABOUR GAZETTE, August, 1932, page 913; February, 1933, page 227). In regard to coal operations, the president was of the opinion that there was some improvement, due in a measure to the National Recovery Act in the United States, wages having increased across the line to the extent that competition in the Montreal market is more favourable to operators in Nova Scotia. While voicing appreciation for certain social legislation, President Morrison pointed out the need for unemployment insurance, a shorter week day and certain amendments to the Workmen's Compensation and Coal Mines Regulation Acts.

Vice-president P. G. Muise emphasized the need of a wider market in Canada for Cana-

dian coal in order to alleviate unemployment among coal miners. He quoted a four-point program adopted by the Associated Boards of Trade at a recent session, proposing (1) continuance of the 1932 Government coal subventions; (2) establishment of a quota system for the production of the Nova Scotia coal trade; (3) authorization by the Federal Government for a substantial rail order; (4) adoption of an effective dumping clause prohibiting importation of foreign coal into Canada.

President Morrison explained negotiations with the Dominion Steel and Coal Corporation and the Cumberland Coal Company which resulted in having the present contract continue in force for another year.

International secretary-treasurer Kennedy addressed the delegates on the working out of the National Recovery Act in so far as it affected coal miners. He believed that increased wages in the United States should have a good effect in Nova Scotia; and that competition would not be so keen as before the enactment of the N.R.A.

The Policy Committee recommended: (1) the establishment of an educational program; (2) the appointment of an international organizer for the District; (3) the continuing of the present wage scale; (4) that wage reductions be not discussed with operators in District 26; (5) that contracts signed with other operators be similar to the contract with the Dominion Steel and Coal Corporation and Cumberland Rail and Coal Company; (6) the extending of the coal market in order to give the miners of Nova Scotia work all the year round; (7) the appointment of an independent umpire to settle grievances between United Mine Workers employees and railroad

men in Glace Bay shops, the same procedure to apply to apply to the question of timber in Springhill.

In reply to a letter sent by Vice-president Muise to the Hon. W. A. Gordon, Minister of Labour, advising that the Receivers and Liquidators of the Acadia Coal Company had suggested closing the mines due to lack of capital unless men accepted a reduction in wages, the Minister advised that the matter was one that should be taken up with the Provincial authorities owing to provincial intervention in a similar dispute at Sydney Mines.

Resolutions were adopted recommending as follows:—

Extension of the Workmen's Compensation Act to cover checkweighers.

Hospital accommodation for tuberculosis patients with treatment free of charge.

That company officials compensate track-layers when required to work in pools of water.

Curtailment of the expenses of maintaining District 26.

That the special rate be restored to car shunters, box car trimmers and other car trimmers at mines of Springhill.

A minimum of ten dollars per week for injured workmen under the Workmen's Compensation Act, and amendment of the Act to provide for hernia cases; also that claims be heard by the Board within thirty days.

Drawing the attention of the Mines Department to the practice of having engineers do

other work than attend to their engines on idle days.

A system of dentistry in the schools.

Suitable employment, clear of the coal face, for the older miners until time to retire on a pension.

Repairs to the company houses in New Waterford, failing which application to be made for an injunction against the collection of rents.

That the company provide a motor ambulance in a central place with man in charge.

A 20 per cent increase for back shift contract work, same to be inserted in next contract.

Instructing District officers and Board members to write a new constitution for District 26 and that same be submitted to local unions and endorsed at next regular convention.

Legislation providing for six-hour work-day.

Fifty per cent reduction in rent of company houses, and cancellation of arrears for rent and coal.

Pledging support to the District officers and opposing a referendum vote to decide what organization shall control the District.

Payment of time and a half for overtime and double time for Sundays and Statutory holidays for all classes of surface labour (other than men on continuous shifts).

A daily rate of six dollars per day.

The next convention will be held in Truro, N.S.

## THE TOLPUDDLE MARTYRS

### Trade Union Movement to Commemorate Early Pioneers

AT the recent Trades Union Congress in Britain, plans were submitted for carrying out the resolution of the Congress of 1932 "to place on record its deep appreciation of the service rendered by the Tolpuddle Martyrs to trade unionism and to humanity" by celebrating the centenary of their martyrdom and "to arrange for a national demonstration in keeping with the character and devotion of these pioneer stalwarts."

In moving the above resolution, the Rt. Hon. J. R. Clynes said: "The organization which I represent at this Congress thought it proper some time ago to bring before your notice the resolution now on the paper in order that the whole Trades Union Movement might later be led to pay homage to the memory of men who nearly 100 years ago faced great perils and distresses and endured physical privations, punishment and banish-

ment for the cause of Trade Unionism. . . . . The whole Movement should be invited and inspired to hold meetings, to have marches, to organize and carry through demonstrations, and thereby bring to the notice of the younger workers now living the sacrifices that were made by those who had to win the liberty, which, as I say, we now enjoy. It is with that view in mind that I trust the General Council will wholeheartedly undertake the service of reminding the Movement during the year and during the next of the fact that our liberties were not received as a gift from the great and from the powerful, but they were won by martyrs whose memory deserves to be kept in reverence by all of us who now enjoy the fruits of the labours which they expended."

Because the story of the martyrs is of special interest in Canada, it will be outlined here.

The Tolpuddle Martyrs were six agricultural labourers living near the village of Tolpuddle in Dorsetshire, who, when their weekly wages had been progressively reduced from 9s. to 8s. and 7s. and then were likely to be reduced to 6s., took the lead in forming an agricultural labourers' union in November, 1833, "to maintain the wages of farm servants." In other counties where agricultural labourers had joined the Grand National Consolidated Trades Union, with headquarters in London and at the height of its power, wages were about 10s. This encouraged the labourers in Tolpuddle and about Dorchester, and a small union was formed, the members binding themselves to secrecy by an oath of initiation and special ritual. Membership in a trade union was not unlawful at this time, but the employers sought to break up the union by having recourse to the Unlawful Oaths Act, 1797. Placards were posted in February, 1834, reminding the labourers of the Unlawful Oaths Act and of the possible penalty of transportation. Three days later the six men were arrested. The judge directed the jury, who were all farmers or millers, to find the accused men guilty if they were satisfied that an oath or an obligation tantamount to an oath had been administered. On March 19, 1834, they were sentenced to the maximum penalty of transportation for seven years "as an example to others."

The leader, George Loveless, made the following statement on hearing the sentence pronounced: "My lord, if we have violated any law, it was not done intentionally. We have injured no man's reputation, character, person or property. We were uniting together to preserve ourselves, our wives and our children from utter degradation and starvation. We challenge any man or number of men to prove that we have acted or intended to act different from the above statement."

In spite of the protests against the sentence by persons of all classes, the sentence was carried out and the "six men of Dorset" were taken to Australia, five near Sydney and George Loveless to Tasmania. The agitation increased in England, however, and in March, 1836, a free pardon was granted but there was delay in carrying it out. George Loveless returned home in June, 1837, his brother James, Thomas Standfield and his son John with James Brine returning in March, 1838. The sixth "martyr," James Hammett, sailed for England only in August, 1838.

The "Dorchester Labourers' Fund" had been built up to pay the costs of the committee working for their release. From this fund, increased by the proceeds of a pamphlet

written by George Loveless on his return, five small farms were bought for five of the men, the sixth, James Hammett, resuming his work in Tolpuddle. But in 1844, the Lovelesses, Standfields and James Brine, with their families, sailed for New York on their way to Western Ontario where they took up farms near the present city of London. They made an agreement among themselves not to reveal the past, and it was only in 1912 that the Canadian end of this story became known. In 1912, the Rt. Hon. Arthur Henderson unveiled a memorial arch erected before the little Methodist Chapel in Tolpuddle where George Loveless used to preach.

Interest in the story of these early Trade Unionists has been revived both in Britain and Canada by the approaching centenary anniversary of their prosecution. The British Trades Union Congress is to be held in 1934 in Weymouth, in Dorset, and plans are going forward to commemorate in permanent form the contribution of the "Six Men of Dorset" to the development of Trade Unionism. One of the proposals made is the erection of six cottages for aged farm labourers.

In Canada, the Trades and Labour Congress has been asked by some Trade Unions to take part in the commemoration of the centennial of the Tolpuddle Martyrs, five of whom have given numerous descendants to Canada, most of them living in or near London and St. Mary's in western Ontario. The Hamilton and District Trades and Labour Council adopted a resolution moved on November 3 last by Humphrey Mitchell, M.P., to ask the Trades and Labour Congress to raise a fund for a suitable memorial at London where James Loveless and the younger Standfield are buried. The older martyrs, George Loveless and Thomas Standfield, are buried at Siloam, a few miles from London, while the grave of the youngest, James Brine, is in St. Mary's.

The National Council on Compensation Insurance (U.S.A.), in a circular to member companies, has announced that it is filing a proposal with State supervising authorities and with various independent boards and bureaus to eliminate schedule rating in workmen's compensation risks. Schedule rating, in fixing a rate, considers primarily certain specific mechanical safeguards, whereas experience rating takes into account the accident history of an individual risk over a term of years. Both schedule rating and experience rating have been in use for a number of years.

## EMPLOYMENT CONDITIONS IN CANADA AT THE END OF NOVEMBER, 1933

### Reports of Superintendents of the Employment Service

THE employment situation at the end of November was reported by the superintendents of the Employment Service to be as follows:—

Practically all farming activities in the Maritimes were completed, but farmers were engaged in bringing large quantities of produce to the city markets. Fishing was again retarded by stormy weather. There was considerable improvement noted in logging in New Brunswick, but in Nova Scotia conditions in this line were quiet, as only a few pulpwood contractors were placing small gangs of men in the woods. Mines in the New Glasgow area operated from five to six days per week, with the exception of some collieries closed, owing to a dispute over general wage reductions; those in Cape Breton and vicinity worked from one to four days per week. Manufacturers of confectionery and food stuffs reported business fair, oil companies a reduction in output due to the advanced winter season, potteries and car works idle, wood-working factories and steel companies, for the most part, busier, the condition in the latter industry due to an order for 2,800 tons of steel rods for the British market which will provide employment for some hundred workers for a considerable period and be a welcome addition to work already available. Sawmills were being prepared in anticipation of increased activity during the winter months. Building construction, except at Saint John, was slack. Highways departments still employed a large number of workers on general repair, new and maintenance work. Freight traffic was good, passenger fair. Retail trade showed improvement with the approach of the Christmas season. There was a continued steady demand for charworkers and domestics in the Women's Division.

November proved a quiet month for farming in the province of Quebec, but showed a heavy increase in logging placements. In Rouyn, where the industry was at its best, 2,000 men were already at work. Hull, Quebec, Sherbrooke and Three Rivers also shared in the improvement shown. Mining remained unchanged, it being reported from Rouyn that about 2,000 men were employed in the mines and on prospects. Factories were busy at Hull, but in Montreal lessened activity was reported in the clothing industry and boots and shoes. Textiles were fair, but rubber quiet. Quebec city factories with the excep-

tion of furs, were not so busy as desired. In Sherbrooke, conditions were satisfactory, and at Three Rivers, normal, two pulp establishments there having started machines which have been idle for some time. Building construction was slack, except at Hull, Rouyn and Noranda, where some important construction was being carried on. The city of Montreal continued to employ a large number of men on unemployment relief work. With the close of navigation near, shipping was busy at Montreal and Three Rivers. Approaching holidays also benefited trade, although collections were slow. There was a good demand for women workers in all cities of the province, but there was also a large number of applicants ready for all work offered.

Other than a few calls for chore men for the winter, there was little activity in farming in the province of Ontario. Movement of labour in the logging industry was somewhat handicapped by trade disputes, although at Sudbury approximately 1,200 men were engaged in the camps. Pulpwood cutters were in demand, but while there were still plenty of unemployed applicants, very few of them were experienced in this line. Mining activities were brisk, and although there was no call for extra labourers, production was being carried on at the maximum. There was little variation shown in manufacturing throughout the province. The employment gains made during the past six months were being held and future prospects of staff expansion were much better than at the corresponding time last year. This more favourable outlook was particularly noticeable at Sault Ste. Marie, where a steel corporation was planning to reopen its rail mill within a few days. This would mean hiring a number more of their former employees, some of the men already at work drawing, during November, their first pay cheque in two years' time. Seasonal activity was also reported elsewhere by firms engaged in the manufacture of small electrical appliances and other articles for the Christmas trade. Ordinary building construction continued slow, but various unemployment relief programs eased the situation by providing work for men on the rotatory system. This consisted chiefly of highway, street and sewer construction and municipal building designed as a relief measure. Issuance of snow cards was also made in Toronto, allocating citizens to various districts throughout the city for

temporary employment with the Works Department as snow shovellers. Trade was brighter due to oncoming holidays. In the Women's Section more calls were registered for domestic service, but opportunities for clerical and factory help were scarce, 63 per cent of all female applicants in the Toronto office being on relief.

Although the demand for farm help in the Prairie Provinces under the Assisted Plan was heavy, the number of persons placed so far was comparatively small; but more were expected to take advantage of the Government offer at a later date. Prospects in logging looked brighter, but there were very few calls for men, mainly owing to weather conditions. This also affected the coal mining district, where lack of orders resulted from the continued mild weather. Manufacturing was very quiet, also building construction, relief work continuing to be the main source of employment available. Trade was only fair. More applicants registered for work in the Women's Section, but a decline was reported in the number of orders received, although a slightly greater number of domestics found household employment outside the city.

There was practically no call for farm hands in British Columbia. Very little hired help was at work in the orchards, and packing houses had laid off most of their workers. No great change was reported in logging, although a number of men were engaged in getting out Christmas trees for shipment to the United States. Sawmills were employing a larger percentage of white help than in previous years, but wages paid were very low. Shingle mills continued to run mostly on half time. In the Alberni district, fair catches of herring were reported, these fish being taken for reduction plants. Mining was more active. Very little building construction was in evidence, but relief work on highways, parks, and in National Defence camps continued. Shipping and longshore work at New Westminster was more slack, while at Prince Rupert a fish shipment from Alaska provided employment for longshoremen; conditions for these workers were also good at Victoria. The only positions calling for female help were in domestic service where wages offered were exceedingly low, thus a surplus of women applicants was reported, many of whom were applying for relief.

## EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN OCTOBER, 1933

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on November 1 was 8,394, the employees on their payrolls numbering 845,291 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for October was 1,734, having an aggregate

membership of 148,703 persons. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 64 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 61 cities throughout Canada, showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

### (1) Employment Situation at the Beginning of November as Reported by Employers

According to reports furnished the Dominion Bureau of Statistics by leading industrial firms throughout the Dominion, employment at the beginning of November showed its seventh consecutive monthly increase, the advance being contrary to the general seasonal movement

manifested in the years since 1920; in only two of these twelve years (viz., 1922 and 1928), had activity increased between October 1 and November 1, while the gain on the date under review considerably exceeded that noted in either of those years.

Since April 1, 1933, the trend of industrial employment has been consistently upward, resulting in the reinstatement of nearly 142,600 persons by the co-operating employers; the number of workers included in these surveys of employment is large, but if data were available for all industries and all employers, this number would be very greatly increased. The index (based on the 1926 average as 100) has risen from 76.0 at the beginning of April to 91.3 on the date under review. This gain of 15.3 points or 20.1 per cent in the seven months is in favourable contrast to the decline

ber 1, 1932. On the same date in the eleven preceding years, the index was as follows: 1931, 103.0; 1930, 112.9; 1929, 124.6; 1928, 118.9; 1927, 108.8; 1926, 104.0; 1925, 98.3; 1924, 94.1; 1923, 100.0; 1922, 97.0, and 1921, 91.3. As already mentioned, a gain at this time of year is unusual, so that the index, after correction for seasonal factors, showed a larger increase than the unadjusted index, rising from 86.9 on October 1 to 88.4 on the date under review.

Particularly important improvement occurred at the beginning of November in logging, the

### EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

of 2.8 points recorded in the corresponding seven months of last year, and also compares satisfactorily with the increases of 3.3, 5.1 and 14.2 points indicated between April 1 and November 1 in 1931, 1930 and 1929, respectively. In fact, the 1933 advance during this season of highest activity was only once exceeded in the years since 1920, that recorded in the same months of 1928 having been larger.

The firms making returns for November 1, 1933 (8,394 in number), reported payrolls aggregating 845,291, compared with 836,715 in the preceding month. Reflecting this increase of nearly 8,600 persons, the index rose from 90.4 on October 1 to 91.3 at the beginning of November, as compared with 84.7 on Novem-

ber 1, 1932. increase being greater than in any other year on record except 1929. Mining and trade also reported heightened activity, also seasonal in character, that in the former being unusually pronounced. On the other hand, manufacturing, construction, transportation and communications showed contractions, which were largely seasonal. The losses in manufacturing and construction were on a smaller scale than has been customary on November 1 in the last twelve years.

### Employment by Economic Areas

The tendency was upward in Quebec and Ontario, but elsewhere losses were recorded.

*Maritime Provinces.*—There was a small decline in employment in the Maritime Provinces on November 1, 1933; most of the loss took place in construction, particularly in highway and road work, but transportation was also quieter. On the other hand, manufacturing (chiefly of lumber and pulp and paper products), mining and logging showed improvement, that in the two last-named being of a seasonal nature. Returns were received from 586 employers, with 63,192 workers on their payrolls, or 499 fewer than at the beginning of October. An advance had been indicated on November 1, 1932, but the index then was a few points lower.

*Quebec.*—There was a further large increase in Quebec, where the 2,040 co-operating firms enlarged their staffs by 8,614 employees, bringing them to 249,704 on November 1. Logging, highway and building construction and trade reported improvement, while manufacturing, transportation and railway construction registered curtailment. Within the manufacturing group, the leather, lumber, vegetable food, tobacco, electrical apparatus and iron and steel divisions showed contractions, that of a

seasonal character in the wood-using industries being most pronounced; on the other hand, musical instruments, pulp and paper, textile and some other factories recorded heightened activity. Employment was in greater volume than on the same date in 1932, when contractions had been indicated. The experience of the last twelve years shows that employment is usually, though not invariably, less on November 1 than on October 1, the average change between the two dates being a decline of rather more than half a point. The increase of over three per cent occurring at the beginning of November, 1933, is therefore especially interesting, particularly so because it is the largest ever recorded at this time of year. In the last seven months, the movement in Quebec has been uniformly upward, resulting in the re-employment of over 51,400 workers by the firms whose reports were tabulated, while the index has risen from the 1933 low of 73.1 on April 1 to 92.2 on the date under review, an advance of 19.1 points or 26.1 per cent. In the corresponding seven months in 1932, a reduction of over 4,000 persons was reported by the co-operating firms.

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS  
(AVERAGE CALENDAR YEAR 1926=100)

|   | Canada | Maritime Provinces | Quebec | Ontario | Prairie Provinces | British Columbia |
|---|--------|--------------------|--------|---------|-------------------|------------------|

| Mar. 1.....   | 88.7   | 93.1               | 86.5   | 91.8    | 88.2              | 78.7             |
| April 1.....  | 87.5   | 88.3               | 85.0   | 91.1    | 86.1              | 80.9             |
| May 1.....  | 87.5   | 87.8               | 86.0   | 89.5    | 87.6              | 82.7             |
| June 1.....   | 89.1   | 96.4               | 87.8   | 89.0    | 89.3              | 83.7             |
| July 1.....   | 88.7   | 96.4               | 86.6   | 89.2    | 90.5              | 83.7             |
| Aug. 1.....   | 86.3   | 80.1               | 84.4   | 86.9    | 90.1              | 81.4             |
| Sept. 1.....  | 86.0   | 87.8               | 85.3   | 85.1    | 91.6              | 82.8             |
| Oct. 1.....   | 86.7   | 84.9               | 85.8   | 86.1    | 94.6              | 82.1             |
| Nov. 1.....   | 84.7   | 86.8               | 83.6   | 84.2    | 91.6              | 77.8             |
| Dec. 1.....   | 83.2   | 83.8               | 82.9   | 84.1    | 86.7              | 73.8             |
| Jan. 1, 1933.....   | 78.5   | 80.1               | 77.8   | 78.8    | 84.4              | 69.7             |
| Feb. 1.....   | 77.0   | 76.5               | 75.7   | 78.9    | 80.4              | 68.0             |
| Mar. 1.....   | 76.9   | 76.8               | 74.1   | 79.8    | 80.0              | 67.7             |
| April 1.....  | 76.0   | 78.3               | 73.1   | 78.3    | 78.3              | 68.8             |
| May 1.....  | 77.6   | 80.3               | 75.4   | 79.5    | 79.2              | 72.2             |
| June 1.....   | 80.7   | 82.8               | 79.3   | 81.6    | 82.7              | 76.2             |
| July 1.....   | 84.5   | 89.9               | 83.0   | 85.0    | 85.0              | 81.8             |
| Aug. 1.....   | 87.1   | 93.0               | 84.8   | 86.6    | 90.5              | 87.3             |
| Sept. 1.....  | 88.5   | 91.5               | 87.0   | 88.1    | 90.7              | 89.2             |
| Oct. 1.....   | 90.4   | 90.9               | 89.1   | 89.6    | 98.7              | 85.6             |
| Nov. 1.....   | 91.3   | 90.2               | 92.2   | 91.4    | 94.6              | 84.0             |
| Relative Weight of Employment by Economic Areas as at Nov. 1, 1933..... | 100.0  | 7.5                | 29.5   | 40.9    | 13.9              | 8.2              |

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area to the total number of all employees reported in Canada by the firms making returns for the date under review.

*Ontario.*—Employment again advanced in Ontario, this being the seventh consecutive gain indicated since the early spring; during this period of expansion, some 49,700 extra employees have been taken on by the firms furnishing data, in satisfactory contrast to the decline of nearly 25,900 reported in the same seven months of 1932. A falling-off had been noted on November 1 of last year as compared with the preceding month, and the index then was lower than on the date under review. The most marked improvement on November 1, 1933, was in logging and highway construction, but manufacturing as a whole, mining, services and trade were also more active; within the manufacturing division, the iron and steel, non-ferrous metal, tobacco and beverage, textile, rubber and pulp and paper divisions were brisker, while leather, lumber, clay, glass and stone and electric current plants showed losses. Communications, transportation and railway construction also recorded contractions. A combined working force of 345,355 persons was reported by the 3,717 employers whose

data were tabulated, and who had 338,599 on their payrolls in the preceding month.

*Prairie Provinces.*—Following six months of steady expansion, there was a seasonal curtailment in employment in the Prairie Provinces on November 1, 1933; the decline exceeded that noted in the autumn of 1932, but the index was then three points lower. Returns were compiled from 1,221 firms having 117,972 employees, as against 122,948 on October 1, 1933. Coal-mining and logging afforded considerably more employment; on the other hand, manufacturing, building, highway and railway construction and transportation showed contractions. The changes within the manufacturing group were generally small.

*British Columbia.*—Decreased employment was recorded by the 828 employers furnishing returns in British Columbia; their staffs aggregated 69,069 compared with 70,388 in the preceding month. The reduction occurred almost wholly in manufacturing, there being decided seasonal losses in food factories. Highway construction also showed a decline. On the other hand, logging and building and

| Relative Weight of<br>Employment by<br>Cities as at Nov. 1,<br>1933..... | 15.0     | 1.4    | 13.0    | 1.4    | 3.0      | 1.2     | 4.1      | 3.1       |

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated city to the total number of all employees reported in Canada by the firms making returns for the date under review.

railway construction were rather more active. Employment was in greater volume than on November 1 of last year, when very much greater shrinkage had been noted.

Table I gives index numbers by economic areas.

### Employment by Cities

Additions to staffs were registered in Toronto, Ottawa and Hamilton, while in Montreal, Quebec City, Windsor and the adjacent Border Cities, Winnipeg and Vancouver there were reductions.

*Montreal*.—Following seven months of uninterrupted improvement, the trend of employment in Montreal was downward on November 1, when 1,309 persons were let out from the staffs of the 1,149 co-operating firms, who employed 127,206. Manufactures, construction and transportation showed reduced activity, while there were small gains in wholesale trade and services. Within the manufacturing group, there was curtailment in textile, leather, tobacco and beverage, iron and steel and electrical apparatus plants; on the other hand, musical instrument works

reported an advance. Very much greater declines had been noted on November 1, 1932, and the index was then slightly lower.

*Quebec City*.—Employment showed a further falling-off in Quebec, according to 158 employers of 12,060 persons, compared with 12,526 on October 1. Manufacturing indicated most of the contraction, while other industries on the whole recorded only minor changes; within the manufacturing group, the largest decline occurred in leather footwear factories. Employment as reported by employers was in less volume than on the same date last year, the losses then noted having been on a smaller scale.

*Toronto*.—There was a further increase in the number of workers on the payrolls of 1,249 firms in Toronto, who had 109,886 persons in their employ, or 792 more than in the preceding month. Most of the gain took place in manufacturing (notably in printing and publishing, lumber, electrical apparatus and non-ferrous metal plants), and in construction, services and trade. A decline had been registered at the beginning of November a

| Relative Weight of Employment by Industries as at Nov. 1, 1933..... | 100.0          | 50.9          | 3.6     | 5.9    | 2.5            | 11.3           | 13.1         | 2.6      | 10.1  |

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated industry to the total number of all employees reported in Canada by the firms making returns for the date under review.

year ago, but the index was then higher by one point.

*Ottawa.*—In Ottawa, improvement was shown in construction, and manufacturing was also rather more active; the changes in the other groups were small. The 156 employers furnishing data reported 12,147 workers, as against 11,854 on October 1. Employment was in slightly better volume than on the same date in 1932, when contractions had been indicated.

*Hamilton.*—Employment in Hamilton increased substantially on November 1, when the 249 co-operating firms employed 25,125 persons, or 1,242 more than at the beginning of October. Manufacturing was decidedly brisker, chiefly in the iron and steel group, and construction also afforded more employment. A small gain had been reported on November 1 of last year; the index then was nearly two points lower.

*Windsor and the Adjacent Border Cities.*—Activity in the Border Cities showed a reduction; 140 employers reported 9,801 persons on their payrolls, compared with 9,912 at the beginning of October. The decrease took place largely in the automobile and related industries, in which, however, activity was generally greater than it had been on November 1, 1932. An increase had been indicated on the same date of a year ago, but employment was then decidedly below its level on November 1, 1933.

*Winnipeg.*—Employment in Winnipeg was slacker, according to 404 firms employing 34,337 workers at the beginning of November, as compared with 34,585 in their last report. Trade reported slight seasonal advances, but manufacturing (particularly in iron and steel works), transportation and construction released help. A greater falling-off had been recorded on November 1, 1932, when employ-

<sup>1</sup>The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

ment was, however, in rather greater volume.

*Vancouver.*—There was a downward movement in Vancouver, where 354 employers had 26,535 persons on their staffs, or 216 fewer than in the preceding month. Manufacturing showed a decline, while the changes in the remaining industries were slight. Employment was rather duller than at the beginning of November last year, when similar curtailment had been reported.

Index numbers by cities are given in Table II.

### Manufacturing

Further seasonal shrinkage on a small scale was noted in manufactures, chiefly in the lumber and food-canning industries, although there were also losses in fur, leather, building material and electric current plants. On the other hand, musical instrument, pulp and paper, textile, rubber, chemical, iron and steel and non-ferrous metal factories registered advances. The gains in iron and steel factories, though not especially large, are particularly interesting, because since 1924, the trend on November 1 has been uniformly unfavourable. The 5,070 co-operating manufacturers reported 430,081 operatives, as against 431,608 at the beginning of October. This decline involved fewer workers than that shown on November 1 of 1932, or indeed, of any other year since 1922; it was distinctly smaller than the average seasonal loss between October 1 and November 1 in the last twelve years.

A brief review of the course of employment in manufacturing during the elapsed months of 1933 shows uninterrupted improvement from January 1 to September 1; although there has been slight curtailment in the last two months, this has been decidedly less than seasonal, and the index, standing at 86.5 on November 1, was over 12 points higher than on January 1. This increase of 16.2 per cent compared very favourably with the declines ranging from just under two to nearly five points recorded in the same months in each of the last three years. The index on the date under review (86.5) was 4.8 points or practically six per cent higher than on November 1, 1932, when the reported decreases had involved the release of nearly eight times as many workers.

*Animal Products—Edible.*—Dairies and meat preserving plants reported slightly increased activity, but seasonal curtailment in fish-canneries caused a reduction in the group as a whole. Statistics were received from 236 manufacturers, employing 19,235 persons, as compared with 20,030 in the preceding month. This contraction, which took place chiefly in British Columbia, was much smaller than that

registered on the corresponding date last year, when activity was generally at a lower level.

*Leather and Products.*—There was a falling-off in employment in this group on November 1, chiefly in boot and shoe factories in Quebec and Ontario. The 260 firms furnishing data reported 19,490 workers, as against 20,287 on October 1. The index was nearly seven points higher than on the same date in 1932, when a smaller decline had been noted.

*Lumber and Products.*—Further contractions, involving a smaller number of employees than in the autumn of last year, were indicated in the lumber group, in which employment was in greater volume than in November, 1932. The losses on the date under review took place chiefly in rough and dressed lumber mills, while furniture works showed improvement. A combined working force of 32,114 persons was reported by the 782 co-operating manufacturers, as compared with 33,453 at the beginning of October. The largest decreases were in Quebec and Ontario.

*Musical Instruments.*—A considerable increase in staffs was indicated in musical instrument factories, 35 of which reported 1,254 workers, or 400 more than on October 1. Employment was in smaller volume than at the beginning of November, 1932, when little general change had been indicated.

*Plant Products—Edible.*—Fruit and vegetable canneries made large seasonal reductions in their payrolls, while sugar and syrup and chocolate and confectionery factories showed an advance. The forces of the 404 reporting firms aggregated 33,067 persons, or 910 fewer than in their last return. Employment declined in Quebec and British Columbia, while improvement occurred in the Maritime Provinces. The curtailment, on the whole, involved fewer workers than that registered on the corresponding date last year, and the index number was then several points lower than on the date under review.

*Pulp and Paper Products.*—There was a large increase in the staffs reported by employers in this group, 562 of whom had 53,614 workers on their payrolls, as compared with 52,998 at the beginning of October. Improvement was recorded in pulp and paper mills and in printing and publishing houses. The tendency was favourable in all except the Western provinces, being especially so in Ontario. Gains had also been indicated at the beginning of November a year ago; the index was then one point lower.

*Rubber Products.*—Employment in rubber goods showed a slight increase on November 1; data were compiled from 47 firms with 11,085

employees, as against 10,980 in their last report. The additions to staffs were made in Ontario. Employment was at a higher level than on November 1, 1932, when an advance had also been noted.

*Textile Products.*—Hosiery and knitting silk and woollen factories reported heightened activity, but the production of garments and personal furnishings and headwear showed a falling-off; 867 textile manufacturers enlarged their payrolls from 88,387 on October 1 to 89,250 on the date under review. The increases were recorded largely in Quebec and Ontario. A smaller gain had been shown at the beginning of November last year, when the index was several points lower.

*Tobacco, Distilled and Malt Liquors.*—There was a decline in employment in beverage factories, offsetting gains in tobacco manufacturing, according to the 154 establishments furnishing statistics in this group, which employed 15,116 persons, as compared with 15,147 on October 1. Most of the shrinkage occurred in Quebec, while the improvement noted was in Ontario. A considerable reduction had been indicated on the corresponding date last year, and employment was then in lesser volume.

*Chemicals and Allied Products.*—A small gain was recorded in this group, in which statements were furnished by 158 plants employing 8,587 persons or 127 more than in their last report. Activity was greater than in the autumn of 1932, when the tendency had also been upward.

*Clay, Glass and Stone Products.*—Seasonal curtailment was indicated in building material plants, chiefly in Ontario; employment generally was at a very slightly higher level than on November 1, 1932, when much greater losses had taken place. The forces of the 186 employers from whom information was received, declined by 190 persons to 6,744 at the beginning of November, 1933.

*Electric Current.*—Employment in the production of electric current showed a contraction, 391 workers being released from the forces of the 92 co-operating manufacturers, who employed 13,456 persons. Similar declines had been indicated in this industry on November 1 last year, when the index was rather higher.

*Electrical Appliances.*—Little general change was reported in electrical apparatus works, 103 of which had 10,333 employees, or 48 fewer than in their last report. An advance had been reported on the same date in 1932, and employment was then in greater volume.

*Iron and Steel Products.*—The crude, rolled and forged, machinery and agricultural imple-

ment divisions showed moderate improvement over the preceding month, while the automobile, shipbuilding, iron and steel fabrication and some other groups of the iron and steel industry registered reduced activity. The result was an increase in employment which is especially interesting in that it is contrary to the usual seasonal trend indicated on November 1 in the last twelve years. Statements were received from 778 manufacturers whose payrolls aggregated 82,377 persons, as compared with 81,825 in the preceding month. Employment advanced in Ontario and the Maritime Provinces, losses being reported elsewhere. Decided curtailment had been indicated at the beginning of November last year, and employment then was quieter than on the date under review.

*Non-ferrous Metal Products.*—Data tabulated from 145 firms in the non-ferrous metal group showed that they employed 14,828 workers, or 393 more than on October 1. There was improvement in smelters and refineries, precious and base metal works. Employment was brisker than on the same date of 1932, when smaller gains in personnel had been reported.

*Non-metallic Mineral Products.*—There was a minor decline in employment in non-metallic mineral product factories, 112 of which released 24 persons, bringing their staffs to 12,800 at the beginning of November. The index was higher than on November 1 of last year, when the curtailment had involved a larger number of persons.

### Logging

Statistics were tabulated from 247 firms employing 30,245 men, or 12,445 more than in the preceding month. This advance was much greater than that reported at the beginning of November, 1932, or indeed, of any other year since 1920, except 1929; employment on November 1, 1933, was more active than in any month since March, 1930. The greatest increases on the date under review occurred in Quebec and Ontario, although all five economic areas shared in the improvement over October 1, 1933.

### Mining

Coal-mining afforded much more employment; quarries and other non-metallic mineral mines were rather busier, while the extraction of metallic ores was considerably more active. Statements were compiled from 254 mine operators, with 49,980 employees, or 1,827 more than in their last report. Of the total employees recorded on the date under review, 25,476 belonged in the coal mining, 18,859 in

the metallic ore and 5,645 in the non-metallic mineral group. A smaller gain had been indicated on the whole on the same date in 1932, and the index then was below its level at the time of writing.

### Communication

Telephones and telegraphs showed a seasonal contraction; the companies and branches making returns had 21,349 workers on their payrolls, a loss of 374 since October 1. Employment was quieter than on November 1, 1932, when a similar falling-off had been noted.

### Transportation

*Street Railways and Cartage.*—There was a reduction in employment in local transportation, according to 189 firms whose staffs aggregated 24,165 at the beginning of November. There were small losses in all economic areas except the Maritimes. Activity was less than on the corresponding date in 1932.

*Steam Railways.*—Statistics were tabulated from 100 divisional superintendents and other employers in the railway operation group, whose payrolls decreased by 529 persons to 56,730 on November 1. Declines were recorded in all provinces, with the exception of British Columbia. Employment was slacker than in the autumn of 1932, although greater contractions had then been indicated.

*Shipping and Stevedoring.*—Losses were noted in water transportation, 93 companies employing 14,856 workers, as compared with 15,494 in the preceding month. There were general losses. Curtailment had also been shown on November 1 last year, when the index stood at 87.8, compared with 90.5 on the date under review.

### Construction

*Building.*—There was a slight decrease in building, 113 persons being let out from the forces of the 656 co-operating contractors, who had 18,118 employees, a number in excess of that reported by the firms making returns at the beginning of November, 1932; the losses then experienced had involved a decidedly larger number of persons. The greatest declines on the date under review took place in Ontario and the Prairie Provinces, while gains occurred in Quebec and British Columbia.

*Highways.*—Work on highways and streets generally decreased to some extent in spite

of increases in Quebec and Ontario. Contractions in this group are usually indicated during the autumn. The index at the beginning of November was higher than on the same date of 1932, when larger losses were reported. Statements were tabulated from 357 employers, whose staffs, standing at 67,629, were smaller by 194 persons than on October 1, 1933.

*Railways.*—Curtailment of railway construction work was recorded, especially in Ontario and the Prairie Provinces. The forces of the 36 companies and divisional superintendents furnishing returns declined from 27,254 persons on October 1, to 24,774 at the beginning of November. This shrinkage was on a smaller scale than that registered on the corresponding date in 1932, but the level of employment then was slightly higher.

### Services

Very little general change was noted in the personnel of service establishments, 386 of which employed 22,235 persons, as against 22,160 at the beginning of October. The index was slightly higher than on November 1, 1932, when large contractions had been indicated.

### Trade

The trend of employment in trade was again upward, 443 workers being added to the forces of the 924 retail and wholesale establishments furnishing returns, whose staffs aggregated 85,129. The advance took place mainly in the latter division. The index stood at 115.6, compared with 115.4 on November 1, 1932. Further pronounced gains in employment may be expected during the next few weeks, in preparation for the Christmas and holiday trade. The increases recorded on the corresponding date last year gave employment to a larger number of workers.

### TABLES

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables. The columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns on the date under review.

## (2) Unemployment in Trade Unions at the Close of October, 1933

Unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged in work other than their own trades or who are idle owing to illness are not considered as unemployed. Unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership from which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

somewhat better than in October last year when 22.0 per cent of the members reported were idle. In Alberta the coal mines and manufacturing industries afforded a greater volume of work than in September, and were responsible for the employment rise of over 3 per cent reported from that province. Activity also tended upward in New Brunswick, Ontario and Saskatchewan, though the gains were very slight, being less than 1 per cent. Recessions in employment on a small scale from September were reflected by Nova Scotia, Quebec, Manitoba and British Columbia unions, which, however, were suffi-

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADE UNIONS

There was no change in the percentage of unemployment reported by local trade unions in Canada as a whole, during October, when compared with the returns for the previous month, though fluctuations were apparent in the various provinces and industries. This was manifest by the reports received for October from a total of 1,734 labour organizations involving a membership of 148,703 persons, 29,417 or 19.8 per cent of whom were without work on the last day of the month, the same percentage as was recorded in September. The situation was, however,

cient to counteract the improvement in the other provinces. When a comparison is made with the reports for October last year New Brunswick and Alberta unions showed a considerably better situation during the month surveyed, the gains being of rather general distribution throughout these provinces. Increases in activity of more moderate proportions were reflected by Quebec, Ontario and Manitoba unions, while in Saskatchewan fractional gains only occurred. On the other hand, Nova Scotia and British Columbia unions reported minor gains in employment.

The monthly returns on unemployment from the largest city in each province with the exception of Prince Edward Island are tabulated separately. Of these Halifax unions showed a sharp drop in activity from September conditions. Declines of much lesser importance were reflected by Saint John, Montreal and Regina unions, Winnipeg showing but a nominally adverse situation. Noteworthy improvement was recorded by

Edmonton unions from September, and fair-sized gains were apparent in Toronto. In Vancouver also activity tended slightly upward. A more favourable employment movement than in October, 1932, was indicated in all cities used here for comparison, Edmonton unions showing the best situation. In Vancouver, Toronto, Winnipeg and Montreal conditions improved moderately over October last year, and the employment tendency for Halifax, Saint John and Regina unions was but slightly upward.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

| Month             | N.S. and Prince Edward Island | New Brunswick | Quebec | Ontario | Manitoba | Saskatchewan | Alberta | British Columbia | Canada |
|-------------------|-------------------------------|---------------|--------|---------|----------|--------------|---------|------------------|--------|
| Average 1919..... | 3.1                           | 2.0           | 3.4    | 2.7     | 2.1      | 3.2          | 2.0     | 7.9              | 3.4    |
| Average 1920..... | 1.8                           | 2.0           | 7.2    | 3.4     | 3.1      | 3.2          | 2.8     | 11.2             | 4.9    |
| Average 1921..... | 11.3                          | 8.5           | 16.6   | 9.7     | 8.5      | 7.8          | 7.8     | 23.5             | 12.7   |
| Average 1922..... | 7.1                           | 4.3           | 8.6    | 5.0     | 8.9      | 5.4          | 6.1     | 12.4             | 7.1    |
| Average 1923..... | 3.0                           | 2.0           | 6.7    | 3.7     | 5.8      | 3.0          | 6.0     | 5.8              | 4.9    |
| Average 1924..... | 5.1                           | 4.0           | 10.0   | 6.1     | 6.5      | 4.3          | 5.4     | 5.8              | 7.2    |
| Average 1925..... | 5.0                           | 3.6           | 10.9   | 5.5     | 5.1      | 3.3          | 8.4     | 5.7              | 7.0    |
| Average 1926..... | 7.8                           | 2.1           | 6.8    | 4.2     | 3.6      | 3.0          | 4.6     | 5.5              | 5.1    |
| Average 1927..... | 3.7                           | 1.9           | 6.8    | 4.1     | 4.4      | 3.2          | 4.1     | 5.5              | 4.9    |
| Average 1928..... | 4.0                           | 1.2           | 6.1    | 3.5     | 4.2      | 3.0          | 4.2     | 5.1              | 4.5    |
| Average 1929..... | 4.0                           | 1.6           | 7.7    | 4.3     | 7.1      | 5.3          | 6.4     | 5.9              | 5.7    |
| Average 1930..... | 5.4                           | 3.7           | 14.0   | 10.4    | 9.6      | 10.6         | 13.3    | 11.6             | 11.1   |
| Average 1931..... | 8.5                           | 9.2           | 19.3   | 17.2    | 15.7     | 15.6         | 19.4    | 17.6             | 15.8   |
| Average 1932..... | 9.6                           | 14.4          | 26.4   | 23.7    | 20.0     | 15.8         | 22.6    | 21.6             | 22.0   |
| Oct. 1919.....    | 3.2                           | 1.4           | 2.5    | 8       | 1.3      | 6            | 8       | 5.0              | 2.9    |
| Oct. 1920.....    | 3                             | 4             | 9.5    | 3.0     | 3.3      | 3            | 8       | 15.7             | 6.1    |
| Oct. 1921.....    | 2.8                           | 5.6           | 10.7   | 5.7     | 4.2      | 3.3          | 4.0     | 14.8             | 7.4    |
| Oct. 1922.....    | 1.3                           | 2.4           | 5.9    | 1.6     | 5.2      | 1.4          | 2.5     | 10.6             | 3.9    |
| Oct. 1923.....    | 4.3                           | 3.2           | 9.5    | 2.8     | 2.2      | 1.8          | 3       | 1.3              | 4.8    |
| Oct. 1924.....    | 2.5                           | 4.3           | 10.5   | 4.5     | 6.1      | 3.2          | 8.1     | 8.9              | 6.8    |
| Oct. 1925.....    | 3.4                           | 2.1           | 10.6   | 3.1     | 1.8      | 1.0          | 3.7     | 4.2              | 5.1    |
| Oct. 1926.....    | 1.2                           | 1             | 3.6    | 3.3     | 4.4      | 1.4          | 8       | 5.6              | 2.6    |
| Oct. 1927.....    | 1.1                           | 0             | 3.6    | 3.2     | 4.2      | 1.8          | 4.4     | 4                | 3.9    |
| Oct. 1928.....    | 1.1                           | 1.0           | 5.7    | 1.8     | 1.7      | 1.5          | 1.4     | 5.8              | 3.1    |
| Oct. 1929.....    | 2.3                           | 2.2           | 7.8    | 4.4     | 9.3      | 4.0          | 7.2     | 6.9              | 6.0    |
| Oct. 1930.....    | 4.1                           | 4.6           | 14.5   | 11.2    | 8.8      | 7.7          | 9       | 10.5             | 10.8   |
| Oct. 1931.....    | 7.4                           | 10.2          | 16.1   | 18.4    | 15.1     | 18.2         | 15.7    | 16.9             | 15.0   |
| Jan. 1931.....    | 6.7                           | 8.5           | 15.7   | 17.1    | 15.6     | 19.0         | 18.2    | 16.2             | 15.6   |
| Feb. 1931.....    | 6.5                           | 10.4          | 14.0   | 16.0    | 14.7     | 19.7         | 21      | 18.8             | 15.5   |
| Mar. 1931.....    | 6.5                           | 10.4          | 15.5   | 15.6    | 13.0     | 12.8         | 22.0    | 14.2             | 15.2   |
| April 1931.....   | 7.2                           | 9.8           | 14.4   | 15.2    | 14.4     | 14.6         | 20.0    | 17.8             | 14.9   |
| May 1931.....     | 6.4                           | 10.7          | 20.5   | 15.6    | 13.0     | 12.8         | 22.0    | 14.2             | 15.2   |
| June 1931.....    | 7.2                           | 6.5           | 20.0   | 16.2    | 14.1     | 13.5         | 21.7    | 15.6             | 16.3   |
| July 1931.....    | 7.2                           | 7.0           | 17.0   | 16.6    | 14.7     | 14.5         | 25.5    | 16.2             | 16.2   |
| Aug. 1931.....    | 9.3                           | 7.7           | 16.9   | 15.2    | 15.7     | 11.8         | 24.4    | 16.7             | 15.8   |
| Sept. 1931.....   | 8.2                           | 10.7          | 22.7   | 18.7    | 19.0     | 19.3         | 16.9    | 17.9             | 18.1   |
| Oct. 1931.....    | 8.6                           | 9.2           | 23.6   | 18.3    | 17.7     | 22           | 16.4    | 19.7             | 18.3   |
| Nov. 1931.....    | 12.8                          | 10.0          | 22.1   | 18.8    | 18.2     | 17.0         | 14.7    | 20.6             | 18.6   |
| Dec. 1931.....    | 13.8                          | 9.6           | 29.0   | 20.2    | 16.5     | 19.9         | 16.4    | 21.2             | 21.1   |
| Jan. 1932.....    | 15.1                          | 15.5          | 28.4   | 21.5    | 19.0     | 18.0         | 19.2    | 21.8             | 22.0   |

The chart which accompanies this article traces the course of unemployment by months from January, 1927, to date. The curve during October remained at exactly the same level as in September, showing an identical volume of unemployment in both months. A slight drop from October, 1932, in the level of the curve was noted, however, indicating a more favourable situation during the month reviewed.

There was little variation from the previous month in conditions for workers in the manufacturing industries during October, though the tendency was in a favourable direction. For October, reports were compiled from 458 unions, covering 42,117 members, 8,793 or 20.9 per cent of whom were idle on the last day of the month, contrasted with 21.3 per cent in September. Garment workers reported gains in activity from September, involving the greatest number of members, though some improvement was apparent also among printing tradesmen, electric current employees, and general labourers. Fractional gains only occurred for leather workers, and bakers and confectioners. Textile, and hat and cap workers, metal polishers and glass workers, on the other hand, all reported noteworthy contractions of activity, viewed from a percentage basis, though involving few members. Employment for brewery workers, cigar-makers, and pulp and paper makers was also moderately curtailed, wood workers showing a decline of less than 1 per cent. In the iron and steel trades the same situation obtained for both months under review. A better employment volume was available to members in the manufacturing industries than in October last year when 24.3 per cent of the membership reported were without work. In the garment trades extensive employment advancement was noted from October a year ago as was the case among hat and cap workers, and metal polishers, though the gains for these latter tradesmen did not involve a great number of workers as their membership was small. Substantial improvement was also recorded among textile workers, gains on a

TABLE II.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY GROUPS OF INDUSTRIES

| September, 1933 | 13.9    | 36.6                  | 6.0                      | 12.0               | 6.6            | 13.9                                   | 6.4              | 26.0          | 14.4                                  | 4.3             |                 |                            |                 |                       |                    |                                |                  |  |                           |                |                          |                         |                      |               |                     |                     |                            |          |              |               |                 |

somewhat smaller scale being reported by glass workers, and slight increases in activity among iron and steel workers. The tendency for pulp and paper makers, printing tradesmen and wood workers was also favourable, though the change was but nominal. On the other hand, leather workers, general labourers and cigarmakers indicated a pronounced drop in available work from October, 1932, lesser declines occurring among brewery and jewellery workers, and bakers and confectioners.

Coal mining afforded a slightly better volume of employment during October than in either the previous month or October last year as shown by the reports tabulated from 51 unions, embracing a membership of 14,340 persons. Of these, 1,155 or 8.1 per cent were idle on the last day of the month contrasted with percentages of 9.8 in September and 13.3 in October, 1932. The Alberta mines were responsible entirely for the better situation shown from September, conditions in Nova Scotia remaining unchanged, while in British Columbia activity eased off slightly. Nova Scotia, Alberta and British Columbia miners all participated in the employment expansion noted from October, 1932, Alberta miners showing the most noteworthy advances though moderate improvement was reflected by unions in Nova Scotia. In British Columbia only small gains were recorded.

The building and construction trades remained quite slack during October, with a slight tendency in a favourable direction from September conditions. Reports for October were received from 210 associations of building and construction tradesmen with 15,894 members, 10,401 of whom were without work on the last day of the month, a percentage of 65.4 in contrast with 65.8 per cent in September. A quieter situation prevailed, however, than in October, 1932, when 59.6 per cent of the members recorded were unemployed. Electrical workers alone were afforded a better volume of employment than in September, the improvement being pronounced. Bridge and structural iron workers, and tile layers, lathers and roofers, whose combined membership formed a quite small share of the group total indicated large percentage declines in activity, though bricklayers, masons and plasterers reported the greatest number of members adversely affected. Activity for granite and stonecutters was moderately curtailed from September, and among carpenters and joiners, and plumbers and steamfitters the recessions were but nominal. Steam shovelmen and hod carriers and building labourers, however, reported the same percentage of idleness in both months

compared. Contrasted with the returns for October, 1932, in the building and construction trades, bricklayers, masons and plasterers indicated a sharp drop in activity during the month reviewed, as did also granite and stonecutters, and tile layers, lathers and roofers. Recessions of much lesser importance were noted by bridge and structural iron workers, carpenters and joiners, steam shovelmen, and electrical workers. On the other hand, noteworthy improvement was evident among painters, decorators and paperhangers, and hod carriers and building labourers, and increases of slightly lesser degree were apparent among plumbers and steamfitters.

The 772 unions of transportation workers making returns in October, with an aggregate of 55,838 persons, showed that 7,026 or 12.6 per cent were without work at the end of the month, contrasted with 12.0 per cent in September, and with 12.9 per cent in October, 1932. Steam railway employees, whose returns included about 78 per cent of the entire group membership reported, indicated a nominal adverse change from September, and among navigation workers there was a slight decline in available work. Street and electric railway employees, and teamsters and chauffeurs, however, showed approximately the same situation as in September. In steam railway operation there was somewhat greater activity than in October a year ago, and teamsters and chauffeurs were considerably better engaged. Among street and electric railway employees the trend was also upward, though the change was quite slight. Navigation workers, however, were much slacker than in October, 1932.

Activity for retail clerks was at a high level during October, there being little change from the September situation. For October reports were tabulated from 4 unions of retail clerks, with 1,007 members, 0.5 per cent of whom were without employment on the last day of the month, in contrast with 0.6 per cent in September. Improvement on a small scale was reflected from October last year when 2.0 per cent of inactivity was recorded.

Civic employees were better engaged during October than in either the previous month or October, 1932, as shown by the returns received from 74 associations, with a membership total of 6,917 persons. Of these 112 or 1.6 per cent were without work at the end of the month, compared with percentages of 5.2 in September and 5.3 in October last year.

From unions in the miscellaneous group of trades 117 reports were tabulated during October, combining a membership of 4,104 persons, 706 or 17.2 per cent of whom were idle at the end of the month, in comparison

with 20.2 per cent in September. The situation was also more favourable than in October, 1932, when 20.8 per cent of the members reported were without work. Hotel and restaurant, and theatre and stage employees, stationary engineers and firemen, unclassified workers, and barbers, all reported a higher level of activity than in September, though the gains were not of particular importance in any one group of trades. Stationary engineers and firemen were afforded a much better volume of work than in October last year, and increases of noteworthy proportions were reflected by hotel and restaurant employees. There was, however, some slowing up of activity among theatre and stage employees and unclassified workers. The percentage of idleness for barbers remained the same as was recorded in October last year.

There was no change from the preceding month in the volume of work afforded fishermen during October, unemployment for both

months standing at 24.8. Activity was, however, slightly curtailed from October, 1932, when 21.3 per cent of idleness was registered. Returns for October were tabulated from 2 unions of fishermen, with a total of 705 members.

The 5 unions of lumber workers and loggers furnishing reports in October, with a membership of 671 persons, showed that 163 or 24.3 per cent were unemployed on the last day of the month, in contrast with 16.9 per cent of idleness at the close of September and with 36.3 per cent in October, 1932.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1932 inclusive, and also the percentage of unemployment by provinces for October of each year from 1919 to 1930 inclusive, and for each month from January, 1931, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

### (3) Employment Office Reports for October, 1933

The volume of business transacted by the offices of the Employment Service of Canada during the month of October, 1933, showed increases in the average daily placements of 12 per cent and 44 per cent, respectively, when a comparison was made with the records of September, 1933, and with those of October, 1932. This large gain in each instance was in construction and maintenance, where increased placements were effected on highways, streets, sewers, and airports, and on other building construction provided as relief work by the Government. Logging and services also showed noteworthy gains under both comparisons. The largest loss from the previous month and likewise from the corresponding period a year ago was in farming, manufacturing also showing a noticeable decline from September but little or no variation from October, 1932. Changes in other groups, both adverse and favourable, were nominal only.

The accompanying chart shows the trend of employment since January, 1931, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, computations being made semi-monthly. It will be noted from the graph that the curves of vacancies and placements in relation to applications dipped sharply during the first half of October, but recovered during the latter half of the month, and at the close of the period under review, the levels attained were slightly above those shown at the conclusion of

September and considerably higher than the ratios recorded at the end of October, 1932. The ratio of vacancies to each 100 applications was 45.7 during the first half and 52.2 during the second half of October, 1933, in contrast with the ratios of 43.5 and 38.6 during the corresponding periods of 1932. The ratios of placements to each 100 applications during the periods under review were 43.9 and 49.3 as compared with 41.3 and 37.1 during the corresponding month of 1932.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during October, 1933, was 1,347, as compared with 1,198 during the preceding month and with 929 in October a year ago.

The average number of applications for employment received daily by the offices during the month under review was 2,733, in comparison with 2,504 in September, 1933, and with 2,276 during October last year.

The average number of placements made daily by the offices of the Service during October, 1933, was 1,281, of which 628 were in regular employment and 653 in work of one week's duration or less, as compared with a total daily average of 1,142 during the preceding month. Placements in October a year ago averaged 889, consisting of 398 placements in regular and 491 in casual employment.

During the month of October, 1933, the offices of the Service referred 33,752 persons to employment and effected a total of 32,015 placements. Of these, the placements in

regular employment were 15,700, of which 11,752 were of men and 3,948 of women, while placements in casual work totalled 16,315. The number of vacancies reported by employers was 25,656 for men and 8,003 for women, a total of 33,659, while applications for work numbered 68,310, of which 54,964 were from men and 13,346 from women. Reports for September, 1933, showed 29,935 positions available, 62,579 applications made, and 28,534 placements effected, while in October, 1932, there were recorded 23,222 vacancies, 56,877 applications for work, and

## NOVA SCOTIA

There was a gain of nearly 64 per cent in the number of positions offered through Employment Offices in Nova Scotia during October, when compared with the preceding month and of 31 per cent in comparison with the corresponding month of last year. Placements also were nearly 87 per cent above September and 28 per cent in excess of October, 1932. Increased placements in highway construction and services were responsible for the gain over October of last year, as the improvement in logging was offset by

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

22,205 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service, each year, from January, 1923, to date:—

| Year                  | Placements |         |         |
|-----------------------|------------|---------|---------|
|                       | Regular    | Casual  | Totals  |
| 1923.....             | 347,165    | 115,387 | 462,552 |
| 1924.....             | 247,425    | 118,707 | 366,132 |
| 1925.....             | 306,804    | 106,021 | 412,825 |
| 1926.....             | 300,226    | 109,929 | 410,155 |
| 1927.....             | 302,723    | 112,046 | 414,769 |
| 1928.....             | 334,604    | 135,724 | 470,328 |
| 1929.....             | 260,747    | 137,620 | 398,367 |
| 1930.....             | 187,872    | 180,807 | 368,679 |
| 1931.....             | 175,632    | 205,876 | 471,508 |
| 1932.....             | 153,771    | 198,443 | 352,214 |
| 1933 (10 months)..... | 139,391    | 135,190 | 274,581 |

declines in trade and manufacturing. During the month 46 placements were made in logging, 745 in construction and maintenance and 367 in services. Of the latter, 242 were of household workers. There were 177 men and 61 women placed in regular employment during the month.

## NEW BRUNSWICK

During the month of October, positions offered through Employment Offices in New Brunswick were nearly 13 per cent less than in both the preceding month and in the corresponding month of last year. Placements also were about 13 per cent less than in both September and in October, 1932. There were fewer placements than during October of last year in all industrial divisions except services,

## REPORT OF THE EMPLOYMENT SERVICE FOR THE MONTH OF OCTOBER, 1933

| Offices                       | Vacancies              |                           | Applicants               |                       |               |               |                            | Regular placements same period 1932 |

\*110 Placements effected by offices since closed.

although construction and maintenance was the only group to show a decline of any importance. There were 446 placements in this group and 472 in services. Of the latter, 368 were of household workers. During the month 101 men and 55 women were placed in regular employment.

#### QUEBEC

Orders received at Employment Offices in the Province of Quebec called for over 12 per cent more workers than in the preceding month and 84 per cent more than in the corresponding month of last year. There was a gain of nearly 17 per cent in placements when compared with September and over 93 per cent in comparison with October, 1932. All industrial divisions, except mining, participated in the increase in placements over October of last year, gains in services, construction and maintenance and logging being the most important. Placements by industrial divisions included: manufacturing, 122; logging, 314; construction and maintenance, 423; trade, 78; and services, 1,830, of which 1,600 were of household workers. Placements in regular employment numbered 981 of men and 1,326 of women.

#### ONTARIO

Opportunities for employment, as indicated by orders received at Employment Offices in Ontario during October, were over 19 per cent better than in the preceding month and nearly 64 per cent in excess of the corresponding month of last year. Placements also were over 18 per cent higher than in September and over 59 per cent above October, 1932. Relief work on road and sewer construction was mainly responsible for the large increase in placements over October a year ago, although all industrial divisions showed improvement. Of the gains reported, logging and farming fall next in order to the increase shown in construction and maintenance. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 502; logging, 1,044; farming, 661; construction and maintenance, 8,104; trade, 340; and services, 3,152, of which 1,828 were of household workers. There were 3,086 men and 1,338 women placed in regular employment during the month.

#### MANITOBA

Positions offered through Employment Offices in Manitoba during October were 9 per cent higher than in the preceding month and nearly 33 per cent above the corresponding month of last year. Placements also were over 9 per cent in excess of September

and over 42 per cent above October, 1932. Highway construction and maintenance, farming and logging showed the largest gain in placements over October of last year. These increases were offset by a substantial decline in services and smaller losses in manufacturing and trade. Placements by industrial divisions included: logging, 170; farming, 593; construction and maintenance, 1,774; and services, 720, of which 590 were of household workers. There were 2,092 men and 335 women placed in regular employment during the month.

#### SASKATCHEWAN

Employment opportunities, as indicated by orders received at Employment Offices in Saskatchewan during October, were nearly 10 per cent less than in the preceding month, but nearly 16 per cent above the corresponding month of last year. There was a decline of nearly 13 per cent in placements when compared with September, but a gain of nearly 15 per cent in comparison with October, 1932. Placement gains over October of last year were reported in highway construction and maintenance, farming, mining and manufacturing, while there were declines in services, logging and transportation. None of these changes, however, was large. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 45; farming, 731; mining, 77; construction and maintenance, 634; trade, 56; and services, 733, of which 507 were of household workers. Regular employment was secured for 1,172 men and 360 women.

#### ALBERTA

Orders received at Alberta Employment Offices during October called for over 7 per cent more workers than in the preceding month and nearly 13 per cent more than during the corresponding month of last year. There was a gain of over 7 per cent in placements when compared with September and of nearly 16 per cent in comparison with October, 1932. The only group to show any increase of importance in placements over October of last year was the highway division of construction and maintenance. The most substantial decline was in farming, with a smaller loss in services. None of the changes in other groups were important. Placements by industrial divisions included: farming, 467; construction and maintenance, 2,031; and services, 481, of which 360 were of household workers. During the month 1,956 men and 255 women were placed in regular employment.

## BRITISH COLUMBIA

There was a gain of over 9 per cent in the number of positions offered through Employment Offices in British Columbia during October when compared with the preceding month and of over 48 per cent in comparison with the corresponding month of last year. Placements also were over 8 per cent higher than in September and nearly 48 per cent above October, 1932. Relief placements on highway construction were mainly responsible for the gain over October of last year, although increases were reported in all other groups, except transportation and manufacturing. None of these changes, however, was large. Industrial divisions in which most of the placements were effected during the month were: farming, 117; logging, 36; construction and maintenance, 3,427; trade, 33; and services, 605, of which 408 were of household workers. There were 2,187 men and 218 women placed in regular employment during the month.

## Movement of Labour

During the month of October, 1933, the offices of the Employment Service of Canada made 15,700 placements in regular employment, 5,513 of which were of persons for whom the employment found was outside the immediate vicinity of the offices at which they were registered. Of the latter, 525 were granted the Employment Service reduced transportation rate, 331 going to centres within the same province as the despatching office and 194 to other provinces. The reduced transportation rate which is 2·7 cents per mile with a minimum fare of \$4 is granted by the railway companies to bona fide applicants at the Employment Service who may desire to travel to distant employment for which no workers are available locally.

Quebec transfers at the reduced rate during October numbered 80, of which 33 were provincial and 47 interprovincial. The movement within the province originated at the Quebec City office, which despatched 33 bushmen to employment within its own zone. The workers going outside the province were also bushmen who secured their certificates for transportation at the Hull office, 35 travelling to the Sudbury zone and 12 to Pembroke. Persons benefiting by the Employment Service reduced transportation rate in Ontario during October were 256 in number, these going to provincial employ-

ment. From Sudbury 16 bushmen were shipped to Timmins and 125 bushmen to centres within the Sudbury zone. To the Timmins zone also were destined 63 bush workers from North Bay, 7 bushmen from Port Arthur and 1 saleslady from Fort William. Travelling within their respective zones 28 bushmen, 7 highway construction workers, 1 papermaker, 2 mine workers, and 1 housekeeper were conveyed from Port Arthur, and 3 bushmen from Fort William. In addition, the Ottawa office transferred 1 lumber scaler to North Bay, and Pembroke 1 foreman to Ottawa. The movement of labour from Manitoba centres during October comprised the transfer of 154 workers, 7 within the province and 147 outside. Included in the former were 2 construction labourers, 1 fisherman, 1 farm hand, 1 farm domestic, 1 construction cook, and 1 hotel general journeying from Winnipeg to employment within the same zone. The Winnipeg office also effected the despatch of 144 persons to other provinces, the Port Arthur zone being the destination of 141 bush workers, 1 highway engineer's assistant, and 1 town general, and the Estevan zone of 1 farm hand. From St. Boniface also the Port Arthur zone received 3 bushmen. The Saskatchewan offices issued certificates during October to 4 workers travelling to employment within the province. Three of these were farm hands for the Prince Albert zone, 2 shipped from Saskatoon and 1 from Moose Jaw. To a situation within its own zone Regina transferred 1 teacher. In Alberta the labour movement during October emanated from Edmonton and was entirely provincial, 22 workers being despatched to various centres within the Edmonton zone. Among these were included 6 miners, 5 farm hands, 3 bush workers, 1 nurse, 2 labourers, 1 fisherman, 3 building construction workers, and 1 cook. The Vancouver office was responsible for all transfers made in British Columbia during October, which were to centres within the province, and totalled 9. Journeying to employment within the Vancouver zone were 4 mine workers and 4 survey workers, while 1 steel sharpener was carried at the reduced rate to Kamloops.

Of the 525 persons who secured certificates at the Employment Service reduced transportation rate during October, 246 travelled by the Canadian National Railways, 223 by the Canadian Pacific Railway, 44 by the Temiskaming and Northern Ontario Railway, 8 by the Pacific Great Eastern Railway, and 4 by the Northern Alberta Railway.

#### (4) Building Permits Issued in Canada in October, 1933

The estimated value of the building authorized by 61 cities during October was \$1,762,947; this was a decrease of \$269,892 or 13.3 per cent, as compared with the September total of \$2,032,839, and of \$1,407,623 or 44.4 per cent as compared with the aggregate of \$3,170,570 for October, 1932.

Some 50 cities furnished detailed statistics, showing that they had issued over 220 permits for dwellings estimated to cost approximately \$685,000, and about 1,550 permits for other buildings valued at almost \$1,000,000. During September, authority was granted for the erection of about 250 dwellings and 1,750 other buildings, the estimated cost being approximately \$800,000, and \$1,000,000, respectively.

Nova Scotia, Quebec and Saskatchewan recorded increases in the value of authorized building as compared with September, 1933, while the remaining provinces reported declines. The largest decrease was that of \$133,683 or 49.6 per cent in British Columbia.

In comparison with October, 1932, there were declines in all provinces except Prince Edward Island and Manitoba; cities in Quebec reported the most pronounced losses, amounting to \$696,323 or 54.0 per cent.

Montreal showed an increase over September, 1933, but a reduction as compared with October, 1932; in Winnipeg there was a decline as compared with September, 1933, but an improvement over October, 1932, while Toronto and Vancouver recorded decreases in both comparisons. Of the other centres, Sherbrooke, Three Rivers, Brantford, London, St. Thomas, East Windsor, St. Boniface, Moose Jaw, Medicine Hat and New Westminster reported increases over both September, 1933, and October, 1932.

*Cumulative Record for First Ten Months, 1933.*—The following table gives the value of the building authorized by 61 cities during October and in the first ten months of each year since 1920, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in the first ten months of the years since 1920 are also given (average 1926=100).

| Year      | Value of permits issued in September | Value of permits issued in first ten months | Indexes of value of permits issued in first ten months (1926=100) | Average indexes of wholesale prices of building materials in first ten months (Average 1926=100) |
|-----------|--------------------------------------|---|---|--|
|           | \$                                   | \$  |   |  |
| 1933..... | 1,762,947                            | 18,043,654                                  | 13.4  | 77.8   |
| 1932..... | 3,170,570                            | 38,196,769                                  | 28.3  | 77.5   |
| 1931..... | 8,442,627                            | 97,045,622                                  | 71.9  | 82.4   |
| 1930..... | 12,756,402                           | 139,117,752                                 | 103.1   | 92.0   |
| 1929..... | 18,073,378                           | 204,084,407                                 | 151.3   | 96.2   |
| 1928..... | 21,558,085                           | 187,179,719                                 | 138.8   | 96.8   |
| 1927..... | 18,848,019                           | 160,000,554                                 | 118.6   | 96.2   |
| 1926..... | 14,738,402                           | 134,902,338                                 | 100.0   | 100.4  |
| 1925..... | 11,312,644                           | 109,676,825                                 | 81.3  | 103.0  |
| 1924..... | 13,089,588                           | 109,906,921                                 | 81.5  | 107.6  |
| 1923..... | 9,999,187                            | 118,319,159                                 | 87.7  | 111.8  |
| 1922..... | 10,737,525                           | 127,515,975                                 | 94.5  | 108.5  |
| 1921..... | 10,491,228                           | 99,064,670                                  | 73.4  | 125.2  |
| 1920..... | 10,401,041                           | 106,547,319                                 | 79.0  | 144.4  |

The aggregate for the first ten months of this year was lower than in 1932 and other years since 1920; in this connection it should be noted that the average index numbers of wholesale prices of building materials were also lower than in any other of the fourteen years of the record, except 1932.

#### Wage Contracts for Public Works in U.S.A.

The Emergency Administration for Public Works in the United States recently completed negotiations with the Labour Advisory Board (consisting of representatives of unions affiliated with the American Federation of Labor) in regard to a form of contract governing conditions of the labour to be employed in connection with public works. The contract provides for the following wage rates for all construction financed from funds appropriated by the Administrator of Public Works under the National Recovery Act.

For skilled labour—southern zone, \$1; central zone, \$1.10; northern zone, \$1.20.

For unskilled labour—southern zone, \$0.40; central zone, \$0.45; northern zone, \$0.50.

It is provided in the contract that there shall be created a Board of Labour Review to hear all issues arising out of the operation of contracts financed from funds appropriated by the Administrator of Public Works. This Board consists of three members, one to represent labour, one to represent contractors and a chairman to represent the Administrator of Public Works. The members of the Board are appointed by the President of the United States, but no member may be connected in any way with any organization of building workers or have any interest in contracting.

## EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

### Great Britain

THE British *Ministry of Labour Gazette*, November 1933, summarized the employment situation as follows:—

Employment at October 23, 1933, showed a further improvement as compared with a month before. The improvement was most marked in coal mining, engineering, vehicle building, shipbuilding and ship-repairing, the manufacture of metal goods, the textile trades, (except artificial silk yarn and jute manufacture), the clothing industries (except hat and cap manufacture), the boot and shoe, pottery and glass industries, woodworking and furniture making, and certain food manufacturing industries.

On the other hand, the seasonal decline continued in the hotel and boarding house, shipping, and road transport services, in the distributive trades, and to a slight extent in building and public works contracting. There was also some set-back in iron and steel (except pig iron), tinplate, and hat and cap manufacture.

In the south of England employment showed a slight decline, but was still fair to moderate on the whole. In the Midlands it continued to improve, and was moderate. There was a further improvement also in the Northern Counties of England, but employment in those areas was still bad. It continued bad also, though improving slightly, in Scotland and in Northern Ireland. In Wales it showed a decline and was very bad.

Among the workpeople, numbering approximately 12,883,000, insured against unemployment in Great Britain and Northern Ireland, and working in practically every industry except agriculture and private domestic service, the percentage unemployed at October 23, 1933 (including those temporarily stopped as well as those wholly unemployed) was 18.1, as compared with 18.4 at September 25, 1933, and with 21.9 at October 24, 1932. The percentage wholly unemployed at October 23, 1933, was 15.3, as compared with 15.3 at September 25, 1933; while the percentage temporarily stopped was 2.8 as compared with 3.1. For males alone, the percentage at October 23, 1933, was 21.4, and for females, 9.5; at September 25, 1933, the corresponding percentages were 21.6 and 10.0.

At October 23, 1933, the number of persons on the Registers of Employment Exchanges in Great Britain was 1,854,290 wholly unemployed, 357,669 temporarily stopped, and 86,794 normally in casual employment, making a total

of 2,298,753. This was 37,974 less than a month before, and 448,253 less than a year before. The total included 1,911,529 men, 52,220 boys, 297,686 women and 37,318 girls.

In Great Britain and Northern Ireland, the total number of persons on the Registers of Employment Exchanges at October 23, 1933, was 2,359,763.

### United States

Index numbers showing the trend of employment and pay rolls in manufacturing industries are computed monthly by the Bureau of Labor Statistics of the United States Department of Labor from reports supplied by representative establishments in 89 of the principal manufacturing industries of the United States and covering the pay period ending nearest the 15th of the month. These indexes of employment and pay rolls are figures showing the percentage represented by the number of employees or weekly pay rolls in any month compared with employment and pay rolls in a selected base period. The year 1926 is the Bureau's index base year for manufacturing industries, and the average of the 12 monthly indexes of employment and pay rolls in that year is represented by 100 per cent.

Employment in manufacturing industries increased one-tenth of 1 per cent between September and October, 1933, and pay rolls increased six-tenths of 1 per cent over the month interval. The October index of employment was 74.0 as compared with 73.9 in September and the index of pay rolls in October was 53.6, compared with 53.3 in the preceding month.

A comparison of employment in October, 1933 with October 1932 shows that employment in October of the current year is 23.5 per cent above the level of the October 1932 employment index (59.9). A similar comparison of the October 1933 pay-roll index with the October 1932 index (39.9) shows a gain of 34.3 per cent in pay rolls over the year interval.

The increases in employment and pay rolls between September and October 1933, while small, indicate a continuation of the gains in employment and pay rolls which occurred during the preceding 6-month interval. The fact that 56 industries, or nearly two-thirds of the 89 manufacturing industries surveyed, reported increased employment in October would give reason to expect a greater expansion over the month interval than was shown. These increases however were practically offset by the decreases reported in the remaining 33 industries. Among the decreases which largely affected the final result were losses of over 10

per cent in employment in automobiles and a similar decline in silk goods where labour difficulties prevailed throughout the period covered. Smaller declines were recorded in iron and steel, boots and shoes, woollen, steam fittings, hardware, plumbers' supplies, and men's clothing, and seasonal shrinkage in the brick, cement, beverage, and ice cream industries.

These changes in employment and pay rolls in October 1933 are based on reports supplied by 18,602 establishments in 89 of the principal manufacturing industries of the United States. These establishments reported 3,358,960 employees on their pay rolls during the pay period ending nearest October 15 whose combined weekly earnings were \$63,195,865. The employment reports received from these co-operating establishments cover approximately 50 per cent of the total wage earners in all manufacturing industries of the country.

The average percentage of change in employment between September and October over the preceding 10-year period has been a decrease of less than  $\frac{1}{10}$  of 1 per cent and pay rolls have shown an average gain of 2 per cent over this interval. The small percentage gain in employment in October of the present year therefore indicates a change slightly better than average, while the payroll increase of 0.6 per cent in October of the current year is appreciably less than the average increase shown in October over the preceding 10-year interval.

The most pronounced increases in employment between September and October were seasonal gains in the beet sugar and radio industries. The beet sugar industry, marking the beginning of its active season, reported a gain of 171.1 per cent in employment and the radio industry reported an increase of 21.6 per cent. The locomotive industry showed a gain of over 20 per cent in number of workers and the cottonseed oil-cake-meal and fertilizer industries reported seasonal gains of 15.6 per cent and 10.6 per cent, respectively. Fifteen industries reported gains ranging from 5 per cent to 9.8 per cent among which were the agricultural implement, confectionery, machine tools, jewelry, stove, shirt and collar, and cigar and cigarette industries. Other industries of major importance reporting increased employment over the month interval were petroleum refining, electrical machinery, shipbuilding, chemicals, foundries, sawmills, furniture, women's clothing, knit goods, and cotton goods.

*Non-manufacturing industries.*—Increased employment in October, 1933, compared with September, 1933, was shown in 11 of the 16

non-manufacturing industries surveyed monthly by the Bureau of Labor Statistics and increased payrolls were shown in 13 industries.

The crude petroleum producing industry reported the largest percentage gains in both items, 6.7 per cent in employment and 12.8 per cent in payrolls. The metalliferous mining industry reported an increase of 4.6 per cent in employment over the month interval and retail trade establishments reported a gain of 4.2 per cent. The power and light industry reported an increase of 2.4 per cent in number of workers between September and October, wholesale trade establishments reported a gain of 1.7 per cent, electric railroad and motor bus operation showed an increase of 1.4 per cent and the quarrying and non-metallic mining industry reported a gain of 1.1 per cent. The increases in employment in the remaining 4 industries in which increased employment was reported were as follows: telephone and telegraph, 0.5 per cent; banks-brokerage-insurance-real estate, 0.4 per cent; anthracite mining, 0.2 per cent; and building construction, 0.5 per cent. The change in employment in the building construction industry represents the change in employment based on reports supplied by 11,172 contractors engaged on public and private projects not aided by Public Works funds.

In the 5 industries in which decreased employment was reported over the month interval, the most pronounced decline was a seasonal decrease of 28.1 per cent in the canning and preserving industry, which reached its peak of employment in September and regularly shows a sharp decline in October. Employment in the bituminous coal mining industry was affected by strikes in various localities, the industry reporting a decline of 5.3 per cent. Increased earnings, however, in a large number of mines not affected by the labour disturbances resulted in a net decline of only one-tenth of 1 per cent in weekly payrolls over the month interval. The hotel industry reported a falling-off of 2.1 per cent in employment in October due entirely to the closing of seasonal resort hotels, which were open during the first half of September and were closed in October. The laundry industry reported 1.6 per cent fewer employees in October than in September, and the dyeing and cleaning industry reported a decrease of 0.3 per cent.

The American Federation of Labor's estimate for October shows 10,076,000 out of work in that month as compared with 10,065,000 in September.

## FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding the contracts executed by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government with respect to contracts "for construction, remodelling, repair or demolition of any work" is set forth in an Act of Parliament adopted on May 30, 1930, entitled "The Fair Wages and Eight-Hour Day Act" (chapter 20-21, Geo. V). The full text of this measure appeared in the *LABOUR GAZETTE*, April, 1930, page 383. The Fair Wages and Eight-Hour Day Act provides as follows:—

3.(1) Every contract made hereafter with the Government of Canada for construction, remodelling, repairs or demolition of any work shall be subject to the following conditions respecting wages and hours:—

(a) All persons in the employ of the contractor, sub-contractor, or of any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall be paid such wages as are generally accepted as current from time to time for competent workmen in the district in which the work is being performed for the character or class of work in which they are respectively engaged; provided that wages shall in all cases be such as are fair and reasonable;

(b) The working hours of persons while so employed shall not exceed eight hours per day except in such special cases as the Governor in Council may otherwise provide, or, except in cases of emergency, as may be approved by the Minister.

(2) The provisions of this section shall not apply to persons employed in the fabrication or manufacture of materials, supplies or equipment for use in the work contemplated where such fabrication or manufacture is carried on in any established plant or factory other than a plant or factory established for the purposes of the work contemplated.

The Fair Wages Policy was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by Order in Council of April 9, 1924. The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the wages rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

In addition to the requirements of the Fair Wages and Eight-Hour Day Act, government

contracts for the construction, remodelling, repair or demolition of any work, contain a number of other provisions for the protection of the workmen employed, which are sanctioned by the foregoing Orders in Council.

It is further provided in the foregoing Orders in Council that "all contracts for the manufacture and supply to the Government of Canada of fittings for public buildings; harness, saddlery, clothing and other outfit for the military and naval forces, Royal Canadian Mounted Police, letter carriers, and other Government officers and employees; mail bags, letter boxes, and other postal stores; and any other articles and things hereinafter designated by the Governor in Council" must contain provisions for the observance of the current wages rates and working hours in the district, or, in the absence of any such current standards, fair and reasonable rates and working hours. These conditions, which are referred to in the Orders in Council as "B" conditions (the Conditions of the Fair Wages Orders in Council with reference to building and construction works being designated as "A" conditions), include the following Fair Wages Clause:—

All workmen, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed, and if there be no current rate in such district, then a fair and reasonable rate, and shall work such hours as those fixed by the custom of the trade as respects hours in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district then fair and reasonable hours, except for the protection of life and property, or on due cause shown to the satisfaction of the Minister of Labour. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade or fair and reasonable hours it shall be determined by the Minister of Labour, whose decision shall be final; payment may also be withheld of any moneys which would otherwise be payable to the contractor until the Minister of Labour's decision has been complied with.

By the term "current wages" and the term "hours of labour fixed by the custom of the trade" in the foregoing are meant respectively the standard rates of wages and hours of labour either recognized by signed agreements between employers and workmen in the district from which the labour required is necessarily drawn or actually prevailing, although not necessarily recognized by signed agreements.

Both in the case of contracts for building and construction work, and in the "B" conditions sanctioned by Orders in Council ap-

plicable to contracts for the manufacture of certain classes of supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates and working hours.

The contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid to and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workman employed claim therefore may be filed with the Minister of the Department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of the contract shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contract are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of certain classes of supplies listed in the Fair Wages Orders in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any disputes which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts, containing fair wages conditions, have been recently executed by the Government of Canada:—

#### DEPARTMENT OF NATIONAL DEFENCE

##### *Contracts in Group "B" (Manufacture and Supply of Clothing, Interior Fittings, etc.)*

The following is a statement of contracts awarded by the Department of National Defence during the month of November, 1933, for various classes of manufactured goods, which contracts included in all cases the "B" labour conditions above referred to:—

| Nature of Contract              | Contractors   |
|---------------------------------|---|
| Serge jackets.....              | Grant-Holden - Graham Ltd., Ottawa, Ont.              |
| Cases, paillasse, camp.....     | Royal Mattress Co., Quebec, P.Q.                      |
| Boots, ankle.....               | A. E. Wry-Standard, Ltd., Amherst, N.S.               |
| Winter caps.....                | Progress Brand Cap Co., Montreal, P.Q.                |
| Cartridges, 22".....            | Canadian Industries Ltd., Montreal, P.Q.              |
| Leather mitts.....              | Huron Mfg. Co., Quebec, P.Q.                          |
| Pillows.....                    | Dominion Textile Co., Montreal, P.Q.                  |
| Steel bunks.....                | Western Steel Products Ltd., Winnipeg, Man.           |
| Springs for steel bunks.....    | Simmons Ltd., Winnipeg, Man.                          |
| Cases, paillasse.....           | Royal Mattress Co., Quebec, P.Q.                      |
| Braces.....                     | National Suspender Co., Toronto, Ont.                 |
| Mattresses and pillows.....     | Canadian Feather and Mattress Co., Ltd., Ottawa, Ont. |
| Fire extinguishers.....         | Lafrance Fire Engine & Pumps Ltd., Montreal, P.Q.     |
| Enamel ware, etc.....           | General Steel Wares Ltd., Montreal, P.Q.              |
| Rubber boots.....               | Northern Rubber Co., Guelph, Ont.                     |
| Leather mitts.....              | Huron Mfg. Co., Quebec, P.Q.                          |
| Nightshirts.....                | Canadian Converter's Co. Ltd., Montreal, P.Q.         |
| Socks, woollen.....             | Brampton Knitting Mills, Brampton, Ont.               |
| Shaving brushes.....            | Rubberset Co., Ltd., Gravenhurst, Ont.                |
| Steel bunks and mattresses..... | Parkhill Bedding Co., Ltd., Winnipeg, Man.            |
| Sweater jackets.....            | Regent Knitting Mills Ltd., Montreal, P.Q.            |
| Blue serge.....                 | Rosamond Woollen Co., Ltd., Almonte, Ont.             |
| Tap soles.....                  | Anglo-Canadian Leather Co., Toronto, Ont.             |
| Felt in-soles.....              | Code Felt & Knitting Co., Perth, Ont.                 |

These contracts involved a total expenditure of \$66,200.

## DEPARTMENT OF PUBLIC WORKS

*Contracts in Group "A" (Construction, etc.)*

Grading and roadways at the Customs-Immigration Building, Trout River, P.Q. Name of contractor, Mr. B. Bergamin, Montreal, P.Q. Date of contract, October 31, 1933. Amount of contract, \$2,495. A fair wages schedule was inserted in the contract as follows:—

| Trade or Class of Labour     | Rates of Wages      | Hours of Labour |
|------------------------------|---------------------|-----------------|
|                              | Not less than       | Not more than   |
|                              | per hour<br>\$ cts. | per day         |
| Concrete mixer operator..... | 0 40                | 8               |
| Cement finishers.....        | 0 50                | 8               |
| Road roller operator.....    | 0 45                | 8               |
| Labourers.....               | 0 30                | 8               |
| Driver, horse and cart.....  | 0 45                | 8               |
| Driver, team and wagon.....  | 0 55                | 8               |
| Motor truck driver.....      | 0 35                | 8               |

Recovering the roof of the Drill Hall, Quebec, P.Q., Name of contractors, Eugene Falardau, Ltd., Quebec, P.Q. Date of contract, November 15, 1933. Amount of contract, \$9,095 and any new roof boarding required to be paid at rate of 5½c. per foot B.M. A fair wages schedule was inserted in the contract as follows:—

| Trade or Class of Labour    | Rates of Wages      | Hours of Labour |
|-----------------------------|---------------------|-----------------|
|                             | Not less than       | Not more than   |
|                             | per hour<br>\$ cts. | per day         |
| Carpenters.....             | 0 55                | 8               |
| Sheet metal workers.....    | 0 55                | 8               |
| Roofers.....                | 0 55                | 8               |
| Labourers.....              | 0 35                | 8               |
| Driver, horse and cart..... | 0 55                | 8               |
| Driver, team and wagon..... | 0 70                | 8               |
| Motor truck driver.....     | 0 40                | 8               |

N.B.—In any cases where, by agreement or current practice, the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

Repairs to wharf at Stewart, Skeena District, B.C. Name of contractors, Albert & McCaffery Ltd., Prince Rupert, B.C. Date of contract, September 15, 1933. Amount of contract, approximately \$7,490.40. A fair wages schedule was inserted in the contract as follows:—

| Trade or Class of Labour  | Rates of Wages      | Hours of Labour |
|---|---------------------|-----------------|
|   | Not less than       | Not more than   |
|   | per hour<br>\$ cts. | per day         |
| Pile driver foreman.....  | 1 12½               | 8               |
| Pile driver engineer.....   | 1 00                | 8               |
| Pile driver man.....  | 0 90                | 8               |
| Pile driver boom man.....   | 0 90                | 8               |
| Bridgeman.....  | 0 90                | 8               |
| Timberman or cribman (using such tools as broad-axe, adze, saw, hammer, auger)..... | 0 90                | 8               |
| Fireman.....  | 0 65                | 8               |
| Labourers.....  | 0 45                | 8               |

Construction of alterations and additions to the old Post Office Building, Saskatoon, Sask., for R.C.M.P. accommodation. Name of contractors, C. M. Miners Construction Co., Ltd., Saskatoon, Sask. Date of contract, November 6, 1933. Amount of contract, \$3,425. A fair wages schedule was inserted in the contract as follows:—

| Trade or Class of Labour                           | Rates of Wages      | Hours of Labour |
|--|---------------------|-----------------|
|  | Not less than       | Not more than   |
|  | per hour<br>\$ cts. | per day         |
| Bricklayers and masons and hollow tile layers..... | 1 00                | 8               |
| Concrete workers.....                              | 0 40                | 8               |
| Cement Finishers.....                              | 0 75                | 8               |
| Carpenters and joiners.....                        | 0 75                | 8               |
| Sheet metal workers.....                           | 0 75                | 8               |
| Lathers, metal.....                                | per yard<br>0 06    | 8               |
| Plasterers.....                                    | per hour<br>1 00    | 8               |
| Plasterers' helpers.....                           | 0 60                | 8               |
| Painters and glaziers.....                         | 0 70                | 8               |
| Plumbers.....                                      | 1 05                | 8               |
| Steamfitters.....                                  | 1 05                | 8               |
| Electricians.....                                  | 0 75                | 8               |
| Labourers.....                                     | 0 40                | 8               |
| Teamster, team and wagon.....                      | 0 70                | 8               |
| Motor truck driver.....                            | 0 40                | 8               |

N.B.—In any cases, where, by agreement or current practice, the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

## POST OFFICE DEPARTMENT

Following is a statement of payments made in November, 1933, for supplies ordered by the Post Office Department under contracts which were subject to regulations for the suppression of the sweating system, the securing of payment to the works of fair wages, and the performance of the work under proper sanitary conditions:—

| Nature of Work   | Amount   |
|--|----------|
|  | \$ cts.  |
| <i>Making metal dating stamps and type, brass crown seals, cancellers, etc.—</i> |          |
| Pritchard-Andrews Co. of Ottawa, Ltd.....  | 830 89   |
| <i>Making and supplying letter-carriers' uniforms—</i>                           |          |
| Wm. Scully Ltd., Montreal, P.Q.....  | 228 96   |
| Grant-Holden-Graham Ltd., Ottawa, Ont.....                                       | 112 00   |
| Jay Wolfe Incorporated, Montreal, P.Q.....                                       | 312 00   |
| Miner Rubber Co., Ltd., Granby, P.Q.....   | 1,323 54 |
| St. George Woolen Mills Ltd., St. George Beauce, P.Q.....                        | 8,254 68 |
| Tower Canadian Ltd., Toronto, Ont.....   | 154 30   |
| Hamilton Uniform Cap Co., Hamilton, Ont.....                                     | 402 05   |
| <i>Making and repairing rubber stamps, daters, etc.—</i>                         |          |

## RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

**A** SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the Department. Such agreements are summarized each month in the *LABOUR GAZETTE*. In the majority of cases the agreements are signed by both the employers and employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In addition to these, important schedules of wages are summarized, including civic schedules. In each agreement or schedule the rates of wages for the principal classes of labour are given, with other information of general interest.

### Logging

**KAPUSKASING, ONTARIO.**—THE SPRUCE FALLS POWER AND PAPER COMPANY LIMITED AND THE COMMITTEE OF LOGGING CAMP EMPLOYEES.

Agreement made following the strike reported on page 1164 of this issue, to be in effect from November 7, 1933, until the end of the 1933-34 season.

Provision is made for holding meetings in camp and the election of camp committees from men working in the bush. No discrimination against strikers or union members by employers or against non-union workers by the committee. The Company reserves the right not to officially recognize any union.

Hours: 10 per day as a general rule, and any man asked to work an abnormal number of hours may refer his case to the camp committee. A month to consist of 26 working days, and any work over 26 days to be paid *pro rata*.

Wages: Monthly rate: minimum of \$35 per month with board. Piece rates: \$1.85 per cord, four foot, and \$3.50 per cord, eight foot, for men remaining to the end of the 1933-1934 season; \$1.75 and \$3.30 respectively for men leaving voluntarily before the close of the season; 5 cents per piece for 16 foot pulpwood; charge for board for men on piece rates 75 cents per day.

**HEARST DISTRICT, ONTARIO.**—NEWAYGO TIMBER COMPANY LIMITED AND THE COMMITTEE OF LOGGING CAMP EMPLOYEES.

Agreement made following the strike reported on page 1164 of this issue, to be in effect from November 25, 1933 until the end of the 1933-1934 season.

Provision is made for recognition of camp committee and for meetings in camp outside of working hours. No discrimination against strikers, subject to good behaviour and good workmanship.

Hours: 10 per day, 26 days per month.

Wages: monthly rate: \$30 to \$35 per month with board. Piece rates: \$3.50 per double cord; maximum charge for board for men on piece rates 85 cents per day;

### Manufacturing: Pulp, Paper and Paper Products

**FORT FRANCES AND KENORA, ONTARIO.**—RECEIVERS FOR THE MINNESOTA AND ONTARIO PAPER COMPANY, THE FORT FRANCES PULP AND PAPER COMPANY, LIMITED, AND THE KENORA PAPER MILLS, LIMITED, AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS (LOCAL 159 FORT FRANCES AND LOCAL 238 KENORA).

Agreement to be in effect from May 1, 1933, to May 1, 1934, and thereafter from year to year, subject to notice.

In employing new men, preference to be given to union members, but if others employed, they must join the union, and all employees must maintain union membership. Any question of jurisdiction between the unions to be settled by the American Federation of Labor.

Hours: 8 per day, a 48 hour week.

Overtime: time and one-half for all overtime and for work between 8 a.m. Sunday and 8 a.m. Monday, and on the three holidays.

Wage rates are reduced 9 per cent from the 1932 rates. Wage rates for papermakers vary according to the size and speed of the machines. Wages per hour on paper machines at Fort Frances: machine tenders 84 and 90½ cents, back tenders 69½ and 76½ cents, third hand 58 and 60 cents, fourth hand 44½ and 46½ cents, fifth hand 41½ and 43 cents, spare back tender 76½ cents, spare hand 69½ cents, rewinder man 60 cents, head oiler 60 cents, oiler 45½ cents, swipers 35 cents. Wages per hour on cylinder machine at Fort Frances: machine tenders 76½ cents, back tenders 58 cents, third hands 43 cents, fourth hands 39½ cents, chain puller 35½ cents, oiler 45½ cents, beaterman 35 cents, screenerman 35½ cents, broke beaterman 35 cents, scalers 35½ cents, finishers 38 cents, head beaterman 60 cents, liner man 39½ cents, size-man 35 cents, cleanup 35 cents, head cutterman 43 and 45½ cents, cutterman 38 cents, pulp weighers 35 cents. Wages per hour on paper machines at Kenora: machine tender, \$1.16 and \$1.17½, back tender \$1.01½ and \$1.04, third hand 76½ and 78½ cents, fourth hand 50½ cents, fifth hand 43 cents, sixth hand 35 cents, head clothing man 84½ cents, rewinder man 50½ cents, head oiler 53½ cents, oilers 45½ cents, beater engineer 66½ cents.

No strikes or lockouts to occur. Provision is made for all disputes to be taken up by officials of the Company and the union, and if they cannot agree, the matter to be referred to arbitration.

### Construction: Buildings and Structures

**OTTAWA, ONTARIO.**—THE OTTAWA BRANCH OF THE ASSOCIATION OF CANADIAN BUILDING AND CONSTRUCTION INDUSTRIES AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, LOCAL No. 93.

Agreement to be in effect from May 1, 1933, to April 30, 1934, and thereafter from year to year, subject to notice.

This agreement is similar to the one previously in effect and summarized in the *LABOUR GAZETTE*, January, 1932, page 90, with the following exceptions:

Hours are changed from 44 to 40 per week, with a 5-day week.

Overtime pay, that is time and one-half, to be paid for all work on Saturday.

Wages for journeymen carpenters: 70 cents (a reduction of 10 cents per hour from the 1932 rate).

WINNIPEG, MANITOBA.—GENERAL CONTRACTORS' SECTION OF THE WINNIPEG BUILDERS' EXCHANGE AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, LOCAL No. 343.

Agreement to be in effect from July 5, 1933, to December 31, 1933. The parties are to meet during December to formulate a new agreement.

Foreman to be a union member. The agent of the union, with the permission of the superintendent of the work, may visit jobs for the purpose of furthering the interests of the union.

Hours: 8 per day, 4 on Saturdays, a 44-hour week. For shift work, not more than 8 hours in the 24 hours.

Overtime: time and one-half up to 12 hours work per day; on overtime over 12 hours and

for work on Sundays and holidays, double time.

Wages for journeymen: 75 cents per hour. Foreman to be paid at least 10 cents per hour extra, except if less than three journeymen are employed or if the employer or his agent is acting as foreman.

Every employer with two or more men working may have an apprentice and one additional apprentice for every seven men working. An apprenticeship system to be worked out by the joint committee and adopted as soon as possible.

Any disputes to be referred to the joint arbitration committee whose decision is final. If this committee cannot agree, the dispute will be referred to the general president of the union or his appointee and a representative of this section of the Builders' Exchange, who together may appoint a third party whose decision will be final, or such third party may be appointed under the terms of the Act of Arbitration for Manitoba. No stoppage of work to occur pending such settlement.

## AGREEMENTS AS TO WAGES ON STEAM RAILWAYS IN CANADA

FOLLOWING proceedings under the Industrial Disputes Investigation Act (LABOUR GAZETTE, November, 1933, pages 1065-1066), a dispute between the principal railways and their engine, train and telegraph service employees was settled by an agreement dated October 28, 1933. The Board of Conciliation and Investigation had recommended (one member dissenting) that the ten per cent deduction from each employee's pay, calculated on basic rates, in effect since December 1, 1931, should be increased to twenty per cent on May 1, 1933 (LABOUR GAZETTE, May, 1933, pages 478-494). The employees had not agreed to this recommendation, but the railways had made it effective pending further negotiations. The agreement finally reached provided that the deduction of twenty per cent should continue in effect until October 31, 1933; that from November 1, 1933, to October 31, 1934, the deduction should be fifteen per cent, and that after November 1, 1934, it should be ten per cent, "provided that either party may, after September 1, 1934, serve thirty days' notice, as required by wage agreements now in effect, of a desire to change such percentage to become effective November 1, 1934."

In the meantime the railway companies had notified the other classes of railway employees of a desire to change the ten per cent deduction to one of twenty per cent.

A Board of Conciliation and Investigation was established on August 28 to deal with disputes between the Canadian Pacific Railway Company and its clerks, freight handlers, station employees, etc., and its report dated November 8, 1933, appeared in the LABOUR GAZETTE, November, 1933, pages 1066-1070.

The Board recommended that the ten per cent deduction in effect since March 1, 1932, should be increased to fifteen per cent for a period of one year, beginning in November, but with modifications in the application of the additional five per cent to certain employees on short time or who had exercised their seniority to revert to lower rated positions owing to staff reductions. As stated elsewhere in this issue, the railway company accepted this recommendation and the employees' committee recommended its acceptance by the employees.

A Board was also established to deal with a similar dispute between the Canadian National Railways and its clerks, freight handlers, station employees, etc., and its report is given elsewhere in this issue. The report, one member dissenting, recommended that the ten per cent deduction from each employee's pay as calculated on basic rates, effective since May 1, 1932, should be increased to fifteen per cent during a period of one year, December 1, 1933, to November 30, 1934, the additional deduction not to apply to the compensation of employees receiving below \$85 per month. The dissenting member recommended that the fifteen per cent deduction should be applied without exceptions.

Agreements for a fifteen per cent deduction instead of ten per cent, and a return to the ten per cent deduction after one year subject to notice of desire to change by either party, have been reached between the following: the Railway Association of Canada, representing the principal railways, and the Brotherhood of Maintenance of Way Employees, effective December 1, 1933, to November 30,

1934; the Railway Association and Division No. 4, Railway Employees' Department, American Federation of Labor (Federated Shop Crafts), effective from December 16, 1933, men working less than forty hours per week to have a deduction of only ten per cent; the Canadian Pacific Railway and its

Signal Maintainers, Helpers and Mechanics, effective from January 1, 1934, to December 31, 1934, the deduction from November 1, 1933, to December 31, 1933, to be \$30 per month for signal maintainers and \$20 per month for helpers, on full time with *pro rata* deduction for those working less.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, NOVEMBER, 1933

### Cost of Living, Prices of Staple Articles and Index Numbers

THE cost per week of the family budget of staple goods, fuel and lighting and rent in terms of retail prices was somewhat lower, a slight increase in the cost of foods and fuel being more than offset by a fall in rent. The Dominion Bureau of Statistics index number of wholesale prices advanced, due mainly to increases in the prices of farm products, chiefly grains and live stock.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in sixty-nine cities was \$7.27 at the beginning of November as compared with \$7.24 for October; \$7.09 for November, 1932; \$11.75 for November, 1929; \$11.01 for November, 1926; \$11.08 for November, 1921; \$16.92 for June, 1920 (the post war peak); and \$7.96 for November, 1914. The slight advance was due to a seasonal increase in the price of eggs and milk. The prices of beef, mutton, pork, flour, evaporated apples and potatoes were lower. Including the cost of fuel and rent with that of foods the total budget averaged \$15.72 at the beginning of November as compared with \$15.78 for October; \$16.10 for November, 1932; \$22.03 for November, 1929; \$21.24 for November, 1926; \$21.60 for November, 1921; \$26.92 for July, 1920 (the post war peak); and \$14.36 for November, 1914. Fuel was slightly higher because of an advance in the price of coal, while rent averaged lower.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics was higher, this being the first advance since July. The index for November was 68.7 as compared with 67.9 in October; 63.6 in February, which was the low point; 64.7 for November, 1932; 95.7 for November, 1929; 97.7 for November, 1926; 98.3 for November, 1921; 164.3 for May, 1920 (the post war peak); and 67.2 for November, 1914. One hundred and six prices quotations were higher, eighty-five were lower, and three hundred and eleven were unchanged.

In the grouping according to chief component materials five of the eight main groups

were higher and three were lower. The groups which advanced were: the Vegetables and Vegetable Products group, because of higher prices for grains, flour and tea, which more than offset lower prices for rye, gluten meal, sugar and coffee; the Animals and their Products group, because of higher prices for live stock, butter and eggs, which more than offset lower prices for leather and fresh and cured meats; the Wood, Wood Products and Paper group, due mainly to higher prices for lumber; the Iron and its Products group, chiefly because of advanced quotations for galvanized sheets and scrap; and the Non-Ferrous Metals and their Products group, due to increased quotations for lead, tin and solder. The Fibres, Textiles and Textile Products group and the Non-Metallic Minerals group were lower, the former because of reduced prices for raw silk, cotton fabrics and raw jute which more than offset higher quotations for raw cotton, raw wool and worsted cloth yarns, and the latter due mainly to lower prices for coal and sulphur. The Chemicals and Allied Products group was also slightly lower.

In the grouping according to purpose consumers' goods advanced, mainly because of higher prices for tea, fish, flour, and milk and its products. Producers' goods were also somewhat higher, owing mainly to higher prices for materials for the metal working industries, for the meat packing industries and for the milling and other industries. Materials for the textile and clothing industries, for the furs and leather goods industries and for the chemical using industries were lower.

In the grouping according to origin both raw and partly manufactured goods and fully and chiefly manufactured goods were higher. Canadian farm products advanced substantially owing chiefly to higher prices for grains and live stock, milk and eggs.

### EXPLANATORY NOTE AS TO RETAIL PRICES

The table of retail prices and rentals shows the prices at the beginning of November of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed

houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amounts due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which statistics were available when first published in the LABOUR GAZETTE in January, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included, owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tends to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

### Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expendi-

\*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18½%; Clothing, 18½%; Sundries, 20%.

ture for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and costs of the various items from 1913 to 1926, weighted according to the importance of each item in workingmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

(Continued on page 1222)

# COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL, AND LIGHTING, AND RENT IN TERMS OF THE AVERAGE PRICES IN SIXTY-NINE CITIES IN CANADA

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost for an average family

\*Prior to 1926 number of commodities was 236.

(Continued from page 1214)

## Retail Prices

The decline in beef prices which commenced in August was continued, sirloin steak being down in the average from 20.7 cents per pound in October to 19.7 cents in November, round steak from 16.7 cents per pound to 15.8 cents and shoulder roast from 11 cents per pound to 10.5 cents. Mutton declined from an average price of 17.9 cents per pound to 17.2 cents, decreases being somewhat more pronounced in the western provinces. Fresh pork was down from an average of 17.2 cents per pound in October to 15.8 cents in November.

Eggs were generally substantially higher, fresh being up from 29.2 cents per dozen in October to 37.7 cents in November and cooking from 22.7 cents per dozen to 27.7 cents. Milk was seasonally higher in several localities, the average price being 9.7 cents per quart in November as compared with 9.5 cents in October. Butter prices were little changed from the levels prevailing in the summer, creamery averaging 24.3 cents per pound as

compared with the low point of 23.8 cents in July. Flour was lower in most localities, the average price being 3.1 cents per pound in November as compared with 3.3 cents in October. Onions averaged 3.3 cents per pound as compared with 3.5 cents the previous month and 6.3 cents in July. Potatoes were again generally lower the price averaging \$1.10 per ninety pounds in November as compared with \$1.23 in October. The price in November last year was 81 cents per ninety pounds. Evaporated apples declined from an average of 15.1 cents per pound in October to 14.8 cents in November. Anthracite coal was up from an average price of \$14.99 per ton in October to \$15.07 in November. Increases were reported from Saint John, Sherbrooke, Guelph, Kitchener, Sudbury and Timmins. Bituminous coal was also slightly higher averaging \$9.29 per ton in November as compared with \$9.22 in October. Rent averaged considerably lower due to decreases in several localities.

The following are the prices reported for Welsh coal, domestic sizes: Halifax, \$16;

Charlottetown, \$14.40; Moncton, \$16; Saint John, \$14; Quebec, \$13.50; Three Rivers, \$15; Sherbrooke, \$16.25; St. Hyacinthe, \$14.75; Montreal, \$14.50-\$14.75; Ottawa, \$16.25; Kingston, \$15.50; Belleville, \$15; Peterborough, \$16.25; Oshawa, \$14.50; Toronto, \$14.75; St. Catharines, \$15.50; Hamilton, \$14.75; Galt, \$15.50-\$16; Sudbury, \$17; Cobalt, \$17.75; Port Arthur, \$16; Port William, \$16; Winnipeg, \$19.50.

### Wholesale Prices

The following is a summary of a statement on wholesale price changes during the month issued by the Dominion Bureau of Statistics.

Grain prices generally averaged higher during November than in October. No. 1 Manitoba northern cash wheat, Fort William and Port Arthur basis, was up in the average from 60.5 cents per bushel to 63.7 cents. The high price for the month was 66½ cents per bushel reached on the 9th and the low 60½ cents per bushel on the 30th. Factors in the advance in the early part of the month were said to be unfavourable crop news from the southern hemisphere and lower Russian exports. In coarse grains western barley advanced from 32.8 cents per bushel to 34.4 cents, flax from \$1.31 per bushel to \$1.39, western oats from 29.4 cents per bushel to 30 cents. Flour at Montreal rose from \$4.80 per barrel to \$5.20, while rolled oats at Toronto were up from \$2.45 per ninety pounds to \$2.75. Raw sugar at New York was down from \$1.32 per cwt. to \$1.17, while granulated at Montreal declined from \$6.47 per cwt. to \$6.37. The unsettled political conditions in Cuba and the effect of beet sugar in eastern United States markets were said to be factors in the

decline in the price of raw sugar. Raw rubber at New York advanced from 8.6 cents per pound to 9.4 cents. In livestock, prices generally were higher, good steers at Toronto advancing from \$4.30 per hundred pounds to \$4.47 and at Winnipeg from \$2.74 per hundred pounds to \$3.37. Veal calves at Winnipeg were up from \$4.61 per hundred pounds to \$5.47, while the price at Toronto was unchanged. Bacon hogs at Montreal rose from \$6.03 per hundred pounds to \$6.37 and at Toronto from \$5.80 per hundred pounds to \$6.25. Lambs at Montreal advanced from \$5.81 per hundred pounds to \$6.02 and at Toronto from \$6.09 per hundred pounds to \$6.31. This same grade at Winnipeg was 28 cents per 100 pounds higher at \$5.21. Production of eggs was said to be at a very low level, and the price advanced substantially, fresh at Montreal being up from 39 cents per dozen to 49.4 cents and at Toronto from 37.9 cents per dozen to 46.4 cents. Creamery butter at Montreal advanced from 21.1 cents per pound to 22.8 cents and at Toronto from 21.9 cents per pound to 23 cents. Stocks in cold storage at the beginning of November were said to be about 7 per cent less than at the beginning of October. Raw cotton at New York was slightly higher at 9.9 cents per pound, while raw silk was down from \$1.80 per pound to \$1.63. In lumber prices a grade of common white pine advanced from \$39 per thousand board feet to \$41 and spruce scantling from \$14 per thousand board feet to \$15. Scrap steel was \$1 per ton higher at \$6. In non-ferrous metals electrolytic copper declined from \$9.13 per hundred pounds to \$8.96, while tin advanced from 53 cents per pound to 56.5 cents.

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to significant changes and conditions affecting prices in Great Britain and certain other countries. The index numbers of the cost of living are from official sources unless otherwise stated. The authorities for the wholesale prices index numbers are named in all cases. The latest quarterly table giving the official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and several of the principal commercial and industrial countries appeared in the October issue of the LABOUR GAZETTE.

### Great Britain

WHOLESALE PRICES.—The Board of Trade index number, on the base 1924=100, was 61.8 for October, a decrease of 0.5 per cent

11337—6½

for the month. Foods as a whole were 1.1 per cent lower, due to a fall of over 5 per cent in cereals, although the other two food groups were higher. Industrial materials, as a whole, were unchanged, increases in iron and steel, coal and cotton being offset by declines in "other metals and minerals," wool, "other textiles" and miscellaneous commodities.

The *Statist* index number, on the base 1867-1877=100, was 80.5 for October, a decrease of 0.2 per cent from the previous month's level. Foodstuffs were 0.8 per cent lower, due principally to a decline in vegetable foods, chiefly wheat, barley and flour. Industrial materials were 0.1 per cent higher due to a small advance in the minerals and sundries group, partly counteracted by a decline in textiles.

**COST OF LIVING.**—The *Ministry of Labour Gazette* index number, on the base July, 1914=100, was 143 at November 1, an advance of 1.4 per cent for the month, due entirely to increases in the food group, chiefly in the prices of eggs and milk, although bread, flour and bacon were somewhat cheaper. The non-food groups were all unchanged as compared with the October level.

#### France

**WHOLESALE PRICES.**—The index number of the General Statistical Office, on the base 1914=100 (gold index) was 78 for October, showing no change on the whole from the September level. There were very slight declines in all groups except minerals and metals, which showed a small advance.

**COST OF LIVING.**—The official index number, on the base 1914=100 (gold index), was 105 for August, showing no change from the previous quarter.

#### Germany

**WHOLESALE PRICES.**—The index number of the Federal Statistical Office, on the base 1913=100, was 95.7 for October, an advance of 0.8 per cent for the month. All four sub-groups of agricultural products showed increases, the total for the group being 3.1 per cent higher than for September. Colonial products and industrial raw materials and semi-manufactured goods were lower, while manufactured goods were slightly higher than the September level.

**COST OF LIVING.**—The official index number, on the base 1913-1914=100, was 119.0 for October, an increase of 0.7 per cent for the month, due to increases in food, heat and light and clothing.

#### New Zealand

**WHOLESALE PRICES.**—The index number of the Census and Statistics Office, on the base 1909-1913=1000, was 1325 for August, a slight decline from the previous month's level. In-

creases in textile manufactures, metals and their products and chemicals and manures were more than offset by declines in foodstuffs, etc., of vegetable origin, animal products and non-metallic minerals and their products.

**COST OF LIVING.**—The official index number, on the base 1926-1930=1000, was 796 for August, showing no change from the previous quarter. Increases in food and clothing were offset by declines in rent, fuel and light and miscellaneous commodities.

#### United States

**WHOLESALE PRICES.**—The Bureau of Labour Statistics index number, on the base 1926=100, was 71.2 for October, an increase of 0.6 per cent over the September level. Advances in textile products, fuel and lighting materials, metals and metal products, building materials, housefurnishing goods and miscellaneous commodities were partly offset by declines in farm products, foods and hides and leather products.

*Bradstreet's* index number, which is the sums total of the prices per pound of 96 articles of common consumption was \$8.8480 at November 1, a fall of 2.2 per cent from the previous month, but the index number is still 27 per cent over the level of November 1, 1932, and 39.3 per cent higher than at March 1, 1933.

*Dun's* index number, which is based on the estimated cost *per capita* of a year's supply of commodities, was \$160.433 at November 1, a decline of 1.35 per cent for the month. As compared with the level of October 1, breadstuffs, meat, dairy and garden produce, other food and clothing were lower, while metals and miscellaneous commodities showed increases.

**COST OF LIVING.**—The index number of the Department of Labour and Industries, Massachusetts, on the base 1913=100, was 128.8 for October, and increase of 1.1 per cent over the September level. Increases were recorded in all of the five groups.

A third edition of the pamphlet: "Occupation Hazards and Diagnostic Signs: A Guide to Impairments to be looked for in Hazardous Occupations," has been published by the United States Department of Labour (Bureau of Labour Statistics Bulletin No. 582). Earlier editions of this work, which were prepared by Dr. L. A. Dublin and R. J. Vane of the Metropolitan Life Insurance Company, proved to be of great service to industrial physicians, compensation boards, factory inspectors, general medical practitioners and others. The new edition incorporates the

results of the most recent researches in the field of industrial hygiene. The writers express the hope that the medical profession will become more and more acquainted with occupational diseases and help in the movement to discover and eliminate cases thereof. They point out that very large numbers of working people are constantly exposed to serious occupational hazards and suffer, often unnecessarily, very seriously from the effects of such exposure. The greater interest of medical practitioners will help materially in the campaign of prevention.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

### Liability of Employer for Accident caused by Inexcusable Fault

The Supreme Court of Canada, in a recent decision reversed the judgment of the Court of King's Bench at Quebec in an action for compensation for a fatal accident which occurred under the circumstances described below. The lower courts had dismissed the action brought on behalf of the children of a workman, Joseph Geoffroy, who received fatal injuries in the course of his employment in the paper mill of the Anglo-Canadian Pulp and Paper Company in the City of Quebec.

Mr. Justice Crocket (with whom Chief Justice Duff, and Justices Rinfret and Smith concurred, Mr. Justice Cannon giving a separate judgment, but agreeing in the conclusion) gave the following judgment:—

"The accident occurred on the night of December 13, 1927. There is no dispute as to the material facts. The deceased was employed as helper to one Levesque, a millwright, in repairing some part of the interior machinery of one of three electrically operated revolving separators which were usually kept in operation together on the floor of the mill next above the blow pit floor. These separators, which were round wooden vats, were placed over what are called in the case, basins, the walls of the basins being 3 feet to 4 feet wide, and stood about 3 feet above the level of the basin floors. There was an opening of about 18 inches diameter in the bottom of each separator. Levesque and another millwright, Trepanier, were instructed by one of the defendant's foremen, to make the repairs in question. The electric switch, by which it was set in motion and which was placed on a wall some 10 feet or more from the separator beside the switches by which the two other separators were started and stopped, was shut to enable the repairs to be made. While the repair work was in progress the power suddenly went off, putting out the regular lights as well as stopping all the machinery in that portion of the mill. The two millwrights resorted to an electric extension hand lamp to avoid delay in the repair work. Geoffroy was standing on the floor of the cement basin with the upper part of his body inside the separator endeavouring to continue the work with the improvised light, while his boss, Levesque, was standing outside the separator within the basin wall, when, the electric current having been restored, the switch controlling the shaft by which the separator in question was operated, was opened, the separator began to turn, and Geoffroy was so injured that, although he

was able to get himself through the opening in the bottom of the separator, he died soon afterwards.

When the power went off the mill superintendent sent an employee named Stapleton up to the separator room from the floor below to see to the return of the power and the light. The separator switches had nothing to do with the light. Stapleton after the return of the current proceeded to turn on the separator switches, first one and then the other, the last one being the switch connecting with the separator in which Geoffroy was working. He did so of course without knowledge that Geoffroy was working inside this separator, neither Levesque nor Trepanier, who were standing outside the basin wall, having warned him, though both saw Stapleton open the first switch. When the latter turned on the third switch Trepanier shouted that there was a man inside the separator, but it was too late.

The defendant, recognizing its responsibility under the Workmen's Compensation Act, R.S.Q. 1925, c. 274 (1928 (Que.), c. 79), without awaiting the appointment of a tutor to represent her infant children, paid the widow \$3,000—the maximum sum payable under the Act except in those cases which fall within the provisions of s. 6, and \$50 additional for funeral expenses. Ladislav Geoffroy was subsequently appointed tutor to the infant children, and in his quality as such brought this action to recover further compensation under s. 6, which reads as follows:—

"6. No compensation shall be granted if the accident was brought about intentionally by the person injured.

"The court may reduce the compensation if the accident was due to the inexcusable fault of the workman, or increase it if it was due to the inexcusable fault of the employer."

This Court in a judgment delivered by Duff J. (now C.J.C.) in *Dufresne Construction Co. v. Morin* (1931), 2. D.L.R. 172, at p. 178, S.C.R. 86, at p. 93, without undertaking to lay down a definition of the word "inexcusable" as used in the Workmen's Compensation Act, unanimously declared the view that it is to be applied in its ordinary sense in the light of the context in which it occurs and of the subject matter of the statute, quoting the dictum of Lord Cave in delivering the judgment of the Privy Council in *Montreal Tramways Co. v. Savignac* (1920), 51 D.L.R. 88, at p. 92, that "each case must be judged from its own facts."

We are of opinion that the accident was due to the inexcusable fault of the defendant com-

pany, within the meaning of the Act. It is not pretended that the deceased was himself in any way to blame. The opening of the switch by which the separator was put in motion while the deceased was within it engaged in the work he had been directed to do is inexplicable on any other ground than negligence on the part of some one or other of the defendant's employees. Whether the fault was the fault of the superintendent or Stapleton or Trépanier or Levesque or the foreman who directed the repairs to be made is a matter of no consequence, so far as the responsibility of the defendant is concerned. All were servants of the company acting in the course of their employment. Their acts and omissions were all alike imputable to the company as their employer under art. 1054 of the Civil Code. The accident was one which would not have occurred if any precautions of any kind had been taken to protect the deceased in the dangerous position in which he was placed, and one for which there was no valid excuse. That is all that is necessary to entitle the plaintiffs to have the maximum compensation prescribed by s. 4 increased.

As to the amount by which the compensation should be increased, we accept in principle the view upon which Dorion J., proceeded to his dissenting judgment, that, in authorizing the Court to increase the compensation awarded where the accident "was due to the inexcusable fault of the employer," the enactment does not contemplate compensation estimated according to the standard of full reparation, or according to some principle entirely unaffected by any considerations derived from the nature of the scheme of the Act. For example, the Court would not, we think, be justified in guiding itself by a rule that should admit where death has not ensued, reparation for the suffering of the victim as such, apart altogether from its effect upon the victim's earning power, or the cost of providing for its alleviation. We think, moreover, that in this case at all events, it is reasonable to limit the indemnity for the benefit of the children by reference to the principle of the enactment of s. 4 (2), by which compensation is payable "to the legitimate children. . . to assist them to provide for themselves until they reach the full age of sixteen years or more if they are invalids."

In the present case the children are very young and whether or not any one or more of them may fall, while still of tender years, within the class of "invalids" within the meaning of the enactment, only the future can determine. This last is a point which,

we think, cannot be entirely neglected by the Court in exercising its discretion under s. 6.

The majority of the Court below have not afforded us any guide. We think that, keeping in view the limitations suggested by the provisions of the Act, a fair award would be the sum of \$10,000 from which must be deducted, however, the sum of \$3,000 already paid, this amount to be apportioned one-half to the tutor for the benefit of the infant children in equal shares and the other half to the co-plaintiff, deceased's widow.

The appeal will therefore be allowed and judgment entered accordingly against the defendant for \$7,000, to be apportioned as stated, with costs throughout.

*Geoffroy versus Anglo-Canadian Pulp and Paper Company* (Supreme Court of Canada), 1933, *Dominion Law Reports*, vol. 4, page 442.

#### Defense of "assumed risk" not applicable in Breach of Statute

A labourer was required by his employer to accompany him after dark in an automobile owned by the employer, a farmer. During the trip the car, which was driven by the farmer without lights and on the wrong side of the road, collided with a vehicle drawn by a team of horses. As the result of the collision the labourer was very seriously injured. In an action brought by him against his employer the District Court Judge found that the accident was mainly, if not altogether, the result of the absence of lights on the defendant's car. The defendant admitted the absence of lights, but claimed that the plaintiff knew the lights were not on, and that he had "voluntarily assumed any risk of injury as a result thereof." The Court found against the defendant in this attempt to bring himself within the maxim *volenti non fit injuria*. The question whether a "servant" has so undertaken a risk so as to bring himself under that maxim was held to be one of fact, and the defendant had not shown that the workman in this case had been aware of or voluntarily assumed the risk of driving without lights.

On appeal by the defendant, Chief Justice Haultain affirmed the decision of the lower court. He found, however, that the injury in the present instance was the consequence of a breach of the direct statutory duty of the defendant to carry lighted lamps, and under these circumstances the maxim referred to did not afford a defence.

The verdict of the lower court was varied, the general damages being reduced. Otherwise the appeal was dismissed.

# CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

ROOMS 716-717 UNIVERSITY TOWER BUILDING (UNIVERSITY AT ST. CATHERINE ST.)  
MONTREAL, QUE.

OCTOBER 1, 1933.

IN conformity with adopted practice, the Fifth Report of Canadian Railway Board of Adjustment No. 1 is submitted at this time. It covers the operations of the Board for the period October 1, 1930, to September 30, 1933.

More than fifteen years ago, on July 26, 1918, at the invitation of the late Hon. G. D. Robertson, Senator, and then Acting Minister of Labour for Canada, a Conference was held in Montreal between the representatives of the Dominion Government, the Canadian Railway War Board, the Railways of Canada, and the Train Service, Telegraphers and Trackmen's Labour Organizations on these Railways.

Some forty-three representatives of Canadian Railways and seventy-six representatives of the Railway Employees' Organizations attended this meeting, under the Chairmanship of the Hon. G. D. Robertson, who explained that the purpose for which the conference had been called was to devise and put into effect a method that would equitably and fairly adjust the difficulties arising, and the changed conditions of employment resulting from the adoption by the Canadian Railways of General Order No. 27 of the Director General of the United States Railways.

To quote from the Chairman's opening remarks:—

"The Government approves of the idea for one purpose only, and that is for the maintaining of industrial peace on the Railways, and to have the transportation of the country carried on without interruption."

After several meetings between the representatives, an Agreement constituting Canadian Railway Board of Adjustment No. 1 was entered into on the 7th day of August, 1918, between the Canadian Railway War Board, acting for the Railways of Canada, and the six Labour Organizations on these Railways representing the Engineers, Firemen, Conductors, Trainmen, Telegraphers, and Maintenance of Way Employees. The first paragraph of this Agreement read, in part:—

"Whereas the parties hereto, in united desire to avoid disputes or misunderstandings which would tend to lessen the efficiency of transportation service in Canada during the war, have resolved upon the appointment of a Board, etc., etc. . . ."

The Board, thus formed to meet the exigencies of war times, operated under this Agreement until April 15, 1921, when a new compact was drawn up continuing its functions. This Agreement, which is still in force, was between the Railway Association of Canada (successor to Canadian Railway War Board) and the same six Organizations representing the employees in Train, Telegraph and Track service. It reads as follows:—

MEMORANDUM OF AGREEMENT made between the Railway Association of Canada, acting for the Railways of Canada, whose names appear in Appendix "A" hereof, members thereof, of the one Part; and  
The Brotherhood of Locomotive Engineers.  
The Brotherhood of Locomotive Firemen and Enginemen.  
The Order of Railway Conductors.  
The Brotherhood of Railroad Trainmen.  
The Order of Railroad Telegraphers, and  
The United Brotherhood of Maintenance of Way Employees and Railway Shop Labourers.

acting for the said classes of employees of the said railways, of the other Part.

Whereas the parties hereto, guided by a desire to aid in the preservation of industrial peace in the Dominion of Canada, have resolved upon the appointment of a Board composed of members to be selected as hereinafter prescribed, which shall have full power and authority to determine all differences which may arise between any of the said railways and any of the classes of its employees above-mentioned, and which are not settled between the officers and employees of the railway concerned, including the interpretation of wage schedules or agreements, having due regard to the rights of the several classes of employees and of the railways respectively.

Now therefore, it is agreed by and between the parties as follows:—

1. The Board appointed in pursuance of the terms of agreement dated August 7, 1918, between the parties hereto, known as Canadian Railway Board of Adjustment No. 1, shall be continued subject to change or dissolution as provided for herein.

2. The Board shall consist of twelve members, six to be selected by the Railway Association of Canada and compensated by the Railways, and six by the Executive Officers of the Organizations of Employees hereinbefore named, and compensated by such organizations.

3. The Officers of the Board shall consist of a Chairman and a Vice Chairman who shall be members of the Board and elected by the Board, and a Secretary appointed by the Chairman subject to approval of the Board.

The Chairman and Vice Chairman shall serve for a period of one year from date of election. In case of vacancy the position shall be filled for unexpired portion of term by the election of a member of the Board.

The Chairman or Vice Chairman shall preside at meetings of the Board, and both are required to vote upon the adoption of all decisions by the Board.

4. The Board shall meet regularly at stated times and continue in session until all matters placed before it at the commencement of the session in accordance with its regulations, have been considered.

5. Unless otherwise mutually agreed, all meetings of the Board shall be held in the City of Montreal, P.Q., provided that the Board shall have authority to empower two or more of its members to conduct hearings and pass upon controversies when properly submitted, at any place designated by the Board, provided, further, that such division of the Board shall not be authorized to make final decision. All decisions shall be made, approved, or ratified by the Board as herein provided.

6. Should a vacancy occur in the Board, such vacancy shall be filled immediately by the same appointive authority which made the original selection.

7. The Board shall render decisions on all matters of controversy arising from interpretations of wage agreements and other matters in dispute, as provided in the preamble hereof, and when submitted to the Board in accordance with its regulations.

8. All disputes, including personal grievances, or controversies arising or pending under interpretation of wage Agreements between officials of a railway and its employees covered by this agreement, are to be handled in the usual manner by General Committees of the Employees up to and including the Chief Operating Officer of the railway (or someone officially designated by him), when if an agreement be not reached, the Chairman of the General Committee of employees may refer the matter to the Executive Officer of the organization concerned, and if the contention of the Employees' Committee is approved by such Executive Officer, then the Chief Operating Officer of the Railway and the Executive Officer of the Organization shall refer the matter with all supporting papers to the Board which shall promptly hear and decide the case, giving due notice to the Chief Operating Officer of the railway and to the Executive Officer of the organization of the time set for hearing.

9. No matter will be considered by the Board unless officially referred to it in the manner herein described, provided, however, that no case having origin in circumstances which occurred prior to August 7, 1918 (date of original agreement between Canadian Railway War Board and Labour Organizations upon which Canadian Railway Board of Adjustment No. 1 was founded), shall be referred to the Board except those arising out of disputes properly pending at the above mentioned date.\*

10. In hearings before the Board, the railway shall be represented by such person or persons

as may be designated by the Chief Operating Officer, and the employees shall be represented by such person or persons as may be designated by the Executive Officer of the organization.

11. All clerical and office expenses will be borne equally by the Railway Association of Canada and the organizations above mentioned. The railway directly concerned and the organizations involved in a hearing, respectively, will assume any expenses incurred in presenting a case.

12. In each case an effort should be made by the disputants to present a joint, concise statement of facts, but the Board is fully authorized to require information in addition to such statement of facts, and may call upon the Chief Operating Officer of the railway or the Executive Officer of the organization for additional evidence, either oral or written. In event of a joint statement not being submitted, each disputant should furnish the other with a copy of his individual statement and each should give the other a copy of his supporting statement of the contention.

13. All decisions of the Board shall be approved by a majority vote of all members of the Board, except that in the event of a member of the Board presenting a case, such member shall not vote upon the decision of the case, and in order that the voting strength of each side may be equal, a member of the opposite side of the Board shall refrain from voting.

14. After a matter has been considered by the Board, in the event a majority vote cannot be obtained, any six members of the Board may elect to refer the matter upon which no decision has been reached to a referee to be unanimously agreed upon by the Board, and in case of failure to agree, application shall be made to the Minister of Labour of the Dominion of Canada for appointment of a referee.

15. The Board shall keep a complete and accurate record of all matters submitted for its consideration, and of all decisions made by the Board.

16. A report of all cases decided, including the decisions, will be filed with the Railway Association of Canada, with the Chief Operating Officer of the Railway affected and with the Executive Officer of the organization concerned.

17. It is further agreed that the Board shall have like authority to determine differences between any of the railways represented herein and any other classes of employees of such railways, and between any steam railway in Canada not represented herein and the employees thereof, provided that the parties to the dispute shall make joint submission of the case to the Board and shall agree that the decision of the Board shall be accepted by each party as final and binding.

18. This Agreement shall remain in full force and effect until amended or terminated in accordance with the terms of Clause 19 hereof.

19. Should it be desired by the Railway Association of Canada, representing the railways, or a majority of the Executive Officers of the organizations, representing the employees, this Agreement may be amended or terminated at any time during its existence upon service of thirty days' notice by the one party upon the other.

\* The following Supplement to paragraph 9 was agreed to by the parties and passed by Resolution of the Board at meeting of December 27th, 1927:

"That any case submitted to this Board should have its origin in circumstances occurring within two years previous to the date of such submission."

Signed on behalf of each of the above-named parties this 15th day of April, A.D. 1921.

#### Changes in Personnel

August 11, 1931—Mr. S. N. Berry, elected  
President of the Order of Railway Con-  
ductors, appointed Mr. C. S. Montooth,  
Vice-President of that Organization, to  
represent him on the Board;  
January 10, 1933—Mr. A. D. MacTier, Vice-  
President, Canadian Pacific Railway,  
Eastern Lines, retired;  
Mr. W. M. Neal, General Manager,  
Canadian Pacific Railway, Western Lines,  
succeeded Mr. A. D. MacTier, as repre-  
sentative of the Railway Association of  
Canada;

August 8, 1933—Mr. R. H. Cobb, Assistant  
Grand Chief Engineer, Brotherhood of  
Locomotive Engineers, retired;

Mr. H. B. Chase, Assistant Grand Chief  
Engineer, succeeded Mr. R. H. Cobb as  
representative of the Brotherhood of Loco-  
motive Engineers;

August 8, 1933—Mr. J. J. Trainor, Acting Vice-  
President, Order of Railroad Telegraphers,  
retired;

Mr. W. H. Phillips, Vice-President, suc-  
ceeded Mr. J. J. Trainor as representative  
of the Order of Railroad Telegraphers.

September 13, 1933—Hon. James Murdock,  
Vice-President, Brotherhood of Railroad  
Trainmen, retired;

Mr. W. J. Babe, Vice-President, suc-  
ceeded Hon. James Murdock as repre-  
sentative of the Brotherhood of Railroad  
Trainmen.

#### Officers elected during period

February 10, 1931—Mr. A. E. Crilly, re-elected  
Chairman.

February 10, 1931—Mr. H. H. Lynch, re-elected  
Vice Chairman.

March 9, 1932—Mr. H. H. Lynch, elected  
Chairman (succeeding Mr. A. E. Crilly);  
re-elected Chairman May 2, 1933.

March 9, 1932—Mr. H. T. Malcolmson, elected  
Vice Chairman (succeeding Mr. H. H.  
Lynch); re-elected Vice Chairman May 2,  
1933.

#### Membership of Board

At present the Board consists of the follow-  
ing members:—

Mr. H. H. Lynch, Vice-President, Brotherhood  
of Locomotive Firemen and Enginemen,  
Chairman;

Mr. H. T. Malcolmson, Vice-President and  
General Manager, Toronto, Hamilton &  
Buffalo Railway Company, Vice Chair-  
man;

Mr. W. J. Babe, Vice-President, Brotherhood  
of Railroad Trainmen;

Mr. S. N. Berry, President, Order of Railway  
Conductors, represented by Mr. C. S.  
Montooth, Vice-President;

Mr. H. B. Chase, Assistant Grand Chief En-  
gineer, Brotherhood of Locomotive En-  
gineers;

Mr. S. B. Clement, Chief Engineer, Temis-  
kaming & Northern Ontario Railway  
Commission;

Mr. A. E. Crilly, Chief of Wage Bureau,  
Canadian National Railways;

\* Now Northern Alberta Railways.

<sup>1</sup> Now Canadian National Railways.

Mr. Geo. Hodge, Manager, Department of Personnel, Canadian Pacific Railway;  
 Mr. W. M. Neal, General Manager, Canadian Pacific Railway, Western Lines;  
 Mr. W. H. Phillips, Vice-President, Order of Railroad Telegraphers;  
 Mr. W. V. Turnbull, Vice-President, Brotherhood of Maintenance of Way Employees;  
 Mr. A. E. Warren, Vice-President, Canadian National Railways.

In the month of May 1931, the Board moved its headquarters from Rooms 701-702 Bank of Nova Scotia Building, 437 St. James Street, Montreal, to more convenient quarters in Rooms 716-717 University Tower Building (University at Ste. Catherine Street), where it is now established.

At the meeting of the Board held at Montreal August 10, 1933, it was Resolved, in view of the many *ex parte* submissions received, to communicate with the Chief Executive Officers of the Railways and of the Organizations, parties to the Memorandum of Agreement, asking them to impress upon their Operating Officers and General Chairmen,

respectively, the importance of Joint statements of facts being formulated by the parties in submitting disputes to the Board.

From October 1, 1930, to September 30, 1933, the Board held 11 meetings, sitting 19 days, and rendered decisions in 60 cases. A summary of these cases is attached hereto, specifying the nature of each claim, with a synopsis of decision.

There is also appended a financial statement for the period covered.

Previous reports have been issued by the Board as follows:

First Report, issued October 12, 1920;  
 Second Report, issued October 1, 1923;  
 Third Report, issued October 1, 1927;  
 Fourth Report, issued October 1, 1930;  
 a copy of any of which can be had on application to the Secretary, Room 716 University Tower Building, Montreal, Que.

H. H. LYNCH,  
*Chairman.*

H. T. MALCOLMSON,  
*Vice Chairman.*

# CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

## Fifth Report of Proceedings—Summary of Cases submitted to the Board from October 1st, 1930, to September 30th, 1933

| Case Nos.     | Date Decision Rendered | Parties to Dispute                         | QUESTION  | Synopsis of Decision  |
|---------------|------------------------|--|---|---|
| 1930          |                        |  |   |   |
| 361           | Oct. 14, 1930          | C.N.R. (C.R.) and B.L.F. & E.              | Claim of Engineer and Fireman for a minimum day in each direction, Sarnia to London and returning deadhead.   | Contention of Employees sustained.  |
| 362           | Dec. 10, 1930          | N.A. Rlys. and O.R.T.                      | Dismissal of Agent at Berwyn, Alta.   | Contention of Railway sustained with recommendation for restoration to service.   |
| 363           | Dec. 10, 1930          | C.P.R. (W.L.) and O.R.T.                   | Appointment of local freight agents and local freight staff at North Battleford and Prince Albert, Sask.  | Contention of Railway sustained, its action did not constitute a violation of schedule, but recommend negotiations to determine future status.                            |
| 364           | Dec. 10, 1930          | C.N.R. (W.R.) and O.R.T.                   | Manning of Frobisher Tower....  | Claim of Employees denied.  |
| 365           | Dec. 10, 1930          | C.N.R. (W.R.) and O.R.T.                   | Manning of Strathcona Tower...  | Claim of Employees denied.  |
| 366           | Dec. 10, 1930          | C.N.R. (W.R.) and O.R.T.                   | Manning of Midale Tower.....  | Claim of Employees denied.  |
| 367           | Dec. 10, 1930          | C.N.R. (W.R.) and O.R.T.                   | Claim of Agent at Bonnyvale, Alta. for refund.  | The Board is unable to decide between respective contentions, and claim is removed from docket.   |
| 368           | Dec. 10, 1930          | C.N.R. (C.R.) and B.R.T.                   | Claim of Yard Helper at Toronto that he should displace Relieving or Asst. Yardmaster.  | Claim of Employees denied.  |
| 1931          |                        |  |   |   |
| 369           | Feb. 10, 1931          | C.P.R. (W.L.) and B.L.E.                   | Payment to unassigned Engineer being taken off his train at Austin and held to double-head a freight train in opposite direction from Austin to Sydney. | Claim of Employees denied.  |
| 370           | Feb. 10, 1931          | C.P.R. (W.L.) and B.L.E.                   | Claim of Engineer for 30 minutes, hostling time at Lac du Bonnet June 12, 1929.   | Engineer entitled to an allowance of 30 minutes when required to hostile engine, in addition to 30 minutes preparatory time allowance.                                    |
| Sup. 1 to 370 | Aug. 12, 1931          | C.P.R. (W.L.) and B.L.E.                   | Interpretation of Board's decision in claim of engineer for hostling time at Lac du Bonnet.   | Claim of employees not sustained.   |
| 371           | Feb. 10, 1931          | C.N.R. (C.R.) and O.R.C. and B.R.T.        | The use of an assisting engine on the Gorham-Island Pond Way Freight between North Stratford and Island Pond.   | The double heading of way freight trains from North Stratford to Island Pond as a practice is in conflict with provision of agreement as stated.                          |
| 372           | Mar. 10, 1931          | C.N.R. (A.R.) and B.L.E.                   | Payment for fifteen run-around claims of Engineer April 13, 1930.   | Contention of employees not sustained. Recommended that representatives of parties confer further with a view to removing cause for friction re arrangements for calling. |
| 373           | Mar. 10, 1931          | C.N.R. (A.R.) and B.L.E.                   | Payment for five run-around claims for engineer Oct. 20, 1930.  | Contention of employees sustained under circumstances in this case.   |
| 374           | Apr. 14, 1931          | C.N.R. (A.R.) and B.L.E. and B.L.F. and E. | Method of re-assigning engine-men to freight service on trains 475 and 476 Halifax and Moncton and 473 and 474 between Truro and Moncton.               | Contention of employees not sustained. No violation of schedule.  |
| 375           | Apr. 14, 1931          | C.N.R. (C.R.) and O.R.T.                   | Appointment of Agent at Brockville, Ont.  | Claim of employees not sustained.   |
| 376           | Apr. 14, 1931          | C.N.R. (A.R.) and O.R.T.                   | Transfer of Train Despatcher from New Carlisle, Que. to Campbellton, N.B.   | Claim of employees not sustained under the special circumstances in this case.  |

## CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

## Fifth Report of Proceedings—Summary of Cases submitted to the Board from October 1st, 1930, to September 30th, 1933—Continued

| Case Nos. | Date Decision Rendered                       | Parties to Dispute                  | QUESTION   | Synopsis of Decision   |
|-----------|--|-------------------------------------|--|--|
| 377       | Aug. 12, 1931                                | C.N.R. (C.R.) and B.R.T.            | Claim of Conductor and crew for two days' pay for extra service performed June 7th and 10th, 1930.                                     | Claim of employees denied. Work performed within switching limits.   |
| 378       | Aug. 12, 1931                                | C.N.R. (C.R.) and B.L.E.            | Claim of engineer for service performed Oct. 6, 1930.  | Claim of employees sustained.  |
| 379       | Aug. 12, 1931                                | C.N.R. (W.R.) and B.L.E.            | Dispute re discipline assessed Engineer.   | Recommends cancellation of demerit marks under the particular circumstances.   |
| 380       | Oct. 12, 1932<br>(Heard )<br>(Aug. 11, 1931) | C.N.R. (A.R.) and O.R.T.            | Dispute re seniority rights of telegraph operators on Chandler-Cascapedia subdivision of Campbellton division.                         | Decision in case referred to enable parties to negotiate further. Later satisfactory settlement reached and withdrawal requested. Approved.                        |
| 381       | June 15, 1932<br>(Heard )<br>(Aug. 11, 1931) | C.P.R. (W.L.) and B.L.E.            | Claim for hostling time at Midway.   | Referred back to parties for further negotiations. Satisfactory settlement reached later and withdrawal requested. Approved.                                       |
| 382       | Aug. 12, 1931                                | C.P.R. (W.L.) and B.L.E.            | Claim for hostling time at Neudorf.  | Claim of employees not sustained.  |
| 383       | Aug. 12, 1931                                | C.P.R. (W.L.) and B.L.E.            | Claim for hostling time at Macklin.  | Duplicate payment must not be made.  |
| 384       | Aug. 12, 1931                                | C.P.R. (W.L.) and B.L.E.            | Claim for hostling time at Nipawin.  | Duplicate payment must not be made.  |
| 385       | Mar. 9, 1932                                 | C.N.R. (C.R.) and O.R.C. and B.R.T. | Claim of Conductor and crew for 100 miles under Art. 42 for time at Pembroke, Ont. Jan. 5, 1931.                                       | Claim of employees sustained.  |
| 386       | Mar. 9, 1932                                 | C.N.R. (C.R.) and B.R.T.            | Claim of Yardman at Sarnia for \$94.48 account of not being permitted to exercise seniority to position of helper in St. Clair tunnel. | Claim of employees denied. Yardman in question did not bid on any position as helper.  |
| 387       | Mar. 9, 1932                                 | C.N.R. (C.R.) and B.R.T.            | Seniority of certain express-baggage-men.  | Claim of employees denied. Seniority dates of the two employees in question in accordance with proper status.  |
| 388       | Mar. 9, 1932                                 | C.N.R. (C.R.) and B.R.T.            | Claim of Passenger Brakeman that he was short paid account earnings of Relief Man for deadheading used to make up monthly guarantee.   | Claim of employees sustained.  |
| 389       | Mar. 9, 1932                                 | T. & N.O.R. Com. and B.L.F. & E.    | Manner of assigning certain enginemen in yard service at North Bay Junction.   | Case removed from docket of Board in hope that following discussion of the matter before the Board it may be possible to have it disposed of by local arrangement. |
| 390       | June 15, 1932                                | C.P.R. (W.L.) and B.R.T.            | Claim of Trainman for acting as pilot on engine running light from Tadanac to Nelson.  | Claim of employees denied.   |
| 391       | June 15, 1932                                | C.P.R. (W.L.) and B.R.T.            | Claim for deadheading from Brandon to Neudorf.   | Claim of employees denied.   |
| 392       | June 15, 1932                                | C.P.R. (W.L.) and B.R.T.            | Claim for deadheading from Maple Creek to Medicine Hat.  | Exceptional conditions involved. Claim of employees sustained.   |
| 393       | June 15, 1932                                | C.P.R. (W.L.) and B.R.T.            | Dispute re pay for guarantee on an assigned way freight.   | Claim of employees sustained.  |
| 394       | June 15, 1932                                | C.N.R. (C.R.) and B.R.T.            | Dismissal of conductor for failure to properly protect Railways' revenue.  | Claim of employees not sustained   |
| 395       | June 15, 1932                                | C.N.R. (A.R.) and B.R.T.            | Dispute re method of payment to train crew on Nos. 39 and 40 between Cape Tormentine and Moncton.                                      | Claim of employees denied.   |

## CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

## Fifth Report of Proceedings—Summary of Cases submitted to the Board from October 1st, 1930, to September 30th, 1933—Continued

| Case Nos. | Date Decision Rendered                                       | Parties to Dispute                     | QUESTION   | Synopsis of Decision  |
|-----------|--|--|--|---|
| 396       | June 15, 1932  | C.N.R. (C.R.) and B.R.T.               | Seniority of Baggage men on 14th Seniority District.   | Claim of Employees denied. (Case heard originally Mar. 8th, 1932 and referred back to parties for further negotiations, who were unable to reach a satisfactory settlement and case was returned to Board for final decision).  |
| 397       | Oct. 12, 1932  | N.A. Rlys. and O.R.T.                  | Claim of Relieving Operator for expenses.  | Claim of Employees sustained.   |
| 398       | Aug. 10, 1933 (Heard Oct. 11, 1932 and Aug. 9 and 10, 1933.) | N.A. Railways and O.R.T.               | Request for reinstatement of Lineman.  | Lineman reinstated to former status not later than Sept. 1, 1933 and as delay and final settlement of case was not caused by Rly., employee shall be paid half salary from Sept. 8, 1931 to date of reinstatement.  |
| 399       | Aug. 10, 1933 (Considered Oct. 12, 1932 and Aug. 10, 1933.)  | N. A. Railways and B.L.F. and E.       | Removal of demerit marks from engineer's record.   | Discipline removed from engineer's record. Claim of Employees sustained.  |
| 400       | Oct. 12, 1932  | C.N.R. (W.R.) and O.R.C. & B.R.T.      | Claim of passenger conductor and trainmen for payment under terminal time rules for time delayed within limits of Saskatoon terminal.  | Contention of Employees denied.   |
| 401       | Oct. 12, 1932  | C.N.R. (W.R.) and R.O.C. & B.R.T.      | Method of payment of certain train crews employed on Alberta Coal Branch.  | Right of Co. to make assignments must be conceded. Method of payment outlined.  |
| 402       | Oct. 12, 1932  | C.N.R. (W.R.) and O.R.C. & B.R.T.      | Claim of passenger crews for terminal time payment for time consumed within the defined limits of an intermediate terminal when switching is performed.  | Service rendered in case in question does not constitute switching. Contention of employees denied.   |
| 403       | Oct. 12, 1932  | C.N.R. (W.R.) and O.R.C. & B.R.T.      | Claim of conductor and crew for run-around.  | Contention of employees sustained.  |
| 404       | Oct. 12, 1932  | C.N.R. (W.R.) and B.R.T.               | Right of Railway to require head-end brakeman to report for duty at a time in advance of time at which balance of crew are required to report.   | Similar circumstances practiced, generally, on many Railways. Contention of employees denied.   |
|           | 1933   |  |  |   |
| 405       | Jan. 11, 1933  | T. & N.O.R. Com. and O.R.C. and B.R.T. | Method of paying train crews in work train service.  | Claim of Employees sustained.   |
| 406       | Jan. 11, 1933  | T. & N.O.R. Com. and O.R.C. and B.R.T. | Manner of compensating conductor in work train service used to pilot light engine to terminal for washout.   | Claim of employees sustained under the special circumstances involved in this case.   |
| 407       | Jan. 11, 1933  | T. & N.O.R. Com. and O.R.C. and B.R.T. | Protest of conductors and trainmen re manner of placing crews in passenger service on trains 17, 18, 46 and 47, Time table 71, effective June 12, 1932; and claim of employees for time held at away-from-home terminal in excess of 16 hrs. | Claim of employees denied: 1—No violation of schedule; 2—Not improper assign passenger crews to run out of different stations in same terminal; 3—Displaced crew not entitled to compensation as claimed; 4—Assigned passenger crews not entitled to compensation under Rules 27 and 47 for time held at away-from-home terminal; suggest parties endeavor arrange for periods of longer duration than usual. |

## CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

Fifth Report of Proceedings—Summary of Cases submitted to the Board  
from October 1st, 1930, to September 30th, 1933—Concluded

| Case Nos. | Date Decision Rendered | Parties to Dispute                     | QUESTION   | Synopsis of Decision   |
|-----------|------------------------|--|--|--|
| 408       | Jan. 11, 1933          | C.N.R. (A.R.) and B.R.T.               | Assignment of baggagemen on trains 41 and 42 (mixed) between Sackville, N.B. and Borden, P.E.I. and method of payment.   | Claim of employees sustained to extent outlined in General Statement of Decision.  |
| 409       | May 2, 1933            | C.N.R. (C.R.) and B. of M. of W.E.     | Claim of painters for time lost as a result of displacement by Steel Workers.  | Settlement made on basis of fifty per cent of amount claimed.  |
